Statement of principal commodities carried on the Eastern Bengal State Railway during the month of July 1894.

Increases.

	Tons.
Coal	42,373
The increase was chiefly in despatches to Shamnagar mills and to Bracebridge Hall.	
Rice	2,552
The increase was chiefly in downward despatches from stations on the Northern and Bihar Sections, and was due to demand in the Eastern districts and in the Calcutta market for shipment.	
Jute	1,481
Principally in despatches from Atrai, Nilphamari and Kissengunge.	
Kerosine oil	1,141
Principally in despatches from Budge-Budge, and chiefly due to the extension of bulk oil traffic.	

J. Shaw,

for Examiner of Accounts.

Calcutta, *the 27th September* 1894.

Statement of principal commodities carried on the Bengal Central Railway during the month of July 1894.

Increase.

Seeds .. .. 636 Tons.

The increase was chiefly in despatches from Khulna.

The increases and decreases in other commodities are due to ordinary fluctuation of traffic, and call for no special remarks.

Calcutta, *the 27th September* 1894.

J. Shaw,
for Examiner of Accounts.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR THE YEAR 1893-94.

GENERAL DEPARTMENT.—MISCELLANEOUS.

Darjeeling, the 9th October 1894.

RESOLUTION.—No. 104T.G.

READ—

The Annual General Administration Report of the Burdwan Division for the year 1893-94.

The Lieutenant-Governor considers the Report, which has been submitted by Mr. Romesh Chandra Dutt, to be very creditable to that officer, as he only entered on charge of the Division subsequent to the expiry of the year which forms the subject of the Report. In three of the six districts there was practically no change of District Magistrate during the year, except for short intervals of privilege leave. In the other three districts there were changes, and in the case of Birbhum they were, regrettably but unavoidably numerous. Mr. Power, before going on leave, placed on record his opinion highly commending the services, among District Officers, of Mr. Romesh Chandra Dutt, Mr. D. B. Allen, Mr. G. A. Grierson, and Mr. F. W. Duke. The Lieutenant-Governor is pleased to endorse this commendation.

2. Mr. Romesh Chandra Dutt's remarks in paragraph 31 deserve careful attention as giving a correct description of the obstructions to drainage, which are believed to be the main causes of malarial fever in Burdwan, and which the

Drainage Bill now before the Legislative Council is intended to remedy. And his aspiration in paragraph 35, that every town should be supplied with filtered water, and every village with a reserved tank, is one towards the realisation of which Government and its officers, as well as all the leading men in the country, should be prepared to give their hearty help. The work done in this direction by the Burdwan District Board and by the Collector, as recorded in paragraph 36, merits commendation, and should be imitated in other districts.

3. In paragraph 42 of his Report the Commissioner has given some figures to show the export of rice and paddy from Burdwan during the last three years. According to this statement 2,875,572 tons of rice and 1,146,277 tons of paddy were exported during 1893-94. These figures appear to be very inaccurate, and it is not stated from whence they have been obtained. It is possible that tons have been written where maunds were meant. Converting paddy into rice at the rate of 25 seers of rice to a maund of paddy, the total exports of cleaned rice would amount to 3,591,905 tons during the year in question. But according to the agricultural returns, the area cultivated in the Burdwan district with autumn and winter rice was 171,460 acres and 918,300 acres, respectively, the estimated yield of both kinds of rice being 402,300 tons; in other words, the Commissioner's export figures for the past year are nearly nine times larger than the outturn. On the other hand, the figures given for the imports into Burdwan are inadequate and inconsistent with those otherwise recorded. It is stated by the Commissioner that European piece-goods up to Rs. 1,23,482 were imported into Burdwan, as against Rs. 1,19,863 and Rs. 1,12,863 in the preceding two years. But according to the returns of the Calcutta traffic published in the Gazette, the total exports from Calcutta to the Burdwan district during 1893-94 were valued at Rs. 18,43,869, against Rs. 24,11,260 in 1892-93, and Rs. 26,86,018 in 1891-92. It is desirable that greater accuracy should be aimed at in the statistics of trade, and steps will be taken to secure it.

4. The District Judge of Birbhum has made some interesting observations, quoted in paragraph 45, on the steady diminution in the number of appeals, and the growth of confidence in the Munsifs' Courts, which deserve general attention.

5. The Commissioner's remarks in paragraph 53 on the failure of many people to renew their licenses under the Arms Act are well timed and judicious. The attention of Government has lately been drawn by the Commissioner of Dacca to this subject, and orders will shortly be issued as to the best method of dealing with it.

6. Mr. R. C. Dutt's suggestions in paragraph 54, on the steps required to improve the efficiency of the Police, have the Lieutenant-Governor's concurrence. One of the remedies he suggests—the improvement in the pay of the Sub-Inspectors—has already been partially introduced, and will be carried on further as the funds of the province permit; also a new system of appointment has been invented, by which it is hoped that a better class of recruits will be supplied. As regards the other remedy suggested—the treatment of the Police with greater discrimination by their superior officers—Mr. Dutt's views agree closely with those of Mr. Nolan, which His Honour has recently quoted with complete approval.

7. Sir Charles Elliott is unable to concur in the Officiating Commissioner's remarks in paragraph 67 as to the need of a public prosecutor in important cases tried by Magistrates, on the ground that Court Sub-Inspectors are incompetent. Measures have been taken during the last three years to ensure that Court Sub-Inspectors are competent men, with some legal training, and with more leisure to study the record and to act as public prosecutors; and reports have been received from several quarters that these measures have been successful. It is the duty of District Magistrates to select the most capable men in the force for this duty.

8. In paragraph 76 some remarks are passed on the want of care shown in issuing certificates, and a suggestion is made that the requisitions should be laid before a Civil Court, and their validity proved by evidence, before a certificate is issued. The remedy is impracticable, but the defect found is often true. It would be cured if the officer who receives the requisition recognises that it is his duty not to issue the certificate as a matter of course, but to satisfy himself that there is good evidence that the claim is sound.

9. The statement in paragraph 80 that the Tenancy Act does not give protection to raiyats in respect of their homestead lands, and that zamindars, when thwarted in attempts to oust raiyats from their fields, often secure their ends by turning them out of their homesteads, is a grave one. The section of the Tenancy Act which deals with the question of homesteads, section 182, has hitherto been supposed to be an effective security for the rights of raiyats, providing as it does that, unless a specific local custom of usage to the contrary is proved to exist, the homestead land is subject to the same conditions as the raiyat's agricultural land. The Commissioner is requested to submit a special report on the subject, together with such statistics as he can collect to prove the existence of this abuse. If it does prevail, and if the law is powerless to stop it, an endeavour must be made to amend the law.

10. The section dealing with Wards' and Attached estates contains (paragraph 88) an observation with which the Lieutenant-Governor agrees, that in taking charge of such estates the object of Government officers should be to improve their condition. He regrets, however, that the Commissioner has not dealt more fully with this subject, showing what has been done in this direction. The expenditure on permanent improvements (outside of the Burdwan Raj) has been only Rs. 14,000, though a surplus of Rs. 56,000 stood to the credit of those estates at the end of the year.

11. Sir Charles Elliott has read with surprise the opinion expressed in paragraph 94, that "as the Income-tax Act does not touch the large class of cultivators and labourers, it is not widely unpopular, and is less unpopular than the Road Cess." This view is opposed to what His Honour believes to be the general opinion of the best informed people in the country, and does not go to the root of the matter. The incidence of the Road Cess is based on ascertained facts, while the main gravamen against the Income Tax is that it is imposed, to a great extent, by guess work.

12. The Officiating Commissioner's remarks (paragraph 99) on the condition of roads in Birbhum and Midnapore, as being inferior to what it was a few years ago, will be communicated to the Public Works Department and to the Inspector of Local Works. No grounds are given for any falling off in their condition.

13. The view expressed in paragraph 114, that District Boards are useful as consultative bodies, and that it is a good thing for non-officials to obtain acquaintance with administrative work, is one which has never been contested. The battle of Local Self-Government—if there is a battle—lies round the question whether any loss of executive efficiency is incurred, and whether, if so, this loss is compensated for by the advantages in which all agree. On this subject Mr. R. C. Dutt's remarks throw no light. But he is a hearty supporter of village Unions, and his views on their utility (paragraph 116) are sound and valuable. The Resolution which issued on this subject on the 1st September 1894, shows how far the Lieutenant-Governor is able to agree with them, and in what manner he proposes to carry them into effect.

14. In his defence of municipal shortcomings (paragraph 117), Mr. R. C. Dutt goes rather further than His Honour can follow him, in asserting that equal shortcomings existed in the official administration which preceded the municipal law. The District Officer of to-day carries on the administration in a more efficient way than his predecessor of 30 years ago: and the District Officer, with a hundred strings in his hand, cannot give the same attention to any one of them which a body created for the purpose is able to do. On both grounds, therefore, the Municipal administration of to-day ought to be superior to the official administration of 30 years ago, and should not rest content with such comparisons as those which the Report adduces; but the Lieutenant-Governor cordially endorses Mr. Dutt's experience that "when we make reasonable and practicable suggestions, and indicate the way in which improvements should be effected, Municipal Commissioners show an anxious and sincere desire to accept and act on our advice."

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR 1893-94.

No. 182J.G., dated Burdwan, the 28th June 1894.

From—R. C. DUTT, Esq., C.I.E., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the General Administration Report of the Burdwan Division for the year 1893-94.

PRELIMINARY.

2. The Bankura report was received on the 30th May, and the Birbhum and Howrah reports were received on the 31st idem. Those from Burdwan, Midnapore, and Hooghly were received on the 2nd, 4th, and 6th instant, respectively. Most of the reports were however incomplete, and replies to the references made have not yet been all received. I do not, however, think it necessary to delay my report for them.

I.—CHARGE.

3. Mr. Power was in charge of the Division during the whole year, except in September and October when he was on privilege leave, and Mr. R. M. Waller acted for him. Mr. Power retired on the 15th April last.

(*a*) Charge of the Division.

District officers were changed in every district, and no less than five officers had charge of the Birbhum district within the year.

(*b*) Charge of districts.

Mr. Williams left the district of Burdwan on the 8th April 1893. Mr. Windsor succeeded him, and I relieved him on the 25th November last. I remained in charge of Burdwan district till the end of the year, and took over charge of the Division on the 15th April last.

Burdwan.

Messrs. O'Donnell, Vincent, Waller, Ahmad, and Growse held charge of Birbhum. Mr. Waller was there for over four months. Mr. Growse took over charge on the 22nd February last, and I hope he will be kept on at Suri for some time.

Birbhum.

Mr. Barrow held charge of Bankura for almost the whole year. He retired on the 24th March last, and Mr. Cornish succeeded him.

Bankura.

Messrs. Allen and Shirres were the district officers of Midnapore; the latter was in charge from the 27th June 1893 to the 8th January 1894.

Midnapore.

In Hooghly Mr. Duke was the district officer all through the year, except for three months, 16th August to 15th November 1893, when he was away on privilege leave, and Messrs. LeMesurier and Fischer successively acted for him.

Hooghly.

Mr. Grierson continued to be the Magistrate of Howrah. He took, however, three months' leave—26th August to 25th November 1893—during which time Mr. Vincent acted for him.

Howrah.

Except Kalna, Jahanabad, Raniganj, and Serampore, the seven other subdivisions were fortunate in having the same officers as Subdivisional Officers all through the year.

(*c*) Charge of subdivisions.

II.—TOURS AND INSPECTION OF OFFICES.

4. Mr. Power has left the following note about the Commissioner's tour:—

(*a*) Tour of Commissioner.

"I was in charge for ten months of the year. During my absence on privilege leave, from 3rd September to 3rd November 1893, Mr. R. M. Waller acted.

"I was out 71 days on tour, Mr. Waller 47,—total 118. Not less than 14 days were spent in every district, and each was fully inspected, except Hooghly. Every subdivision was also inspected, except Serampore. In the middle of March last, while inspecting Hooghly, private affairs compelled me to prepare for immediate resignation of the service and departure from India; hence the deficiency of two days in the prescribed period of tour, the incompleteness of my inspection of Hooghly, and my omission to visit Serampore. It so happened, however, that Mr. Duke had just thoroughly inspected Serampore, and was making a very full inspection of his own offices synchronously with mine; the public interests therefore did not materially suffer from my shortcomings.

Outline of tours.

"In August I inspected Birbhum, in September Mr. Waller inspected Bankura with Vishnupur subdivision, and in October, Midnapore with Contai subdivision. In November I inspected the subdivisions of Ulubaria, Ghatal, Tamluk, Rampur Hát, and Jahanabad, and in December the Raniganj subdivision and the Burdwan Raj khas mahal settlement office. In that month also I negotiated a fresh opium convention with the Administrateur Principal of Chandernagore. In January I inspected Kalna subdivision and the Burdwan district office in all branches, attended the reception of Lord Elgin on his arrival at Howrah, and inspected the Burdwan Raj ward's estate. In February I inspected Katwa subdivision, the Rajapur drainage survey and settlement operations, and the Howrah offices, and also presided at a conference in connection with the Burdwan and Hooghly tauzi accounts. In March I inspected the Hooghly treasury, and had commenced inspecting the collectorate offices when interrupted as explained above."

(*b*) Tours of Collectors.

5. Mr. Windsor made useful tours in different parts of the district for 49 days, and I was out for 71 days. I visited nearly all the thanas in the district, and the subdivisional offices were thoroughly inspected by me.

Burdwan.

I took charge of the Burdwan district towards the latter end of November, and began my cold-weather tour in the eastern portions of the district, where malarious fever was specially severe in the last cold season. I made special enquiries into the causes of the fever, noted the death-rates in several thanas, and sent my notes and figures to the Deputy Sanitary Commissioner. The general conclusions to which I arrived have been stated elsewhere. After inspecting Kalna and Katwa subdivisions, I came back by way of Srikhand, Mangalkot, and Ghuskara to Burdwan. I then proceeded to the southern parts of the district, and at Jamalpur visited the site of the proposed junction between Kana Nadi and Kana Damodar, and induced some zamindars to withdraw their objections. In February and March I visited the western parts, and inspected Raniganj subdivision and the factories and depôts there. I concluded my tour by a visit to Barakar on the western frontier of the district.

Birbhum.

6. The several officers who held charge of this district spent 95 days in camp, as shown below:—

			Days.
Mr. Vincent	...	...	12
„ Waller	...	...	65
„ Ahmad	...	...	17
„ Growse	...	...	1
Total	...		95

There is nothing deserving of special attention in the tours of Messrs. Vincent and Ahmad, which were limited to a few localities.

Mr. Waller's tour extended to all parts of the Sadar subdivision and to the head-quarters of the Rampur Hát subdivision. He paid special attention to excise and crime and to chaukidari matters, as well as to patshalas, schools, and roads. No other details regarding his tour have been given in the Birbhum report.

Bankura.

7. Mr. Barrow was out in camp for 109 days. He visited every part of the district, and inspected the subdivisional offices and municipalities thoroughly, as well as rural sub-registry offices, schools, excise shops, roads, and pounds. Much of his time

was occupied in work connected with ghatwali tenures and in the extension of the Chaukidari Act. He also tried several bad livelihood cases locally, and did his best to improve the criminal administration of the district.

Midnapore.

8. Mr. Allen was out on tour 49 days and Mr. Shirres 58 days, making up 107 days in all. Mr. Allen writes:—"Mr. Shirres admits that he ought to have done more, but the Balasore and kidnapping cases prevented his doing as much camping in the rains as he desired." On Mr. Allen's representation he was allowed to curtail his camping in the latter end of March, to enable him to inspect the offices at head-quarters.

Every subdivision was, however, inspected twice, every municipality visited, and practically the whole district was seen.

In November last Mr. Shirres inspected the southern parts of the district and the tracts where the people suffered from some distress, but did not see any signs of serious trouble. He thoroughly inspected Contai and Tamluk subdivisions, and visited the Kaminachak estate. In December he visited the western thanas, Jhargram and Gopiballabhpur, and also inspected the municipalities of Ramjibanpur and Chandrakona in the north. In January Mr. Allen went out northwards to Amlagora, found the disputes between Messrs. Watson and Company and the Bogri raiyats settled, and then inspected the offices of Ghatal subdivision. After this he visited Contai and other places in the south, and concluded his tour by a visit to Jamboni estate in the west, which has lately come under the administration of the Court of Wards.

Hooghly.

9. Mr. Duke's tour extended over 81 days, and Mr. LeMesurier remained in the mufassal for 10 days Mr. Duke inspected all the municipalities but one, all the thanas but two, and all the registration offices but three. He paid special attention to illicit traffic, and to the falling off in the sale of country spirits, to higher English schools, and to dispensaries. He also visited six of the larger khas mahals, and inspected the accounts of a large number of others which he was not able to personally visit. There are upwards of 300 khas mahals in the district. All the subordinate offices (except Serampore) were duly inspected twice during the year.

Howrah.

10. Messrs. Grierson and Vincent were altogether on tour for 64 days. They inspected all the thanas of the district but one and nearly all the outposts. Most of the factories were also inspected.

In September and October Mr. Vincent travelled in Ulubaria subdivision by boat and visited Amta. In the cold weather Mr. Grierson visited these places again and made a complete circuit of the north of the district. The subjects which principally occupied Mr. Grierson's attention during his tour were—

(1) The effects of the cyclone of May 1893.
(2) The general condition of the people.
(3) The repression of crime and its concealment.
(4) The work done by chaukidars.
(5) The results of the Rajapur and Howrah drainage systems.
(6) The state of communications.

(c) Tours of Subdivisional Officers.

Burdwan.

11. Mr. Maxwell, Subdivisional Officer of Raniganj, spent 7 days out on tour, and Mr. Webster was out for 92 days. The usual inspections were made, and they visited the large collieries and factories.

Babu Nagendra Nath Pal, who was subdivisional officer of Kalna from the 1st April to the 17th June 1893, did not go out at all. His successor, Babu Mohendra Nath Mukherji, was out in camp for 89 days. On account of his bad health he could not remain out longer. He encamped at 23 different central places.

The Subdivisional Officer of Katwa was out 98 days, and visited all parts of his subdivision. He made some enquiries about the heavy outstanding criminal fines and the properties of judgment-debtors in certificate cases.

12. Mr. Ainslie spent 111 days in the mufassal, and devoted much time to collecting information about chaukidars, bad characters, and crime. He also paid attention to the introduction of the Chaukidari Act into several villages.

Birbhum.

13. The Subdivisional Officer of Vishnupur was out in the interior for 92 days. He made special enquiries into the condition of the people living in the tracts where there had been a failure of crops in the two preceding years.

Bankura.

14. The Subdivisional Officer of Contai was out for 95 days. The condition of the people and the crops and the illicit manufacture of salt received his special attention. He inspected the khas mahal tahsil offices, held enquiries into bad livelihood cases, and supervised distribution of relief.

Midnapore.

The Subdivisional Officer of Ghatal was on tour for 90 days. Mr. Allen reports he is not an energetic tourist. But his subdivision is small, and he visited the different parts of it, and inspected all the municipalities and factories in his subdivision.

The Tamluk Subdivisional Officer camped out for 92 days. He made the usual inspections and enquiries, and Mr. Allen thinks he did a good deal of useful work.

15. The tour of the Subdivisional Officer of Serampore extended over a period of 89 days only. Mr. Duke writes that there were frequent changes in the charge of the subdivision, and Mr. Fischer was on tour almost continuously from the time he rejoined in December. He did good work in personally stimulating the collections in his khas mahals.

Hooghly.

The Subdivisional Officer of Jahanabad remained in the interior for 105 days. He made special enquiries about roads and communications, and the supply of good drinking-water in villages also received his attention.

16. The Subdivisional Officer of Ulubaria was on tour for 94 days. He paid attention to the appointment of panchayats and to village sanitation, and made the usual inspections.

Howrah.

17. Mr. Power inspected the district offices and treasuries at Burdwan, Birbhum, and Howrah, as also the Hooghly treasury. Mr. Waller inspected the Bankura and Midnapore district offices and treasuries.

(*d*) Inspection of district offices and treasuries by—
(1) Commissioner.

18. All the Collectors inspected their offices and treasuries twice in the year.

(2) Collectors.

Very serious irregularities and mistakes were discovered in the tauzi accounts of the Burdwan and Hooghly districts. The demand and balance as shown in the returns differed from those shown in the ledger accounts, and a special establishment is now examining the tauzi accounts of Burdwan. In Hooghly, Deputy Collector Maulvi Mahamad-Ul-Nabi conducted special enquiries, and a special establishment has been asked for.

19. Mr. Waller inspected the Contai and Vishnupur subdivisional offices and sub-treasuries, and Mr. Power inspected the offices at the other subdivisional head-quarters, except those at Serampore.

(*e*) Inspection of subdivisional offices and treasuries by—
(1) Commissioner.

20. The Collectors inspected their respective subdivisional offices, which were found in good order.

(2) Collectors.

III.—WEATHER AND CROPS.

21. The prescribed statements I and II are herewith appended.

In the last year, the monsoon set in earlier than usual, and the rainfall was evenly distributed and was above the average. The excessive rainfall in May retarded the sowing of the paddy to some extent, and the fall in June delayed transplantation. The heavy rains, however, were on the whole favourable to crops except in very low lands, specially in Midnapore.

22. In Burdwan the total rainfall was 62·25 against 52·21 inches in the previous year. The outturn of *aman* or late rice was estimated at 16 annas

and *aus* or early rice yielded an average of 13 annas. The outturn of rabi crop is, however, reported to have been only 11 annas in the average, as there was a total absence of rain from the latter end of October.

23. The Magistrate of Birbhum says that the heavy rains of June to August and the mild rain of September did much good to the rice crop, but injured the sugarcane to a great extent. The outturn of the former was 18 annas, and that of the latter is said to have been only 8 annas in the Sadar and 5 annas in the subdivision. The yield of rabi is said to have been only 8 annas.

24. In Bankura, notwithstanding partial and local damage from the floods in September, the main crop of the district was not on the whole injuriously affected by the heavy rainfall, and the outturn was 16 annas. The winter crops are said to have suffered somewhat from the excessive rainfall of September and October. Cotton yielded about 7 annas, and indigo scarcely yielded a quarter of an average crop.

25. In Midnapore the floods which accompanied the cyclone towards the end of May, and the heavy rains and gales in June, destroyed the seedlings and delayed resowing in many places. In Contai the Public Works Department kept the Bhaitgur lock open as an outlet for the flood-water. The floods were very bad in Tamluk, and about 60 square miles in thana Panchkura and 20 square miles in thana Tamluk were submerged, and the *aman* rice destroyed. This area was then sown with *boro* which promised well, but owing to the drought in February and March did not yield more than an 8-anna crop.

26. In Hooghly a large area was cultivated with rice owing to the copious rains, and the produce was above the average in all parts of the district, except in a portion of Ulubaria and in a few hundred acres of *bil* land in Serampore.

It is worthy of note that the drainage system of this district carried off the flood-water in time to make transplantation possible, and excellent crops were eventually obtained. The outturn of rabi crop was not a good one, oil-seeds only middling; but on the whole, the Collector reports, the supply has been above the average.

27. In Howrah some local damage was done by a storm-wave, which swept over a great portion of the south of the district, broke several embankments and a portion of the Grand Trunk Road, and flooded the low lands. On the whole, however, the winter rice crop was about 12 to 14 annas. The rabi was fair, sugarcane was very good, and so also *pán* or betel leaf.

IV.—PUBLIC HEALTH.

28. The accompanying statement shows the deaths registered in each district from different diseases during the past three calendar years. The figures given in this report are for the calendar year, as directed in Government Resolution No. 527, dated 24th February 1893:—

District.	Number of deaths from fever.			Number of deaths from cholera.			Number of deaths from bowel-complaint.			Number of deaths from small-pox.			Number of deaths from other causes.			Total number of deaths.		
	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.

Total ...	141,491	157,033	137,952	15,853	26,190	6,237	9,216	9,091	8,352	4,815	4,209	899	36,613	35,893	45,462	207,988	232,416	198,902

29. The total number of deaths registered during the year was 200,000 in round numbers, against 208,000 in 1891 and 232,000 in 1892. According to these figures the death-rate fell from 27·05 and 29·9 in 1891 and 1892, respectively, to 26·1 per mille. The figures, however, cannot be accepted as altogether reliable, and the real death-rate must be considerably higher than what is shown. The decrease by ten thousand in Burdwan, and by fifteen thousand in Midnapore, seems at first sight to be unaccountable, specially as the year 1893 was not a healthy year. The unhealthiness, however, began in the last

quarter, and will, as usual with malarial fevers, probably affect the death-rates of the subsequent year.

30. The Magistrate of Burdwan states that the year was bad during the last quarter when malarial fever was more prevalent, on account of the heavy rainfall of the year, than in the corresponding period of the previous year. This was specially the case in the eastern portions of the district, where fever prevailed very badly when I visited those portions in December last.

31. The malarial fever is generally attributed to obstructed drainage, and the consequent dampness of the soil. The drainage of Burdwan has certainly been seriously obstructed, partly by natural and partly by artificial causes. The main current of the Ganges now flows by way of Goalundo into the sea; the Bhagirathi is drying up, and the numerous natural channels which drained the country into the Bhagirathi are stagnant or dry, and are being brought under cultivation. To the south of the district, the Damodar is embanked; its floods do not sweep over the district, and the natural drains which drained the country into the Damodar are also dry, and are being brought under cultivation. The natural drainage of the district is thus obstructed on both sides, and this appears to me to be the main cause of the malaria which broke out first in Burdwan, and has since spread to other districts on both sides of the Bhagirathi.

32. The Civil Surgeon of Midnapore, who supplied statistics for the district, writes that malarial fever prevailed throughout the year, but increased in virulence after the close of the rains.

33. In Hooghly malarial fever was very prevalent in all parts of the district, and chiefly in the Serampore and Jahanabad subdivisions. Many persons suffered from it, but the mortality was not great. The causes assigned are—(1) the heavy rains, (2) obstructed drainage, and (3) bad water-supply.

34. Cholera appeared in all the districts in a more or less mild form. In Birbhum it prevailed in an epidemic form in the Rampur Hát subdivision from January to March 1894. The mortality during these months was great—1,744 people died of it. Of the two Hospital Assistants deputed for medical aid, one succumbed to it. In Midnapore the epidemic advanced in severity from the month of December 1893 in almost all the thanas, but specially in Contai and Tamluk subdivisions. Extra native doctors were deputed, and cholera pills were distributed to the villages affected.

35. Cholera is mainly due to bad drinking-water as malarial fever is mainly due to obstructed drainage; and as the supply of drinking-water is improved, cholera must abate. This has been so in Calcutta, where cholera raged furiously in every hot season, thirty years ago, and the disease has never raged to the same extent since the town got a supply of filtered water. It is to be hoped that every district town will sooner or later be supplied with filtered water, and that tanks will be reserved in every village. A very great deal has yet to be done to improve the sanitation of the country; but it is impossible for District Boards to undertake this with their present resources which are meant, and are barely sufficient, for roads and education.

Sanitation.

36. The District Board of Burdwan spent Rs. 3,304 on the excavation and re-excavation of five tanks in five villages in different parts of the district. The Collector advanced Rs. 9,165 to 30 persons for the purpose of cleaning and deepening 32 silted-up tanks belonging to private individuals. There is room for much improvement in the Municipality of Burdwan, and the large number of filthy *dobas* and small tanks require to be filled up. The present Commissioners have adopted measures gradually to fill up some of them.

In Birbhum the villages and rural tracts are reported to be in need of sanitary improvement. The Magistrate of Bankura states that the district is naturally a healthy one, and no special sanitary measures were needed during the year.

The Magistrate of Hooghly writes that a proposal has been made to the railway authorities for supply of water to the Hooghly and Chinsura town, in cases of drought, from their pipes laid along the Jubilee Bridge embankment. This, however, is likely to come to nothing for the present, for although the Municipal Commissioners have paid for the connection, they have not the means to make adequate arrangements to conduct the water. The most pressing wants of this municipality are good drinking-water tanks in places distant from the river, and a better system of drainage. In the Serampore Municipality

the drainage system has at last been completed at a cost of Rs. 17,725. The internal drainage of the town, however, should be connected with it. Village sanitation has been as bad as ever.

Vaccination.

37. The number of persons vaccinated during the year was 159,948 against 187,108. The decrease was in the districts of Burdwan, Birbhum, and Hooghly, due to the prevalence of fever and influenza amongst the people and the vaccinating staff. The people generally are well disposed towards vaccination and accept it freely. But the Officiating Magistrate of Burdwan, Mr. Vincent, writes :—"Petty extortion on the part of the vaccinators is a cause among the lower classes of the dislike with which vaccination is regarded."

V.—MATERIAL CONDITION OF THE PEOPLE.

38. The material condition of the people was generally good throughout the Division owing to the excellent outturn of the rice crop. In the southern portion of Midnapore, where considerable damage was done by floods, a large number of the people went as usual to cut paddy in the Sundarban tracts, and came back with ample wages, and thus the difficulty was got over. Only in Contai subdivision, there was some slight distress, and Rs. 791-15-3 was subscribed locally and a sum of about Rs. 200 was contributed by the District Board and distributed to those who required help.

The condition of the lower middle classes is not improving, but is perhaps becoming worse. They are averse to manual labour, and the competition among them for appointments in Government or mercantile offices is becoming keener every year. The Collector of Burdwan writes that it would cost less to keep a clerk who can read and write English than to keep a good carpenter, blacksmith or tailor. The Collector of Birbhum says the "*Bourgeois*" class of small *bhadra lok* on fixed salaries or inelastic incomes are gradually feeling the strain of high prices. These remarks, however, apply to some extent to other countries besides India. The man of "genteel" birth is averse to take to labour, and suffers in these days of keen competition in all professions.

On the other hand, the high prices of food-grains are a boon to the cultivating classes. The Subdivisional Officer of Tamluk records the fact, which is generally known, that brass utensils are in common use among these classes, and the women wear silver ornaments. The labouring classes earn good wages in Hooghly and in the Raniganj subdivision, owing to the number of factories and collieries in this last place. And even in tracts which do not boast of these special advantages, the extension of cultivation leavens the condition of the landless labourer. Mr. Grierson compares the Bengal labourer with the Bihar labourer, and remarks that while in Gaya a labourer is lucky if he gets one full meal a day, in Howrah every one gets two full meals, plus a tiffin.

Mr. Grierson also makes some remarks on the taste which is spreading for European articles. Soap is more extensively used than before. I am afraid, however, Mr. Grierson goes too far when he says that "Huntley and Palmer's biscuits are taking the place of native *mithais*." In articles of food the people (except when under medical advice) adhere to their own produce, and *mithais* will hold their own against all European confections.

VI.—EMIGRATION AND IMMIGRATION.

39. Emigrants were registered in three districts of this Division, viz., Burdwan, Bankura, and Midnapore. The number of contracting emigrants registered during the year rose from 1,501 to 2,095; 670 of these went to the colonies and the rest to the tea districts. A considerable portion of these men were recruited by garden sardars.

The increase occurred in Burdwan only; the registrations in the other districts are still on the decline. The increase in Burdwan is, I believe, due to the opening of the Nagpur Railway line, which has greatly helped the Chota Nagpur coolies to come to Burdwan for registration.

In Burdwan 1,228 coolies, including their dependants, were registered, against 712 in the preceding year. Most of them come, as stated above, from Chota Nagpur and the Central Provinces, and consist of Sonthals, Kols and other aboriginal tribes. They find their way to Asansol by the Bengal-Nagpur Railway, the recruiters and garden sardars take charge of them there, and

arrange for their final destination. The labouring classes of Burdwan and neighbouring districts find sufficient employment in the fields and in the coal mines and potteries at Raniganj.

In Bankura the number of emigrants fell from 782 to 511, of whom 412 were recruited by garden sardars.

Six hundred and one emigrants were registered in Midnapore, against 919 in the previous year; nearly 93 per cent. of these were recruited by garden sardars.

The number of coolies registered bears no proportion, however, to those who proceed under the system which is called "free emigration," and which is rapidly expanding. In Burdwan the number of such emigrants is supposed to exceed 14,000. The system is under little or no control, and is therefore attended with much abuse, and gives rise to frequent and well-founded complaints.

Copies of Statement A, showing the criminal cases in connection with emigration, prescribed by Government order No. 1848, dated 20th April 1892, are appended. There were 14 cases in Burdwan, 2 cases in Midnapore, and 5 in Bankura; the accused in all these cases, except two, were convicted. The number of cases, however, is no index to the number of cases in which persons are fraudulently and under false pretexts taken away from their homes under the "free emigration" system. The evil requires to be checked.

There were seven rest-houses and 50 cooly depots in this Division. Most of them are located at district or subdivisional head-quarters. With the exception of seven, all were regularly inspected. The instructions given by inspecting officers for sanitary improvements and supply of drinking-water were generally attended to by the officers in charge of depots, except in Bankura, where the suggestions made by the inspecting officers were in some cases disregarded. The Magistrate has been asked to warn the owners of their responsibility in the matter.

No arrangements exist for the treatment of invalids at rest-houses; the sick coolies in depôts are treated by local practitioners. No such arrangement, however, exists in Bankura.

Blankets and warm clothing were supplied to the emigrants in Burdwan, Birbhum, and Bankura.

There was no regular immigration in any of the districts of this Division; but people from the Sonthal Parganas, Chota Nagpur, and Northern India come in thousands to Burdwan, Hooghly and other districts in the cold season to find employment in harvesting, in road works, on the railway, and in various industries. I found large gangs of them during my last cold-weather tour.

VII.—PRICES OF FOOD AND LABOUR.

40. The two prescribed statements under this head, III and IV, are herewith appended.

The price of common rice, which is consumed by the masses, was high in the earlier part of the year, but became cheaper in all districts after the winter crop was harvested. The prices varied according to the means of communication and the outturn of each district. In Hooghly and Howrah the prices were high—11½ to 12½ seers a rupee. In Birbhum and Midnapore the price was about 15 seers a rupee, but in Contai for some time it was cheaper—18 seers a rupee. At Bankura, which is 30 miles away from the nearest railway station and across the river Damodar, rice was sold at 17 seers per rupee. In Burdwan the prices varied from 13 to 16 seers a rupee.

There was no special demand for labour, and therefore the wages remained almost stationary. They vary according to locality. Near coal mines and the railway line, the rate is higher than in the interior. The Collector of Midnapore writes that six pice a day for a common labourer was considered handsome wages in some parts in the interior of that district. But the ordinary wages of a cooly in Midnapore are reported to be slightly over three annas in Midnapore and rises to four annas in Howrah. The average rate for the Division may, therefore, be taken to be three and-a-half annas, which is the rate in Burdwan district.

VIII.—MANUFACTURES AND MINES.

41. There is nothing worth adding to what was said in the annual reports of previous years. Silk, tasar, jute, cotton molasses, shellac, rope, brass and hardware, indigo, paper, pottery and iron, continue to make up the list of local industries in this Division.

Silk.

In Burdwan the production of silk has increased; the value of the outturn is estimated at Rs. 1,62,681, against Rs. 1,35,625 in 1892. In Birbhum, Midnapore, and Hooghly the industry appears to be on the decline, as the stuff produced cannot compete with that imported from Europe. In the Ghatal subdivision, in Midnapore, fine silk fabrics, such as flowered silk scarfs, wrappers, &c., are manufactured by the local weavers and sent to Calcutta, Bombay, and Madras for sale.

There was a slight improvement in the manufacture of tasar in Birbhum. In Bankura the manufacture of tasar cloth was much limited, there being no great demand for it either in the local market or from outside.

Jute and cotton.

There are large jute mills in the Serampore subdivision and in Howrah, and there are cotton mills in the latter district. Large quantities of gunny bags and cloth are manufactured in the jute mills, but as the owners of some of them have not furnished the necessary statistics, the total outturn of these articles cannot be ascertained. The quantity of jute worked up in four out of the five mills in Hooghly was 29,306 tons, against 44,378 tons of the previous year; the five mills afforded employment to no less than 13,372 people daily.

In Howrah the value of the outturn of three of the jute mills was Rs. 83,40,877, against Rs. 70,39,257 in the preceding year. The figures for the other two mills are not available. Of the four cotton mills one showed a decrease, two gave an outturn of Rs. 34,87,222 against Rs. 31,50,374; no information could be obtained from the other.

Cotton cloth.

Cotton cloth is manufactured by native looms in all the districts of this Division. The industry is, however, gradually giving way to the extensive import from Manchester and other places, and weavers are taking to cultivation or other occupations. There has been a tendency of revival in this industry in the Serampore subdivision, where the well-to-do people have taken to the use of country-made cloths of fine texture which, though dearer, are more durable than the machine-made articles. This is, perhaps, one of the good results of the high rate of exchange which gives a chance to country produce as against imported goods.

The hát or weekly market at Ramkrishnapur, in the town of Howrah, has continued to maintain its flourishing condition.

Molasses.

Molasses prepared from date-palm in Burdwan is locally consumed. The Bihia mills are now generally used in this district in preparing molasses from sugarcane.

Shellac.

The business in shellac in Bankura showed much activity owing to a rise in the price of the article in London. About 30,000 maunds of stick-lac or the raw material was imported from Chota Nagpur Division. The total quantity of shellac turned out in the several factories in this district was about 15,159 maunds, against 6,000 maunds in the preceding year. The entire quantity manufactured was sent to Calcutta. In Birbhum *churis* or bracelets and toys of various descriptions are made of shellac. The value of the outturn is estimated at Rs. 35,000. A small quantity was exported to Calcutta.

Rope.

The manufacture of rope is confined to Serampore subdivision and Howrah. At Serampore the outturn last year was one-half of what it had been in the preceding year. The Shalimar and Ghusry roperies in Howrah turned out Rs. 7,35,320 worth of rope against Rs. 6,65,124.

Brass, bell-metal and hardware.

The manufacture of brass, bell-metal and hardware continued to be carried on more or less in every district in this Division.

In Burdwan the market for brass and bell-metal was somewhat dull, the value of the outturn decreased from Rs. 5,11,423 to Rs. 4,37,224. Knives and scissors of good quality continue to be manufactured at Kanchannagore, a suburb of Burdwan. But the manufacturer, Prem Chand Mistri, is unwilling to train others in the industry, and it is possible the manufacture of these articles in the locality will cease when he dies.

In Midnapore the manufacture in brass and bell-metal wares is extensively carried on at Kharar, a municipal town, where articles worth nearly 15 lákhs of rupees were produced and exported to Calcutta. It gave employment to

four or five thousand persons daily, their daily wages varying from 4 annas to 1 rupee 4 annas.

In Hooghly this manufacture is confined to Jahanabad and Sadar subdivision. Some of the articles, viz., tumblers, jugs, gharâ, pán-dán, &c., are widely known for their special make and finish.

Indigo. The manufacture in indigo has declined during the year. In Bankura the outturn last year shows a decline from 250 maunds to 75 maunds only. The decrease is attributed to the abnormally heavy rainfall of the year. The Magistrate of Midnapore has not furnished any statistics.

Paper. This article is manufactured in the subdivision of Raniganj and in the town of Bally. The mill at Raniganj, working with a capital of eight lakhs, turned out papers worth six lakhs of rupees. At Bally the value of the outturn rose from 9 to 14 lakhs.

Pottery. There was a decrease of 25 thousand rupees, as compared with last year, in the value of articles manufactured at the Pottery Works of Messrs. Burn and Company at Raniganj.

Bricks, tiles, &c., were largely manufactured in Howrah. Earthern pots manufactured in different parts of this district are exported in large numbers to Calcutta.

Iron. The iron works at Barakar owned by the Bengal Iron and Steel Company, Limited, are doing well, and have been considerably extended within recent years. It is working with a capital of 171,500 pounds sterling. The value of the outturn was Rs. 9,34,529, against Rs. 8,42,628 in the previous year.

There were four iron manufactories at work in Howrah; the value of works turned out in three of them has been returned at Rs. 20,48,266 against Rs. 20,55,000; no information is available for the other.

Among other articles manufactured in this Division, the fine mats, called Machland, of Raghunathpur in Midnapore, and of Gurbhanipur in Jahanabad subdivision, deserve mention. Ebony works made in the same subdivision and the *hukas* of Begri and Andul in Howrah also deserve mention.

The subjoined table shows the outturn of some of the principal articles of manufacture:—

Districts.	Articles.	Outturn in—		
		1891.	1892.	1893.
1	2	3	4	5
Burdwan ...	Indigo ... ... Mds.	173	81	58
	Pottery ... Valued at Rs.	1,83,000	1,95,000	1,75,000
	Ironware ... ... Tons.	11,822	16,370	21,150
	Brass and bell-metal wares Mds.	12,710	13,351	12,617
	Cutlery ... ... Doz.	600	587	590
	Cotton cloth ... ... Yds.	1,066,765	1,136,212	413,150
	Silk cloth ... ... ,,	256,355	231,275	232,065

	Paper ... ... lbs.	8,543,232	8,079,552	10,149,312
Howrah ...	Paper ... ... Rs.	15,03,765	9,00,000	14,00,000
	Rope ... ... ,,	4,20,600	6,65,124	7,35,320

There are collieries in the Raniganj subdivision and in a part of Bankura

Coal mines.

The coal trade in Raniganj was brisk, and the prices in the latter part of the year were high, at least for coal of superior quality. The Magistrate of Burdwan thinks that the coal strike in England has given a great impetus to the local industry. Several old collieries which were worked out, or of which the production was inferior, were closed during the year: this has been assigned as the cause for a decrease in the output of coal. Great difficulty was experienced by the owners of collieries in obtaining an adequate supply of labour.

The coal obtained from the few collieries in Bankura is locally used.

The prescribed Appendix V shows the outturn of coal in each district.

IX.—TRADE AND COMMERCE.

42. The trade in this Division is carried on by rail, river, canals and roads. The old Benares road and the old Nagpur road are the chief means of communication between Calcutta and the district of Bankura and parts of Midnapore, while the Burdwan-Midnapore road supplies a trade route between those districts. The East Indian Railway, which traverses the districts of Burdwan, Birbhum, and Hooghly, affords great facilities for both import and export traffic, and the Grand Trunk Road also contributes to the same end. The steamers running daily from Kalna, and bi-weekly from Katwa to Calcutta, serve the riparian tracts of the districts of Burdwan and Hooghly. Though Midnapore has no railway, it is fortunate in respect of communication by water. It has river and natural streams navigable by native crafts throughout the year, and artificial water-courses, through which a large traffic finds its way to Calcutta.

The principal articles of trade in this Division were the same as in previous year, viz.—

Exports—

Rice, paddy, pulses, lime, hides, oil-seeds, brass and bell-metal utensils, shellac, tasar cocoons, coal, potatoes, molasses, timber and paper.

Imports—

European piece-goods, twist and yarn, tobacco, salt, kerosine, pulses, spices, ghî, gunny bags and grains.

Export.

The export of rice and paddy in Burdwan was very considerable, owing to the good harvest reaped.

Grains.

The subjoined memorandum shows the quantity of rice exported from Burdwan during the last three years:—

District.	1891-92.		1892-93.		1893-94.	
	Rice.	Paddy.	Rice.	Paddy.	Rice.	Paddy.
1	2	3	4	5	6	7
Burdwan ...	Tons. 27,68,759	Tons. 8,67,544	Tons. 18,68,617	Tons. 4,06,469	Tons. 28,75,572	Tons. 11,46,277

It will be seen that the export of paddy increased from 4 lakhs to 11 lakhs of tons, and that of rice from 18 lakhs to 28 lakhs. During my last cold-weather tour I ascertained that the reason of this increase was that while a bumper harvest had been reaped in Burdwan, rice had failed partially in some eastern districts, and the prices therefore were high at Goalundo and elsewhere. Mr. Growse, Magistrate of Birbhum, says:—"I knew that, when I was in Faridpur, rice was being imported into Goalundo from this district, and I have reason to believe that not a little went as far as Cachar." The exportation of rice from Bankura was small, and 63,157 tons of rice were exported from Midnapore by the canals.

Pulses. The exportation in pulses also increased in Burdwan and Birbhum.

The export of hides from Burdwan and Bankura suffered a decrease.

Hides. No reason has been assigned for the gradual decline in Burdwan, but it may probably be due to a lull in the Calcutta market. The opening of the Nagpur Railway has also diverted most of the traffic that formerly passed through Bankura.

There was a falling off in the export of lime from Burdwan, the only

Lime. district in this Division which supplies the article for the Calcutta market.

Brass and bell-metal wares in considerable quantity are exported to Calcutta from this Division. The other principal articles of export have been noticed under the preceding head of manufacture.

Import.

The import of European piece-goods is gradually on the increase. In Burdwan the figures were Rs. 1,23,482, against Rs. 1,19,863 and Rs. 1,12,863 in the preceding two years. Accurate statistics to determine the extent of trade, however, are not available.

The Magistrate of Birbhum reports that kerosine oil is much used on account of its cheapness. This is true now for all Bengal.

X.—ADMINISTRATIVE CHANGES.

43. The following changes were effected in this Division :—

(1) The Government notification of the 19th August 1873, appointing the members of the Municipal or Town Committees of Burdwan, Raniganj, Kalna, Katwá, and Dainhat, in the district of Burdwan, to be Honorary Magistrates within the limits of their respective municipalities or towns, was cancelled, and the Municipal Benches of those places were abolished, and their work is now done by the general and Independent Benches of those places.

Similarly, the Municipal Benches of Midnapore, Sadar, and Ghatal were abolished under Government order No. 1110, dated the 23rd February 1894.

(2) The Independent Bench at Garhbeta was reduced last year to a Dependent Bench presided over by a salaried Magistrate from the headquarters.

(3) The Gambling Act was introduced in Asansol town in the district of Burdwan.

(4) The Chaukidari Act, VI (B.C.) of 1870, amended by I (B.C.) of 1892, was extended to some more villages in most districts of this Division. Mr. Growse, Magistrate of Birbhum, writes:—"The year also marks the beginning of an important change, viz., the reduction of the unmanageably large army of chaukidars appointed under Regulation XX of 1817, remunerated by service lands, and the substitution of a comparatively small number of well-paid chaukidars."

(5) In accordance with the recommendation of the Police Commission, several police *outposts* were abolished in the districts of Hooghly, Birbhum, and Burdwan.

(6) Under Government notification, dated the 10th April 1893, the headquarters of the Ghatal subdivision were again changed from Garhbeta to Ghatal.

(7) During the year a sub-registry office was opened at Purbasthali in Kalna subdivision, and another at Krishnagar in the Hooghly district. A joint sub-registry office was started at Shambazar under the Goghat sub-registry office in Hooghly.

(8) In the town of Suri chaukidars were substituted in the place of constables.

(9) The fourth general *Municipal* elections were held during the year, and the people everywhere evinced a keen interest in the elections.

XI.—STATISTICAL ENQUIRIES.

44. The following table shows the birth and death-rates per mille in the several districts of this Division for the last two years:—

Districts.	Birth-rate per mille.		Death-rate per mille.	
	1892.	1893.	1892.	1893.
1	2	3	4	5
Burdwan ...	25·13	34·79	33·36	26·00
Birbhum ...	27·83	40·62	32·96	29·04
Bankura ...	24·20	32·69	19·58	22·18
Midnapore ...	25·30	31·02	30·85	26·44
Hooghly ...	21·30.	35·80	33·02	31·19
Howrah ...	28·08	34·34	26 60	25·63

In rural areas births and deaths were reported at the police-stations by the chaukidars. The system is still defective, and the figures given above cannot be accepted as even approximately accurate. It is reported that in Burdwan the chaukidars were regularly warned on the parade days to report births and deaths. The entries in the birth and death registers were tested by the Sanitary Inspector, the police-officers, including the District Superintendent of Police, and the Magistrate of the district when in the interior. But the figures do not appear to be reliable. The death-rate for Burdwan district as recorded is only 26 in 1893, although 1893 was by no means a healthy year. In Midnapore the police-stations and outposts, which are the registering circles, were inspected several times during the year by the Magistrate, District Superintendent of Police, Inspector and other officers, and the registers kept there for the purpose were examined. But the death-rate shown, 26·44, does not appear to me to be reliable. In Bankura the registration of births and deaths has somewhat improved, and some help was rendered by the vaccination staff in testing the statistics and bringing omissions to light. Still the death-rate shown, 22·18, is not even approximately correct. The figures showing the death-rate in Howrah is reported to be only 25·63. Those for Birbhum and Hooghly, 29·04 and 31·19, come nearer the mark.

There were eight prosecutions under Act IV (B.C.) of 1873 in Burdwan, against three in the previous year. One person was sentenced to ten days' simple imprisonment and the others were fined. Besides 24 persons were warned. In Birbhum 19 persons were prosecuted—one person was warned and 18 persons fined. There were 20 prosecutions during the year in the town of Bankura. In Midnapore 67 persons were prosecuted, and in Hooghly there were 79 prosecutions. The Collector of Hooghly reports that "registration now depends principally on the village chaukidars. Most of these being still under the Regulations, are not amenable to the above-mentioned Act. With care and discipline, however, they can be got to register very fairly."

The statistics as regards the preliminary and final forecast of crops were collected by Sub-Deputy Collectors and kanungos. They also collected the prices-current statistics. Statistics of important industries were collected by these officers and in some cases by the police. Zamindars were also occasionally consulted in the matter. Enquiries regarding import and export traffic were made by Sub-Deputy Collectors and the kanungos or also by nazirs.

XII.—CIVIL JUSTICE.

45. Under instructions contained in Government order No. 1T.—G., dated 6th May 1882, and paragraph 2 of Government Resolution No. 762, dated 24th February 1893, the District Judges were addressed by me to furnish this office with statistics of civil suits in their districts in Forms VI, VII and IX. Burdwan, Birbhum, and Hooghly statistics were received in time, and

those from Bankura reached this office only on the 26th instant. The figures for Midnapore have not yet been received.

There was an increase in the number of disposals of cases in the districts of Birbhum; Bankura, and Hooghly; Burdwan shows a slight decrease.

From an extract from the annual administration report of the Civil Courts in Bankura for 1893, which the Judge has kindly forwarded to me, I learn that there has been a gradual increase in the number of suits during the last decade, and the Munsifs have worked hard to keep pace with the institutions. There has been a similar increase in the miscellaneous judicial business and miscellaneous appeals in this district, and also in criminal work. On account of the rapid accumulation of arrears in appellate business, he has asked the High Court to locate a Subordinate Judge permanently in his district.

The District Judge of Birbhum has made remarks on the administration of civil justice, from which I make the following extracts:—

"The principal feature of the year was the development of litigation. The number of suits instituted rose from 7,428 to 8,101. But the civil staff showed itself equal to the occasion, for no less than 8,247 suits were decided, as against 7,772 in the previous year.

"Another remarkable feature of the year's civil litigation is the growing tendency of litigants to content themselves with the decisions pronounced by the Court of First Instance. That this backwardness in throwing good money after bad is no fortuitous or exceptional phase will appear from the following table:—

	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.
	1	2	3	4	5	6	7	8
A. Appealable decision in contested suits	1,158	1,379	1,300	1,451	1,455	1,337	1,640	1,643
B. Appeal therein	297	314	264	456	345	274	319	252
C. Percentage of B to A	23·9	22·7	20·3	31·4	23·7	20·4	19·4	15·3

"This is to my mind a highly satisfactory state of things, and the general increase of litigation, in so far as it springs from the same cause, namely, the growth of confidence in our Munsifs' Courts, is equally satisfactory."

XIII.—CRIME.

46. There was some decrease in cognizable crime in Burdwan, notably in serious offences against the person and property. The Magistrate attributes this partly to the evenly distributed rainfall of the year, which afforded the lower classes plenty of field work, and there was less inducement to have recourse to crime. The worst thanas for burglaries are Raniganj and Barakar; large numbers of coolies from Bihar and Chota Nagpur work on the collieries and factories in these thanas, and professional criminals find it easy to take shelter among them in the guise of labourers.

In Birbhum there was a slight increase in cognizable crime, but the number of dacoities was only 5, against 9 of the previous year. Three of these were detected, and 9 persons were convicted. The murder cases, however, were dealt with in a most unsatisfactory manner; eleven out of 12 persons sent up for trial were discharged, and the twelfth prisoner was of unsound mind and incapable of making a defence. The reason alleged for this unsatisfactory result is that the villagers combined to conceal the facts. This, however, is generally the plea put forward by police officers who are wanting in tact and detective ability.

Burglaries also increased in Birbhum, in the north of Rampur Hat subdivision, and the Magistrate reports that the police "seemed powerless to interfere, and were either actually terrorized themselves, or feigned to be." The Subdivisional Officer, however, prosecuted the local bad characters during the cold weather, and some of the worst of them were imprisoned for three years in default of finding security. The result was a diminution of crime.

In Bankura there was an increase in cognizable crime which the Magistrate attributes partly to high prices which prevailed, and partly to the better reporting of cases. There were 21 dacoities, 10 robberies, and 370 burglaries, against 18, 9 and 279, respectively, of 1892. In nearly one-half of the dacoities

no clue was found, and out of 89 persons sent up in the remaining cases only 19 were convicted. This result is unsatisfactory.

There was a large increase in cognizable crime in Midnapore, and the Magistrate attributes this, I think correctly, to the better reporting of cases. The increase is most marked in offences against property. The Midnapore Police was notorious for suppressing such cases, and Mr. Allen has done much to teach them their duty, and to make them report and enquire into cases as they occur.

There was a slight increase in cognizable crime in Hooghly, but the difference is not much, and does not call for any special comment. In Howrah there was a slight decrease, which likewise calls for no remarks.

False cases.

47. In Burdwan, out of 146 cases declared false, prosecutions were instituted against the complainants in 20 cases, and 7 persons were convicted. In Birbhum prosecutions were ordered in 13 cases out of 78 declared false, but only one case ended in conviction. In Bankura 77 cases were reported false; prosecutions were instituted in five, and conviction was obtained in one only.

In Midnapore, 196 cases were declared false, and there were 33 prosecutions, and only 7 ended in conviction. Hooghly had 152 false cases, 14 prosecutions and 3 convictions, while in Howrah there were 68 false cases, 5 prosecutions, and 2 convictions.

I have given these figures to show what endeavours were made in each district to repress false cases. The difficulty of obtaining convictions in such cases is well known, but better results might have been secured in most districts with a little more care in selecting cases and initiating proceedings. The Magistrate of Midnapore remarks that the Magistrates of his district were indiscriminate in their selection of cases for prosecution. It is of great importance that a Magistrate should use his discretion very carefully in this matter.

The only general rule which can be laid down is that a prosecution should not be instituted unless the Magistrate is satisfied that the complaint made was substantially and maliciously false, and that there is *prima facie* evidence to prove this. If this rule were carefully observed in selecting cases for prosecution, there would be a greater approach to uniformity in practice, and the result would be more satisfactory.

Compensations under section 560, Penal Code.

48. Compensations were paid in 145 cases in 1893, as against 112 cases in the previous year. The number of cases in which a Magistrate is satisfied beyond a doubt that a complaint is false, frivolous and vexatious, is not very large, and compensations therefore cannot be granted in most cases.

Remands.

49. Attention was paid to the prompt disposal of cases, and, except in Bankura, the proportion of cases which were remanded several times was small. Out of 4,518 A cases in the Division only 268, or a little over 5 per cent., were remanded over four times. The proportion of cases remanded over six times varies from 2 per cent. in Midnapore to 5·7 per cent. in Burdwan; while in Bankura it goes up to 15·4 per cent. The reason for this has not been explained.

Sessions trial.

50. Out of 194 cases committed to sessions 122, or nearly 63 per cent., ended in conviction. The proportion was, however, better in 1892, when 72 per cent. of the cases ended in convictions. Birbhum showed the worst results in the year under review, there being conviction in 14 cases only, against 10 ending in acquittal. Of the persons sent up in this district, 15 were convicted, and no less than 18 acquitted.

Reported cases not enquired into.

51. Enquiry was refused last year in 1,615 cases, against 1,327 in 1892. I think the police do well in refusing enquiry into cases which are of a petty nature, in which the property stolen is of insignificant value and cannot be identified. When such cases, however, multiply in any particular locality, they demand the attention of the police.

Bad livelihood cases.

52. The number of such cases increased from 187 in 1892 to 337 in 1893. The most marked increase was in Birbhum, for reasons which have been explained before. There

was also a large increase in the number of cases in Midnapore, Bankura, and Howrah; whereas Burdwan showed a decrease.

A great deal depends on a careful selection of the men who should be bound down for good behaviour. When crimes multiply in any locality, when the suspicions of the people point to particular criminals, or notorious gangs, as the authors of those crimes, prosecutions of the ringleaders have the best possible effect. On the other hand, these provisions of the law should never be had recourse to except against such habitual criminals, and even they should be given to understand that they will not be interfered with so long as they choose to keep quite and give no trouble.

It is of the utmost importance to make the police work on these lines. It happens, not unoften, that the police leave alone the real culprits who are preying on society, and send up minor criminals to keep up the average. Society is not protected, and men who are living quietly are harassed because they have old convictions recorded against them. The Magistrate of Birbhum reports that in that district men were often sent up on very insufficient grounds, and Mr. Waller had to pass strict orders to stop the practice. During 1893 the cases sent up by the police showed the worst results in Birbhum, there being 28 discharges against 26 convictions.

On the whole, the proportion of convictions in bad livelihood cases was not unsatisfactory. Two hundred and eight cases ended in conviction, and 109 cases in discharge.

Arms Act.

53. Eleven thousand one hundred and three licenses were granted in the year under review, against 10,303 in the previous year. The number is not large considering the population of the Division, and the arms are used generally for self-protection and sometimes for sport. The use of firearms for the purposes of crime or disturbance is unknown.

Complaints are often made of the trouble and inconvenience felt in getting licenses renewed, and there are proposals under consideration for minimising this inconvenience. On the other hand, the holders of licenses are often very negligent and forgetful in the matter of renewing them, and prosecutions have to be ordered to remind them that the licenses require renewal. There was a large increase in such prosecutions in the Hooghly district; the number of men prosecuted being 100 in 1893, as against 29 only in 1882. It is undesirable to multiply prosecutions, for the Arms Act is an unpopular Act, and a large number of prosecutions under the Act are likely to make it still more unpopular. But the Magistrate of Hooghly explains that the indifference of the people in the matter of renewing licenses had gone so far as to cause serious harassment to the executive in getting licenses renewed, and it was necessary to impress on the public that the law was meant to be obeyed.

XIV.—POLICE.

54. The remarks made under the head of *Crime* show that the work of the police during the year has not been altogether satisfactory. They worked with different degrees of success in the different districts.

Mr. Vincent, Magistrate of Burdwan, writes that the police have, on the whole, worked fairly, and have suceeded in repressing dacoity to a great extent.

Mr. Growse, Magistrate of Birbhum, remarks that the police did not work satisfactorily, and were completely demoralized in one outpost where crime prevailed.

Mr. Cornish, Magistrate of Bankura, states that the work at Khatra police-station was very bad, owing to suppression of cases.

Mr. Duke, Magistrate of Hooghly, says that the conduct of the police was on the whole satisfactory during the year. He adds that "there are many lazy, apathetic, or stupid officers, but the general standard is not below the average."

Mr. Collin, Magistrate of Howrah, remarks that the district police worked well during the year, but that the want of a better set of investigating officers is greatly felt.

Mr. Allen, Magistrate of Midnapore, remarks that a decided check has been imposed on the tendency to suppress crime in Midnapore, but it goes on still to some extent.

What Mr. Collin says of Howrah may be said of most districts in Bengal, and the want of a better set of investigating officers is generally felt everywhere. From my experience as a Magistrate, derived in many districts in Bengal, I have found that about one Sub-Inspector in three, or about six or seven in a district with 18 or 20 thanas, are what they all ought to be, *i.e.*, fairly intelligent, tolerably honest, and with a zeal to work well and show good results. With such an officer in a thana, it is possible to successfully cope with crime, to repress burglaries and thefts, and to keep habitual criminals and notorious bad characters in check. The majority of the station officers, however, are more or less apathetic and lazy, or something worse, and it is an uphill work with such officers to deal with crime. I inspected nearly all the thanas of the Burdwan district during the last cold weather, and remarked that in most thanas the police had failed more or less in burglaries and theft cases. It was in exceptional instances that the police honestly and zealously tried to cope with these cases, and I recorded my satisfaction whenever I found evidence of such zealous endeavours having been made.

Two things are necessary to improve the Bengal Police. In the first place, we must allow the Police Sub-Inspector a pay at which it is possible to get educated and intelligent young men, fit for the great powers and responsibilities of thana officers. When we pay less we simply pitchfork inefficient or dishonest men into these responsible posts. In the second place, the police force ought to be handled more intelligently than it is at present. Sub-Inspectors should be treated with greater consideration than they now receive, their good and zealous work should be more carefully noted and rewarded, and their apparently dishonest or inefficient work should be more promptly discouraged than it is at present. They should feel that they are being judged by their work; they should feel a zeal to show good work, a confidence that their good work will be appreciated. A District Magistrate would be more competent, even in addition to his other work, to deal with the police on these lines than District Superintendents of Police generally are. I have not always found District Superintendents able to discriminate between good workers and bad workers, and competent to train subordinates into zealous workers. And yet I feel sure that this could be done, and that by handling the police force with greater intelligence and with more sympathy, it would be possible to inspire them with an emulation and a zeal for doing good work which at present does not generally exist.

Rural Police.

55. Progress was made in introducing Act VI in all districts. In Birbhum it was introduced into 320 census villages within the year, and the Magistrate notes it will be further extended during the current year. Some progress was made in Burdwan, and more in Bankura, in this direction, and the latter district has now 1,543 Act VI chaukidars, against 844 Regulation chaukidars. In Hooghly, as in Burdwan, the Regulation chaukidars greatly predominate in number, but the Magistrate remarks that chakran chaukidars are not always appointed now on the occurrence of vacancies, and that a result of this will be to accelerate the introduction of Act VI year after year.

The Magistrate of Midnapore remarks that a good deal of attention has been paid in his district to improve the chaukidari system, and the payment of their salaries is more regular now than it used to be. This is so in other districts also.

As Magistrate of Burdwan, I recorded the following remarks about the work of chaukidars. "On the whole," I stated, "I have no reason to complain of the work done by the chaukidars; they are a useful, willing, and fairly intelligent class of men, and where the thana Sub-Inspectors know how to utilize them, they render excellent service. When thana officers fail in their work, they often seek to shift the blame on the chaukidars."

XV.—CRIMINAL JUSTICE.

56. The total number of cases tried by the various courts of Magistrates in this Division was 25,166, against 28,024 in 1893. As in previous years, the Benches of Magistrates and Honorary Magistrates sitting singly assisted

materially; they disposed of 10,573 cases, as against 11,509 cases in the preceding year.

57. Out of 31,775 persons concerned in the above cases, 21,829, or 68·6 per cent., were convicted, against 69 per cent. in the preceding year. The following two statements show the number of cases decided by the stipendiary and Honorary Magistrates in each district and their results:—

District.	Number of cases disposed of.	Number of persons tried.	Number of persons convicted.	Number of persons acquitted.	Percentage of conviction.	Witnesses examined.	
						Total number.	Number detained over two days.
1	2	3	4	5	6	7	8
Stipendiary Magistrates.							
Burdwan	2,414	3,480	1,970	1,490	.....	8,693	380
Birbhum	1,860	2,374	1,406	878	.....	6,026	199
Bankura	1,318	2,029	1,294	734	.....	6,797	893
Midnapore	4,191	5,679	3,267	2,411	.....	12,968	260
Hooghly	2,236	3,062	1,923	1,130	.....	8,167	216
Howrah	2,374	3,734	2,895	839	.....	6,986	116
Total ...	14,593	20,358	12,845	7,482	63·	49,637	2,066
Honorary Magistrates.							
Burdwan	2,996	3,229	2,643	586	.....	3,028	101
Birbhum	231	271	167	104	.....	383	6
Bankura	174	186	66	120	...	352	60
Midnapore	1,371	1,511	911	599	.....	2,364	143
Hooghly	1,754	1,974	1,411	563	.. ...	3,034	217
Howrah	4,047	4,240	3,786	454	.....	4,313	124
Total ...	10,573	11,417	8,984	2,426	78·6	13,474	651
Grand Total ...	25,166	31,775	21,829	9,908	68·6	63,111	2,717

It will be seen from the above figures that the Benches dealt with more than 42 per cent. of the total number of cases. They tried mostly cases of petty offences and breaches of Municipal Act and rules. The percentage of persons convicted by the Benches and Honorary Magistrates sitting singly, was higher than the percentage in cases tried by stipendiary Magistrates. Except in Burdwan and Midnapore, the percentage of convictions in cases tried by stipendiary Magistrates exceeded 60 per cent. in all districts. I joined at Burdwan as Magistrate towards the close of the calendar year, and am unable therefore to account for the small percentage of convictions in that district. The bad result of cases decided by the Bankura Bench is attributed to many cases having been compounded in and out of court.

58. Out of 63,111 witnesses examined, 2,717, or 4·3 per cent., were detained over two days; the stipendiary Magistrates detained 4·1 per cent., while the Honorary Magistrates 4·8 per cent. This shows an improvement as compared with 1892, when the percentage of witnesses detained over two days was 5·6.

It is evident from the figures given above that Magistrates now do their best to dispose of the cases as quickly as is compatible with the efficient discharge of their judicial duties. The pressure of work of different kinds, revenue and executive, often interferes, however, with the prompt disposal of criminal cases, and often leads to judicial work being hurriedly and perfunctorily done.

59. Appendices XI and XII show the criminal work done by the stipendiary and Honorary Magistrates during the year. The Magistrates have not furnished separate figures for Benches sitting daily as distinguished from those which sit at longer intervals, as directed in Government order No. 2643J., dated 30th May 1893. They have been asked to submit figures as soon as possible.

60. As noticed under head "Administrative changes," the Municipal Benches at Burdwan, Raniganj, Kalna, Katwa, and Dainhat were amalgamated with the Independent Benches at those places under Government orders contained in their circular No. 2643J., dated 30th May 1893. The total number of Honorary Magistrates

Benches.

in this Division on the 1st April 1894 was 366. Three of them exercised first-class powers, 50 exercised second-class, and the rest third-class powers. A large number of Honorary Magistrates in Burdwan and Howrah, viz., 18 in each district, have second-class powers. The three who exercise first-class powers are of Hooghly.

61. The following statement shows the attendance of Honorary Magistrates in this Division during the year:—

District.	Number of Honorary Magistrates.	Number of times asked to attend.	Number of times actually attended.	Number of absences—		
				With leave or notice.	Without leave or notice.	Total.
1	2	3	4	5	6	7
Burdwan	157	3,252	1,985	194	1,073	1,267
Birbhum	26	343	266	32	45	77
Bankura	34	649	376	48	225	273
Midnapore	103	2,529	1,654	410	465	875
Hooghly	102	2,361	1,789	305	217	522
Howrah	76	1,770	1,191*	128	476	604
Total ...	498	10,904	7,261	1,117	2,501	3,618

* Including voluntary attendance.

There was some improvement in the attendance of Honorary Magistrates in all the districts except Bankura and Howrah.

Working of Benches.

62. From what I have seen of the different Benches in Burdwan, their judicial work seems on the whole to be satisfactory. I have had occasion, however, to complain of the irregular attendance of some Honorary Magistrates, and the dilatoriness of others in the disposal of cases. Since the abolition of the Municipal Benches and the strengthening of the Independent Benches, I have insisted on the more punctual attendance of Honorary Magistrates, and I believe there has been a great improvement in this respect in Burdwan.

63. The Magistrate of Birbhum writes that there is a tendency in that district to discourage rather than to encourage Benches, possibly because the work is generally light, and the stipendiaries have not found much difficulty in getting through their files.

64. The Magistrate of Hooghly reports that the Honorary Magistrates have afforded material assistance to the stipendiary Magistrates in the administration of criminal justice, so far as regards petty cases capable of being very summarily disposed of. He does not think it possible, however, to entrust important police cases to Benches, and he rightly finds fault with these tribunals for the frequent adjournments granted by them for very inadequate reasons.

65. The Magistrate of Howrah reports that the Benches in his district have worked well and have rendered great assistance to the Magistrates of the district. He writes:—"I beg especially to bring to the notice of the Commissioner the good work done by the Howrah Bench in the disposal of the numerous petty cases which would otherwise have greatly pressed the work of the Deputy Magistrates."

66. The Magistrates of Bankura and Midnapore have not made any special remarks on the working of the Benches in their districts.

67. The absence of public prosecutors in important cases tried by Magistrates is greatly felt. The Court Sub-Inspector is incompetent to prosecute, and Magistrates who sit as Judges often fail to do the duties of a prosecutor at the same time. It is of importance in the interests of justice to appoint Junior Government Pleaders to prosecute all important cases before subordinate Magistrates. They will be expected to study police papers, to consult the District Magistrate and the District Superintendent of Police, if necessary, and to place before the court all the evidence for the prosecution in the manner in which it should be placed. In the absence of such a trained prosecutor, the trying Magistrate often fails to grasp the weight of the evidence for the prosecution, specially when the ablest members of the local bar are

ranged for the defence. Failure of justice in important cases is often the result.

Fines.

68. Rupees 96,025 was imposed during the year, and the outstanding balance at the close of the preceding year was Rs. 32,819. Therefore the total amount for realization was Rs. 1,28,843. Rupees 83,538 was collected and Rs. 11,037 remitted on appeal or written off as irrecoverable, leaving a balance of Rs. 34,268 at the close of the year. Midnapore has the largest balance, viz. Rs. 14,218. The attention of Magistrates was drawn from time to time to the realization of the outstanding fines. In Bankura unduly heavy fines were imposed in excise cases. They will have to be remitted, as the defaulters are generally poor Bauries or Sonthals on whom, the Magistrate says, the heavy fines were recklessly imposed by some of the subordinate Magistrates.

XVI.—REGISTRATION OF DEEDS.

69. The following table shows the number of deeds registered, the total amount of receipts, expenditure and surplus credited to Government during the year 1893-94 in the several districts in this Division:—

Districts.	Number of deeds registered.	Receipts.	Expenditure.	Surplus credited to Government.
1	2	3	4	5
		Rs.	Rs.	Rs.
Burdwan ...	34,599	41,162	24,661	16,501
Birbhum ...	17,014	18,764	10,568	8,196
Bankura ...	23,889	24,835	15,454	9,381
Midnapore ...	65,422	62,061	35,883	26,178
Hooghly ...	26,276	29,712	18,653	11,059
Howrah ...	17,987	22,905	11,091	11,814
Total ...	185,187	1,99,439	1,16,310	83,129

The number of documents registered shows a steady increase in the last four years. The increase in the year under report was shared by all the districts except Hooghly and Howrah, which show a nominal decrease. The increase is attributed to the following causes:—

1890-91 ... 137,897 deeds.
1891-92 ... 152,922 „
1892-93 ... 178,747 „
1893-94 ... 185,187 „

(1) Settlement of incumbrances created during the previous year of scarcity.

(2) Growing tendency of the people in general to acquire lands for agricultural purposes in consequence of the high price of the food-grains.

(3) Appreciation of the value of registration.

The decrease in Hooghly is attributed to the rich harvest throughout the district during the past year coming after two bad years. The decrease in Howrah is less than two per cent., and calls for no remarks.

The total receipts during the year under report amounted to Rs. 1,99,439, against Rs. 2,11,212 in the previous year; thus they fell by Rs. 11,773. This fall was shared by all the districts, and is due chiefly to the reduction of *ad valorem* fees from 12 annas to 8 annas for deeds the consideration of which does not exceed Rs. 50.

The expenditure was however greater, viz. Rs. 1,16,310, against Rs. 1,05,555 in the previous year. The opening of new offices in Burdwan, Midnapore, and Hooghly, the allowances of the newly-appointed Special Sub-Registrar at Bankura, and the increase in the pay of the Special Sub-Registrar of Midnapore, the increase in the establishment allowances of the Sub-Registrars, and the payment

of extra establishments introduced by Circular No. 22 of 1893, and lastly, the cost of fitting up new iron racks in the Midnapore office, contributed towards the increase.

Three new offices were opened in the district of Burdwan, as also a joint sub-registry office, as stated before in paragraph 43 of this report.

Finger prints.

The system of taking finger prints to secure the indentification of the executants was formally introduced into the Sadar office under the order of the Government of Bengal. The system has also been introduced into the sub-registry offices lying within the jurisdiction of the Jahanabad subdivision, where cases of false personation are very common. It is now under contemplation to introduce the system into the mufassal offices.

Class of instruction.

On the 10th March 1894, the Inspector-General held a class of instruction. All the Sub-Registrars of the district were present at the meeting, in which the following subjects were discussed: (*a*) finger prints, (*b*) new mode of indexing, (*c*) searching fees under headings H (*a*) and H (*b*) of the table of fees, and some other minor points.

Prosecutions.

Three cases of false personation were instituted during the year under report, and in all of them convictions were obtained at the Sessions Court at Hooghly.

No complaint was made during the year against the conduct of the Sub-Registrars in any of the districts of this Division.

The prescribed statement No. XVII of registration of deeds for the year under report is annexed herewith.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

70. There was no change in the system of administration of land revenue. The total number of estates exceeded that of the previous year by 44. The increase is chiefly due to the addition of a number of estates in class I in the district of Burdwan. These estates, it is said, were actually on the roll before, but were not shown in the former returns. The number now reported is said to have been ascertained by actual counting. A further report on the subject has been called for.

71. Of the total demand of Rs. 85,56,394, Rs. 81,46,268 was collected and Rs. 6,141 was remitted, leaving a balance of Rs. 4,03,985. The percentage of total collections on total demand fell from 96·3 to 95·2. In Birbhum the collection was nearly cent. per cent., in Burdwan it was over 99, in Bankura nearly 99, and in Hooghly 97. Midnapore, as usual, comes last with 86·8 per cent., the small collections being ascribed chiefly to bad crops in low lands on account of floods in this district.

72. The sale law was administered with due leniency and moderation. Recourse to actual sale was had in only 136 cases out of 1,772 defaults, and exemptions were granted even at the last moment.

73. The cess demand increased from Rs. 10,54,533 to Rs. 10,59,814. The increase was the highest in Bankura, where the revaluation was given effect to in certain estates during the year. Raiyati holdings have been treated as tenures in numerous cases for the purpose of this revaluation in Bankura, and this, I think, is wrong. There was some improvement in collection, and the percentage of balance was reduced from 22·3 to 19·21. The improvement was perceptible in all districts except Bankura, where as usual the high percentage is ascribed to the difficulty in the realization of cess from ghatwals.

74. There was some confusion in the administration of the zamindari dâk cess owing to the conflict between the rules and orders on the subject. The question whether the transactions should be according to the calendar or the financial year is still under the consideration of the Board. The collections were fairly good, being 93·7 per cent.

Settlement.

75. No important settlement of Government estates was effected during the year. Police thanadari lands, roadside and chur lands, and jalpai lands in Midnapore were settled. The settlement of D schedule embankment lands in the district of Midnapore is at a standstill. The raiyats are hesitating to execute kabuliyats

in consequence of some of the talukdars of Chetua and Ghatal circuit embankments having obtained civil court decrees against Government tenants. Some of the suits instituted by Government against tenants have been decided against Government by the lower courts. Appeals were preferred, but the lower courts' decisions were upheld. No further appeal was recommended by the Superintendent and Remembrancer of Legal Affairs. The settlement of the 18 temporarily-settled estates of Potaspur under Chapter X of the Bengal Tenancy Act is in progress.

Public Demands Recovery Act.

76. The number of certificates pending from 1892-93 was 28,585, the number filed during the year was 30,711. The disposals exceeded the institutions by over 4,683, or 15·2 per cent. There was some improvement in the working of the department. Out of 35,394 cases disposed of, payments were made in 30,594, or in over 86 per cent., before recourse to sales. Sales took place in only 477, against 1,442 in the previous year.

The defects which come most frequently to notice in the working of the Certificate Department spring mainly from two causes. The extreme ease with which a certificate may be filed makes it at the same time very open to abuse. A tahsildar in a Government or Ward's estate sends in a long list of defaulting raiyats, or a muharrir in the Road Cess Department prepares a similar list of defaulting cess-payers. It is not the usual practice to examine such lists with the scrutiny which would be necessary if we were to go to a civil court to obtain decrees for the amounts which we claim. The result is that certificates are generally made as a matter of routine, and numerous mistakes creep in, entailing hardship on those against whom certificates are filed. I myself think it would be a great improvement, both in principle and in practice, if we had to go to a civil court with our lists, and if we had to prove them by some sort of declaration or evidence before obtaining certificates. This would make our officers and subordinates more careful, and the obtaining of decrees would not be a mere matter of routine as it is now. The procedure indicated would not cause delay in realization, as the Collector might keep in his hands the power to execute such certificates, as he does now, under the present law. It is only in the matter of making the decree or the certificate that I would transfer the power now exercised by a subordinate of the Collector (who is virtually the plaintiff) to a Court specially appointed for the purpose.

Another matter which gives rise to complaints is that our processes are not properly served. It is notorious that processes entrusted to a collectorate peon are not as safe as letters entrusted to a postal peon for delivery. Letters posted seldom miscarry, while the vague reports of collectorate peons about the absence of the parties on whom processes should have been served personally, afford just grounds for suspicion that the peons are extremely careless in the performance of their work. When peons are suspended for frequent reports of this nature, their successors generally manage to find the parties at home and serve the processes personally. Recourse to the post-office for service of such notices and processes as can be conveniently served through that channel, would be a move in the right direction.

Land acquisition.

77. The new Act I of 1894 had effect from March 1894.

Proceedings for the acquisition of 196 acres of land under Act X of 1870 were confirmed by the Board of Revenue during 1894. The following are the important projects the proceedings of which were confirmed by the Board:—

		Rs.
1.	Foreshore road at Howrah	35,000
2.	For water-supply at Howrah	8,000
3.	Volunteer rifle range at Leluah	2,289
4.	Drain from Serampore to Konnagore	5,761
5.	Cholera camp for Midnapore Jail ..	1,078
6.	Balighai Branch Canal, Midnapore..	3,161
7.	Jheria extension of the East Indian Railway	13 426
8.	Loco. quarters at Asansol	10,023

The total cost of acquisition was Rs. 92,025. Abatement of revenue to the extent of Rs. 82 was allowed on account of land acquired for Government, and an abatement of rent in khas mahals to the extent of Rs. 29 for land taken up for

municipalities. The average cost per acre was Rs. 470, against Rs. 312 in the preceding year. The higher cost paid during the year was due to lands acquired in towns. In one single case in Howrah Rs. 35,000 had to be paid for nine poles of land.

Partition.

78. Only two cases of partition are pending in Hooghly. There were no such cases in other districts.

Land registration.

79. The percentage of mutations effected on initial registration fell in Burdwan from 15·8 to 14·6, in Birbhum it rose from 5·8 to 7·8, and in Bankura from 27·2 to 48·7. In Midnapore there was a falling off from 4·2 to 3·9, and in Hooghly from 4·9 to 4·2. The recent ruling of the High Court, that unless a proprietor's name is registered he is not entitled to sue for rent, is likely to have some beneficial effect.

Bengal Tenancy Act.

80. The Act appears to have worked smoothly. The District Judge of Birbhum says that the general result of the Act may be regarded as favourable to the tenants; the selling value of rights of occupancy has risen very greatly since 1885.

In my last cold-weather tour as Collector of Burdwan I was impressed with the necessity of a revision of the Act so as to give protection to the raiyats with regard to their homestead lands. A raiyat acquires the right of occupancy with regard to his cultivated land, but acquires no such right with regard to his homestead. I was informed that zamindars are beginning to take advantage of this, and when they are unable to oust a raiyat from his field, they sometimes secure their object by turning him out from his homestead. The matter is one which deserves serious attention, and I think some protection should be afforded to the raiyat in respect to his homestead.

Embankment.

81. No work of importance was undertaken last year in any of the districts of this Division. In Bankura the embankment constructed for the protection of Government estates Pithaipur and Rajabari at a cost of Rs. 2,725, having proved useless, has been ordered to be abandoned. In Midnapore the embankments are maintained under the contract system. The Government demand for maintaining them was Rs. 75,648. Of this sum Rs. 56,892 was realized, Rs. 1,728 is due from Government and wards' estates, and the remainder, Rs. 17,028, is under realization under the certificate procedure.

Drainage.

82. There are four drainage works in this Division, all in the district of Hooghly, viz., Dankuni, Howrah, Rajapur, and Ampta. The first three have been completed, and the last is still in the hands of the Public Works Department.

The original cost of the Dankuni project has been realised. The maintenance charge has been capitalised for Rs. 65,344, of which Rs. 45,058 was collected between January 1892 and March 1894; out of the balance, Rs. 3,228 is due from Government, which will be adjusted by transfer, and the reminder Rs. 17,018 is likely to be realised in four years.

The assessment of the land benefited and the apportionment of cost of the Howrah scheme have been completed. The capitalisation of both the original cost and maintenance charge has been sanctioned by Government in March 1894 for Rs. 5,24,924. Out of this sum Rs. 4,37,149 represents principal and Rs. 87,775 interest.

The cadastral survey and khanapuri of the Rajapur scheme are expected to be completed before the rains, but not the final attestation. This, however, is being pushed on rapidly. The cost of the scheme up to December 1894 amounted to Rs. 9,39,366.

The Ampta scheme, as already stated, is still in the hands of the Public Works Department. The necessity for carrying it out was demonstrated by the last year's rains. In the absence of proper drainage, crops here are safe only in years of exceptional drought; in other years they are flooded and destroyed.

Advances under Land Improvement and Agricultural Loans Act.

83. A sum of Rs. 38,500 was allotted to this Division, but only Rs. 25,434 was advanced. As the year was one of good harvest, the number of applications was comparatively small, and several had to be rejected owing

to insufficiency of the security offered. The Collector of Burdwan thinks that "loans are granted very much too often here." He therefore intends to restrict these loans considerably, only granting them in cases of need, where, for special reasons, the borrower cannot get money from the local mahajans. Looking, however, at the amount advanced in Burdwan, viz. Rs. 2,075, I hardly think it can be said that loans have been granted in Burdwan too often, and I scarcely think it is the intention of the Act to restrict the loans to the cases to which the Collector wishes to restrict them.

The realisation of former advances was poor in Bankura; out of Rs. 30,736, which fell due under both the Acts, Rs. 12,286 only was realised, leaving a balance of Rs. 18,450. The short collections are attributed to the bad harvests of the two preceding years, the debtors were in straitened circumstances, and the last year's crop, though a good one, did not leave sufficient margin to pay the Government demand after satisfying landlords and local creditors. Certificates have been filed for the realisation of Government demands.

XVIII.—ATTACHED ESTATES AND WARDS' ESTATES.

84. The number of estates under the management of the Revenue authorities during the year was the same as in the previous year, viz. 11. Two estates were released from the Court's management and two were added; one of them, Jalamuta, has been attached for non-payment of Government revenue due from an estate which has been released.

85. The most important estate under the management of the Court of Wards in this Division is the Burdwan Raj estate. Raja Bun Behary Kapur continued to be the sole mannager of the Burdwan Raj. He managed the estate with the help of two assistant managers, who are in charge of separate departments. His management shows signs of gradual improvement, although there is room for further improvements in some of the departments. The new system of account-keeping introduced is now appreciated by the Raj.

As is usual with zamindars, the Raj is averse to write off the rents that are irrecoverable through the death and desertion of raiyats, or even those barred by limitation. During the year under report a special officer was appointed in addition to the circle officer to help in squaring these accounts and to expedite the submission of remission statements. Rupees 1,24,079 was remitted, against Rs. 71,973 in the previous year, for the entire estate. The percentage of collections on the current demand was 102·09, against 99·7 in the preceding year. This result is satisfactory and is creditable to the management.

The audit of the Raj was, as before, conducted by a Deputy Collector. The examination of the accounts down to February 1894 was completed during the year. The progress in the disposal of objections was not, however, satisfactory owing, it is said, to the manager's inability to furnish prompt explanations. Only one case of fraud or over-charge in the bills in connection with law suits came to light. In addition to the monthly audit conducted by the Deputy Collector, the accounts for 1892-93 were audited by the Local Auditor, Babu Ashutosh Singh. His report is not yet to hand.

The public institutions maintained by the Raj continued to be well managed. The state of the Raj College was found to be satisfactory by Dr. C. A. Martin, the Officiating Director of Public Instruction, by whom it was inspected within the year. The Officiating Inspector-General of Civil Hospitals also visited the Raj Charitable Dispensary at Burdwan, and was pleased with the manner in which this dispensary is conducted under the able management the Assistant Surgeon, Babu Mohendra Lal Gupta.

The Raj office building is still under construction by Messrs. Burn and Company under the supervision of the District Engineer. It is hoped that it will be completed shortly.

The Maharaj Kumar is taught English by Babu Ram Narain Dutt, and Sanskrit and Bengali by two pandits. The progress made by him during the year was satisfactory, and I was pleased with his progress when I examined him lately. Arrangements are being made for the appointment of an English companion to the Kumar.

The Burdwan Raj khas mahals, which were under settlement during the year, are situated in the districts of Burdwan and Hooghly. In these districts

105 villages with an area of 54,762 acres had to be settled. Up to the close of the year attestation was completed in 78 villages with an area of 42,777 acres. Draft records of rights were published in 68 villages with an area of 37,256, and final records were published in 51 villages with an area of 22,849 acres.

The case work done during the year in completing the records for draft publication consisted of 4,322 objections, which were summarily disposed of at the time of attestation; 1,104 objections were heard under section 105, while 25 disputes were tried as civil suits under section 106 of the Bengal Tenancy Act.

The cost of settlement during the year amounted to Rs. 10,837, and the total cost from the commencement of the work in Burdwan and Hooghly down to 31st March 1894, came to Rs. 22,816. An increase of Rs. 1,872 in rental has been obtained in the two districts mentioned above with an aggregate present rental of Rs. 59,100. The increase has resulted entirely from amicable settlement. *Solehnamahs* or agreements were filed by tenants through the exertion of the Raj officials. Credit is due to Mr. Srinath Dutt, Assistant Manager, for this satisfactory result.

The settlement of the Sujamuta estate was completed in the previous year, but some of the settlement appeals made to the High Court by the Mudhakhali raiyats are still pending final settlement.

86. There were nine estates under the Court of Wards in Midnapore district at the commencement of the year, excluding Sujamuta, which is a part of the Burdwan Raj estate. Of these nine estates, Basudebpur and Pathra were released within the year. On the other hand, Jalamuta was attached for revenue due from Basudebpur, and a new estate, Jamboni, was brought under our administration, so that the number of estates remained the same as before. The estates Basudebpur, Berabaria, Nayagram, and Belki were involved in debts contracted before they came under the Court of Wards. Basudebpur was released just before the close of the year in an insolvent state, a portion of the Government revenue remained unpaid, and for this the estate of Jalamuta has been attached. Berabaria is hopelessly insolvent, and is about to be released in that state. The unpaid balance of the debts due by the Nayagram estate are being paid year by year, and are expected to be paid off in five or six years more. The debts due by the Belki estate were reduced from Rs. 2,505 to Rs. 1,817 during the year, and the balance will be paid off by the sale of some of the properties belonging to the estate.

Among the solvent estates in Midnapore, Malighati and Turka are large, and each of these is managed by a separate manager. Moheshpur was managed by the manager of Basudebpur, and Baratturhingly is managed by the manager of Nayagram.

The percentage of total collections on total demand in Midnapore during the year was 35·7, against 39·4 in the previous year. This poor result is partly due to the damage caused by floods in Midnapore district, partly to the laxity and inefficiency of the managers.

The settlement of some of the mahals of the Turka and Malighati estates was undertaken during the latter end of the year. The work is in progress.

87. The Maliara estate in the district of Bankura does not call for any special remarks; it was brought under our administration in January 1893.

Howrah has one estate under the Court of Wards, viz., Sankurpur managed from the Rajshahi Division. Hooghly and Birbhum have none.

The accompanying statement No. XXVII will show the demand, collections, remissions, balances, and expenditure of the several wards' estates in this Division during the year under report.

88. From what has been stated in paragraph 86, it will appear that the administration of wards' estates in the Midnapore district has not been as satisfactory as might be expected. In taking involved estates under our administration we hope to improve their condition and to make them over in a solvent state. We have not done this either in respect of Basudebpur or in respect of Berabaria, which were in our hands for years. And the condition of some other estates which were released within the past few years was quite as bad at the time of release. It is to be hoped that we shall succeed better in future, and that all the estates in Midnapore now under the Court of Wards will improve by our administration.

XIX.—EXCISE.

89. During the last year 2,930 shops were opened in this Division, as against 2,827 and 2,946 in the two preceding years. Tari shops are no longer settled by auction. They were settled generally with their former holders on their submitting a schedule of trees to be tapped. The tree-tax system has not worked well in the districts of Burdwan and Midnapore; but the increase in tari revenue in Howrah is attributed to this new system of regulating the fees, as well as to the poorer classes resorting more to tari owing to the rise in the price of country liquor. I am not in a position yet to give any opinion on the tree-tax system.

The total revenue amounted to Rs. 11,72,190, against Rs. 11,55,147 in the preceding year. The revenue derived from country spirit shows a decrease, while there is increase under all other heads. The miscellaneous revenue shows a slight falling off.

The decrease in the country spirit revenue from Rs. 3,33,172 in 1892-93 to Rs. 3,10,984 in the last year, was shared by all the districts except Birbhum. It is attributed to the high price of rice that prevailed in the earlier part of the year as well as to other causes; but I think the main reason is that the poorer classes are taking to cheaper liquor like pachwai. I consider this change an unmixed blessing, for pachwai is food, and it does not demoralise the lower classes of people to the same extent as distilled liquor. In Midnapore the decrease is also attributed to the larger consumption of rum and imported liquor. Considering the very inferior and almost obnoxious imported liquor sold at cheap prices in the mufassal, the increase in its sale is to be regretted.

The Collector of Hooghly reports on the difficulty of transport of country liquor from Hooghly to Jahanabad, and has made proposals to reduce both the rate of duty and license fees in Jahanabad. The difficulty will disappear when Jahanabad is connected with Burdwan by a continuous line of pucka road.

The steady expansion of the pachwai revenue received a check last year owing to the dearness of the price of rice. The revenue decreased in all districts except in Birbhum, where the revenue increased from Rs. 95,323 to Rs. 1,12,619, and the gain in this district more than compensated the loss in the other districts. The total pachwai revenue in this Division rose from Rs. 2,22,699 to Rs. 2,35,082.

There was again an increase in the ganja revenue, which amounted to Rs. 1,69,106 last year, as against Rs. 1,57,089 in the previous year. It is satisfactory, however, that this increase was obtained, even though the consumption was less. The increase was due to the raising of the duty on ganja and to the settlement of shops at increased rates.

Several cases of illicit manufacture of madak were detected, and many new shops for its sale have been sanctioned for the current year. The fee fixed, Rs. 50, for the domestic use of this article is very high for the class of people who generally use it. The Collector of Midnapore writes:—"The fee fixed is so high that not a single license was taken out." Rupees 12 perhaps would be adequately high fee for the poorer consumers.

Hooghly shows a marked inactivity in prosecuting cases; there were only 73 cases last year, as against 136 in the previous year. No reason is given for this falling off. Bankura also shows some decrease. The figures for the other districts call for no remark.

XX.—STAMPS.

90. The total revenue from the sale of stamps during the year under review amounted to Rs. 19,61,616, against Rs. 18,82,919 in the preceding year, thus showing an increase of Rs. 78,697. In the two preceding years also there was increase, and the revenue is steadily expanding. As compared with the preceding year, all classes of stamps show an increase, except notarial stamps.

The annexed table exhibits the revenue derived from the sales of the different descriptions of stamps in the districts of this Division during the year:—

Statement showing Stamp revenue during the year 1893-94.

District.	Court fees.	Copies.	Non-judicial adhesive.	Receipt.	Non-judicial impressed.	General.	Court paper.	Total.	Remarks.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Burdwan ...	3,02,796	19,088	10	5,001	72,885	4,268	6,307	4,10,355	
Birbhum ...	1,38,812	8,370	...	2,192	34,718	1,395	3,570	1,89,057	
Bankura ...	1,69,427	13,133	1	1,263	39,422	1,643	3,667	2,28,556	
Midnapore ...	4,24,472	25,479	...	4,316	1,13,669	3,575	10,875	5,82,386	
Hooghly ...	2,88,303	18,937	12	3,526	47,676	4,212	5,115	3,67,781	
Howrah ...	1,31,351	7,127	1	4,015	35,495	1,735	3,757	1,83,481	
Divisional total for 1893-94.	14,55,161	92,134	24	20,313	3,43,865	16,828	33,291	19,61,616	
Divisional total for 1892-93.	13,91,383	89,992	34	19,577	3,32,036	16,332	33,565	18,82,919	

As in the previous year, the increase mainly occurred in court-fees, and the increase is observable in all districts except Howrah. The increase in the number of civil suits, and in the number of certificates for the recovery of cesses is alleged to account for this increase.

Non-judicial stamps.

91. The increase in the sale of non-judicial stamps is attributed to the registration of a larger number of deeds and to the increase in the number of loan transactions, consequent on the poor harvests of the preceding two years.

The increase in the sale of one-anna revenue stamps, commonly known as receipt stamps, is ascribed to the better observance of the provisions of law by all classes of the people.

Levy of duties and penalties.

92. The number of cases in which duty and penalty were levied by Civil Courts fell from 181 to 159, while those in which Collectors levied the duty and penalty rose from 415 to 435. Rupees 1,049 was levied as duty and penalty by civil courts, and Rs. 3,144 by Collectors, making a total of Rs. 4,193, against Rs. 4,297 in the preceding year. The fluctuations are small and require no explanation.

Prosecutions.

93. The number of prosecutions instituted during the year for various breaches of the provisions of the stamp law was 42, against 44 in the preceding year, viz., 10 in Burdwan, 7 in Birbhum, 2 in Bankura, 6 in Midnapore, 14 in Hooghly, and 3 in Howrah. Of the 42 persons brought to trial, 20 only were convicted. The fines imposed and rewards paid were Rs. 169 and Rs. 2-8, against Rs. 423 and Rs. 5, respectively, in the preceding year. All the District Officers of the Division have been reminded that activity in the detection of evasion of the law must to a great extent depend on the encouragement afforded by a liberal distribution of rewards.

XXI.—INCOME-TAX.

94. The final demand on account of tax was Rs. 2,12,262 on 9,343 persons, against Rs. 2,03,357 on 9,063 persons in the preceding year, showing an increase of Rs. 8,905 and of 280 persons. As in the previous year, there was increase both in the demand and in the number of assessees in all the districts of the Division except in Howrah, where there was again a small decrease of Rs. 36 and 14 assessees. The increased demand is due to the revision of assessments in towns and in important trade centres.

The decrease in Howrah is attributed to exemptions granted in the lower classes on objection. The collection amounted to Rs. 2,07,230, and the balance on the 31st March amounted to Rs. 5,032 only, and the percentage of collection on the final demand was thus 97·6. Of this balance, Rs. 4,539 is reported to be good and under realisation. One thousand and thirty-three objections were filed, against 982 in the preceding year. The increase is due to the assessment of new persons, and also to the enhancement of tax in some cases on revision. Judging from the appeals which come before me for hearing, I cannot say that the assessments and enhancements have always been carefully made, or that the assessors tried to obtain any clear data for coming to their findings. Assessment in most cases must be guess work only, but even this guess work was often very perfunctorily done. The attention of Deputy Collectors has been directed to making careful enquiries when objections are preferred.

As the tax does not touch the large class of cultivators and labourers in the country, it cannot be said to be widely unpopular. It is far less unpopular than the Road Cess.

The prescribed statement is appended. The districts of Hooghly and Howrah were amalgamated for the purpose of income-tax, and the same Deputy Collector and assessor managed the work of both the districts.

One assessor also worked in the districts of Bankura and Birbhum. I do not think the amalgamation of districts under the same officers has produced good results.

XXII.—MONETARY ARRANGEMENTS.

95. Currency notes to the value of Rs. 77,23,615 were received and to the value of Rs. 74,73,295 were issued in the treasuries of the Division, against Rs. 72,61,770 and Rs. 73,68,885 respectively in 1892-93, showing an increase of Rs. 4,61,645 in receipts and Rs. 1,04,410 in issues. The fluctuations are ascribed to the increasing appreciation by the public of the use of notes for making remittances. The introduction of the enlarged money-order system has not apparently yet affected the transactions in notes; as it is cheaper to send money by currency notes than by money-order.

96. Some of the district officers having failed to give the total number of money-orders of all descriptions issued, I have to confine my remarks to money-orders issued for the payment of land revenue and rent.

Land revenue money-orders numbered 36,775 covering Rs. 2,45,493, against 31,915 and Rs. 2,36,156, showing an increase both in the number of orders and in the amount remitted. The increase was mainly contributed by the advanced districts of Burdwan and Hooghly, and this shows that the facilities afforded by the system are most appreciated in the more advanced parts of the Division. In Midnapore there was a large increase in the number of money-orders sent, although there was a decrease in the amount; while in Birbhum the number of orders was less, but the amount remitted was larger. The backward district of Bankura shows a decrease in both.

The system of payment of rent by money-orders seems to be rapidly growing in popularity. There was increase both in the number of money-orders and in the amount covered by them. It has, however, not found much favour with the landlords, for the percentage of refusals continues to be on the increase. All the districts show an increase in the number of refusals except Bankura, where there was a slight decrease.

The Collector of Burdwan thinks that the inability of the amla to exact undue payment from the raiyats is frequently the cause of refusals. The Collector of Midnapore thinks that the landlords are still under the impression that by accepting the amount sent by money-orders they might be held to admit the jama entered in the money-orders by their tenants. There is much force in both these reasons assigned for the refusal of money-orders.

97. The Post Office Savings Bank, as already reported, has proved beneficial to the middle classes, specially to the poorer Government servants. The districts of Midnapore and Hooghly have not furnished any figures under this head; the other districts, except Howrah, show a decrease in the amount deposited. The withdrawals increased in all districts. The Collectors of Birbhum and Bankura attribute it to high prices of food and costly living.

The interest on deposits has, since the close of the year, been reduced from $3\frac{3}{4}$ to $3\frac{1}{8}$ per cent. per annum, and this must necessarily cause a reduction in the amount of deposit.

XXIII.—RAILWAY AND OTHER PUBLIC WORKS.

98. The construction of the Tarakeswar-Mugra Steam Tramway could not be completed within the time sanctioned, and a further extension of time has been recommended. The Collector hopes that the line will open for traffic in the beginning of the next year. The Taposi line, the construction of which commenced in 1892-93, has lately been opened for traffic. The portion of Jheria line lying within the district of Burdwan has also been finished.

The East Coast Railway between Bezwada on the Krisna and Cuttack on the Mahanadi, which is under construction, is proposed to be extended to Calcutta *vid* Midnapore. There is also a proposal for constructing a cross country line from Midnapore to Sini on the Bengal-Nagpur line. Detailed surveys with estimate of cost have been made for the Cuttack-Calcutta extension, but the construction of the line has not yet been sanctioned by the Government of India. A draft agreement deed between the Municipal Commissioners of Howrah and the promoters of the Howrah-Ampta Tramway for the working of the line, has been submitted to Government for approval.

The following table shows the number of accidents and obstructions in the railway line. There was a considerable increase in the number of accidents:—

District.	Persons.				Trains.				Remarks.
	Killed.		Wounded.		Accidents.		Obstructions.		
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	
1	2	3	4	5	6	7	8	9	10

Howrah	3	...	10	...	6*	...	...	...	* Including obstructions.
Total	37	37	21	28	20	56	7	1	

Two accidents in Burdwan and one in Hooghly deserve notice. A cart with three passengers was struck on the permanent-way by a goods train and was dragged about 25 yards ahead. The gate was open, and the occupants of the cart were asleep. One of the passengers was killed and one injured. The gateman was criminally prosecuted, and was convicted and sentenced to one year's rigorous imprisonment. The second accident took place at the Damoda railway station of the Bengal-Nagpur Railway line; a shunter was killed while getting out from between a couple of waggons, owing to negligence of the rules for shunting. The third accident occurred at the Mugra railway station. A down passenger train on entering the Mugra station collided with five trucks which had been driven by a severe storm out of the goods shed siding to the down line. All the coaching vehicles of the train were more or less damaged, and one third-class carriage had the entire side torn off, and two passengers were injured. The station-master, who was to blame for the accident, was prosecuted under section 101 of the Railway Act and sentenced to simple imprisonment for two weeks and to pay a fine of Rs. 50; in default to two weeks' further imprisonment.

XXIV.—COMMUNICATIONS.

99. As remarked last year, the districts of this Division are fairly provided with means of communication. The division is traversed by rail, river, and water-courses. The steamer service connects 10 out of the 17 district and subdivisional head-quarters. The East Indian Railway passes through six district and subdivisional head-quarters. The head-quarters of Bankura, Vishnupur, and Jahanabad are the three outlying stations. Bankura town is situated at a distance of 30 miles from the nearest railway station at Raniganj. There is a metalled road from Raniganj to Midnapore passing through the towns of Bankura and Vishnupur, and hackney carriages ply regularly between Raniganj and Bankura, but in the rainy season the crossing of river Damodar gives trouble. The subdivision of Jahanabad is the worst off in respect of communication. Though a subdivision of Hooghly, Jahanabad is reached more easily from Burdwan, and a portion of the Burdwan-Jahanabad road is pucka. Since taking charge of the Division I have suggested to the District Boards of Burdwan and Hooghly the necessity of metalling the remainder of this road, and my suggestion has been accepted.

The Bengal-Nagpur Railway and the Tarakeswar Railway have greatly facilitated communication.

The funds of District Boards are exhausted in maintaining the existing roads and do not permit the opening out of new roads. The Magistrate of Burdwan remarks that "this is a serious matter, as it means that there is no probability of communications being improved materially for many years to come unless some funds are available."

The condition of the roads in Birbhum and of some roads in Midnapore is unfavourably reported on. The condition of the Birbhum roads is said to be worse than it was some years ago, and this is a fact which does not reflect credit on the District Engineer. In Midnapore, the Provincial roads, 114 miles in length, are not kept in such good repair as those in the Puri district; the cost of maintenance and repair exceeded Rs. 445 per mile, and the Magistrate writes that an additional grant is urgently necessary, which he thinks may be obtained by a deduction from the grant for the Puri roads. The roads in Howrah, which suffered much under the late supervisor in charge, have been greatly improved by the new District Engineer, though much has yet to be done.

Among the important public works undertaken or executed during the year were—(1) the completion of a feeder road one mile in length from the 87th mile of the Grand Trunk Road to the Galsi station on the East Indian Railway; (2) communication of the Victoria bridge on the 9th mile of Burdwan to Katwa road; (3) completion of a road from Bagnapara to Kalna, three miles in length; and (4) proceedings to acquire land for a feeder road, three miles in length, from Devipur railway station, at the expense of a zamindar, which were in progress. All these are in Burdwan. The construction of a road in Bankura, which was first taken in hand some eight years ago, was brought to a completion. The other works were the construction of culverts, wooden bridges, embanking and metalling roads, and repairing roads and bridges.

The subjoined table shows the amount expended in the several districts on original works and repairs and on village roads:—

Districts.	Original works.		Repairs.		Village roads.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Burdwan	29,252	25,787	1,53,732	1,26,932	5,761	7,193
Birbhum	7,117	2,047	27,864	24,907	3,310	4,284
Bankura	6,880	1,905	31,167	34,218	1,822	2,345
Midnapore	15,670	9,021	77,986	77,316	13,262	15,334
Hooghly	10,255	4,809	91,068	85,621	1,483	3,879
Howrah	17,289	9,583	5,360	20,269	2,016	4,509
Total ...	86,413	51,152	3,87,057	3,68,663	27,144	37,544

100. The amounts noted in the margin were expended on planting trees on roadsides and maintaining them. The Magistrate of Midnapore has not furnished information on the subject. The District Boards of Burdwan and Hooghly appear to have paid attention to arboriculture.

	1892-93. Rs.	1893-94. Rs.

XXV.—WORKING OF THE LODGING-HOUSE ACT.

101. There has been no change in the operation of this Act, which was in force in this Division in Garhbeta and Dantun in Midnapore district and in Ulubaria in Howrah district.

The lodging-houses in Garhbeta are little used by pilgrims: the pilgrims generally prefer to camp under trees. Litigants or applicants for registration generally occupy the lodging-houses. The total income of this town including the balance was Rs. 531, of which Rs. 87 was expended on conservancy and Rs. 14 was paid to the Health Officer. A balance of Rs. 428 was left at the close of the year. The tendency on the part of the Committee to spend the fund on charitable relief has been checked.

At Dantun there were 38 lodging-houses. The total income, including balance of previous year, amounted to Rs. 957, of which Rs. 100 was spent towards the construction of an in-door hospital for invalid pilgrims, Rs. 63 on medicine, Rs. 84 as allowance to the Health Officer, and Rs. 61 only on conservancy, and there was a surplus balance of Rs. 614 at the close of the year. The tendency to spend the fund on charitable relief has been checked.

Ulubaria had 33 lodging-houses. The total receipts including balance were Rs. 610, of which Rs. 216 was expended on conservancy, and there was a balance of Rs. 221 at the close of the year. The town, being the head-quarters of a subdivision, was well looked after. Cholera once broke out in an epidemic form, but early measures were taken to arrest its progress. The disease is generally spread there by the pilgrims. To prevent this the Subdivisional Officer has arranged with Messrs. Hoare, Miller and Company to take the pilgrims to Calcutta without landing them in the town.

New bye-laws have been framed for all these towns.

XXVI.—EDUCATION.

102. There was an increase in the number of schools and patshalas, from 10,883 to 10,944, but the number of pupils attending them diminished from 300,400 to 299,187; the decrease was, I believe, due to the unhealthiness of the last months of the year.

The decrease in the number of pupils was shared by all the districts except Birbhum and Bankura, which are comparatively healthy, and in both of which there was an increase.

Financial results.

103. The total expenditure on education in this Division amounted to Rs. 11,35,578, as compared with Rs. 11,17,132, showing an increase of Rs. 18,446. The expenditure from Provincial revenues rose from Rs. 80,415 to Rs. 81,252, and that from public sources, including district and municipal funds, rose from Rs. 10,36,717 to Rs. 10,54,326, or by Rs. 17,609. The high schools cost Rs. 2,91,990, the middle schools Rs. 2,42,117, primary schools Rs. 5,74,289, and special schools Rs. 27,182.

The allotments to high schools have decreased; the allotments to the middle and primary schools have much increased. The municipalities have increased their allotments to primary education.

High schools.

104. There was a loss of two high schools during the year, and the total number of pupils receiving high education fell from 14,652 to 14,055. The Magistrate of Hooghly, where the decrease was most marked, attributes it to high prices, which compelled the poorer class of people to withdraw their boys from schools, and also to the general prevalence of fever, which greatly reduced the attendance. In Midnapore the loss was due to the year being exceptionally unhealthy.

The results of both the F.A. and the University Entrance Examination contrast very unfavourably with that in the preceding year.

In Burdwan, out of 88 boys who appeared at the F.A. Examination, only 26 were successful, against 34 out of 87 in 1892-93; in Midnapore only 9 passed out of 25, against 12 out of 30. The result of Hooghly is not known.

The following table exhibits the result of the University Entrance Examination as compared with that of the preceding year:—

Districts.	1892-93.		1893-94.	
	Number of competitors.	Number of successful students.	Number of competitors.	Number of successful students.
1	2	3	4	5
Burdwan ...	194	113	139	57
Birbhum ...	33	31	30	14
Bankura ...	81	36	67	15
Midnapore ...	25	25	23	15
Hooghly ...	233	155	210	100
Howrah ...	143	81	97	44
Total ...	709	441	566	245

The result, which was generally unsatisfactory, is believed by some of the Magistrates to be due to more difficult questions having been set at the last examination. The number of competitors was also much fewer in Burdwan and Howrah.

Middle schools.

105. The number of middle English and vernacular schools in the Division increased by 6 only, and the number of pupils attending them by 189. The result of middle scholarship examination was also bad. The subjoined table compares the result of the last two years:—

Districts.	1892-93.		1893-94.	
	Competed.	Passed.	Competed.	Passed.
1	2	3	4	5
Burdwan ...	412	253	401	185
Birbhum ...	97	60	112	75
Bankura ...	264	121	255	93
Midnapore ...	259	153	256	120
Hooghly ...	219	139	214	122
Howrah ...	121	97	117	72
Total ...	1,372	832	1,355	667

The Magistrate of Birbhum ascribes the bad result to the fact that English is more or less indifferently taught in these schools, but this reason cannot specially affect the result of the year under report, as compared with the previous year. The Magistrate of Midnapore attributes the bad result to the examination being held in the most unhealthy season of the year.

Primary schools.

106. The number of primary schools increased from 10,365 to 10,425 or by 60, but there was a loss of 823 pupils sustained by all the districts except Birbhum and Bankura, where there was an increase. The Magistrate of Midnapore attributes this to the prevalence of cholera and influenza towards the end of the year.

Except Howrah, of which the figures have not been furnished, the results of both the upper and lower primary examinations were satisfactory. The number of pupils who competed and passed at these examinations are given below:—

Districts.	Upper Primary.				Lower Primary.			
	1892-93.		1893-94.		1892-93.		1893-94.	
	Competed.	Passed.	Competed.	Passed.	Competed.	Passed.	Competed.	Passed.
1	2	3	4	5	6	7	8	9
Burdwan ...	477	238	521	261	1,310	478	1,159	680
Birbhum ...	224	159	242	178	679	283	747	392
Bankura ...	365	187	433	206	1,599	598	1,959	953
Midnapore ...	463	260	562	316	2,833	1,285	2,830	1,873
Hooghly ...	206	92	207	146	1,489	586	1,190	734
Howrah ..	99	75	109	64	509	90	476	278
Total ...	1,834	1,011	2,074	1,171	8,419	3,320	8,361	4,910

The rule of payment by result was largely given effect to in Birbhum and Bankura.

Female education.

107. Education among the females, it appears, made some advance. There were 407 schools attended by 8,116 girls, against 370 schools and 8,024 girls in 1892-93; besides 9,267 girls attended boys' schools. The increase was contributed to by all the districts. Fifty-seven girls from Burdwan, 20 from Birbhum, 87 from Midnapore, and 36 from Hooghly appeared at the Uttarpara Hitakari Sabha scholarship examination; the result is not known.

Muhammadan education.

108. There was a decrease in the number of Muhammadan pupils attending the various classes of schools, from 30,883 to 29,120. The decrease occurred in all the districts except Birbhum, which shows an increase. The decrease in Midnapore is said to be due to the year being unhealthy; no explanation has been given by other Magistrates.

The following statement shows the extent to which Muhammadan education has made progress in this Division:—

Districts.	Population.		Total number of pupils attending schools.		Number of Muhammadan pupils attending schools.		Ratio of Muhammadan pupils passed to total number of pupils.	
	Total.	Muhammadan.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9
Burdwan ...	1,391,880	267,224	46,947	46,326	6,747	6,482	14	13
Birbhum ...	797,833	169,752	24,043	25,060	4,638	5,348	19	21
Bankura ...	1,069,668	45,312	38,512	40,667	1,568	661	4	1
Midnapore ...	2,631,516	171,412	107,340	106,365	6,109	5,786	5	5
Hooghly ...	1,076,710	192,685	53,731	49,465	8,147	7,509	15	15
Howrah ...	721,211	152,806	32,922	31,304	3,674	3,334	11	10
Total	7,688,818	999,191	303,495	299,187	30,883	29,120	10	9

Roughly speaking, while the proportion of Muhammadans is 1 to 8 in this Division, the proportion of Muhammadan boys in schools is 1 to 11. But the proportion is much less in the middle and higher schools than in the primary schools, because, as stated elsewhere in this report, the Muhammadans of this Division are mostly agriculturists, labourers and traders.

The results of the several departmental examinations in which the Muhammadans competed last year were not satisfactory. In Burdwan one passed

the Entrance and five passed the middle scholarship examination, while 80 boys passed the primary scholarship examination. In Birbhum 64 boys received high education, and one passed the Entrance examination. Out of 266 pupils in the middle schools only two passed, while in primary schools there were 4,864 pupils, of whom 74 only competed successfully. In Bankura the result of the several examinations in which they appeared is reported to be poor.

In Midnapore, out of 108 boys in the high schools, four passed the Entrance examination, and out of 175 boys in the middle schools only one passed. Steps are being taken for the improvement of Midnapore Madrassa, the only middle class school specially maintained for Muhammadans in that district.

The Magistrates of Hooghly and Howrah have not specially reported on the progress made by the Muhammadans in their districts.

It is clear from the above figures that the number of Muhammadan pupils receiving high education is comparatively small, and of the large number of pupils receiving primary education a very few care to continue their studies further. The reasons for this have been explained before.

Education of Sonthals and other aboriginal races.

109. There are eight schools at Raniganj, as in the preceding year, for the education of miners' children. The number of pupils attending them fell from 202 to 189, and of these 108 were aborigines and 80 low-caste Hindus and Muhammadans. The pupils receive free tuition, and a monthly stipend of Rs. 8 is paid by Government to each guru.

Some of the managers of collieries have provided the patshalas with thatched houses. Mr. Agabeg, Manager of the Barakar Coal Company, continued to subscribe Rs. 3 a month for the support of a patshala and to take the same interest for it as in previous years.

The number of schools for the education of aboriginal races in Birbhum was the same as in the previous year, namely, 13. The number of pupils rose from 228 to 311. Thirty-one aboriginal candidates from 10 schools competed at the reward examinations and 22 passed. Eleven Sonthal pupils competed at the lower primary examination and 3 passed, and 2 of them obtained the scholarship reserved for Sonthals. Two Sonthals passed creditably at the upper primary examination. The rate of stipends has been increased from Rs. 3 to Rs. 5 a month.

The number of aboriginal pupils in Bankura increased from 979 to 1,179 during the year. The aboriginal races form 9·7 per cent. of the entire population; and the proportion of aboriginal pupils is 2·8 per cent. to the total number of pupils at school. The Wesleyan Mission is said to be doing its best for the furtherance of Sonthal education. There is a training school established with the express object of turning out trained Sonthal teachers. The results of the several departmental examinations were more satisfactory than in the previous year; one passed the upper and 23 the lower primary examination. In Midnapore the number of scholars belonging to the aboriginal tribes fell from 2,045 to 1,886; 10 of them competed successfully at the different scholarship examinations. In Hooghly, 52 pupils belonging to the aboriginal tribes known as Koras attended schools.

Special education.

110. A technical school was opened in Burdwan during the year; carpentry and blacksmith's work are the subjects taught in this school. It has made a fair start with 38 students in the workshop classes and 46 in the ordinary classes. A survey class was also opened in November last attended by 46 students. The school is maintained by the District Board, assisted by the Burdwan Municipality. There are 9 maktabs in this district for teaching Persian and Urdu to Muhammadan pupils.

In Birbhum there are four training classes for training pathsala gurus as teachers of primary schools. An attempt is being made in this district for opening a technical school.

In Bankura the four guru-training classes attached to middle schools and the muktari school opened in the preceding year have ceased to exist.

In Midnapore the number of training and industrial schools remained the same as in the previous year, viz. 5, and the number of pupils attending them rose from 207 to 224. An improved system of technical education is proposed to be soon introduced by the District Board into the Mahishadal Raja's technical school in the town of Midnapore.

In Hooghly there are 7 special schools, 29 maktabs teaching a little Arabic and Persian, 3 teaching Koran, 97 Sanskrit tols.

In Howrah the number of pupils attending schools teaching Arabic, Persian and Sanskrit rose from 291 to 321; the number of schools remained the same.

XXVII.—DISPENSARIES AND HOSPITALS.

111. The following additions to the number of dispensaries and hospitals existing in 1892-93 were made in the year under review:—Dhaniakhali, Haripal, Khanakul, and Mondlya dispensaries were started in the district of Hooghly; and two Irrigation dispensaries were established at Contai and at Panskura in Midnapore. The dispensaries at Dhaniakhali, Haripal, and Khanakul were opened by the District Board to afford relief in the unhealthy season of the year. The Mondlya Dispensary, which was established under Government order, in the Municipal Department, No. 240T.M., dated 22nd September 1891, is maintained from the proceeds of the Trust Fund created by the will of the late Dr. Bhola Nath Bose of Barrackpore. Its management will devolve on the District Board. This institution is at present located in a portion of the village school house and will remain there till the dispensary building is constructed. The Irrigation dispensaries at Contai and Panskura are suported from the Provincial revenue; 349 and 280 patients were treated at a cost of Rs. 769 and Rs. 589 in Contai and Panskura, respectively.

The total number of patients under treatment in the Division (both in-patients and out-patients) fell from 256,263 in the preceding year to 241,484 in the year under report. The total expenditure rose from Rs. 1,01,508 to Rs. 1,11,830. Government contributed Rs. 11,178 against 10,142, the rest being obtained from local sources. It is satisfactory to note that the amount of contribution in the shape of private subscriptions and endowments rose from Rs. 53,281 to Rs. 56,005.

Burdwan.

To the Burdwan Dispensary a separate female ward has been attached with an intelligent lady doctor of the Civil Hospital Assistant class, on Rs. 50 a month, in charge of it. Though the Railway Company has discontinued their subscription to the dispensary, still it continues to send passengers, especially those suffering from infectious and contagious diseases, to it. The unfairness of this arrangement has been pointed out to the Railway authorities. As reported last year, the Mankur Dispensary continues to be largely in arrears as regards realization of subscriptions. While inspecting the dispensary during my last cold-weather tour as Magistrate of Burdwan, I made some arrangements for the proper accommodation of the dispensary and raised subscriptions. The record of work done by the Burdwan Raj dispensaries at Burdwan and Kalna is good. The Chakdighi Dispensary is also well looked after. A temporary dispensary was opened at Dainhat by the local municipality for treatment of the malaria-stricken people of the neighbourhood. Three Municipal Commissioners, who are medical men, offered their services gratis.

Birbhum.

The record of work done by the Suri Dispensary is pronounced by the Magistrate to be excellent. Regarding the Rampur Hát Dispensary building, correspondence is still going on with the Railway authorities. The District Board has recently increased its grant to this dispensary which, as reported last year, continues to suffer from want of funds. Besides these two, there are private dispensaries at Hetampur and Kundala maintained by local magnates. The establishment of two dispensaries at Bolepur and Murarui, at the extreme south and extreme north of the district, is in contemplation.

Bankura.

The Dufferin Female Hospital at Bankura was started this year. Caste prejudices prevent people from largely resorting to it for the present. It is hoped that this will die appear in course of time.

Hooghly.

The most noticeable circumstance in respect of the dispensaries in the Hooghly district was the large increase in the number of out-door patients, from 40,410 to 52,734. This is owing to the prevalence of malarial fevers in the district.

Howrah.

The Howrah General Hospital continues to keep up its reputation of being a useful institution, and is highly prized by the European community. A proposal for placing its funds in the hands of the Treasurer under the Charitable Endowments Act is under consideration. The financial condition of the Ulubaria Dispensary is satisfactory. A cholera ward has been newly constructed and attached to the hospital.

Midnapore.

The establishment of two new dispensaries in this district has already been noticed. There was no noticeable change in the management of the other dispensaries in the district.

* Burdwan	
Birbhum	
Bankura	4
Midnapore	15
* Hooghly	13
Howrah	3
Total	44

Generally the dispensaries in this Division serve a very useful purpose. The people have faith in them, and flock to them in much larger numbers than they do in East Bengal. And as the whole Division suffers more or less from malarial fevers, the 44 dispensaries* of the Division supply a real want.

XXVIII—LIBRARIES.

112. There is nothing new to write under this head. No new library was started during the year. There are no public libraries in the two backward districts of this Division—Birbhum and Bankura. In the four other districts there are 24 libraries, but most of them are small.

Nothing has yet been done to examine the old correspondence at Midnapore. Assistant Magistrate, Mr. Platel, has promised to take up the work.

XXIX—MUSEUMS.

113. There are no museums in this Division.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

District Boards.

114. I recorded the following remarks as Magistrate of Burdwan on the District Board of that district:—

"The members of the Burdwan District Board have taken a laudable interest in their work, and I have received much help from their advice and opinion. I have not unoften changed my own view of a question after a friendly discussion with members of the Board in meeting. A great deal of useful work is unostentatiously done by the different committees of the District Board. Non-official gentlemen give us their time and services in these committees and help our work. And it is a still greater gain to the cause of administration that these non-official gentlemen are thus becoming familiar with administrative work, are taking a share in it, and are practically disposing of the proceeds of the road cess for the improvement of their native district."

Mr. Growse, Magistrate of Birbhum, remarks:—

"The District Board seems to have done its work smoothly and well during the year, but there is no doubt that it is difficult to get up any enthusiasm when the district funds are barely sufficient to keep existing roads in decent repair, and too small to allow of any new work of interest being undertaken."

Mr. Barrow, late Magistrate of Bankura, has left the following remarks:—

"Several members of the Board have taken an active interest in its affairs, and the public is especially indebted to the late Vice-Chairman, Babu Kuloda Prasad Mukherjee, and the present Vice-Chairman, Babu Mohesh Chandra Banerjee. Both these gentlemen have been unsparing in their exertions, and I consider that both are eminently fitted to hold such a post. In both road and educational affairs the district officer receives the greatest help from the members of the Board. Local self-government is so far a success, a stability and continuity being obtained which would be otherwise impossible."

Mr. Duke, Magistrate of Hooghly, cites a number of useful and important works done by the District Board within the year, and adds:—

"Attendance at the Board's meetings is sometimes rather deficient, but on the whole the members cannot be accused of want of interest. After the annual budget has been settled, the Board's functions are in a great measure formal, so far as regards its main heads of expenditure, and the petty matters of administrative detail which come before it from time to time are hardly such as to interest the majority of members."

Mr. Grierson, late Magistrate of Howrah, says that "the District Board did good work during the year," and Mr. Allen, Magistrate of Midnapore, remarks that "there was a fair attendance of members at the meetings of the District and Local Boards."

I have nothing to add to these remarks. Local self-government has been a success, and it is, as I have said before, a distinct gain in the cause of good administration to secure the co-operation of representative non-official gentlemen in our administrative work.

Local Boards.

115. I remarked, as Magistrate of Burdwan, that "Local Boards have not much work made over to them yet," and that "no sanitary improvement of villages is possible unless more money is provided."

Mr. Barrow made much the same remark of Bankura, and said, "the two Local Boards of Bankura and Vishnupur are not given much opportunity to make themselves useful, still they are of some help, and as time goes on, and funds are placed at their disposal, I am sure they will prove themselves useful adjuncts to the general administration."

Mr. Growse would abolish the Local Boards because they are of little use, but Mr. Duke writes that "the Local Boards carried on their duties successfully as far as their funds allowed." All these remarks show that the utility of Local Boards is limited by the poverty of their funds, and the limited scope of their work. When we begin the work of village sanitation, as we must do sooner or later, the services of Local Boards will be more marked, and indeed indispensable. And this brings me to the subject of Village Unions or Union Committees.

Union Committees.

116. Mr. Growse would introduce Union Committes in villages, and would have nothing between these Committees and District Boards.

Mr. Duke, of Hooghly, makes some thoughtful remarks about beginning work from the village, and the remarks are worth quoting. "The Local Boards exhibit local self-government in this country from its weakest side as a tree without roots. We have cut the branch in full growth—leaves, flowers and fruits—and have stuck it in the ground with the expectation that it will put out roots for itself. But if it is ever to succeed, the propagation must begin in the village, or at any rate in a much smaller area than that of the subdivision."

The action which I took as Chairman of the Burdwan District Board to create smaller areas of administration than a subdivision, will appear from the following remarks which I recorded on the subject, and which the present Magistrate of Burdwan has embodied in his Administration Report:—

"In a recent resolution on Local Self-Government, the Government of Bengal has expressed its intention of creating village unions experimentally in some places. With a view to making this possible, I have encouraged the villagers in three selected thanas (Burdwan, Kalna, and Katwa) to form themselves into committees. They are not 'unions' yet, and do not possess the legal powers which can be conferred on unions by the Government. They have not legally the power of reserving a tank for drinking purposes, or effecting other improvements which the chapter on village unions provides for. The committees have formed themselves merely with the object of becoming familiar with their village works and taking an interest in them. In course of time they may become fit to be entrusted with the powers contemplated by the Act. The villages of Burdwan thana have been grouped into six such village committees, those of Kalna into 15, and those of Katwa into 11 committees."

"If we desire to effect sanitary improvements in villages, to reserve tanks for drinking purposes, or to remove obstructions to drainage in villages, we

can only effect this through such village committees or village unions, acting under the direction of Local Boards. The villages within the limits of an average thana can be grouped into about ten unions; each subdivision will thus have thirty or forty such unions, and they can be conveniently managed by the Local Board of the subdivision with the help of an executive sanitary officer. Funds must be provided for the pay of such an officer under each Local Board, and also for sanitary improvements in each union; and it will be possible then to insist on improvements in each village under the powers which unions will possess under the law. The vast work of improving the sanitary condition of the Bengal villages lies before us, and we can only make a beginning in the work under the system indicated above. And until we adopt the system, provide funds for sanitary improvements, and create unions with the powers contemplated by the law, it is idle to talk of the inefficiency of the District Boards or the apathy of villagers."

Municipalities.

117. Birbhum has only one municipality,—at Suri, the district headquarters. The Magistrate writes that the Commissioners took interest in their work, that the assessment was revised, the suggestions of the Sanitary Commissioner partly carried out, and a tank for drinking purposes was reserved. "Altogether," the Magistrate writes, "I think I can discern efforts towards what is right and an appreciation of duty by many of the Commissioners."

The Magistrate of Bankura reports that the municipalities of Bankura, Vishnupur, and Sonamukhi have all done fairly well.

The Magistrate of Hooghly makes detailed remarks about the several municipalities in his district. The town of Hooghly and Chinsura has been well administered, but its sanitary condition cannot be improved until the Commissioners consent to levy the full rate of taxation. In Serampore, the drainage scheme has been completed so far as the main channel is concerned, but the balance of the loan taken, which should have been applied to complete the internal drainage, was spent in other directions. In Uttarpara factious spirit runs high. Generally speaking, assessments in nearly all the municipalities in the district are, the Magistrate thinks, inadequate, and progress is therefore impeded.

The Magistrate of Howrah reports that sanitation in Howrah is deplorable. But the Commissioners have lately raised the latrine-tax, and have applied for a loan of Rs. 50,000 for sanitary improvements.

The Magistrate of Midnapore says there are signs of improvement in his district. An energetic Chairman has been elected in Midnapore. Ghatal and Kharar have invested in iron latrines, and Tamluk has improved, as witnessed by the Deputy Sanitary Commissioner, who visited the place.

In Burdwan, I inspected all the municipalities during the last cold season and found them on the whole as well and creditably managed as our Government offices and departments. The slow progress in sanitary improvements is considered the weak point in municipal administration; but officers who were District Magistrates ten or twelve years ago, know that the progress was not quicker when we were Chairmen. Dirty tanks are private properties, and cannot be filled up or cleaned without a great deal of difficulty, and schemes of drainage require time to prepare and money to carry out. Sometimes the schemes prepared locally are rejected by the Sanitary Board, and at other times schemes approved by the Sanitary Board are so elaborate that it is impossible to carry them out. Dainhat is a small municipality in Burdwan district, and cannot spare more than Rs. 500 a year for drainage improvements; but the scheme which has been prepared for the town would require an expenditure of over Rs. 20,000.

It is necessary that we should constantly direct the attention of Municipal Commissioners to effect sanitary improvements, and that we should insist on these improvements being effected. But often, when we blame Municipal Commissioners, it is in fact their poverty and not their will that consents to the existing state of things. It is my experience that when we make reasonable and practicable suggestions, and indicate the way in which improvements should be effected, Municipal Commissioners show an anxious and sincere desire to accept and act on our advice. And an important

circular of the Bengal Government, No. 10T.M., dated 1st July 1893, imposes upon us this duty of helping municipal administration, and removing its defects, as senior inspecting officers help us in removing the defects of our offices.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

118. I have nothing to add to what was reported by Mr. Power last year under this head.

Mr. Vincent, the Officiating Magistrate of Burdwan, writes:—"Unless Muhammadans take more interest in education, the posts they will obtain must decrease; the education returns of the district show that the number of Muhammadan boys at the various schools is decreasing."

Mr. Cornish, Magistrate of Bankura, is of opinion that "as the Muhammadans form only 4·2 per cent. of the total population" in his district, "they clearly get more than their share of Government service."

Mr. Growse, of Birbhum, reports "many apprentices have been admitted into the office during the year, but a single Muhammadan candidate appeared among them. Amongst the menials the number of Muhammadans, however, is disproportionately large."

Mr. Duke, of Hooghly, writes that the Government order on the subject of considering the claims of Muhammadans when vacancies occur, are duly observed. But the majority of the Muhammadans in the district belong to agricultural or trading classes, and even the small number of Muhammadans who hold Government appointments in his district are, with very few exceptions, residents of other districts. In Howrah, the Magistrate writes, there is no demand among them for education. In fact the Muhammadans in this Division are mostly cultivators, labourers and traders.

XXXII.—POST OFFICE AND TELEGRAPH.

119. There was nothing noticeable in the working of the Post Office and Telegraph during the year. Three cases of embezzlement of postal money occurred. A postman of the Sakulipur Post Office in Birbhum misappropriated the money entrusted to him for payment of money-order: he was convicted and sentenced to seven months' rigorous imprisonment at the Sessions. A sub-postmaster in Bankura was charged with misappropriation of a large sum of money invested in the Savings Bank: he was convicted by the Sessions Judge, but was acquitted by the High Court on appeal; the third case was that of a patshala guru in charge of a branch office in Midnapore, who misappropriated the value of a money-order and some Savings Bank deposits; he was convicted and sentenced to four years' rigorous imprisonment by the Sessions Judge: the amount embezzled has been recovered from his sureties.

No complaint against the postal administration was heard during the year.

Nothing has been done to remove the inconvenience felt at Suri, owing to the telegraph office being kept closed from 9 P.M. to 9 A.M. on week-days and on Sundays.

The Magistrate of Hooghly notices the want of a telegraphic communication with the Jahanabad subdivision. It would be desirable to have a line constructed from Tarakeswar, but the people of Jahanabad refused to give any guarantee for opening the office.

The telegraphic line between Suri and Sainthia in Birbhum was interrupted on four different days, but the cause could not be ascertained.

XXXIII.—ZAMINDARI DAK, FAIRS AND POUNDS.

120. The confusion resulting from the transfer of the work of collection of the zamindari dak cess to Collectors, and the change of account keeping from the basis of the

Zamindari Dák.

official to that of the calendar year, reported in paragraph 108 of the previous year's report, was brought to the notice of the Board of Revenue during the year. I have been informed in reply that Mr. Slack is considering the matter.

The accompanying statement B shows the demand, collection and balances, as also the cost on account of the zamindari dák of the six districts in this Division. The total demand for the year was Rs. 47,892 and the collections Rs. 44,847. The percentage of total collections on the total demand of the Division was 93·7. The percentages were above 95 only in the districts of Howrah and Birbhum; in the other districts they fell below 95; in Bankura it was less than 90, being 89·3.

The total expenditure amounted to Rs. 41,778; the balance left at the end of the year was Rs. 35,334.

The Magistrates of Burdwan and Birbhum report that the zamindari dák service was well managed during the year. No inconvenience or difficulty has been represented by any of the district officers regarding the dák service.

Fairs.

121. The important fairs in the district of Burdwan were those held at Agradip, Bairagitala, Dadhia, and Uddhanpur, in the Katwa subdivision; 15 to 20 thousand people assembled on the occasion of the mêlas. Proper sanitary and police arrangements were made in these mêlas, and there was no outbreak of any disease or disturbance.

The principal gatherings in the districts of Bankura and Midnapore were those at Debar and Hatnagar in the subdivisions of Vishnupur and Contai, respectively. These were free from any epidemic diseases, and the cost of sanitary arrangements at Hatnagar was paid by the District Board. There was no regular fair in the district of Howrah.

The Bakresvar, Kenduli, and Tarapur fairs in Birbhum, and those at Tarakeswar, Mahes, and Tribeni in the district of Hooghly, were the most important in the Division. The District Board of Birbhum took precautions against the spread of disease, and the police there kept order at the fairs. Temporary wells were sunk for drinking-water in the fair at Bakresvar. The Magistrate, who visited this mêla with the District Superintendent of Police and the medical officer, remarks that perfect sanitary arrangements are only possible, if the provisions of section 34 of Act V of 1861 be extended, and a proper staff of mehters entertained to look after the trenches.

At Tarakeswar, in the district of Hooghly, about 100,000 pilgrims assembled at the Siva Gajan and about 20,000 at the Siva Ratri. At the instance of one of the rival claimants after the death of mahant Madhavgiri, Mr. Gordon Leith was this year appointed Receiver by the High Court for the purpose of collecting the offerings made at the shrine. The sanitary arrangements made there were supervised by the Civil Medical Officer and the Subdivisional Officer of Serampore. There was no breach of the peace, nor any criminal cases in these fairs.

The Rath Jatra festival at Mahes and Ballabhpur in Serampore was held on 15th and 22nd July 1893. The mela lasted for a fortnight, and about 50,000 people assembled. The ground was very heavy owing to excessive rain, and there was great difficulty in pulling the cars. The ceremony, which usually requires only an hour or so, was protracted over many days. An untoward accident also occurred. One of the cars is of novel construction, the wheels and framework being of iron made by an English firm. When once started, it runs with less friction, and consequently more momentum than an ordinary wooden car. It was pulled out of a slough after a great struggle, and having acquired an unusual impetus, ran down a slight incline, where it got beyond control, and overtook and upset the Subdivisional Officer, Mr. Thompson, and ran over him. He fortunately fell between the wheels and escaped with slight injuries.

The Uttarayan and Baruni fairs were held at Tribeni. The gathering at each of them numbered from 25,000 to 30,000. The sanitary and police arrangements on these occasions were carried out by the Municipal Commissioners of Bansberia and the District Superintendent of Police.

Pounds.

122. The cattle-pounds remained under the administration of the District Boards and Municipalities during the year. The subjoined statement will show the number of pounds and collections made in the last two years:—

Districts.	Number of pounds in—		Collections in—	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
			Rs.	Rs.
Burdwan	197	200	15,313	14,074
Birbhum	69	71	7,743	7,946
Bankura	34	34	2,057	2,227
Midnapore	114	125	9,172	12,286
Hooghly	90	93	9,080	10,250
Howrah	37	38	2,973	2,466
Total ...	541	561	46,338	49,249

Some of the pounds in the district of Burdwan were inspected by the Magistrate and Subdivisional Officers when on tour, and a Pound Inspector was employed in the Sadar subdivision. In Birbhum the Pound Inspector was employed to see that the impounded cattle were properly housed and fed, and Sub-Inspectors of Schools also visited the pounds.

The increase in the number of pounds in Midnapore is due to branch pounds having been separately settled during the year as so many main pounds. The large increase in collection in the district was due to the fact that a considerable amount of outstanding balance of previous years was realized during the year. The Collector of Hooghly writes:—

"A far stricter supervision and control should be exercised over the izardars of pounds, who have the reputation of overcharging the owners of impounded cattle, although no definite complaint was made. The old system of accounts was faulty, and provided very slight means of check. The forms which have just been introduced will provide greater facilities for check and control."

There was increase in revenue in all districts except in Burdwan and Howrah, where there was decrease.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

123. Besides the *Hitakari Sabha* of Uttarpara, which continues to help in the spread of female education, there are rate-payers' and other local associations in Hooghly, Serampore, Uttarpara, Konnagar, and Baidyabati. They do not generally concern themselves with politics, but occupy themselves with criticising local institutions like the municipalities. The Magistrate of Hooghly remarks that they require to be educated before they can hope to guide Municipal Commissioners.

The Hooghly National Muhammadan Association devotes itself to advancing the interests of Muhammadans.

There are many Hari Sabhas—Hindu religious institutions—in Burdwan and other districts. Similarly, there are Brahmo Somajas in all districts.

The Indian Association has its branches in Midnapore and other places. These branches convene meetings only when there is some special work to do—either to send a delegate to the National Congress or express the public feeling on questions which excite interest. The agitation is confined to the educated classes.

The Society for Prevention of Cruelty to Animals continues to do useful work, and is said to have worked well during the last year.

Public feeling and the public press.

124. In Burdwan a Hindu married girl of ten years was baptised without the knowledge of her husband. The latter applied to the Judge to be declared guardian of his wife, and while the case was pending, the girl was carried away by her husband's party. The case caused considerable excitement in the

town, and the men who used force were convicted by the District Magistrate and fined.

No other local matters of any interest have been reported. The agitation against cow-killing shows no signs of having actively extended to this Division, but Mr. Duke, Magistrate of Hooghly, reports:—"There are, however, numerous small indications of unrest between Hindus and Musalmans. Whereas until a few years ago they lived side by side with little or no feeling about each other, it is now apparent that their relations are less cordial than they were, and the more bigoted Hindus influence their co-religionists to restrict their dealings with Muhammadans in all relations of life. On the other hand, there are signs that the Musalmans are becoming exceedingly touchy and ready to construe everything that happens into an affront to their religion, and an attempt to lower their status."

I do not think this want of cordiality has spread in villages among the masses, or that it is observable anywhere except among a very limited class in one or two towns. But nevertheless, in so far as it exists, it is a matter for regret. It is needless to enquire how this feeling has been created within the memory of the present generation—I may almost say within the last ten or twelve years. But it should be the object of our administration to heal this difference and division. The widening of the difference will not be beneficial either to the Hindus or the Muhammadans, and may lead to consequences which we cannot now foresee. Those who foster this difference and division are adding to the difficulties of the administrative work in India.

In regard to other matters, the educated classes in districts receive their opinions from Calcutta. The subjects which excited interest and were discussed within the year were—(1) the Mufassal Municipal Bill, (2) the financial crises of Government and the grant of exchange compensation to European officials, (3) exclusion of cotton duties from the Tariff Act. With regard to the Opium Commission, educated men know well enough that it will effect no change in our excise policy.

The *Burdwan Sanjibani*, published in Burdwan, has a small circulation. It is edited by a pleader, and is moderate in its tone. The *Bankura Darpan*, published in Bankura, has some circulation in that district, owing to the official information it conveys. Two papers—one a weekly, the *Ulubaria Darpan*, and the other a fortnightly—are issued from Ulubaria subdivision, but their circulation is very small and they are not of importance.

The great majority of the educated people of this Division read the Calcutta papers, and my predecessor, Mr. Power, in his annual report for the year 1891-92, quoted with approval some remarks which I made about these Calcutta papers. I reproduce those remarks here:—

"The educated classes read the *Statesman*, the *Bengali*, the *Hindu Patriot*, the *Indian Mirror*, and the *Amrita Bazar Patrika*, and other Calcutta journals. The majority of these papers write in a temperate style, and with a desire to criticise public measures with fairness and justice, and when their criticism is unfair and violent, it often proceeds from an ignorance of facts and from mistaken views of the scope of administrative measures. An improvement in the tone of criticism is observable year by year, and the improvement will go on as the people obtain an increasing share in the work of administration, and understand its scope and its difficulties. The Press Association, which has been newly established, will do much good if it can secure correct information on matters which excite the public mind from time to time. And if a similar Association were formed among the European journals of this country, with a view to moderate and improve their tone with respect to the people of the country, and to work in harmony with the Indian journals and their Association, much good might be effected and much angry writing on both sides avoided."

I still hold, as I held two years ago, that the tone of the Native Indian press is likely to improve if the tone of the Anglo-Indian press is improved. The Native Indian press is a borrowed institution, and Native Indian journalists unconsciously imitate the tone of their Anglo-Indian brethren. It is unfortunate that the latter indulge in ridicule and contempt when writing of the people and their aspirations. And it is unfortunate that the former reply in an angry and immoderate tone.

Differences of opinion there will always be. In the matter of administration, the Native press will always plead for obtaining an increasing share for the people of the country, and the Anglo-Indian press will always write on the unwisdom of allowing them that share. This roughly speaking is the main difference in opinion, and represents the two sides of nearly every important question that is discussed. . Discussions will therefore continue, but it is possible to continue them without the bitterness which characterizes them now. Every journal which adds to the bitterness of these discussions, adds to the difficulties of administrative work in India.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

125 The statement showing the character of officers is herewith submitted. I have quoted the remarks left by Mr. Power, and I have nothing to add to them, as he consulted me when he noted the remarks. Mr. Power also desired me to bring to the notice of the Government the excellent work done during the year by the following officers:—

Among District Officers—

Mr. G. A. Grierson. Mr. F. W. Duke.
Mr. D. B. Allen. Mr. J. Windsor.

Among Sudivisional Officers—

Mr. J. E. Webster, Raniganj. | Babu Jaga Bandhu Bhattacharjee, Contai.
Babu Bhupati Chakraverti, Ulubaria.

Mr. Power also desired to bring to notice the excellent services of Babu Pran Kumar Das, Personal Assistant to the Commissioner of Burdwan, and of Babu Mohananda Gupta, who is specially employed on "drainage" work.

XXXVI.—CONDUCT OF ZAMINDARS.

126. The conduct of zamindars continues to be generally satisfactory in all the districts of the Division. The following facts deserve special mention.

Burdwan. The administration of the Burdwan Raj estate by the able manager, Raja Bun Behari Kapur, under the Court of Wards, has been satisfactory during the year under report, and no complaints were received from the tenants in any part of the Raj estates.

Birbhum. The district officer of Birbhum makes favourable mention of Raja Rani Ranjan Chakrabarti, Bahadur, of Hetampur, the largest resident zamindar of the district. He is in good terms with his tenantry and is a loyal and peaceful gentleman. On the other hand, a few petty cases of disagreement between raiyats and zamindars are reported from this district.

Bankura. There was nothing special to report.

Hooghly and Howrah. The Uttarpara zamindars are said to exert the rights which they claim over their raiyats without coming to Courts of Justice. In Howrah district there were a few riots in the early part of the year. "The cause of this disturbance," writes Mr. Duke, Collector of Hooghly, "lies in the reclamation of land by the Rajapur drainage scheme. The Uttarpara zamindars wish to raise the rents of raiyats who have been benefited by the reclamation without going through the proper course of law."

Midnapore. With regard to the strained relations reported in the previous year between Messrs. Watson and Company and their raiyats, Mr. Allen writes:—"A settlement was at last come to in January, soon after my return to the district. We trust it will be permanent." But there has been no improvement in the relations between zamindar Narahari Jana of Changichak and his tenants. The zamindar's naib was murdered, and the tenants who were sent up for trial were acquitted. The principal cause of dispute was, as usual, the rate of enhancement, and the police had been deputed by Mr. Allen's predecessor to help the zamindar to enforce his decrees and getting his dues. The question of enhancement has since been referred by the Judge to arbitration, and Mr. Allen adds:—"Meanwhile I have declined to give the landlord again the assistance of the local police. In such cases they generally do more harm than good."

Kumar Narendra Lall Khan of Narajole in Midnapore has offered Rs. 30,000 for a bridge on the road connecting his village with Midnapore town.

XXXVII.—GENERAL REMARKS.

127. As I have joined this Division since the expiry of the year, I have very few general remarks to make. The year was one of good crops, and cultivators reaped a good harvest all over the Division (except in some parts of Midnapore) after one or two years of bad crops. The excessive rainfall was followed by malarial fevers which raged badly in the winter months.

I have noted above that the work of the police requires improvement; that the certificate procedure admits of improvement; that sanitary measures are required in towns and villages; and that the local self-government system requires extension so as to make sanitary improvements possible.

Municipal elections took place all over the Division during the year, and the people manifested a great deal of genuine interest in the elections. On the other hand, many of the electioneering tricks known in other countries were adopted in some places,—specially in the Hooghly district, and notably in Uttarpara town.

The number of khas mahals is very large in Hooghly, and imposes a great deal of work on the Collector. But the largest khas mahals are in Midnapore, which is the heaviest district in the Division. The number of estates under the Court of Wards is also large in Midnapore, and our administration of some of the estates which we have managed within the last eight or ten years has not been altogether successful. Measures are adopted along the coast line in Midnapore to prevent the manufacture of illicit salt, but not with uniform success.

The tauzi accounts have been found to be in disorder in Burdwan and Hooghly, and special establishments have been sanctioned to adjust the accounts. Some court-fee stamps sent to Bankura about the close of the year were lost, and a special enquiry has been made on the subject in the current year.

The Tenancy Act is appreciated. The khas mahals belonging to the Burdwan Raj estate are under survey, and many private parties, zamindars and cultivators are filing applications for survey and record of rights, specially in Midnapore. The occupancy raiyat, whose right to his lands is now sufficiently protected, is not adequately protected, so far as his homestead is concerned, and some legislation in this direction seems to be necessary.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE ORISSA PORTS FOR THE YEAR 1893-94.

No. 2173Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 26th September 1894.

RESOLUTION.

READ—

The Administration Report of the Orissa Ports for the year 1893-94.

The following table shows the receipts of the ports as compared with those of the previous year :—

PARTICULARS.	1892-93.	1893-94.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Port-dues on vessels	3,392	2,095	.....	1,297
Ditto mail steamers	10,157	11,914	1,757	.....
Miscellaneous	71	115	84	.....
Total receipts	13,620	14,124	504	.....

The increase was due principally to the increased receipts from port-dues on steamers trading with False Point. The tonnage of the steamers visiting that port was greater than that of last year, and hence the increase in the amount of dues collected.

2. The disbursements of the year under report, as compared with those of the previous year, are summarized in the following table :—

PARTICULARS.	1892-93.	1893-94	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Establishment	9,301	10,971	1,670	.....
Light-house establishment	3,381	3,209	.....	172
Vessels and boats establishment	2,524	2,480	.....	44
Dockyard services and supplies	6,510	6,958	448	.....
Miscellaneous	1,015	1,878	863	.....
Other charges	226	302	76	.....
Total disbursements ...	22,957	25,798	2,841	.....

The increase is due mainly to the establishment charges at False Point being in excess of those of the previous year, to the increased expenditure incurred at that port on account of dockyard services and supplies, and to increased miscellaneous charges at the port of Balasore. The increase in establishment charges at Balasore was due to the payment of furlough and exchange compensation allowances to the Port Officer, while that under the head "Dockyard services and supplies" was caused by the supply of new buoys instead of old ones, which have been condemned.

3. The following table shows the number and the tonnage of the vessels that entered and cleared during the year as compared with those of 1892-93 :—

	Year.	Entered.		Cleared.	
		No.	Tonnage	No.	Tonnage.
False Point	1892-93 ...	56	74,559	55	74,552
	1893-94 ...	51	79,842	50	78,368
Balasore	1892-93 ...	339	82,019	339	81,556
	1893-94 ...	313	82,133	320	80,584
Puri ...	1892-93 ...	20	26,603	20	26,603
	1893-94 ...	16	20,447	16	20,447

Altogether 380 vessels entered the ports during the year, and out of these 295 were steamers, all of which were engaged in the coasting trade. Of the 85 sailing vessels, 4 were engaged in the foreign trade and 81 in the coasting trade.

Though there was a decrease in the number of vessels that entered into and cleared from the port of False Point, their tonnage was greater than that of the vessels which entered and cleared in 1892-93.

There was also a decrease in the number of vessels that entered into and cleared from the port of Balasore. There was, however, very little difference in the tonnage.

4. The following statement shows the value of the trade of the ports during the years 1892-93 and 1893-94 :—

	Private trade.		Government stores.		Total.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
	1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Exports	76,95,091	62,97,625	364	5,890	67,95,455	63,03,515
Imports	65,95,496	49,50,125	2,01,328	2,31,412	67,96,824	51,81,537
Total ...	1,42,90,587	1,12,47,750	2,01,692	2,37,302	1,44,92,279	1,14,85,052

The decrease in the private trade is attributed to the poor local crop of rice and to diminution in the stocks sent down the Mahanadi for export, in consequence of their diversion in the Bombay direction through the competition of the Bengal-Nagpore Railway.

5. A weekly steamer service was maintained throughout the year between Calcutta and Chandbally by the India General Steam Navigation Company and the Rivers Steam Navigation Company. The steamer *Pilot* belonging to Babu Badya Nath Sahia, which was plying between Calcutta and Chandbally, ceased to run to the latter port since April 1893. The *Seagull* and the *Oorya* made regular weekly trips from Calcutta to Chandbally. The *Curlew* and the *Bassein*, belonging to the India General Steam Navigation Company, also occasionally visited the latter port. During the pilgrim season of July and August 1893, other steamers, viz., the *Kasara*, the *Kistna*, and the *Kotoria*, visited the port, and Chandbally-trading vessels made double trips weekly to Calcutta with pilgrims. The steamer service between Calcutta and Balasore was kept up by the *Bassein* only.

Communication between Cuttack and Chandbally was kept up throughout the year by the canal steamers and cargo-boats of the India General Steam Navigation Company and the Rivers Steam Navigation Company. A bi-weekly canal service was carried on by the former Company between Cuttack and Balasore in conjunction with the coast canal service from Calcutta.

6. There was no accident to the tower and subsidiary lights of Shortt's Island. The Balasore light at Chandipur is visible at a distance of ten miles, and is in good order.

7. The channel buoys of Chandbally were all intact, and were overhauled; those of Balasore were painted and overhauled.

8. The channels of the Brahmini and Byturni rivers gave rise to no inconvenience. There has been no improvement in the channels of the Burabalong river; they can be used by vessels of light draught only during high tide.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG FOR THE YEAR 1893-94.

No. 2181Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 27th September 1894.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Chittagong for the year 1893-94.

Financial.

THE financial position of the Chittagong Port Fund on the 31st March 1894, is shown in the following statement:—

	Rs. A. P.		Rs. A. P.
Opening balance on the 1st April 1893	38,228 12 11	Expenditure during the year 1893-94	60,516 3 8
Receipts during the year ...	77,584 1 4	Balance on the 31st March 1894	55,291 10 7
Total ...	1,15,807 14 3	Total ...	1,15,807 14 3

Shipping.

2. The subjoined table shows the number and tonnage of the vessels which visited the port during the year, as compared with the figures of the two previous years:—

		1891-92.		1892-93.		1893-94.	
		Number.	Tonnage.	Number.	Tonnage.	Number.	Tonnage.
1		2	3	4	5	6	7
European vessels trading with foreign ports.	Entered	40	41,348	26	39,926	17	30,272
	Cleared	34	45,469	27	41,028	15	26,694
Native vessels trading with foreign ports.	Entered	1	89	11	1,824	17	2,572
	Cleared	2	225	2	187	.....	.....
Vessels trading with home ports.	Entered	717	204,629	734	211,362	626	202,030
	Cleared	734	202,086	762	213,357	617	208,885

Of the 15 vessels which cleared for foreign ports during the year under review, 10 were bound for the United Kingdom, three for Mauritius, one for Trinidad, and one for Port Said.

Foreign trade.

3. The total value of the foreign trade during the year was Rs. 90,14,997, of which Rs. 24,10,148 were under imports. The nature of the trade will appear from the following

statement, which shows an increase, compared with the previous year, of Rs. 1,83,608:—

	1892-93.		1893-94.		Increase.		Decrease.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.

All other articles	.....	39,718	.....	15,91,651	.....	15,52,933	.....	.....
Total	.....	4,29,849	.....	24,10,148	.....	19,80,299	.....	.....
Total foreign trade	.....	88,31,389	.....	90,14,997	.....	1,83,608	.....	.....

Coasting trade.

4. In the coasting trade, both the exports and imports increased. The total trade was valued at Rs. 1,47,73,960 against Rs. 1,35,29,721 of last year, the increase amounting to Rs. 12,44,249. This is wholly accounted for by an increase of Rs. 14,32,848 under the head "Treasure," probably mainly required for expenditure on the Assam-Bengal Railway.

Jute trade.

5. The quantity of jute shipped at Chittagong during the year under review was 33,762 tons, against 47,549 tons in the previous year.

Grain trade.

6. The quantity of grain, including rice, exported during the year, amounted to 8,455 tons, showing a decrease of 10,244 tons, as compared with that of the previous year. This was due to the price of grain in the local market having been very high, which restricted shipments. Of the quantity exported, 3,552 tons went to home ports, and 4,903 tons to foreign ports. The grain exported to home ports consisted chiefly of paddy and rice. The average value of rice exported to foreign ports was Rs. 5-2 per cwt.

Tea trade.

7. The total quantity of tea exported amounted to 1,119,426 lbs., being 40,969 lbs. greater than that of the previous year. The amount exported to foreign ports was 460,807 lbs. showing an increase of 357,439 lbs. as compared with that of last year.

Salt trade.

8. The quantity of salt imported during the year was 13,301 tons, showing a decrease of 904 tons as compared with that of the previous year. This was due to a large stock remaining in hand at the beginning of the past year. The value, however, of the quantity imported shows an increase of Rs. 62,325 owing to enhanced rates, presumably due to the fall in exchange.

Oils.

9. The imports of oil from foreign ports increased in value by Rs. 3,65,041, and those from home ports by Rs. 35,111. The total value of oil imported was Rs. 6,30,861, while the value of the exports amounted to Rs. 60,365 only. The total value of mineral oil imported was Rs. 4,72,042.

Piece-goods and other articles.

10. The value of piece-goods imported from home ports shows an increase of Rs. 4,12,291. The value of jute sent down from Narayangunge decreased by Rs. 2,50,637. Cotton shows a decrease of Rs. 2,80,698, which was due probably to the quantity obtained from the Hill Tracts for exportation having been less than that of the previous year.

Port appliances.

11. The appliances of the port and the lighthouses at Norman's Point and Kutubdea are reported to have been kept in good order during the year. The depth of water in Track No. I decreased by one foot, and that in Track No. II by 2 feet

9 inches, while the depths in Track No. III, Track No. IV, and Track No. V remained the same.

Earnings and expenditure of the *Gekko*.

12. The earnings of the steam-tug *Gekko*, maintained by the port, amounted to Rs. 7,046 only, whilst the expenditure on maintaining that vessel, exclusive of Rs. 27,750 for interest and sinking fund, aggregated Rs. 15,541. There was, however, a set off to the extent of Rs. 5.000, being the estimated value of services performed for the port for which no charge was made.

Health of the shipping.

13. The health of the shipping was good compared with that of the previous year. Thirty seamen were admitted into hospital against 37 in the year before. Of this number 25 were discharged, three died of cholera, one of fracture of the skull, and one of aneurism. There were no cases of scurvy or disease arising from bad or insufficient food.

Working of the Pilot Service.

14. The state of the Pilotage Fund is shown in the subjoined table:—

	Rs.	A.	P.		Rs.	A.	P.
Balance on the 1st April 1893 ..	3,962	7	6½	Disbursements during the year 1893-94	11,463	7	6
Receipts during the year 1893-94	14,842	11	3	Balance on the 31st March 1894	7,341	11	3½
Total ..	18,805	2	9½	Total ...	18,805	2	9½

The working of the Pilot Service is stated to have been satisfactory, no accidents having occurred to ships in pilotage charge.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Govt. of Bengal.

WORKS OF PUBLIC UTILITY CONSTRUCTED DURING THE YEAR 1893 FROM PRIVATE CONTRIBUTIONS.

No. 4865M.P.I.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Mis. Pub. Impts.

Dated Calcutta, the 3rd October 1894.

RESOLUTION.

READ—

Statement of works of public utility constructed by private individuals in the several districts in Bengal during the year 1893, and statement of similar works constructed during the year 1892 and the Resolution thereon.

REMARKS.—The cost of works of public utility constructed during the year 1893 amounted to Rs. 3,95,620-6, of which the following is a distribution:—

		No. of works.	Cost. Rs. A. P.	Rs. A. P.
I.—Works costing Rs. 500 each and upwards.	Public buildings ...	4	74,750 0 0	
	Roads	5	4,980 0 0	
	Bridges	4	8,040 0 0	
	Embankments or bunds	1	1,500 0 0	
	Ghats	3	5,000 0 0	
	Tanks	172	1,67,792 0 0	
	Wells	11	11,400 0 0	
	Irrigation channels ...	3	13,000 0 0	
				2,86,462 0 0
II.—Works costing less than Rs. 500 each ...		...	1.09,158 6 0	1,09,158 6 0
Total ...		203	.....	3,95,620 6 0

2. The following statement compares the two classes of works under reference done in 1893, with those of the two previous years, with the result that the outlay in 1893 is less than that of 1892 by Rs. 45,786-11-9, but exceeds that of 1891 by Rs. 1,31,135-5-9:—

CLASS OF WORK.	1893.	1892.	1891.
1	2	3	4
	Rs. A. P.	Rs. A. P.	Rs. A. P.
I. Works costing less than Rs. 500 each.	1,09,158 6 0	1,27,242 5 6	81,840 0 3
II. Works costing Rs. 500 each and upwards.	2,86,462 0 0	3,14,164 12 3	1,82,645 0 0

3. The following works deserve special notice:—

Public Buildings.—Under this head the contributions amount to Rs. 74,750, and show a considerable increase over the figures of last year. Of this sum

Babu Sewbux Bogla of Cotton Street, Calcutta, and Sir Dinshaw Manikji Petit of Bombay, respectively, contributed Rs. 30,000 and Rs. 25,000 towards the cost of the veterinary school and institution at Belgachia; Babu Behari Lall Pandit of Cuttack gave Rs. 15,000 for a dharamsala at Puri; Gopal Khan gave Rs. 2,000 for a pucka mosque at Basirhat.

Roads.—The contribution for roads stand at Rs. 4,980, thus:—

His Highness the Maharaja of Kuch Bihar Rs. 2,480 for the maintenance of the emigration road from the 23rd to the 32nd mile, and for a cross-road from Patgram to Bhutan, Jalpaiguri district; Babu Dwarika Nath Dutta and others of Batajore Rs. 1,500 for a road from Batajore to Soloki, Backergunge district; Kumar Promotha Nath Roy Rs. 500 for a road from Hagoodia to the Godai river, Rajshahi district; Jogendra Kumar Chaudhri Rs. 500 for a road at Panchbia, Dinajpur district.

Bridges.—The total expenditure of Rs. 8,040 on bridges was met by the following donations:—

His Highness the Maharaja of Kuch Bihar, Rs. 5,040 for two pucka bridges at Patgram, Jalpaiguri district; Babu Raj Kumar Poddar, Rs. 1,500 for a timber bridge of 25 feet span on the Jamna near Haringhatta, Nadia district; Brajeshari Baisnabi Rs. 1,500 for a pucka bridge at Nalchiti Bandar, Backergunge district.

Embankments or bunds.—An embankment near Chapra in the Nadia district was carried out at a cost of Rs. 1,500 from funds given by Babu Nafar Chandra Pal Chowdry.

Ghats.—Chunni Mal Khetri contributed Rs. 1,800 for a pucka ghat on the Hooghly river at Bellur; Kasum Kumari Dasi of Calcutta Rs. 1,700 for a Chandni ghat on the banks of the Churni, at Aranghatta, and Khirode Prosad Pal Rs. 1,500 for a pucka ghat on the Hooghly river at Telkul ghat, Howrah.

Tanks.—The expenditure on tanks is Rs. 1,67,792, which was met by the following donations principally:—

Babu Nakur Lal Chowdhri, Monghyr district, Rs. 10,000; the Maharaja of Hatwa, Shahabad district, Rs. 9,100; Maharaja Lachmeshar Singh of Darbhanga Rs. 7,000; Babu Kala Chand Biswas, Nadia district, Rs. 4,000; Babu Mohendra Singh, Saran district, Rs. 4,000; Gatinath Mozumdar, Pabna district, Rs. 3,000; Babu Ashutosh Nath Rai, Tippera district, Rs. 2,500; Soshi Mohan Saha, Patna district, Rs. 2,000; Babus Bhogoban Chandra Rai Chaudhri, Bhairab Chandra Rai Chaudhri and others, Dacca district, Rs. 2,000; the widow of Babu Laderi Mohan Rai, Dacca district, Rs. 2,000; Babus Hansraj Jha and Madhan Jha, Darbhanga district, Rs. 2,000 each; Haradhan Sheik and Indra Kumar Banerji, Burdwan district, Rs. 2,000 each.

Wells.—Rupees 11,400 was expended on wells, thus:—

Hanuman Kaya of Calcutta Rs. 5,000 for a well at the Matigara Bazar; Sasiman Thakurain of Loha, Rs. 900 for a well at Sahaspur, Darbhanga district; Rs. 500 were contributed for a well in the Dinajpur district; Rs. 500 for a well in the Rangpur district; Rs. 500 for a well in the Gaya district; Rs. 500 for a pucka well in Shahabad district; Rs. 500 for a well in the Darbhanga district; Rs. 1,000 for two pucka wells in the Monghyr district; Rs. 500 for a well in the Bhagalpur district; Rs. 500 for a well in the Palamau district.

Irrigation channels.—Maharaja Durga Churn Law, C.I.E., of Calcutta, gave Rs. 12,000 for a khal in the Khulna district; Babu Girindra Nath Mukerji and others Rs. 500 for a drainage in the Nadia district; and the villagers of Purbabhag, Tippera district, Rs. 500 for a khal.

RESOLUTION.—The total cost of works of public utility constructed during the year under review shows a slight falling off, as compared with 1892, it is hoped there will be an improvement during 1894. To those who have displayed their liberality and public spirit, more especially Babu Sewbux Bogla and Sir Dinshaw Manikji Petit, who have respectively given the handsome gifts of Rs. 30,000 and Rs. 25,000, His Honour tenders his acknowledgments, and hopes that the good example set by them will be followed by others who can afford to contribute towards works of utility for the benefit of the poorer classes.

Formal letters of acknowledgment will be forwarded by the Government to those who have constructed works, costing Rs. 500 each and upwards. The usual acknowledgment will be conveyed to the others from the Commissioner or Magistrate of the Division.

ORDER.—Ordered that a copy of this Resolution and of the statement be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions; to the Commissioner of Chota Nagpur; to all Superintending Engineers of Public Works Circles in Bengal; and to the Inspectors of Works, Eastern Circle and Bihar Division, for information.

Ordered also that a copy of this Resolution and of the statement be forwarded to the Revenue and Judicial Departments of this Government for information.

Ordered also that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Secretary to the Government of Bengal.

tement of Works of Public Utility constructed by private individuals during the year 1893.

LIBERALITY OF BABU ISWARA CHANDRA HAZRA OF AMRAGORI, IN THE DISTRICT OF HOWRAH.

No. 466T.M. dated Darjeeling, the 4th October 1894.

From—C. W. BOLTON, Esq., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Burdwan Division.

I AM directed to acknowledge the receipt of your memorandum, dated the 18th September 1894, and previous correspondence, in which you report that Babu Iswara Chandra Hazra of Amragori, in the district of Howrah, has made over to the Magistrate of that district Government Promissory notes of the value of Rs. 12,000 for the purpose of establishing a charitable dispensary in his native village, and is bearing in addition the cost of erecting a suitable building.

2. In reply, I am desired to request that you will be so good as to convey to the donor the thanks of he Lieutenant-Governor for his public spirit and liberality. This letter will be published in the *Calcutta Gazette*.

REPORT ON THE BHADOI CROPS, 1894.

THE following is published for general information.

C. E. BUCKLAND,
Secy. to the Govt of Bengal.

REVENUE DEPT.,
The 8th October 1894.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the bhadoi crops in Bengal, 1894.

Explanatory.—Under orders of Government contained in their letter No. 1557, dated 16th March 1894, the present *bhadoi* forecast furnishes statistics for whole districts instead of for each sub-division, as has hitherto been the arrangement. A change has been made in the classification of crops with special reference to the compilation of the Agricultural Statistics for the Province. The headings adopted in the appended returns are intended to give a conspectus of all the *bhadoi* or rain crops. The most important *bhadoi* food crops are *bhadoi* paddy, Indian-corn, and millets. The cultivation of *bhadoi* paddy prevails chiefly in Bengal Proper and Orissa, where the area under maize and millets is limited. The latter crops occupy large areas in Bihar and Chota Nagpur. The chief millets are *jowar*, *bajra*, and *mandua*, all of which have been shown separately in the returns. The less important millets and *bhadoi* pulses have been included under the head "Other cereals and pulses." Among *bhadoi* non-food crops, the most important are jute, indigo, and cotton. Special reports are published by this Department for the jute and cotton crops: in the present return, these two crops have been grouped with other non-food crops.

2. *Character of the season.*—The outturn of the *bhadoi* crops is determined by the rainfall from April to September. The season up to the end of May was characterized in South-West Bengal, Bihar, Orissa, and Chota Nagpur by deficient rainfall, which is reported to have led to a contraction of the area under cultivation in these parts. In North and East Bengal the rainfall was heavier, and more evenly distributed. In June, the rainfall in North Bengal and in the Presidency Division was short of the normal, while there was an excessive fall in Orissa and Chota Nagpur. Elsewhere the rainfall in this month was either normal or slightly in excess of the normal. During July, the rainfall throughout these Provinces, except in the Rajshahi Division, was generally above the normal. This deficiency in North Bengal was compensated by heavy rainfall in August. The rainfall of this month was generally above the normal throughout these Provinces, except in the Burdwan and Presidency Divisions. In the first half of September, the rainfall has been below the normal.

3. *Area sown.*—The total area sown with *bhadoi crops* during the current year appears from the returns attached to this note to amount to 15,545,600 acres against 15,607,200 acres in the preceding season. Taking these Provinces as a whole, the decrease is inappreciable. A falling off in the

area in consequence of the want of rain at the time of sowing has been reported from nine* districts. The total cultivated area of these Provinces being estimated in these returns at 57,229,900 acres, it will be seen that roughly a little more than one-fourth of this area is estimated by the District Officers to have been cultivated with *bhadoi* or rain crops. Comparing now the areas under *bhadoi* food and non-food crops, with the total area sown with all *bhadoi* crops, the district estimates of the current year show that the food-crops occupy in round numbers about 76 per cent., and the non-food crops about 24 per cent. of the total *bhadoi* area. *Bhadoi* paddy, which is the most important *bhadoi* crop, occupies about 45 per cent. of the total *bhadoi* area.

* Bankura, Midnapore, Bogra, Champaran, Darbhanga, Malda, Cuttack, Balasore, and Puri.

The above estimates will be understood to be merely approximate, as they are not based on measurements.

4. *Character of the crops.*—The present season has been favourable to *bhadoi* crops. From the appended statement, it will be seen that out of the 45 districts of these Provinces, two districts, viz., Tippera and Noakhali, report an outturn above the average, 29 districts including all the districts of the Dacca and Bhagalpur Divisions, and the four North Ganges districts of the Patna Division report an outturn of from 12 to 16 annas, 12 districts an outturn between 8 and 12 annas, and in the case of only 2 districts, viz., Palamau and Manbhum, is the yield estimated to be less than eight annas. Floods are reported to have caused damage in six districts, viz. Murshidabad, Muzaffarpur, Monghyr, Malda, Cuttack, and Balasore, but the damage done does not seem to have been very considerable. The yield of all *bhadoi* crops for the Province is estimated by this Department, after allowance for the tendency to understate the outturn, and looking to the fact that the prospects of the *bhadoi* crops are admittedly much better this year than last year, to be not less than 15 annas, and it may reach the average of 16 annas.

N. N. BANERJEI,

Assistant Director of the Dept. of Land Records and Agriculture, Bengal.

Countersigned.

W. C. MACPHERSON,

Director of the Dept. of Land Records and Agriculture, Bengal.

The 24th September 1894.

Preliminary Forecast of Bhadoi Crops to the end of August 1894.

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi crops.*	Approximate normal area *under each specified bhadoi crop* in acres.	Approximate area *last year under each specified bhadoi crop* in acres.	Estimated area *this year under each specified bhadoi crop* in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Burdwan ...	1,726,080	1,382,600	*Bhadoi* paddy ...	173,700	171,500	172,700	12½	13½	Owing to early rains there has been an increase in the estimate of outturn and of area over that cultivated last year. The outturn of the present year is expected to be better, owing to timely rains.	
			Indian corn (maize)...	3,000	3,000	3,000	12	14		
			Other cereals and pulses.	8,100	7,400	7,700	12½	13½		
			Other food-crops (*e.g.*, vegetables).	700	500	600	12	14		
			Indigo	6,000	4,200	5,800	11	12		
			Other non-food-crops including jute and cotton, as shown in the special forecast.	19,200	18,400	18,600	11	11½		
			Total ...	210,700	205,000	208,600	12½	13½		
Birbhum ...	1,124,023	900,000	*Bhadoi* paddy ...	156,000	165,000	150,000	18	16	Sowing began generally late, owing to want of rain in May. After the monsoon set in, rainfall was capricious, some parts of the district getting a good and other parts deficient rainfall. The late rain in August was, however, general, and I think the average area is under *aus* this year.	The district area as now given (1,124,023 acres) differs from that shown in the Agricultural Statistics for 1892-93, viz. 1,121,920 acres. The Collector states that the present figure has been
			Indian corn (maize) ...	2,000	2,200	2,000				
			Other cereals and pulses.	.....	.....	.....				
			Other food-crops (*e.g.*, vegetables).	1,500	2,000	1,500				
			Indigo	.....	.....	.....				

N. B.—Twenty annas to be taken as representing a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi crops*.	Approximate normal area *under each specified bhadoi crop* in acres.	Approximate area *last year under each specified bhadoi crop* in acres.	Estimated area *this year under each specified bhadoi crop* in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Birbhum—*concld.*	.....	.....	Other non-food-crops including jute and cotton, as shown in the special forecasts.	2,500	2,500	2,500	Annas.	Annas.		obtained from survey papers. The area estimated to be under cultivation has been raised by the Collector from 459,000 acres as shown in last year's final *bhadoi* crop report and from 455,500 shown in the Agricultural Statistics for 1892-93 to 900,000 acres as now shown in column 3.
			Total ...	156,000	171,700	156,000	16	16		
Bankura ...	1,677,440	642,800	*Bhadoi* paddy	44,300	44,300	43,200	16	14	There was some decrease of cultivation under most of the *bhadoi* crops, owing to the scanty rainfall in March, April and May, when fields were prepared for these crops. In subsequent months the rainfall in some parts of the district was rather excessive, which has injured the outturn of crops to a certain extent.	
			Indian corn (maize)...	300	300	500		11		
			Other cereals and pulses.	5,000	5,000	3,000		12		
			Other food-crops (*e.g.*, vegetables).	500	500	300		12		
			Indigo	2,900	2,900	2,700		12½		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	3,900	3,900	3,900		12		
			Total ...	56,900	56,900	54,100	16	13		

Midnapore ...	3,292,800	2,111,500	*Bhadoi* paddy ...	343,800	100,800	110,200	11	11	The whole of the normal area could not be brought under cultivation for want of rain at sowing time. The prospects are at present very favourable in the Sadar and Tamluk. In Contai and Ghatal the crops have suffered from excessive rainfall. Last year these crops suffered from excessive rainfall before they were harvested, and especially in low lands they were submerged. The normal area under these crops shows an increase over last year, which has been arrived at by latest calculation. *N.B.*—The figures in column 2 have been taken from the census figures excluding the river beds.	The district area was shown in the Agricultural Statistics for 1892-93 to be 3,319,040 acres. The Collector states that the district area now given by him (3,292,800 acres) has been taken from the census figures and is exclusive of river beds. The whole area of the district should be shown in future returns. The Collector has furnished no estimate of the area and outturn under *bajra* and *mandua* last year, though he has given figures for these crops for this year. The figures for this year have been accordingly shown against the above named crops in column 6.
			Jowar		.....	... ..	.....	.....		
			Bajra		6,000	6,000	.....	14		
			Mandua		1,800	1,800	.....	14		
			Indian corn (maize)...		24,000	21,000	12	14		
			Other cereals and pulses.		9,400	48,400	9	10		
			Other food-crops (*e.g.*, vegetables).		8,700	23,500	10	11		
			Indigo		35,300	40,600	10	14		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.		47,800	43,200	.....	11		
			Total ...	343,800	233,800	294,700	11	12		
Hooghly ...	1,086,060	702,200	*Bhadoi* paddy ...	92,300	48,000	51,500	11	11	The increase in area is only in Serampore. This is owing to the timely rain in that subdivision. The outturn is expected to be almost the same as that of the previous year.	The area under *bhadoi* paddy given in column 6 (49,000 acres) does not agree with the corresponding figure (50,270 acres) shown in the final *Bhadoi* Report for 1893. An explanation should have been given of the change of figures.
			Jowar	.....	.....	.....	.....	.....		
			Bajra	.....	.....	.....	.....	.....		
			Mandua	.....	.....	.....	.....	.....		
			Indian corn (maize) ...	100	100	50	10	12		
			Other cereals and pulses.	2,300	2,300	1,850	10	10		
			Other food-crops (*e.g.*, vegetables).	6,000	4,900	4,000	13	13		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	40,400	25,700	24,000	8	10½	Insufficient rain is the cause of the unfavourable outturn.	
			Total ...	141,100	81,000	81,400	10	11		
24-Parganas ...	1,671,626	1,223,600	*Bhadoi* paddy ...	108,700	87,500	107,200	8	12	This year's outturn is expected to be better than that of last year owing to seasonable rainfall.	The figure in column 7 against "other cereals" and "other food-crops" have been inserted against these two cross-headings in column 6 in the absence of figures supplied by the Collector.
			Other cereals and pulses.	3,000	700	700	.....	9		
			Other food-crops (*e.g.*, vegetables).	4,900	4,600	4,600	.....	10		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	48,600	41,200	35,400	8	13		
			Total ...	164,200	134,000	147,900	8	11		

N.B.—Twenty annas to be taken as representing a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

1	2	3	4	5	6	7	8	9	10	11

							Annas.	Annas.		
Nadia	1,788,160	1,303,000	*Bhadoi* paddy ...	260,600	229,500	260,600	11	14	The increase in the area sown this year is due to timely and normal rainfall during the ploughing and sowing seasons.	The blank in column 6 against Indian corn for which no figure was furnished by Collector, has been supplied by inserting the same figure as is given against the crop in column 7.
			Indian corn (maize)	1,000	1,000	1,000	.....	12		
			Other cereals and pulses.	49,200	44,900	49,200	10	14		
			Other food-crops (*e.g.*, vegetables).	20,500	16,900	20,500	10	14		
			Indigo	52,100	48,300	52,100	5	14	The increase in the expected outturn is also due to the normal rainfall and to the late rise of the rivers.	
			Other non-food crops including jute and cotton, as shown in the special forecasts.	47,000	46,700	47,000	9	14		
				430,400	387,300	430,400	9	13		
Murshidabad...	1,372,160	985,500	*Bhadoi* paddy ...	252,900	256,700	251,400	12¼	10	The outturn is estimated below normal in consequence of the early and sudden rise of the river Bhagirathi.	
			Indian corn (maize)	300	400	200		10		
			Other cereals and pulses.	5,300	5,200	5,100		12		
			Other food-crops (*e.g.*, vegetables).	12,700	10,400	9,600		11½		
			Indigo	59,200	59,700	58,800		10¼		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	31,700	30,900	22,500		12		
			Total ...	362,100	363,300	347,600	12¼	10½		

Jessore ...	1,872,000	1,116,800	*Bhadoi* paddy	314,500	250,900	314,100	10	17	Owing to reasonable rainfall the outturn and area have increased. (*a*) The area and the outturn of the previous year of each of these crops were low in consequence of excessive rainfall. (*b*) The area under indigo has slightly fallen below last year's owing to the closure of a few factories in Magura. The outturn is better than last year's, but worse than normal owing to incessant rainfall at the manufacturing season.
			Indian corn (maize)...	.....	.....	.....	.....	... ..	
			Other cereals and pulses.	9,100	6,500	8,800	10	(*a*)13	
			Other food crops (*e.g.*, vegetables).	18,700	15,200	16,600	7	(*b*)15	
			Indigo	17,800	16,900	16,900	4	10	
			Other non-food crops including jute and cotton, as shown in the special forecasts.	48,000	32,650	39,100	7	(*a*)15	
			Total ...	408,100	352,100	395,400	9½	16	
Khulna ...	3,103,942·4, including 317,440 acres of land on account of boundary khals and rivers in Sundarbans.	870,000	*Bhadoi* paddy ...	56,400	48,500	52,600	8	16	Better results are expected this year owing to timely rainfall.
			Other cereals and pulses.	3,200	3,200	3,200	12	16	
			Other food-crops (*e.g.*, vegetables).	.....	.....	.....	.....	.....	
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	29,800	24,400	20,600	9	15	
			Total ...	89,400	76,100	76,400	8½	15½	
Rajshahi ...	1,539,952·4	1,085,900	*Bhadoi* paddy	105,500	104,200	104,800	13½	15½ 13	Last year the progress of cultivation was stopped by heavy rainfall at the time of sowing; hence the area sown this year shows a little increase. The recent rain has done good to the crops which appear to be flourishing everywhere, and a better outturn is expected.
			Other food-crops (*e.g.*, vegetables).	1,600	1,600	1,600	10	14	
			Indigo	9,600	9,000	9,000	14	15½	
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	111,900	104,500	109,500	12½		
			Total ...	228,600	219,300	224,900	13	15	
Dinajpur ...	2,634,880	1,745,000	*Bhadoi* paddy	128,000	128,000	128,000	18	9	The insufficient rainfall has caused much mischief to these crops; hence the outturn is expected to be bad. (1), (2) and (3).—These figures were not shown in last year's statement, consequently columns 6 and 8 against these heads have been kept blank.
			Jowar	(1)7,000	7,000	7,000	.....	18	
			Bajra	...	... ..	.....	... ...	.....	
			Mandua	(2)7,000	7,000	7,000	.....	10	
			Indigo	(3)100	100	100	.....	10	
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	99,500	106,500	107,600	16	12	
			Total ...	241,600	248,600	249,700	17	10½	

The figures entered in column 7 have been repeated in column 6.

N.B.—Twenty annas o be taken as representing a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Jalpaiguri ...	1,895,881	985,200	*Bhadoi* paddy	186,700	191,400	186,200	14	13	The increase in area in column 3 is due to increase of cultivation in the Duars. The difference between the figures shown in columns 5 and 6 and those shown in last year's return are owing to insertion of new headings in the forecast, and also to alteration made in last year's figures. The decrease in area cultivated this year with *bhadoi* paddy is due to increase in cultivation of jute.	Estimates of area and outturn for last year against "other food crops," which were not furnished by Deputy Commissioner, have been supplied by inserting the corresponding figures of the current year.
			Indian corn (maize)...	2,000	1,000	2,000	10	10		
			Other cereals and pulses.	4,500	1,500	4,500	10	11		
			Other food-crops (*e.g.*, vegetables).	5,200	5,200	5,200	...	12		
			Other non-food-crops including jute and cotton, as shown in the special forecast.	85,400	83,400	85,600	13	13		
			Total ...	283,800	282,509	283,500	12	12		
Darjeeling ...	744,960	189,400	*Bhadoi* paddy	32,300	32,500	32,500	14	13	Want of seasonable rainfall accounts for the decrease in outturn this year.	
			Mandua	7,700	5,300	5,300	14	14		
			Indian corn (maize)	17,700	22,200	22,200	15	14		
			Other non-food-crops including jute and cotton, as shown in the special forecast.	15,300	15,300	15,300	14	12		
			Total ...	73,000	75,300	75,300	14½	13		
Rangpur ...	2,231,040	1,602,700	*Bhadoi* paddy ...	275,400	285,400	275,400	16	10	Owing to the comparatively dry season of this year, the outturn of *bhadoi* paddy has been less than that of the previous year.	
			Indian corn (maize)...	100	100	100	16	16		
			Other cereals and pulses.	91,000	91,000	91,000	13	16		

			Other food-crops (*e.g.*, vegetables).	23,700	23,700	23,700	12	16	In the final forecast of *bhadoi* crops of 1893, the outturn of jute was entered as 18 annas instead of 13½ annas through a clerical mistake.
			Indigo	7,700	6 600	6,600	16	16	
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	286,300	295,300	295,300	13½	14	
				684,200	702,000	692,100	14½	13	
Bogra ...	929,000	421,000	*Bhadoi* paddy ...	140,000	175,000	105,000	10	8	The decrease in the area sown this year is due to insufficient rainfall at the time of sowing. The low estimate of outturn is due to the damage done to the plants by the continued drought which immediately followed the sowing.
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	76,000	75,000	75,000	12	14	As stated in the final forecast of jute, the scanty rainfall of June and July did not allow the plants to grow healthy. The subsequent showers, specially those that fell during the current month, have greatly benefited the lowland plants, and an outturn of two annas below normal is expected.
			Total ...	216,000	250,000	180,000	14½	10½	
Pabna	1,176,960	882,500	*Bhadoi* paddy	125,200	123,500	124,000	10	11	The poor outturn of jute last year owing to heavy rainfall led the raiyats to grow jute this year on a smaller area in the Sadar sub-division. Want of rain was felt in the beginning of the sowing season; but it having rained afterwards, and the river rising later than usual, the *bhadoi* crops do not appear to have been damaged to any great extent. In the Sirajganj sub-division, the prospect would have been better had there been seasonable rainfall.
			Other cereals and pulses.	20,460	18,400	18,400	8	9	
			Other food-crops (*e.g.*, vegetables).	102,000	108,800	108,800	9	10	
			Indigo	100	100	100	4	12	
			Other non-food crops including jute and cotton, as shown in the special forecasts.	212,800	226,100	203,100	12	14	
				460,500	476,900	454,400	10½	10	
Dacca	1,790,080	997,700	*Bhadoi* paddy	174,900	162,500	165,500	7½	15	The decrease in the area of other cereals and pulses is due to the increase in the area under paddy, jute and other food-crops.
			Other cereals and pulses.	1,000	500	800	6	9	
			Other food-crops (*e.g.*, vegetables).	62,700	37,200	43,300	11	10½	Owing to timely rainfall, the outturn of paddy and jute is better than last year. Owing to better outturn of jute and paddy, less care was taken of vegetables: hence their outturn is a little worse than that of last year.
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	219,300	208,700	211,200	9½	13	
			Total ...	457,900	408,900	420,300	9	11½

			Total ...	430,100	330,900	392,200	6	16		

Backergunge...	2,335,360	1,343,200	*Bhadoi* paddy ...	283,500	265,600	283,500	5	14	The area yielding harvests will be larger than last year when much of the cultivable area was flooded.	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	6,400	6,400	6,400	8	13	Owing to seasonable and moderate rainfall, the outturn this year is expected to be far better than that of last year.	
			Total ...	289,900	272,000	289,900	5½	13½		
Tippera ...	1,594,240	1,167,360	*Bhadoi* addy ...	241,100	241,100	302,000	7	20	The increase in the area under heads *Bhadoi* paddy and pulses, and the decrease under head Other non-food crops, &c., is due to the fact that owing to distress and high price of rice during last year, many jute lands have been sown with early crops and pulses.	The increase in the area this year against "other cereals and pulses" as compared with last year's area and the normal area is not understood.
			Other cereals and pulses.	300	300	13,500	9	15	The outturn under the head Other cereals and pulses is probably underestimated, but the area is so small that I cannot speak from personal observation.	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	95,200	261,600	229,300	9½	18	The increase in the area under head Other non-food-crops, &c., as compared with the normal area is attributable to the gradual increase of area under cultivation under head Jute, &c. The increase in the outturn is chiefly due to timely rainfall. In the Brahmanbaria sub-division, where the floods did much damage last year, the deposit of silt left by the floods has done much to increase the fertility of the soil.	
			Total ...	336,600	503,000	544,800	8½	17½		
Noakhali ...	1,050,240	818,800	*Bhadoi* paddy ...	206,600	157,600	206,600	7½	18	This year's outturn is better than that of last year owing to a better distribution of rainfall.

Puri	1,612,929	728,100	*Bhadoi* paddy ...	86,100	83,900	84,000	12	14	The increase of area under paddy with reference to last year is very slight, and calls for no explanation. The difference with reference to the normal area under paddy and *mandua* is due to the late rainfall, which did not begin till June, and the continuous and heavy rainfall afterwards which retarded the sowing of *beali* paddy and *mandua*.	The area under jute should have been included in column 6 against the cross-heading "Other non-food crops."
			Mandua	40,300	29,100	23,000	13	11		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	11,200	8,500	13,600	16	11	The increase in area under other non-food-crops, is due to theaddition of the area under jute this year, which was not added last year. The outturn has been less on account of the continuous rainfall.	
			Total ...	137,600	121,500	120,600	12½	13		
Hazaribagh ...	4,493,440	2,478,500	*Bhadoi* paddy	43,300	43,300	43,300	12	16	The difference in the total area in columns 5 to 7 with that of the final forecast for 1893 is due to the exclusion of areas under *til* and hemp and to the inclusion of fresh figures for vegetables.	Areas for *til* and *hemp* should not have been omitted by Deputy Commissioner. The areas returned under these crops in the final report on *bhadoi* crop for 1893 have been added (by this office) to the area shown against "other non-food crops, &c" in columns 5, 6 and 7.
			Mandua	121,200	105,100	105,100	6	12		
			Indian corn (maize) ...	227,200	217,200	217,200	3	8		
			Other cereals and pulses.	131,300	131,300	131,300	6	12	All the crops, except *bhadoi* paddy and vegetables, suffered more or less owing to heavy rains. The rainfall, though heavy, was not so continuous as was the case last year; hence the outturn is expected to be better than that of last year.	
			Other food-crops (*e.g.*, vegetables).	1,200	1,200	1,200	16	16		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	75,100	75,100	75,100	6	14		
			Total ...	599,300	573,200	573,200	8	13		
Lohardaga ...	4,568,960	2,988,300	*Bhadoi* paddy	842,900	842,900	842,900	12	12	The area cultivated and the estimated outturn remains the same as last year. No better outturn can be expected owing to excessive rainfall.	
			Jowar	.....	.....	.....				
			Bajra	8,000	8,000	8,000				
			Mandua	9,000	9,000	9,000				
			Indian corn (maize) ...	8,000	8,000	8,000				
			Other cereals and pulses.	89,000	89,000	89,000				
			Other food crops (*e.g.*, vegetables).	.....	.....	.....				
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	221,500	221,500	221,500				
			Total ...	1,178,400	1,178,400	1,178,400	12	12		

N.B.—Twenty annas to be taken as representing a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Total area of district in acres.	Total area of district estimated to be under cultivation in acres.	Names of *bhadoi crops*	Approximate normal area *under each specified bhadoi crop* in acres.	Approximate area *last year under each specified bhadoi crop* in acres.	Estimated area *this year under each specified bhadoi crop* in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Palamau ...	3,139,200	768,000	*Bhadoi* paddy	40,000	22,700	19,000	9	7	The law outturn this year is due to heavy continuous rain.	The Deputy Commissioner gives 1,100 acres as the area this year under "other food crops." The same figure has been inserted by this office in column 6 against 'other food crops.'
			Jowar	.....	.....	.....	.....	.....		
			Bajra	2,000	800	400	5	2		
			Mandua	35,000	19,000	9,000	6	5

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 6th October, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
BURDWAN DIVN. 1	Burdwan Oct. 6, '94	1·52	Weather—seasonable. Harvesting of *aus* continues. Weeding of *aman* completed. Prices of common rice:—
	Kalna ...	1·14	
	Katwa ...	1·51	
	Raniganj ...	2·52	

	Srs.	c.	
Burdwan	15	0	per rupee.
Kalna	10 to 12	0	
Katwa	14	5	
Raniganj	14	8	

2	Birbhum „ 6, '94	1·42	Weather—rainy during the last three or four days in the Sadar subdivision; cloudy and stormy in the Rampur Hát subdivision. Paddy doing well. Sugarcane flourishing except in Ilambazar. Common rice sells from 12½ to 16½ seers per rupee. Supply of fodder and water plentiful. Cattle doing well except that cattle-pox is reported from only one village of Sakulipur thana.
	Rampur Hát ...	2·83	
3	Bankura „ 6, '94	2·08	Weather—stormy. Prospects of crops continue good. Prices of common rice:—
	Vishnupur ...	4·40	

	Srs.	
Bankura	17½	per rupee.
Vishnupur	17½	

4	Midnapore „ 6, '94	2·25	Weather—showery with occasional sunshine. *Aus* paddy is being reaped. Prospects of all crops continue bright. Fodder and water abundant. Prices of common rice:—
	Contai ...	Not reported.	
	Tamluk ..	2·22	
	Ghatal ..	0·94	

	Srs.	
Sadar	14	per rupee.
Contai	Not reported.	
Tamluk	12	
Ghatal	13	

5	Hooghly „ 6, '94	1·21	Weather—cloudy with occasional showers. Jute and *aus* are being harvested. In thanas Jahanabad and Goghat the outturn of *aus* is estimated to be 8 annas and 16 annas respectively. Sugarcane progressing well. Prices of common rice:—
	Serampore ...	0·93	
	Jahanabad ...	1·67	

	Srs.	
Sadar	10	per rupee.
Serampore	11 to 12½	
Jahanabad	13 to 14	

6	Howrah „ 6, '94	Figures not furnished.	Weather—hot and bright with occasional showers. Winter rice doing well. Jute and *aus* paddy being harvested. Fodder and water-supply sufficient. No cattle-disease reported. Price of common rice at Howrah 10 seers per rupee.
PRESIDENCY DIVN. 7	24-Parganas „ 6, '94	1·89	Weather—seasonable. Harvesting of *aus* nearly over. *Aman* and sugarcane doing well. The rain during the week has done much good to the *aman* crop. Condition of cattle good. Fodder and water sufficient.
8	Nadia „ 6, '94	2·40	Weather—cloudy with occasional heavy rain. Prospect of *aman* crop excellent and that of other crops satisfactory. Common rice selling from 11 to 14 seers per rupee.
	Kushtia ...	1·54	
	Meherpur ...	5·09	
	Chuadanga ...	0·83	
	Ranaghat ...	2·51	
9	Murshidabad „ 6, '94	0·81	Weather—cloudy and hot. *Kalai* is being sown in some parts. *Aman* paddy on low lands submerged. Sugarcane doing well. Fodder sufficient for cattle. Common rice sells at 13 seers per rupee.
10	Jessore „ 6, '94	0·87	Weather—hot with occasional showers. Prospect of *aman* good. Jute and *aman* plants on chur lands partially damaged by the rise of rivers in the Bangaon subdivision. Indigo being sown. Cattle-disease reported from Gaighatta in Bangaon. Fodder and water sufficient. Prices of common rice:—
	Jhenida ...	1·52	
	Magura ...	0·33	
	Narail ...	0·91	
	Bangaon ...	1·37

16	Rangpur ,, 6, '94	0·31	Weather—hot and cloudy. Transplantation of *aman* not yet finished. Steeping of jute going on vigorously. *Kalai* being sown. Sugarcane doing well. Price of rice 8½ to 10 seers per rupee.
	Gaibanda ...	1·30	
	Kurigram ...	2·67	
	Nilphamari ...	0·33	
17	Bogra ,, 6, '94	1·80	Weather—seasonable. Standing crops doing well. Outturn of *aman* estimated at 15 annas. Common rice selling at 12 seers per rupee. Fodder and water sufficient.
	Sherpur ...	3·50	
	Naukhila ...	0·82	
18	Pabna ,, 6, '94	0·59	Weather—hot. Prospects of standing crops good. Harvesting of *aus* and jute nearly finished. Common rice selling at 11 to 12 seers per rupee. Fodder and water-supply sufficient.
DACCA DIVN.			
19	Dacca ,, 6, '94	1·35	Weather—hot and cloudy. Harvesting of jute nearly finished. Prospects of standing crops good. Fodder plentiful. No cattle-disease. Common rice sells at 12 seers per rupee.
20	Mymensingh ,, 6, '94	2·75	Weather—seasonable. Prospects of standing crops good. Common rice sells at 10 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.
21	Faridpur ,, 6, '94	0·35	Weather—seasonable. Prospects of crops continue to be good. Floods going down. Rice sells at 11½ to 12 seers per rupee.
	Goalundo ...	2·16	
	Madaripur ...	1·47	
22	Backergunge ,, 6, '94	1·80	Weather—seasonable. State and prospects of crops good. Outturn of *aus* estimated to be 16 annas. Common rice sells from 9 to 13 seers per rupee. Fodder and water sufficient.
	Pirojpur ...	2 01	
	Patuakhali ...	1·43	
	Bhola ...	4·21	
CHITTAGONG DIVN.			
23	Tippera ,, 6, '94	0·39	Weather—seasonable. Prospect of *aman* becoming brighter day by day. Fodder sufficient. Price of common rice 10 seers 10⅔ chittacks per rupee in the Sadar subdivision.
24	Noakhali ,, ..	...	Report not received.
25	Chittagong ,, 6, '94	0·08	Weather—somewhat hot. Transplantation of *aman* nearly over. Prospects fair, but a little more rain is wanted. Prices continue normal. Water and fodder sufficient. Cattle-disease prevails in Jaldi jurisdiction.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
	BIHAR.		
PATNA DIVISION.			
26	Patna Oct. 6, '94	2·60	Weather—cloudy. Prospect of rice continues excellent. Land is being ploughed and prepared for *rabi* crops. Prices of food-grains continue normal. Common rice selling at—
	Barh ...	1·58	
	Bihar ...	1·48	
			Srs.
			Sadar ... ... 15 }
			Barh ... ... 12½ } per rupee.
			Bihar ... ... 15½ }
27	Gaya „ 6, '94	2·12	Weather—cloudy and rainy. Harvesting of *bhadoi* over. Prospect of paddy favourable. *Rabi* lands being prepared. Prices of common rice:—
	Jahanabad ...	1·50	
	Nawada ...	0·51	
	Aurangabad ...	2·27	Srs.
			Sadar ... ... 13 }
			Jahanabad ... ... 13½ } per rupee.
			Nawada ... ... 15 }
			Aurangabad ... ... 16 }
			Fodder and water-supply sufficient.
28	Shahabad „ 6, '94	2·13	Weather—seasonable with passing clouds and at intervals rainy. Prospect of paddy generally excellent. Harvesting of *marua, serha,* and *sathi* nearly finished.
	Buxar ...	2·51	
	Bhabua ...	4·07	
	Sasaram ...	4·49	
29	Saran „ 6, '94	3·08	Weather—cloudy with occasional showers. Harvesting of *bhadoi* crops finished; outturn good. *Aghani* paddy and sugarcane doing well. Fields are being prepared for *rabi* sowings. Fodder and water plentiful. Prices of common rice:—
	Siwan ...	1·57	
	Gopalganj ...	Not reported.	Srs. c.
			Chapra ... ... 14 5 }
			Siwan ... ... 13 15 } per rupee.
			Gopalganj ... ... Not reported. }
30	Champaran „ 6, '94	0·35	Weather—generally sunny with occasional clouds and showers. Reaping of *bhadoi* nearly finished. Prospect of *aghani* paddy fair. More rain wanted for young rice crop. Common rice selling at 16 seers per rupee. Fodder and water sufficient.
31	Muzaffarpur „ 6, '94	2·85	Weather—cloudy and sultry at times. Paddy crop doing well. Threshing of *bhadoi* crops going on. Fields being prepared for *rabi* sowings. The fall of *hathia* rain has done immense good to paddy crop and *rabi* fields. No cattle-disease. Fodder and water for cattle ample. Price of common rice ranges from 13 to 15 seers per rupee.
	Hajipur ...	4·28	
	Sitamarhi ...	0·47	
32	Darbhanga „ 6, '94	0·74	Weather—bright. Prospects of *aghani* rice crop continue very favourable. *Bhadoi* harvest completed. Fodder for cattle sufficient. Price of common rice ranges from 13½ to 15 seers per rupee.
BHAGALPUR DIVISION.			
33	Monghyr „ 6, '94	0·37	Weather—hot and cloudy with occasional rain. Paddy crop growing well. Land being prepared for sowing *rabi* crops. Sugarcane being harvested. Indigo doing well. Fodder and water sufficient. No cattle-disease reported. Prices of common rice:—
	Begusarai ...	2·55	
	Jamui ...	2·38	Srs. c.
			Sadar ... ... 11 to 14 0 }
			Begusarai ... ... 14 0 } per rupee.
			Jamui ... ... 13 2 }
34	Bhagalpur „ 6, '94	0·13	Weather—cloudy and rainy for first two or three days of the week; strong east winds. Weather has since cleared up. Harvesting of *bhadoi* rice going on and that of *marua* over. *Bhadoi* rice selling at 22 seers per rupee in North Bhagalpur. Prospects of *aghani* rice very fair. Some of the minor crops have suffered in parts of the district on account of high floods.
	Banka ...	1·77	
	Madhipura ...	1·62	
	Supaul ...	1·03	
35	Purnea „ 6, '94	1·83	Weather—cloudy in the beginning of the week. The sky has since cleared up. Days sultry and nights cool. Harvesting of *bhadoi* paddy and jute still going on. Outturn satisfactory. *Kurthi* being sown, and lands being prepared for *rabi* sowings. *Aghani*, though late, promises well. No want of fodder and water. No cattle-disease. Common rice sells at 13 to 16 seers per rupee.
	Kishanganj ...	1·27	
	Araria ...	0·70	

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*			
Bhagalpur Div.—*concld.* 36	Malda Oct. 6, '94	Figures not furnished.	Weather—cloudy and rainy early in week, latter part generally sunny. Prospect of winter rice continues favourable. Sowing of *kalai* pulse in progress. Jute still being washed in some places. Price of ordinary rice varies from 12 to 15¼ seers per rupee. Fodder and water ample.
	Sahibganj ..	3·08	
	Gazole ...	2·22	
37	Sonthal Parganas „ 6, '94	2·75	Weather—seasonable. Paddy crop excellent. *Kurthi* being sown largely. Some *kurthi* and *sirguja* injured here and there by heavy rain.

* Mean for 6 days.

Explanation.—Summary—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The ıns are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question ions in the district sending in returns divided by the number of stations. A rainy day is one of which at least a tenth of an inch fell.

for the week ending Saturday, the 6th of October 1894.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th May 1894. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·10 inch of rain has fallen.

CALCUTTA, *the 9th October* 1894.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 6TH OF OCTOBER 1894.

DURING practically the whole of the previous week a barometric depression had existed in the north of the Bay, which had gradually deepened into a feeble cyclonic storm and had passed inland near Puri, moving in a west-north-westerly direction into the Central Provinces. It afterwards commenced to recurve, and on the 29th of September, or the last day of that week, its centre was nearly midway between Seoni and Jubbulpur. From the 29th to the 30th of September, or the first day of the week under review, the storm had advanced about 100 miles in a northerly direction, and its centre was between Saugor and Sutna. It then began to move in a north-easterly direction, and from the 30th of September to 1st of October it had advanced over 150 miles, and was midway between Sutna and Benares, while on the 2nd it had again advanced in a north-easterly direction and had broken up against the Himalayas, probably to the north of Bihar. Hence, as this storm moved at first in a northerly direction to the west of the province, and then in a north-easterly direction towards the north-western districts of Bengal, specially towards the west of Bihar and Chota Nagpur, it continued to give somewhat disturbed weather to a considerable part of Bihar, Chota Nagpur and Bengal generally. Hence, though on the 30th of September and on the 1st of October rainfall was rather local and in most cases light, on the 2nd it was becoming more general, and rather heavy falls were reported in the north of the Province, while the falls continued to increase in heaviness on the 3rd, 4th and 5th instants though at the close of the week rainfall was again becoming local.

While, however, the first storm was advancing in a north-easterly direction towards the Himalayas, where it broke up on the 2nd, another feeble depression was forming in the Bay. On the 1st pressure had fallen over the whole province, the fall being rather rapid in Orissa, where it exceeded a twentieth of an inch, and where pressure was in defect by amounts ranging up to 0·189 inch at Cuttack. On this day ordinary but rather strong monsoon winds only prevailed over the whole Bay. On the 2nd a further slow to moderate fall of pressure occurred over the whole province, the fall exceeding a twentieth of an inch at the stations in the north-west angle of the Bay, and pressure became below the normal by amounts ranging up to 0·229 inch at Balasore and Saugor Island, and 0·220 inch at False Point and Cuttack. A very decided cyclonic circulation of winds also set up round the north-west angle of the Bay, the centre of the circulation being to the south of Saugor Island and to the east of False Point, but the wind force in connection with this circulation was light. The depression commenced to move in a north-westerly direction almost as soon as it was formed, and the centre of the feeble storm passed between Saugor Island and Balasore on the evening of the 2nd, and at 8 A.M. of the 3rd the centre was between Chaibassa and Balasore, and nearer the former station than the latter. On the 4th the feeble depression had again moved in a north-westerly direction, and was to the west of Hazaribagh, but it was apparently beginning to fill up. On the 5th the small cyclonic storm had advanced about 250 miles in a north-westerly direction, and its centre was near Lucknow, and the depression at the centre of the storm was greater and the gradients were steeper, and the storm was giving heavy rain in the North-West Provinces, though the falls were lighter in Bengal. On the 6th the storm had advanced in a northerly direction, and it had broken up against the Himalayas probably not very far from Naini Tal.

With the formation of the depression on the 2nd and the commencement of its inland advance on the evening of this day, another feeble burst of monsoon winds began to flow over Bengal, and hence from the 3rd instant rainfall again was general over the whole province; this general rainfall continued on the 4th and 5th, while on the 6th it was again becoming decidedly local.

Pressure.—Owing to the low pressure attending the two barometric depressions previously described, the mean pressure for the week has been largely below the normal, and indeed at the majority of stations the defect has exceeded a tenth of an inch. The defect has been largest at the western stations, which have been most directly under the influence of the depressions, and at such stations as Balasore, Midnapore, Raniganj, Bankura, Ranchi, Chaibassa, Arrah, Buxar and Dehri the defect has exceeded 0·15 inch, while in the east of the province at Chittagong, Narayanganj Jalpaiguri, &c., the defect has only equalled about 0·08 inch. In Assam also the average defect has only equaled 0·086 inch.

Temperature.—The variations of temperature from the normal for the week have been small, and for the whole of Bengal the mean temperature has only been a tenth of a degree in defect. In the case of Assam the average mean temperature has been 0·4° in excess.

Rainfall.—Owing to the action of the two depressions, rainfall has been heavier than usual during the week. Chota Nagpur has received the large average fall of 2·82 inches, or about three times the normal fall for the week, while in all other divisions the falls have equalled from about one inch to an inch and a half, and the falls have been decidedly above the normal, except in the case of East and North Bengal. In all divisions, even in East and North Bengal, the number of rainy days in the week has been rather largely in excess of the normal.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 163 per cent., North Bengal 58 per cent., East Bengal 88 per cent., Bihar 130 per cent., Orissa 113 per cent., and Chota Nagpur 297 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 142 per cent. of the normal.

In Assam during the week Silchar has received 4·02 inches of rain, Dhubri 1·50 inches, and Sibsaugor 1·05 inches.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 6th of October 1894:—

Meteorological Divisions.	Temperature.						Rainfall.									
							Of week.			Rainy days.			Since 1st of month.		Since 16th May 1894.

The greatest excess of sun over air temperature	69·1	10th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	75·7		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·7	13th	
	Miles.		
The mean movement of the wind per day	68·5		
The greatest movement of the wind in one day	138·0	2nd and 19th	
The greatest movement of the wind in one hour	14·0	19th 8 to 9 A.M. 26th 11 to noon.	

The number of hours with winds from each of the 8 points—
N. 11, N.E. 2, E. 63, S.E. 188, S. 191, S.W. 132, W. 17, N.W. 3, Calm 113.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently equal; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

A. PEDLER,

For Meteorological Reporter to the Govt. of India.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·80
The total fall from 1st January to 6th October 1894	42·99
The average fall of the corresponding period for 24 years, Surveyor-General's Office	60·57

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; lr, lightning reflection; ☍, dew.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE PRESIDENCY DIVISION FOR THE YEAR 1893-94.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 16th October 1894.

RESOLUTION—No. 108T.G.

READ—

The Annual General Administration Report of the Presidency Division for the year 1893-94.

Mr. H. C. Williams took charge of the Division after the close of the year, and in preparing the Report was under the disadvantage of writing without personal knowledge of the events of the year. He has compiled a useful but rather lengthy report. In future years it will be desirable to curtail remarks on those departments (such as Registration, Education, Excise, &c.) regarding which a separate departmental report is issued.

2. In only one district, Murshidabad, the Magistrate, Mr. Kennedy, was unchanged throughout the year. The districts of the 24-Parganas, Nadia, and Jessore were, however, governed by their former Magistrates, Messrs. Collier, Bernard, and Fiddian, for all but a small portion of the year, when they were absent on short leave. In Khulna, Mr. Brojendra Nath Dé ended his long tenure of office as Magistrate and went on leave in August, since when two officers

have held temporary charge. All these Magistrates have done well and deserve the commendation of Government. Rai Durgagati Banerjee Bahadur, Collector of Calcutta, is also favourably mentioned.

3. The information given in paragraphs 80, 86 and 87 of the Report regarding the Jessore Loan Company, the Khulna Trading Company, and the 46 small Insurance Companies in the Bágerhat subdivision is curious and interesting. It appears that these Companies are a new class of ventures for the investment of native capital.

4. The Magistrate of Murshidabad appears from paragraph 123 to have suggested that the system of retaining village watchmen on service tenures should be upheld in Murshidabad, instead of advancing the introduction of paid chaukidars under the Chaukidari Act. This is opposed to the views of Government, which contemplate the gradual substitution of paid men for chakran chaukidars. In connection with chaukidars' pay, it is to be remarked that the reasoning of the Magistrate of Nadia (quoted in paragraph 126) is the result of a misapprehension. The panchayat is bound to pay the salary at the end of every quarter, and fifteen days after the quarter the chaukidars can complain to the Magistrate. But the payment is considered to be in arrear as soon as the quarter is over, and the efforts of Magistrates should be directed to seeing that the quarterly payments are made punctually.

5. The Officiating Commissioner remarks in paragraph 155 on the poor collections in khas mahals, and expresses his agreement with Mr. Westmacott in the view that Deputy Collectors are inclined to neglect revenue work for criminal. On the other hand, the Officiating Commissioner of Burdwan, Mr. Romesh Chunder Dutt, believes the reverse to be the case. Such generalizations are perhaps to be deprecated. What is necessary is that the distribution of work amongst the district staff should be more equal, and that the District Officer should satisfy himself that each officer performs the duty assigned to him.

6. The statistics given in paragraphs 158-59 of the Report regarding the cost and nature of material improvements in the khas mahals are valuable, and the Lieutenant-Governor desires that all Commissioners should give similar information in their annual report, especially with regard to improvements in the water-supply of villages. The smallness of the total amount expended in this way is to be regretted. Only in the 24-Parganas was there any considerable outlay under this head, consisting, as it did, of over three-fourths of the total expenditure in the Division. In the management of Wards' estates, however, there has been a wise liberality, and His Honour has much pleasure in noticing that in the Bhawanipur and Kasimbazar estates upwards of Rs. 19,000 and Rs. 12,000 respectively were spent with discretion and forethought upon works of improvement. The expenditure in the Bhawanipur estate was, however, largely devoted to clearing jungle in the Sundarbans—a useful investment of money, but not directly beneficial to the population already resident on the estate. The management of the Kasimbazar estate have also supported, at a cost of over Rs. 15,000, schools and dispensaries in different localities and a Zanana Hospital at Arnakali. When distress arising out of the floods of last year overtook pargana Sarail of this large estate, the Board of Revenue took a sound and liberal view of the situation; the postponement of rents and the grant of relief have been on a scale worthy of a large zamindar.

7. It is mentioned in paragraph 248 that in the district of the 24-Parganas over 300 miles of bridged and unmetalled roads are in the charge of the Local Boards, and that they are not kept in good condition. It is not usual to put roads of this class under the Local Boards. His Honour would observe that the opinion generally held in the Public Works Department is that metalling of roads should be done in the rains and earthwork in dry weather, and not the opposite, as is stated in paragraph 249. The efforts made by the District Board and the Municipality of Baraset, paragraph 305, to remove obstructions and restore the flow of water in the Soonti river were highly praiseworthy, and His Honour trusts that the other local bodies in the Division will follow this example.

8. The section on Education shows a decrease in the number of schools and of scholars, which is a subject of much regret. It is questionable if any other Division in the Province shows such bad results, but it is explained in paragraph 267 that the falling off in the number of lower primary schools

and their pupils is due to agricultural distress. Throughout the Division the schools were 255 fewer than in 1892-93, and the number of pupils, Muhammadan as well as Hindu, decreased by over 6,000, mostly in primary schools. The expenditure on education was smaller by nearly Rs. 28,000. Except in the case of secondary schools in Khulna, the decrease was apparent in every class of school and in every district.

9. With regard to the remarks in paragraph 340 of Mr. Williams on the absence of information on the sale of stamps and issue of money-orders, the Lieutenant-Governor considers that it is not incumbent on District Officers to visit post and telegraph offices with the object of making such enquiries. But Mr. Williams observes that information might well have been given as to the success which has attended the sale of quinine in post-offices, and that he previously in Bihar found the measure a successful experiment.

10. In paragraph 324 a reference is made to one of the important events of the year—the election in May 1893, by qualified municipalities of the Division, of a member as their representative for the Bengal Legislative Council. The anti-kine-killing movement is said to have spread very slightly to this Division, though the difficulty in Jessore of procuring pound-keepers, referred to in paragraph 349, was probably the effect of this movement, but it was apparently only local. The Commissioner is fortunate in being able to record that, as far as this Division was concerned, the relations of Hindus and Muhammadans were satisfactory and that there was no tension of feeling between them worthy of public notice.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE PRESIDENCY DIVISION FOR 1893-94.

No. 63J.G., dated Calcutta, the 30th June 1894.

From—H. C. WILLIAMS, Esq., Officiating Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the following report on the General Administration of the Presidency Division for the year 1893-94, with the statistical returns enumerated in annexure B to Government letter No. 544, dated 28th February 1892.

I.—CHARGE.

2. (a) Division. Mr. E. V. Westmacott held the office of the Commissioner throughout the year under report. I took over charge from him on the 25th April 1894.

3. (b) Districts. In the table below are given the names of the Magistrates and Collectors who served in this Division during the past year, the districts of which they were in charge, and the period for which they severally held office:—

District.	Name of Officer.	Period of incumbency.	
		From—	To—
1	2	3	4
24-Parganas	Mr. F. R. S. Collier ...	1st April 1893	26th August 1893.
	„ J. H. Temple ...	27th August „	26th September „
	„ F. R. S. Collier ...	27th September „	31st March 1894.
Nadia ...	„ J. H. Bernard ...	1st April „	4th „ „
	„ E. W. Collin ...	5th March 1894	31st „ „
Murshidabad	„ J. Kennedy ...	1st April 1893	31st „ „
Jessore ...	„ W. Fiddian ...	1st „ „	29th May 1893.
	„ F. S. Hamilton ...	30th May „	1st December „
	„ W. Fiddian ...	2nd December „	31st March 1894.
Khulna ...	„ C. Fisher ...	1st April „	4th April 1893.
	„ Brojendranath Dé ...	5th „ „	8th „ „
	„ C. Fisher ...	9th „ „	4th May „
	„ Brojendranath Dé ...	5th „ „	16th August „
	„ C. H. Bompas ...	17th August „	27th November „
	„ H. F. T. Maguire ...	28th November „	31st March 1894.

4. From the above it will be seen that in no district, except Murshidabad, did one officer remain in charge throughout the year. Mr. Collier was away on short leave for one month, from the 27th August to 26th September 1893, and Mr. Temple acted for him. In Nadia Mr. Bernard went away on furlough on the 4th March 1894, and Mr. Collin took charge of the district. In Jessore Mr. Hamilton acted for Mr. Fiddian when he was away on furlough from the 30th May to 1st December 1893. The changes were very frequent in Khulna. Mr. Fisher was in charge of the district when Mr. Brojendranath Dé was on short leave in the beginning of the year, but he was suddenly called back to Khulna to be present during an enquiry made by Mr. Westmacott into the forgeries committed in the Collectorate there, from the 5th to 8th April 1893. Mr. Fisher held charge of the district from 9th April to 4th May 1893, when Mr. Brojendranath Dé resumed charge. He continued in office till 16th August 1893, when he went away on furlough, and was succeeded by Mr. C. H. Bompas. This gentleman held office until the 27th of November last, when Mr. H. F. T. Maguire relieved him, and he retained charge till the close of the year. However undesirable for administrative purposes these changes may be, they were apparently unavoidable.

5. The statement below shows the names of the officers and the period for which each held charge of the several subdivisions of the districts of this Division during the year:—

(c) Subdivisions.

District.	Subdivision.	Name of Officer.	Period of incumbency. From—	To—
1	2	3	4	5
24-Parganas.	Barasat ...	Babu Mohesh Chunder Sen ...	1st April 1893	5th July 1893.
		,, Bejoy Krishna Bose ...	6th July ,,	5th September ,,
		,, Mohesh Chunder Sen ...	6th September ,,	22nd January 1894.
		,, Bejoy Krishna Bose ...	23rd January 1894	29th March ,,
		,, Chandi Das Ghosh ...	30th March ,,	31st ,, ,,
	Basirhat ...	Maulvi Mahomed Abdulla ...	1st April 1893	31st ,, ,,
	Diamond Harbour.	Babu Gopal Chunder Mukerjee	1st ,, ,,	26th June 1893.
		,, Radhakant Banerjee ...	27th June ,,	6th September ,,
		,, Gopal Chunder Mukerjee	7th September ,,	22nd March 1894
		,, Khagendranath Mitter ...	23rd March 1894	31st ,, ,,
Nadia ...	Kushtia ...	,, Rajaninath Chatterjee ...	1st April 1893	19th April 1893.
		,, Purna Chundra Mitra ...	20th ,, ,,	31st March 1894.
	Meherpur ...	,, Mukunda Deb Mukerjee	1st ,, ,,	19th July 1893.
	Ranaghat ...	Mr. W. N. Delevingne ...	20th July ,,	31st March 1894.
Murshidabad.	Jangipur ...	Babu Nobin Chunder Sen ...	1st April ,,	31st ,, ,,
	Kandi ...	,, Nobokumar Chackerbutty	1st ,, ,,	31st ,, ,,
		,, Pran Kumar Ghose ...	1st ,, ,,	31st ,, ,,
		,, Amirta Lal Mukerjee ...	1st ,, ,,	31st ,, ,,
Jessore	Narail ...	,, Bepin Behari Mukerjee...	1st ,, ,,	12th May 1893.
	Magura ...	Mr. C. Fisher ...	13th May ,,	13th September ,,
		Babu Radhakant Banerjee ...	14th September ,,	31st March 1894.
	Jhenidah ...	Mr. E. M. Konstam ...	1st April ,,	1st July 1893.
		,, W. Maxwell ...	2nd July ,,	31st March 1894.
	Bangaon ...	Babu Monmotho Kumar Bose...	1st April ,,	18th July 1893.
		Mr. A. K. Ray ...	19th July ,,	31st March 1894.
Khulna	Satkhira ...	Babu Suresh Chunder Chatterjee	1st April ,,	13th ,, ,,
		,, Gati Krishna Neogy ...	14th March 1894	31st ,, ,,
	Bagerhat ...	,, Kumudnath Mukerjee ...	1st April 1893	31st ,, ,,

It will be seen that of the fourteen subdivisions in the districts of this Division there was no change in six, and none in either of the subdivisions of Murshidabad. In the other subdivisions there were permanent changes. In Barasat they were particularly numerous.

II.—TOURS AND INSPECTION OF OFFICES.

6. Mr. Westmacott spent 94 days on tour away from head-quarters. This period was distributed over nearly the whole year, as will appear from the following abstract:—

(a) Tour of Commissioner.

Month.	24-Parganas.	Nadia.	Murshidabad.	Jessore.	Khulna.	Total.
1	2	3	4	5	6	7
1893.						
April ...	2	4	2	...	4	
May ...	1	5	...	...	...	
June ...	1	...	...	...	...	
July ...	1	...	...	...	7	
August ...	3	...	...	...	2	
November ...	4	...	...	...	...	
December ...	3	...	...	...	...	
1894.						
January ...	...	...	11	...	9	
February ...	...	16	6	...	...	
March ...	...	4	...	19	...	
Total ...	15	29	19	19	22	104

Of the total of 104 thus shown, ten days were spent partly in one and partly in another district. He could not go out in September and October owing to illness.

7. Of the 14 subdivisions Mr. Westmacott inspected 12 during the year, those in the district of Murshidabad having been inspected by him in the latter part of March 1893.

8. Of the 37 municipalities in the districts of this Division Mr. Westmacott inspected the following on the dates mentioned against their names:—

District.	Name of Municipality.	Date of visit.
1	2	3
24-Parganas ...	Govardanga ...	21st April 1893.
	Baranagar ...	26th " "
	Barasat ...	13th May "
	Manicktolla ...	29th " "
	Basirhat ...	31st July "
	Taki ...	31st " "
	Naihati ...	15th Aug. "
Nadia ...	Ranaghat ...	20th May 1893 and 15th Feb. 1894.
	Krishnagar ...	22nd " "
	Nadia ...	8th Feb. 1894.
	Kushtia ...	10th " "
	Kumarkhali ...	11th " "
	Santipur ...	13th " "
	Birnagar ...	14th " "
	Meherpur ...	1st April 1893.
Murshidabad ...	Lalbagh ...	9th March 1894.
Jessore ...	Jessore ...	11th Jan. 1894 and 5th April 1893.
Khulna ...	Khulna ...	7th April 1893.
	Debhatta ...	30th July "
	Satkhira ...	1st Aug. "

When visiting them, he generally discussed with their Chairmen and Vice-Chairmen budget estimates and drainage schemes and other matters, and inspected some of the municipal trenching grounds.

9. While at Khulna in April 1893, the subject of the forgeries in the Collectorate there, which were reported to Government in this Office No. 28J.J., dated 11th April 1893, received his attention.

10. Besides the subdivisional offices mentioned above, Mr. Westmacott inspected all the Magistrates' and Collectors' offices in all their branches, treasuries, sub-treasuries, Registration offices, offices of the District and Local Boards, dispensaries at district or subdivisional head-quarters, jails, subsidiary jails and lunatic asylum. He paid special attention to the working of the court sub-inspectors' offices, the working of Benches, the attendance of Honorary Magistrates and the frequency of remands. Settlement operations also received a due share of his attention. The practice of employing amins on monthly pay was stopped and orders issued to employ them by the job as more likely to expedite matters. He also inspected the offices of the managers of wards' estates, some of the ganja and opium shops which were on his route, liquor depôts and distilleries. He also visited slaughter-houses, markets and some schools. While at Murshidabad in March last, he paid a visit to the punitive police outpost stationed at Shamnagar, where the villagers murdered three men of Mr. Hills, of Patkabari, but escaped punishment. He inspected some of the old cemeteries, especially one at Barasat, which he visited in company with Mr. Collier and the Ven'ble Archdeacon of Calcutta. He also visited some of

the Government estates and inspected the offices of the Collector of Calcutta, and made a partial inspection of the office of the Collector of Income-tax at the same place.

(b) Tours of Collectors.

11. The orders of Government in respect of touring have been fully complied with by all the District Officers, except the Collectors of the 24-Parganas and Jessore. In the 24-Parganas the Collector and the Joint-Magistrate spent between them 89 days on tour, or one day less than the period prescribed by the rules. In Jessore the tour of the District Officers fell short by two days.

12. Mr. Collier, the Collector of the 24-Parganas, was out for 49 days and the Joint-Magistrate for 40 days. Their tour was distributed over all the months of the year, except May, September, and October. Mr. Collier says that his appointment as a member of the Select Committee on the Bill to amend the Bengal Municipal Act rendered it impossible for him to spend any more days on tour. All the subdivisional offices and treasuries were inspected twice during the year. Some of the sub-registry offices, most of the thanas and nearly all the municipal offices and dispensaries were visited. Mr. Collier also looked into the state of roads and communications and matters connected with the principal Government estates, inspected schools, enquired into the state of public feeling and public health, saw the state of crops and had interviews with the people of all classes. He, moreover, visited the Naihati cooly depôt and the jute mills at Shamnagar, Budge-Budge, and Baranagar.

13. The tour of the Collectors of Nadia extended over a period of 120 days, and was distributed over all months of the year, except February. Mr. Bernard was on tour for 112 days, and Mr. Collin, who took charge on the 5th March 1894, for eight days. Mr. Bernard visited all the subdivisional offices and sub-treasuries, thanas, sub-registry offices. municipalities and dispensaries. He looked into the state of roads and communications, the Government estates in Meherpur and Kushtia subdivisions, inspected schools and pounds in many places, enquired into the state of public feeling and public health, saw the state of crops in different parts of the district and had interviews with the people of all classes. In October he visited Birnagar, Ranaghat, and Chakdaha Municipalities, accompanied by the Deputy Sanitary Commissioner of Bengal, and minutely examined the sanitary arrangements of these municipalities. Mr. Collin visited Ranaghat and Santipur and made an inspection of all the public offices at these places.

14. In Murshidabad Mr. Kennedy spent 120 days on tour. He inspected all the khas mahals and the principal villages in the district, and also the subdivisional offices, treasuries and sub-registry offices.

15. The District Officers of Jessore spent 118 days on tour, or two days less than the time prescribed by Government. Of these, Mr. Hamilton was out for 50 days and Mr. Fiddian for 68 days. Mr. Fiddian says that he could have made up the deficiency of two days in the total touring for the year had he not been laid up for some time by an accident, and also detained at head-quarters for Mr. Westmacott's inspection. Mr. Hamilton was chiefly occupied with the inspection of subdivisional offices. He inspected some thanas, registry offices, and the Kotechandpur Municipal office, and made an enquiry about hemp drugs. Mr. Fiddian also inspected the subdivisional offices, police-stations, registration offices, schools, and other institutions and visited most parts of the district, except the Jhenidah subdivision, which was visited by Mr. Hamilton, and part of the Bangaon subdivision. Attention was given to the realisation of the arrears of chaukidars' pay, and for this purpose, whenever practicable, a notice was issued to all defaulting panchayats to meet him at the thana and pay up the arrears. The effect of this was to ensure in the majority of cases that the panchayats paid up the arrears on or before the date fixed. A marked improvement in the payment of chaukidars' salaries is said to have taken place, default for more than one quarter being quite exceptional, and in some police areas all have been paid up to date. Attention was also given to the registration of births and deaths. Registration of births has, as a rule, doubled in the year 1893 compared with 1892. Many enquiries were also made as to trade and commerce, the lines which traffic take, and the commodities dealt in. The result of prosecutions under section 110, Criminal Procedure Code, was found to have been beneficial as shown by a great decrease in burglaries, thefts, and dacoities.

16. The District Officers of Khulna spent 91 days on tour, or one day in excess of the period prescribed for this district. Of these, Mr. Fisher was out for 1 day, Mr. Brojendranath Dé for 8 days, Mr. Bompas for 17, and Mr. Maguire for 65 days. Mr. Fisher visited Bagerhat only. Messrs. Dé and Bompas each visited Bagerhat and Satkhira and made partial inspections. Mr. Bompas also inspected the thanas and outposts which lie in the way to these places. Mr. Maguire went round the whole district, stopping for nearly a week at the subdivisional head-quarters and for two or three days at each of the outlying thanas and making the usual inspections of khas tahsil offices, sub-registry offices, roads, schools and pounds. He attended several chaukidari parades and enquired about the state of the people generally. He also made enquiries about income-tax cases and outstills. His touring was not marked by any important occurrence.

(*c*) Tours of Subdivisional Officers.

17. The following table shows the time spent on tour by the Subdivisional Officers:—

District.	Name of Officer.	Number of days.
1	2	3
24-Parganas ...	Subdivisional Officer of Barasat ...	111
	Ditto of Basirhat ...	97
	Ditto of Diamond Harbour.	91
Nadia ...	Ditto of Kushtia ...	106
	Ditto of Meherpur ...	107
	Ditto of Ranaghat ...	137
Murshidabad ...	Ditto of Jangipur ...	115
	Ditto of Kandi ...	100
Jessore ...	Ditto of Jhenidah ...	125
	Ditto of Magura ...	109
	Ditto of Narail ...	122
	Ditto of Bangaon ...	94
Khulna ...	Ditto of Satkhira ...	101
	Ditto of Bágerhat ...	102

It will be seen that all the Subdivisional Officers without a single exception more than fully complied with the orders of Government in respect of tours. Almost all of them appear to have visited all parts of their respective subdivisions. The tours of the Subdivisional Officers of the 24-Parganas, Jessore, and Khulna were generally well planned and useful. Amongst other things, they made enquiries about the state of the crops and the supply of food-grains, the health of the people, the condition of the roads and other communications, the relations between landlord and tenant, income-tax assessments and the working of the Chaukidari Act. They also inspected police-stations, outposts, sub-registry offices, schools and pathsalas, excise shops, pounds and khas mahals. While in the interior they also enquired into criminal and revenue cases. Mr. A. K. Ray, the Subdivisional Officer of Bangaon, is said to have submitted interesting diaries. The Subdivisional Officers of Nadia and Murshidabad are reported to have given due attention to all the usual subjects of enquiry and inspection. The Subdivisional Officer of Bágerhat in Khulna visited the greater part of his subdivision. I think every Subdivisional Officer should thoroughly visit every part of his subdivision in the course of the year.

18. With reference to paragraph 10 of Government Circular No. 4J.D., dated the 14th October 1891, I may mention that in the 24-Parganas the Subdivisional Officers of Barasat and Diamond Harbour have each a horse and the Subdivisional Officer of Basirhat a boat. In Nadia and Murshidabad the Subdivisional Officers and others who have to camp out keep horses. In Jessore the Subdivisional Officer of Jhenidah keeps horses, and the Subdivisional Officers of Magura and Narail have each a boat. In Bangaon Babu Manmatha Kumar Bose had a horse, but Mr. A. K. Ray, the present Subdivisional Officer, has none. He travelled by *ticca* boats and hired horses as occasion required. In Khulna the Subdivisional Officers have each a boat.

(*d*) Inspection of District Offices and Treasuries by—
(1) Commissioner.

19. The district offices and treasuries in all the districts of the Division were inspected by my predecessor, Mr. Westmacott. Such irregularities as he found were pointed out in his inspection notes, and have since been remedied.

(2) Collectors.

All the District Officers inspected their offices and treasuries twice during the year. Their inspections did not disclose any serious irregularities in any department, except in Murshidabad. The chief defects noticed by the Collector of Murshidabad were in the Road Cess Department. The defects have, however, since been remedied.

(*e*) Inspection of Subdivisional Offices and Treasuries by—
(1) Commissioner.

20. Mr. Westmacott inspected all the subdivisional offices and treasuries during the year, except those in Murshidabad, which he had inspected in the latter part of March 1893. No serious irregularities were found.

(2) Collectors.

All the subdivisional offices and treasuries were inspected twice during the year by the Collectors, the Barasat subdivisional office having been inspected once more by the Joint-Magistrate of the 24-Parganas. The results of these inspections were generally satisfactory.

III.—WEATHER AND CROPS.

21. Statements Nos. I and II annexed to this report show the average rainfall and outturn of crops in each of the districts of this Division during the past three years. The average rainfall in the year under report was greater in all the districts compared with that in 1891-92 and 1892-93. The largest rainfall during the year was at Canning Town in the 24-Parganas, being 94·16 inches, and the smallest at Kandi in Murshidabad, where it was only 52·68 inches. The outturn of *aman* or winter crop in the 24-Parganas, Murshidabad, and Khulna was greater than that of the previous year, but the *bhadoi* or early rice and jute crop fell off in all the districts. Other crops are not grown in all the districts, and are not of much importance.

22. In the 24-Parganas the average rainfall in the year under report was greater than that of the previous year in all the subdivisions, except Diamond Harbour, where it was 66·58 against 88·24 in the preceding year. In June and July there were heavy rains, which submerged all the low lands in the southern part of the district. The result was that the transplantation of *aman* crop in the low lands was greatly impeded, and *aus* and jute standing on such lands were destroyed. This accounts for the average outturn of the *bhadoi* and jute crops being considerably less than that of the previous year. The *aman* crop on high lands, however, grew well, and its outturn was not below the average. The *rabi* and oilseed crops yielded a less outturn than in the preceding year, as the want of rain after sowing in October prevented the plants from thriving well.

23. In Nadia the average rainfall in the year under report was greater than that of the preceding two years in all subdivisions; but the uneven distribution during the year materially affected the cultivation and the outturn of different kinds of crops. During May and June, when the sowing and weeding operations of *bhadoi* paddy and other *bhadoi* crops were in progress, the weather was very unfavourable. The rainfall during those months being exceedingly heavy, the growth of the young crops was checked, while in some

parts of the Kushtia and Meherpur subdivisions the crops on low lands suffered from accumulation of water. The rainfall from July to September was also abnormal, while the utter cessation of rains from October to March injuriously affected the *rabi* crops all over the district. On the whole, the outturn of all the important crops except wheat was less than that of the preceding year.

24. In Murshidabad the rainfall of the year was unusually heavy throughout the district. In the Sadar subdivision the rain, which fell in April, May, and the first-half of June, was favourable to all the crops generally, but the heavy downpour which commenced thereafter caused considerable damage to the paddy of low lands, indigo, mulberry, and sugarcane. In the Sadar 23·13 inches fell in June against 10·38 in the preceding year. The rains of August, September, and October did good to the standing crops. There was no rain from November to the middle of January, and the winter crops began to fall off. The little rain which fell in February and March improved the condition of mulberry and indigo. In the Sadar subdivision an average outturn of all crops, except winter crops, was obtained. In the Jangipur subdivision the low tract called *Bagri* reaped a splendid *bhadoi* crop, but the expectation of reaping a bumper crop of *aman*, which is the principal crop in the neighbouring tract (*Rarh*), was not fully realised owing to incessant rains. A sixteen-anna crop was, however, obtained. The early growth of indigo was very promising, but constant rain spoiled the colour and reduced the ultimate outturn to 8 annas. The early-sown *kalai* was grazed down by cattle, as it produced no pods, while that late sown yielded a 6-anna crop. The total absence of winter rain caused the *rabi* outturn to be very limited, and in the case of wheat, insects damaged the roots. In the Kandi subdivision the total rainfall of the year under report was very little over that of the previous year. *Aman*, pulses and oilseeds were the only crops of which the outturn was better; that of all other crops was worse. This is ascribed to the untimely rainfall.

25. In Jessore the rainfall was abnormally high in May and June. The heavy fall of May interfered with the sowing of *aus* and *aman* and caused a large area to remain unsown, while that of June submerged the young *aus*, *aman*, and jute plants grown on low lands, and caused great injury to these crops as also to indigo. Incessant rains also greatly impeded the weeding operations, which are essential to *aus*, *aman*, and jute. Again, the absence of rain from the middle of November till the latter part of February much affected the *rabi* crops. Owing to these causes the outturn of the several crops of the year fell below the average. *Aus* or early rice crop yielded a 10-anna outturn against 18 annas in the previous year, while the outturn of *aman* fell below the average. *Aus* suffered more in Jhenidah and Narail subdivisions, while the outturn of *aman* was larger in the Narail and Bangaon subdivisions. Pulses, jute, indigo, and tobacco yielded a 9, 7, 4, and 12-anna outturn against 11, 16, 10 and 14 annas in the previous year.

26. In Khulna the average rainfall in the year under report was more than in either of the two previous years in all places of record, though in Lakhipur in the Satkhira subdivision it was almost the same as in the previous year. The highest rainfall during the year was at Rampal, viz., 93·81 inches. On account of heavy rainfall the low tracts in thanas Bágerhat and Mollahat, where *aman* and *boro* paddy are cultivated to a large extent, were entirely submerged, and those crops, as well as jute and sesamum, which also are largely grown in thana Mollahat, were almost totally lost. The outturn of *aus* was everywhere below the average, while that of *aman* exceeded the average in the Sadar, and was but little below it in the subdivisions. As a matter of fact, the winter rice crop varied a good deal in the different parts of the district. The heavy rains swamped the low lands, but spread abundant moisture over those occupying a higher position, and hence the rice on the higher lands did very well, while that on the lower levels was mostly lost. At the same time, the rice in the Sundarbans, which generally suffers from inundation by salt water, was saved by the heavy rain, and was nearly everywhere a bumper crop. The average outturn is therefore a mean between very good crops and rather bad ones.

IV.—PUBLIC HEALTH.

27. The following table compares the recorded mortality in the districts of this Division during the past three years:—

District.	Number of deaths from fever.			Number of deaths from cholera.			Number of deaths from other causes.			Total number of deaths from all causes.			Average of the past two years 1892 and 1891.
	1893.	1892.	1891.	1893.	1892.	1891.	1893.	1892.	1891.	1893.	1892.	1891.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
24-Parganas	31,884	33,164	32,185	1,561	8,742	7,082	7,656	6,152	6,518	41,101	48,058	45,785	46,921
Nadia	47,674	42,491	51,048	4,381	10,502	14,561	8,936	5,603	5,973	60,941	58,686	71,582	65,134
Murshidabad	38,592	31,825	31,705	4,390	4,617	4,352	5,545	4,237	4,512	48,527	40,678	40,599	40,639
Jessore	63,725	64,556	65,980	3,624	11,286	6,420	6,380	3,866	4,420	73,729	79,707	76,820	78,264
Khulna	24,148	28,548	24,247	1,270	3,961	2,824	6,705	4,777	3,642	32,123	37,286	30,713	33,999
Total ...	206,023	200,584	205,165	15,176	39,108	35,230	35,222	24,635	25,095	256,421	264,415	265,499	264,957
Ratio of death per mille of the population.	26·2	25·5	26·1	1·9	4·9	4·3	4·3	3·1	3·1	32·6	33·5	33·6	33·6

It will be seen that the figures for 1891-92 for the districts of the 24-Parganas and Khulna, as given in the reports for those years, differ considerably from those now furnished by the District Officers and reproduced in the present report. The discrepancies are apparently due to figures for those districts being furnished for calendar years instead of official years. Nevertheless, owing to defective registration, I cannot accept the statistics given in the above statement even as approximately correct, or base any argument upon them. As they stand, they show that the general health in the Division was slightly better than in the two preceding years. Taking the districts separately, the year was most unhealthy in Murshidabad and healthy in the 24-Parganas and Jessore compared with either of the two preceding years. In Nadia the year contrasted unfavourably with 1892, but favourably with 1891. In Khulna the year contrasted favourably with 1892, but unfavourably with 1891.

28. In the 24-Parganas the number of deaths from fever was less by 3·8 per cent., and from cholera by 82·1 per cent., while there was an increase of 24·4 per cent. in regard to deaths from other causes. The Magistrate thinks that deaths from fever were much under-registered during the year. He remarks that it is evident that the exceptional rainfall of the year (which extended from January to November) was attended in most parts of the district with an unusual increase of malarious fever which prevailed throughout the year; that the suburbs of Calcutta, notwithstanding their improved sanitary arrangements, had a large increase of fever; that at Kalighat, Alipore, and Chetla, in the Sadar subdivision, there were widespread outbreaks of malarious fever, and that there was an exceptionally great increase in the attendance at most of the dispensaries in the district, and the mortality too was heavy. Cholera of a sporadic form occurred throughout the district all the year round. The cases of small-pox during the year were fewer, the number of deaths from it being 116 against 375 in the preceding year. The total number of persons vaccinated during the year was 41,102, of which 138 cases were unsuccessful.

29. In Nadia the increase in the death-rate during the year was chiefly due to the greater prevalence of malarious fevers. The urban areas suffered as usual somewhat less than the rural areas, the ratio of death per mille of population being 33·41 against 37·34. Of the urban areas, the Meherpur town suffered the most, having a death-rate of 45·19 per mille of the population against 24·05 in 1892. The death-rates in the Kushtia and Kumarkhali towns were also much greater than in the previous year, the number of deaths being 103 from cholera during the year against 3 in 1892 in the former, and from fever 206 against 145 in the latter. Of the rural areas, Hanskhali, in the Sadar subdivision, furnished the highest death-rate, being 52·22 per mille against 36·51 in 1892, and thana Gangin, the lowest being 25·71 per mille against 35·33 in 1892. The greatest number of deaths occurred in the month of December (11,917), and the lowest number in March (2,280). The months of October, November, and December were, as is generally the case, the

unhealthiest in the year, and the number of deaths during these three months was more than one-half of the total number of deaths recorded during the year. Malarious fever of a virulent type prevailed throughout the whole district during the last three months of the year. The number of deaths from this cause was 47,674 against 42,491 in 1892, and the death-rate 29 per mille of the population against 25·84. Of this 25,590 deaths occurred during the months of October to December, and the remaining 22,084 deaths between the months of January and September, so that more than half the total number of deaths occurred during the last three months of the year. Cholera is shown as causing 4,331 deaths against 10,592 in 1892. The Kushtia subdivision had the highest death-rate, viz. 5·42, and the Ranaghat subdivision the lowest, viz. 0·37. Cholera generally becomes prevalent in many parts of the district during the months of March, April, and May, but in the year under report the number of deaths during these months was 39 only. It was prevalent during October, November, and December, and during that period it caused 4,181 deaths. The total number of deaths from small-pox was 26 against 1 in 1892. The deaths occurred from January to August. Dysentery and diarrhœa account for 267 deaths against 194 in 1892. Men suffered more than women, in the proportion of 9 to 5. The total number of deaths from injuries was 870 against 925 in 1892. They were chiefly caused by suicide and snake-bite. Suicides were more common among females than among males and in rural areas than in urban. Deaths from other causes were 7,773 against 4,483 in 1892. There were two deaths out of 136 admitted into the Krishnagar jail hospital.

30. In Murshidabad the total number of deaths returned was 48,527, or 38·79 per mille of the population—a number considerably in excess of the average of the past six years, and also in excess of any one year in that period. The total number of deaths reported from fever was 38,592, or 30·85 per mille of the population, against 31,825, or 25·46 per mille in 1892. This is by far the highest mortality recorded in the district. Although improved registration has no doubt much to say in accounting for this large increase, yet it cannot be denied that the year was exceptionally unhealthy in regard to malarious fever. The mortality from this was as usual especially heavy from October to April, and is attributed to the water-logged condition of the greater part of the district, the impure water-supply, the miserable physical condition of the majority of the population, their insufficient housing and clothing in the cold season, and the general absence of any healthy sanitary condition of any kind. The highest mortality from fever was in November, when 6,195 deaths were reported, and the lowest in June, when 1,890 deaths were reported. Thanas Assanpore and Manullabazar were most affected and thana Nowada the least. This district did not enjoy the comparative immunity from cholera like other districts, as this disease caused 4,390 deaths, or 3·5 per mille of the population against 4,617, or 3·67 per mille in 1892. It was present throughout the year in a sporadic form, but the mortality was small from January to August, while it broke out from September to December in an epidemical form, causing 4,295 deaths. The areas most affected were Burwa and Gorabazar thanas. As a rule there are two periods for the prevalence of cholera in this district—from March to May and from September to December. The year under report was marked by a total absence of epidemic cholera during the first portion of the year and by an unusual prevalence during the last portion. There were 6 deaths from small-pox against 24 in 1892. Four of these are reported from thana Bharatpore.

31. Judging by the mortuary statistics in Jessore, the year was healthier than its two immediate predecessors, but the Magistrate says that it was in reality more unhealthy. This, he says, is borne out by the fact that the total number of in-door and out-door patients treated at the charitable dispensaries amounted to 28,557 during the year against 18,812 in 1892 and 21,384 in 1891. So far as can be ascertained, heavy rainfall was the cause of the unhealthiness. Fever prevailed over the whole district all the year round, being worse during the months of September, October, and November, and reaching its highest in December with 12,577 deaths. The smallest number of deaths from this cause occurred in April, when only 2,998 deaths were registered. Out of the 63,725 deaths from fever, 31,345, or 49·2 per cent., were

reported in the last quarter of the year alone; 19,604 deaths, or 32·9 per mille of the population, occurred in the Sadar; 13,681 or 41·4 in Bangaon; 11,793 or 37·8 in Jhenidah; 10,182 or 33·5 in Magura; and 8,465 or 24·0 in the Narail subdivision. The ratio of deaths from fever was highest in the Bangaon subdivision and lowest in Narail. The total number of deaths from cholera was 3,624 compared with 11,286 in 1892, 6,420 in 1891 and 6,298, the average of the five years from 1888 to 1892. Thus in respect of this disease the year compares very favourably with its predecessors. The disease was present in every month of the year, but it was most prevalent in November and December, when 1,168 and 1,133 persons respectively were carried off by it. The total number of deaths from dysentery and diarrhœa was 112 against 114 in 1892. Deaths from small-pox numbered 2 against 1 in the preceding year. During the year vaccination was performed in 45,186 cases, of which the result was successful in 44,851, in 303 it was unsuccessful, and in 32 the result was unknown.

32. In Khulna the general health, as deduced from the mortuary returns for fever and cholera, has been fair and decidedly better than that of the immediately preceding two years, but there has been a considerable increase in the number of deaths from other causes. The number of deaths from fever was 24,148, or 20·05 per mille of the population, against 28,541, or 24·84 per mille in 1892, and 24,247, or 22·75 per mille in 1891. Cholera is shown as causing 1,270 deaths against 3,961 in 1892 and 2,824 in 1891. Deaths from this disease during the year are the smallest on record since the creation of the district. Deaths from small-pox were 2 against 8 in 1892; from bowel-complaints 99 against 105; from injuries 538 against 437; and from other causes 6,066 against 4,227.

V.—MATERIAL CONDITION OF THE PEOPLE.

33. As in the previous year, there was no improvement in the condition of the people during the year under report. From reading the various district reports it would seem rather to have deteriorated. The high price of food-grains, which prevailed during the last four years, pressed hardly on the landless classes and all persons with small fixed incomes. The agricultural classes did not feel the pinch so much, as they had the benefit of better prices for such crops as they harvested. The case was, however, different with the labouring classes who had scarcely any increase in their wages. The condition of the poorer middle or so-called *bhadra-lok* classes with limited incomes was bad, and in the present day it is naturally bound to become worse, as long as their false notions of respectability prevent them from taking to many remunerative callings and also from learning to help themselves. They spend more than they can afford on marriages and other social ceremonies, and to meet these charges, generally have recourse to the money-lender, with the inevitable result that they ultimately lose such rent-free lands as they happened to possess. This is evident from the large increase in the number of sales of immovable property, mortgage-deeds and bonds for money registered during the year in all the districts of this Division, except the 24-Parganas, where the majority of the people are purely agriculturists. The so-called poverty of the people is, however, of course only comparative, at least judging by what I have seen in the short tour I have taken in this Division compared with the state of affairs in North Bihar.

34. The southern part of the 24-Parganas, which consists of low lands, suffered considerably during the year from the effect of floods caused by excessive rains, especially in June and July. There was a total or partial failure of crops in some parts of the Diamond Harbour subdivision from the same cause. The distress was greatest in villages Moheswara, Protapbaria, and Hariharpur, in Government estate Kamarpole, and in thana Bankipur, where a sum of Rs. 4,000 was advanced to the raiyats under the Agriculturists Loans Act for the cultivation of the *boro* paddy and for enabling them to tide over temporary difficulties. Most of the raiyats of the Government estate Bil-Bullee also suffered from poor crops owing to heavy rains submerging their lands.

35. In Murshidabad the continued high price of articles of food, caused partly by successive bad crops of previous years, materially reduced the condition

of the people, especially of the middle class who mostly earn their livelihood by service. The labouring classes get sufficient employment and would earn more if they were not so accustomed to subsist partly on doles given by a good many of the zamindars. The actual cultivators are steadily improving in condition owing to the continued high prices of their produce.

36. In Jessore none of the important crops did well owing to an unfavourable distribution of the rainfall, as the early and heavy rains prevented the sowing of paddy in many places, and the want of rain later on in the season crippled the cold-weather crops. As the crops of previous seasons were also inadequate in many parts of the district, there has for some time been a tendency towards straitened circumstances. The one article of produce which gives some stability to the condition of the people in this district is *gur* made from the juice of the toddy palm, and the sugar which is manufactured therefrom. The outturn of these commodities was good during the past season. In the centre, south and part of the west of the district, the *gur* industry is regarded as the most important business. An average householder may possess 150 to 200 toddy trees, and throughout the cold weather he is seen busily engaged in all the processes, from tapping the trees to selling the *gur* or manufacturing sugar out of it. The high prices of food-grains have been most felt by the landless classes, and to a less extent by the poorer classes of agriculturists, who, after meeting the claims of their landlords and other creditors, had only a small stock of grain left for home consumption. Owing to bad harvests the landlords have had special difficulty in collecting their rents during the year.

37. In Khulna the state of the people depends mainly on their crops. Last year the winter rice, which is the chief staple food, was not a good crop, and in the early part of the year there was some distress on this account. In some parts of the Bágerhat subdivision, specially in thana Mollahat, which is chiefly dependent on the *boro* rice crop, matters were not improved by the general failure of crops. But the winter rice generally has been excellent, and the high prices which have ruled must have tended still further to improve the condition of the people. These remarks apply chiefly to the cultivating classes. The middle classes who do not work at agriculture have suffered from the high prices and the overstocked state of the labour market.

VI.—EMIGRATION AND IMMIGRATION.

38. *24-Parganas.*—As remarked in previous years, there is generally little or no emigration from the districts of this Division. During the year under review the total number of persons registered under the provisions of Act XXI of 1883 and Act I of 1882 for the colonies and the labour districts of Assam, Cachar, and Sylhet, was 1,987 and 3,229 respectively as compared with 1,285 and 4,288 in the previous year. Of the total number of persons who emigrated during the year, only 25 belonged to this district, and the rest to Bihar, the North-Western Provinces, the Sonthal Parganas, and other districts. No emigrants left for Jamaica during the year. Except in one case in which one person was convicted, no cases of abuse or misdemeanour on the part of recruiters were brought to notice.

39. *Nadia.*—There was the usual exodus of labourers during the harvest season from this district to the Sunderbans and neighbouring districts. Coolies from up-country were at work on railway lines.

40. *Murshidabad.*—There was no emigration from or immigration into this district during the year.

41. *Jessore.*—As in other years, people from different parts of the district visited the Sundarbans in the harvesting season to reap paddy. There they received as their remuneration a share in the crop harvested. *Nalwas* and fishermen also visited the Sundarbans—the former to collect reeds for preparing mats, and the latter to fish. Tappers of date trees also visited other districts in the tapping season. As in other years, a few Kabulis visited the district to sell cloth and fruits. Hawkers from Shahabad also came in winter to sell winter clothes. Coolies from Bihar and elsewhere also came to make roads and dig tanks.

42. *Khulna.*—There was the usual influx of labourers from Nadia, Jessore, Backergunge, and Faridpur in the transplanting and reaping season. They

are generally paid in kind, and the rate in ordinary years is one-fifth or one-sixth of the produce reaped. In the Bágerhat subdivision the partial local distress, and the general distress in the neighbouring districts of Faridpur and Backergunge, caused an unusually large number of labourers to flock to the south of the subdivision. There was thus great competition, and the rate was reduced to one-fifteenth, and in some place to one-sixteenth, of the produce reaped. Various labourers also came to cut firewood and timber in the Sunderbans.

VII.—PRICES OF FOOD AND LABOUR.

43. Statements Nos. III and IV showing the prices of food and labour during the last fortnight in March 1894 in the several districts of this Division are annexed.

44. It will be seen that the price of common rice, which is the staple food in this Division, was almost stationary in Nadia and Khulna, less in the 24-Parganas and Murshidabad, and higher in Jessore, as compared with the two preceding years. The price of salt in all the districts has remained almost stationary during the last three years, although with the exception of Khulna it was slightly higher last year than in the previous years. The price of wheat and gram fell off considerably in every district save Khulna, but these articles are not commonly consumed.

45. The figures of the statement cannot, however, be accepted as representing the prices of food-grains throughout the year, inasmuch as all kinds of food-grains ruled high from April to October. In the 24-Parganas the price of common rice ranged from 10 to 13 seers a rupee from the beginning of the year. Owing to the damage caused to the *aman* paddy by the heavy rains of June and July, there was a further subsequent rise in prices, but after harvest the price of common rice fell, the outturn of *aman* paddy not being below the average. In Jessore the price of common rice is gradually rising. Compared with the previous year, there was very little fluctuation in cost during the first two months of the year, but in the subsequent months it rose, and would have risen still higher, but for the import of a large quantity of rice from Birbhum, Burdwan, and Dinajpur. As stated in last year's report, prices in this district and Khulna are no longer restricted to local causes. The development of the railway system equalises to a great extent prices. In the subdivisions of Khulna and Satkhira the price of rice was lower than in the two preceding years, while at Bágerhat it was the same as in 1892-93, but lower than in 1891-92.

46. As regards the wages of labour, both superior and common, they were almost the same as in the past two years in the districts of Nadia and Jessore. In the 24-Parganas, Khulna, and Murshidabad, a slight increase has taken place in the wages of blacksmiths, both superior and common, and in Murshidabad in the wages of carpenters also. As they are in a manner fixed by local custom, the rise or fall in the price of food-grains has no appreciable effect on them.

47. In the 24-Parganas and Nadia there was a slight rise in the wages earned by coolies, while in Khulna they decreased.

VIII.—MANUFACTURES AND MINES.

48. The chief manufactures of this Division are cotton twist and yarn, gunny-bags and cloth, paper, ice, shellac and lac-dye, indigo, silk, sugar, and molasses.

49. The manufacture of cotton twist and yarn, gunny-bags and cloth, sugar, paper, silk, ice, shellac and lac-dye is confined to the district of the 24-Parganas, in which there were 58 mills, presses, and factories, against 49 in the previous year. Of these, 9 are owned by Government, the rest belonging to companies or private individuals. 72,833 operatives in all were employed in these factories; of these, 67,569 were adults and 5,264 children. Among the adults 58,668 were males and 8,901 females, and of the children 4,902 were boys and 362 girls.

50. The following statement gives the value of the outturn returned by the owners of the mills, presses, &c., during the last two years:—

Articles.	Outturn.			Remarks.
	1893-94.	1892-93.	1891-92.	
1	2	3	4	5
	Rs.	Rs.	Rs.	
Gunny-bags and cloth	1,61,98,071	1,00,37,674	1,17,47,836	
Cotton twist and yarn	3,51,51,812	68,24,017	68,90,697	
Rice	No information furnished.	58,000	2,28,123	
Paper	12,05,873	10,49,167	10,18,697	
Lac	9,50,000	10,00,000	12,00,000	
Tannery ...	No information furnished.	...	72,000	

According to these figures the year was a successful one for gunny-bags and paper and also for cotton twist and yarn.

51. The following remarks, made by the Manager of the Baranagar Jute Factory, point to an unfavourable condition of the jute trade:—

"The year 1893-94 commencing on 1st August 1893 has been so far most unprofitable to all concerned in the manufacture of jute. The report of a short jute crop induced speculators, balers and mills to pay famine prices for the raw material, and, although higher rates were obtained for manufactured goods, this rise in price was never sufficient to enable manufacturers to cover costs. Several concerns began to work 'short time' very early in the year, and one closed its works altogether, finding that the working loss would be greater than the standing cost. The associated mills entered into an agreement to work only five days per week for three months from 2nd April 1893. In face of the very unremunerative state of the trade, the Hastings mill has been worked day and night for some time. The opinion of the Jute Mills Association is dead against night and day work, and a number of the associates is strongly in favour of memorialising the Government of India, with a view of having the Indian Factories Act amended and the limits of the working day fixed, so that no jute mill should be able to work except between the hours of 6 A.M. and 6 P.M. If women and children could be employed only between these hours, it would have the desired effect.

"The almost complete stoppage of wheat shipment from India during the year under review has been very prejudicial to the gunny trade, the export demand, although good, being scarcely sufficient to take off even the diminished production."

52. With regard to the manufacture of cotton twist and yarn, the Secretary to the Dunbar Cotton Mill writes as follows:—

"*Cotton.*—When the financial year 1892-93 closed, cotton prices were at a point midway between the inflated values which were reached in February 1893 and the lower basis established on the expectation of a large American crop in the following May. The sterling prices of Indian cotton followed those of American closely, but when in July last the closing of the Indian mints put an artificial value on the rupee, and exchange rose nearly to 1*s.* 4*d.*, a proportionate decline in the rupee value of Indian cotton took place.

"The crop of Indian cotton season in 1893-94 has been above the average in point of quantity in the Bengal circle, but quality has been indifferent, while the Bombay crop shows fair quality, but is short in quantity. Price has been moderate.

"*Yarn.*—At the close of the financial year 1892-93 the prospect of Government taking measures to raise the exchange value of the rupee had caused difficulty in financing business with China and hampered the yarn export trade to that country, on which local mills have largely depended. When the mints were closed in June 1893, and all the evils of a fluctuating exchange were fastened on to our trade with silver-using countries in an accentuated form, the trade with China was at once stopped. This has been a terrible blow to the local yarn trade, as the mills have now to depend almost entirely on local consumption. Fortunately owing to the excellent crops which were produced last year over the greater part of India, consumers were

able to spend more money on clothing, and an unusual local demand for yarn ensued. This enabled mills to clear their stocks, but left prices still low. At this moment it seems that this local demand has been supplied, and as China, owing to the vagaries of exchange, is still almost closed to the trade, stocks are accumulating and prices falling, and all margin of profit has disappeared."

53. The outturn of the paper mills at Titaghur was 7,717,588lbs. against 6,714,673lbs. in the previous year. The manufactures consisted of white printing, *badami* and coloured paper, blotting paper, cartridge, foolscap and water-marked stamp paper of the value of Rs. 12,05,873 against Rs. 10,49,167 in the previous year. The raw materials used were rags, straw, grasses, old gunnies, jute, hemp, bagging and waste papers, &c.

54. Besides the mills and factories mentioned above, there are several mills in the suburbs of Calcutta, but no statistics regarding their outturn are available. Considerable improvement is said to have been made in the working of the 16 oil mills at Sarupganj in the district of Nadia. The prejudice against the use of the mill oil has almost been removed, and the demand for the oil has so much increased of late that the proprietor is thinking of increasing the number of mills.

55. Indigo is largely manufactured in the districts of Nadia, Jessore, and Murshidabad. The table below shows the state of this industry during the last three years:—

District.	Number of factories.			Produce in maunds.			Value in rupees.			Remarks.
	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	
1	2	3	4	5	6	7	8	9	10	11
Nadia	63	65	62	1,249	2,130	6,519	2,51,055	5,44,790	12,67,980	
Murshidabad	23	23	25	1,641	1,357	2,189	4,21,577	4,11,795	3,95,995	
Jessore	17	20	27	478	1,198	3,099	1,20,096	3,33,942	5,05,026	
Total ...	103	108	114	3,368	4,685	11,807	7,92,728	12,90,527	21,69,001	

It will be seen that the number of factories at work during the year under review remained the same in Murshidabad, while it has decreased in Nadia and Jessore. Compared with the two previous years, the value and outturn of indigo were very poor in the latter two districts, especially in Jessore, where the crop was almost a total failure. In Nadia the excessive rainfall at the manufacturing season injuriously affected the outturn, which would otherwise have been far better. In Jessore the short outturn is due to untimely heavy rains, from the beginning to the middle of the season, which damaged the October plants. Mr. P. Smith, the proprietor of the Kathuli Concern in Nadia, has termed the season a most ruinous one. Probably the manufacture of indigo is gradually dying away as in most districts of Bengal. The Meherpur subdivision in the district of Nadia is still the principal seat of this industry. There are six large concerns in this subdivision as reported in paragraph 84 of the previous year's report.

Silk.

56. The manufacture of silk is principally carried on in the districts of the 24-Parganas and Murshidabad. The following table compares the state of this industry during the last three years:—

District.	Number of filatures.			Produce in lbs.			Value in rupees.			Remarks.
	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	
1	2	3	4	5	6	7	8	9	10	11
24-Parganas	Information not furnished.						53,719	52,068	56,015	
Murshidabad	63	66	64	576,380	333,621	309,149	33,84,573	27,24,190	22,88,043	

In the 24-Parganas there was a small increase in the value of the outturn compared with the previous year, while there was a large increase both in the value and the outturn in Murshidabad. According to the Collector, the trade is, however, declining in this district.

57. The manufacture of silk cloth at Mirzapore in the Jangipur subdivision in Murshidabad is losing ground year by year. During the year under

report 7,004 pieces of silk cloth were manufactured against 10,941 pieces of the previous year, the value realised being Rs. 51,450 against Rs. 91,083. The high price during the year is said to have materially affected the manufacture and sales. There are other places in this district, viz. Baluchar, Hariharpara, and Daulatabad, where silk cloths are manufactured on a small scale, but the Collector has no information regarding their manufacture and sale.

Sugar.

58. Sugar is manufactured in all the districts of this Division, except Murshidabad. The managers of the sugar mill at Cossipore in the 24-Parganas have not supplied any statistics of their operations. The manufacture of sugar by the native process continues in the Basirhat and Barasat subdivisions in the 24-Parganas, and in Basirhat the season seems to have been a good one. The following table compares the state of this industry in the districts of this Division during the last three years:—

District.	Number of factories.			Outturn.			Value.			Remarks.
	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	
1	2	3	4	5	6	7	8	9	10	11
24-Parganas ...	229	175	Not furnished.	92,546	75,800	Not furnished.	Rs. 6,62,907	Rs. 5,68,500	Rs. Not furnished.	These figures apply to the Basirhat sub division only.
Nadia ...	No statistics available.									
Murshidabad ...	...	...	...	...	...	...	...	...	...	
Jessore ...	174	174	167	288,036	319,170	431,181	20,79,532	19,05,429	27,89,508	
Khulna ...	Not furnished.			18,160	17,431	21,824	1,38,497	1,56,879	1,52 768	

These figures are entirely guess-work and cannot be much relied on, but apparently in the 24-Parganas there was a considerable increase in the outturn as well as in the value of sugar. In Jessore there was a decrease in outturn, but increase in value, while in Khulna there was an increase in the outturn, but decrease in the value. The Collector of Jessore observes: "The rainy weather in February and March greatly interfered with the tapping of the date trees, and thus affected the outturn. The price of sugar rose in consequence by about a rupee in the maund. The fall in the value of the rupee had also to do with the increase in the value of sugar, as sugar made out of India could not compete successfully with the home-made product." In Khulna the decrease in value is said to be due to an increase in outturn.

59. In Jessore, besides the native factories, there were three English refineries—one at Kotechandpur and one at Chaugatcha belonging to Mr. Newhouse, and one at Taherpur belonging to Rai Dhanput Singh Bahadur. The refineries at Kotechandpur produced 15,269 maunds of sugar against 11,596 maunds in the preceding year, while those at Chaugatcha and Taherpur produced 19,600 maunds and 17,100 maunds against 14,584 maunds and 33,252 maunds respectively. The cause of decrease in the outturn at the Taherpur factory appears to be that the work was stopped for a long time for reasons not stated.

60. The principal centres of date sugar in the district of Nadia are Santipur, Chakdoha, Kishenganj, Daulatganj, Alamdanga, and Munshiganj. No statistics are available regarding their outturn.

Molasses.

61. Sugarcane is largely cultivated in the Kushtia subdivision and in part of Meherpur in Nadia. In the Kushtia subdivision Messrs. Renwick and Company let out 1,369 sugarcane mills on hire during the year under report against 1,750 in the preceding year. The decrease in the number of mills let out has been attributed to the bad outturn of sugarcane. The rate of monthly hire for each mill was Rs. 26-6. In Murshidabad molasses are manufactured in the Kandi subdivision. The outturn during the year is estimated at 2,400 maunds, valued at Rs. 11,400, against 4,000 maunds, valued at Rs. 12,000, of the previous year. The heavy decrease is explained to be due to the sugarcane deteriorating in quality owing to the same kind of sugarcane being cultivated from year to year on the same plots. In Khulna the outturn during the year was 68,543 maunds, valued at Rs. 1,91,611, against 41,346 maunds, valued at Rs. 93,028, in the previous year. It will be seen that there was an increase in outturn as well as in value.

62. The other manufactures of the Division are noted below:—

Brass-work.

The brass foundry at Moheshganj in Nadia manufactures iron screws and other requisites for indigo factories. The year having proved very unfavourable to the business, the orders received were very few, and consequently there was no improvement in its working during the year under report. Brass utensils of a common kind are manufactured in the Sadar subdivision of Nadia and in Jessore. In Murshidabad bell-metal and brass utensils of superior kinds are manufactured in considerable quantities, in Berhampur, Kandi, and Baranagar.

Dhotis, saris, &c.

Santipur *dhotis* and *saris* are in much demand for their fine texture. The cotton wrappers of Kushtia and Kumarkhali are very largely used by the poorer classes on account of their cheapness The manufacture of cotton cloths is also carried on in the districts of Murshidabad, Jessore, and Khulna, but the industry is gradually dying away, being unable to compete with foreign manufactures.

Pottery and clay figures.

The clay figures of Ghurni, a part of the Krishnagar town, are very much appreciated both here and abroad. A fine kind of pottery with a black glaze is made at Khanjya in Khulna, but its price is too high for ordinary purchasers. A coarser imitation of it is made at Toleswar, which being cheap has a ready sale. Pottery of common kind is also manufactured in Jessore and Murshidabad.

The ivory industry in Murshidabad, which was at one time very flourishing, is now almost extinct, the manufacture being carried on only to a small extent in Khagra, Manullabazar, and Daulatabad.

Shell bracelets and blankets are manufactured in Murshidabad, and sticks, sandalwood boxes, teapoys of buffalo horn and mats of reeds in Khulna.

63. There are no mines in any of the districts of this Division.

IX.—TRADE AND COMMERCE.

64. 24-*Parganas*.—The table below shows the export and import traffic registered along the 11 main trade routes of the district during the past two years:—

Articles.	From mufassal towards Calcutta.		From Calcutta towards mufassal.	
	1892.	1893.	1892.	1893.

	Rs.	Rs.	Rs.	Rs.
Cotton piece-goods,	81,252	72,992	16,99,069	16,87,281
luc.				

The total weight of traffic into Calcutta from the interior shows an increase of about five lakhs of maunds as compared with the previous year. The increase was mainly in rice, wheat, oilseeds, firewood, jute, lime and salt. Paddy, sugar, *gur*, oil and iron show a decrease. In the outward trade from Calcutta to the interior there was a large increase in paddy and a small increase in *gur*, jute, tobacco and cotton, while there was a large decrease in rice, oilseeds and lime.

65. The above figures do not, however, include the whole internal trade of the district. They do not also include the large railway traffic or the boat traffic on the Hooghly or on the Baliaghatta canal. It seems therefore hardly safe to base any general conclusion on statistics, which only show a portion of the trade of the district, and the utmost that can be said is that as far as they go trade was about as brisk as in the previous year.

66. *Nadia.*—Trade in this district is carried by river, rail and road. The chief articles of export from it are indigo, jute, oilseeds, wheat, gram, pulses, sugar, tobacco, fish and poultry. The chief imports are cotton piece-goods, rice, paddy, salt, *ghi*, kerosine oil, cocoanut oil, spices and flour. The tables below show the value and quantities of the principal staples of traffic exported from this district to Calcutta and imported from Calcutta to this district during the ten months from April 1893 to January 1894 :—

TABLE I.

Showing Exports from Nadia to Calcutta.

Rice.	Paddy.	Wheat.	Gram and pulses.	Other food-grains.	Jute, raw.	Gunny-bags.	Linseed.	Mustard.	Cotton, raw.	Silk, raw.	Sugar, refined.	Sugar, unrefined.	Tobacco unmanufactured
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Mds. 11,772	Mds. 17,088	Mds. 1,42,022	Mds. 8,21,009	Mds. 8,677	Mds. 4,22,430	Mds. 85,063	Mds. 2,59,999	Mds. 20,218	Mds. 3,021	Mds. 1,102	Mds. 10,330	Mds. 58,923	Mds. 26,781

TABLE II.

Showing Import to Nadia from Calcutta.

Cotton piece-goods.		Cotton twist.		Salt.	Gunny-bags.	Kerosine oil.
European.	Indian.	European.	Indian.			
1	2	3	4	5	6	7
Rs. 27,32,573	Rs. 2,400	Mds. 19,187	Mds. 757	Mds. 2,33,664	Mds. 4,13,948	Mds. 1,22,369

The above figures, it is stated, have been taken from the statistical statements from April to December 1893 supplied by the Statistical Department of the Bengal Secretariat on the 24th April last, and also from the statement for January 1894, published in the *Calcutta Gazette* of the 2nd May 1894. The statements furnish important statistics of trade carried on in the district by all kinds of routes, and if the figures are intended to be embodied in the general administration and the annual trade reports, the publication of these statistical statements for each official year should be completed in time to enable the District Officers to include the figures in their annual reports which are due on the 1st June of each year. As, however, this is not likely to be done, it would be better perhaps if the figures for the calendar year were embodied in the reports, and the District Officers commented on them and compared them with the figures of the previous year. At present the different modes of dealing with the figures obtained in different ways from different sources discount very much the usefulness of such figures.

67. The table below shows the rail-borne traffic in the district during the year 1893 compared with 1892. The figures, it is stated, have been taken from

the revenue statistics of the Eastern Bengal State Railway supplied by the Manager :—

Articles.	Exports.		Imports.	
	1893.	1892.	1893.	1892.
1	2	3	4	5
	Tons.	Tons.	Tons.	Tons.
Rice	1,534	1,835	6,946	1,534
Gram and pulse ..	20,946	17,565	10,129	1,925
Salt	...	...	1,936	5,920
Sugar	6,047	6,340	186	274
Seeds	7,347	2,418	687	959
Cotton, manufactured ...	34	77	2,351	2,096
Tobacco	95	216	133	316
Jute, unscrewed ...	13,322	18,440	174	199
Hides and skins ...	327	197	...	...
Miscellaneous ...	4,874	5,026	8,989	1,813
Coal and coke ...	501	317	6,593	8,957
Metal, manufactured ...	340	191	840	892
Kerosine oil ...	13	20	1,986	1,448
Provisions	674	491	803	896
Oils, vegetable ...	...	...	361	621
Timber	32	90	493	770
Indigo	63	...	...	...
Turmeric	410	...	...	...
Total ...	56,559	53,223	42,607	28,620

In 1893 the exports and imports of all kinds amounted to 56,559 and 42,607 compared with 53,223 and 28,620 in 1892. Both heads show an increase which is especially marked under imports. Under exports, trade was brisk in gram and pulse, seeds and some other minor articles. In imports in rice, gram and pulse and miscellaneous goods, the increase is attributed to the partial failure of crops in the district during the year under report. The import of cotton (manufactured) and kerosine oil also shows some increase.

68. The following statement shows the total amount of import and export trade carried along the Nadia rivers during the past two years:—

	Imports.	Exports.
	Mds.	Mds.
1892-93 ...	4,61,919	7,58,812
1893-94 ...	5,28,857	6,53,665
Increase	66,938	
Decrease		1,05,147

There was thus under this head an increase in the imports during the year, while the exports show a falling off. The increase in imports was chiefly under the head of rice and paddy and was mainly due to the partial failure of paddy crops during the year. There was also some increase in the importation of oil, oilseeds, and coal and coke. The decrease in the exports was noticeable under the heads of pulse and gram, firewood, iron, jute and bamboos, and is ascribed to the partial failure of the jute and *rabi* crops.

69. *Murshidabad.*—The table below gives the details of the export trade in this district during the last two years:—

Articles.	1892-93.	1893-94.
	Mds.	Mds.
Rice in husk	1,10,370	81,095
Do. not in husk	2,45,300	5,45,877
Wheat	90,205	36,781
Gram and pulse	5,16,407	55,177
Jute	1,78,508	2,50,282
Linseed	92,676	88,762
Mustard	12,560	4,369
Total	12,46,026	10,62,843

Compared with the preceding year, there was a large increase in the export of rice not in husk and in jute. This is attributed partly to good crops and partly to the high prices which prevailed in several districts during the year under report. On the other hand, the export in rice in husk, wheat, gram and pulse and mustard shows a marked decrease. The decrease under the head of rice in husk naturally follows the large increase in the export of rice not in husk, and under the other heads it is ascribed to the shortness of winter crops in general.

70. The articles imported into this district are piece-goods, sugar, salt, twist yarn, cocoanut oil, kerosine oil and coals. The above articles are all imported from Calcutta, except coal, which comes from Raniganj.

71. The table below shows the principal articles of export by the rivers during the past two years. The toll office is at Jangipur in the north of the district:—

Articles.	1892-93.	1893-94.
	Mds.	Mds.
Rice and paddy	65,455	1,18,414
Wheat	32,976	30,906
Pulse and gram	39,474	48,639
Jute	52,594	1,14,008
Coal	31,565	49,859
Total ...	2,22,064	3,61,826

It will be seen that there was a marked increase in the export of all these articles, except wheat, in which there was a slight decrease.

72. The following statement shows the chief articles of import by river in this district and the extent to which they were imported during the year as compared with the preceding year:—

Articles.	*1892-93.*	*1893-94.*
	Mds.	Mds.
Mustard	35,583	26,219
Tobacco	13,098	15,090
Firewood	7,363	18,724
Lime	5,924	14,508
Coal	16,840	6,172
Rice and paddy	6,494	18,678
Pulses and grain	4,269	14,964
Total ...	89,571	1,14,355

The above shows that there was a marked increase in the import of all articles, except mustard and coal, in which there was a large decrease.

73. The river-borne traffic of this district is confined as a rule to some months during the rains; its briskness gradually ceases with the subsidence of the water of the Bhagirathi. During the year under report, however, the river remained navigable nearly throughout the year, and Messrs. Hoare, Miller and Company's steamer carried on exports and imports from Calcutta to Jeaganj without much difficulty.

The articles of export and import up and down the river consisted of rice, paddy, wheat, pulses and grain, mustard and other oilseeds, jute, cotton, silk and silk goods, sugar, tobacco, vegetables, dyes, brass and brass utensils, *ghi*, salt, spices, oil, firewood, lime, coal, timber, and other miscellaneous goods.

74. The Collector has not been able to furnish any statistics of the rail-borne traffic in the district, as he did not get them from the Railway authorities. He does not mention whether he has asked for such information.

75. *Jessore.*—There was no change in the important means of communications of this district during the year under report. There are no offices in this district for the registration of traffic except the railway stations. The railway figures, however, do not of course correctly represent the trade statistics of the district. These are collected through the police or the sub-executive staff, who have to depend entirely on the mere *ipse dixit* of the traders, who again are careful not to give actual figures for fear of the income-tax.

76. The figures shown in the following two tables roughly exhibit the import and export trade of the district. They have, however, no strong claim to be regarded as accurate:—

ARTICLES.	IMPORT.	
	1892-93.	1893-94.
1	2	3
Piece-goods ...	10,32,200 Rs.	9,30,198 Rs.
Salt ...	1,78,452 Mds.	1,69,992 Mds.
Rice ...	2,50,156 „	4,92,950 „
Cocoanut oil ...	10,000 „	15,645 „
Kerosine oil ...	50,000 „	41,115 „
Spices ...	1,24,000 „	1,18,703 „
Hardware ...	18,650 Rs.	27,159 Rs.
Potato ...	30,000 Mds.	31,414 Mds.

Piece-goods show the largest decrease, while rice shows the largest increase. The decrease in the import of piece-goods is attributed to the increase in their price owing to the fall of the value of the rupee and the rise in the price of jute, while the increase in the import of rice is said to be due to a succession of bad harvests. The fluctuations in the import under the other heads are attributed to general causes. It is stated that a good deal of Burma rice was imported into the Magura subdivision from Calcutta, and that a large quantity of rice from Birbhum, Burdwan, and Dinajpur also found its way into this district, besides the usual importations from Backergunge. Paddy is also said to be largely imported from Khulna.

77.

ARTICLES.	EXPORT.	
	1892-93.	1893-94.
1	2	3
	Mds.	Mds.
Gur ...	3,31,178	3,30,000
Sugar ...	2,73,115	2,23,500
Indigo ...	1,198	478
Rice ...	58,436	23,300
Oilseeds ...	38,500	49,800
Pulses ...	93,400	87,500
Tobacco ...	9,044	8,300
Jute ...	2,31,732	1,20,000
Chillies ...	4,820	2,000
Fish ...	14,900	19,000

Besides the above, paddy is also exported from the bhil district in the north to Nadia and places on the west. All the articles of export, with the exception of oilseeds and fish, show a decrease, and in each case the poorer outturn is said to have been the cause. The increase in the export of oilseeds is ascribed to a better outturn, and in the export of fish to the fact that the local prices were lower than in the previous year.

78. As stated in the previous year, the Bengal Central Railway has greatly facilitated traffic. Local products find a ready market in Calcutta through its medium, while foreign articles are imported at a lesser cost. Whenever the local market is found dull for any home product, the commodity begins to be exported.

79. From this district Calcutta gets its fair share of food. Flocks of goats and sheep are brought up here and sent to Calcutta along the Jessore-Calcutta road. Dealers penetrate to most parts of the district and buy up poultry. During the last cold season truck loads of turtles, which had been caught in the bhils, were despatched by rail to Calcutta for consumption by the lower classes. The turtles come into the bhils with the river water at times of flood, and when the water recedes they are found in the shallows and caught.

80. The following is a balance sheet of the Jessore Loan Company on the 31st March 1894:—

Detailed heads of income.	Amount.	Detailed heads of expenditure.	Amount.
1	2	3	4
	Rs. A. P.		Rs. A. P.
1. Deposit ...	1,93,005 0 0	1. Establishment, &c. ...	4,647 10 3
2. Debts recovered ...	1,42,795 11 3	2. Expenses for the management of immovable property.	570 11 3
3. Interests realised ...	33,950 11 9		
4. Rent, cesses, &c. ...	8,003 10 9		
5. Unpaid dividend ...	429 6 0	3. Rent, &c., paid ...	6,915 4 3
6. Reserve fund ...	1,028 0 0	4. Loans given ...	2,86,158 0 0
7. Income-tax recovered.	300 0 0	5. Repayment of deposits	75,621 0 0
		6. Interests paid ...	23,217 4 0
8. Pleaders' fees realised.	127 6 6	7. Dividend ...	12,726 3 0
		8. Purchase of immovable property.	13,700 0 0
9. Other miscellaneous receipts.	89 3 9	9. Law expenses ...	768 8 3
10. Cash in hand at the beginning of the year.	1,10,765 4 6	10. Repayment of other deposits.	89 3 0
		11. Refund of excess interests realised.	238 8 0
		12. Sale of promissory notes.	2,500 0 0
		13. Closing balance ...	63,342 2 6
Total ...	4,90,494 6 6	Total ...	4,90,494 6 6

The Loan Company is apparently in a flourishing condition.

81. *Khulna.*—The following table gives particulars of the import trade of the district during the past year compared with the year before:—

Articles.	1892-93.	1893-94.
Piece-goods ...	6,96,671 Rs.	7,43,980 Rs.
Gunny-bags ...	4,806 No.	46,795 No.
Salt ...	1,54,884 Mds	1,11,851 Mds
Cotton twist and yarn	30,868 „	3,491 „

From the above it appears that the trade in piece-goods and [illegible] was very brisk during the year, while that in cotton twist and salt shows a large falling off. Other important imports are kerosine oil, iron-ware, gram, wheat, fancy goods and potatoes, but no statistics are available as to their quantity or value.

82. The following table shows particulars of the export trade of the district during the past two years:—

Articles.	1892-93.	1893-94.
Rice in husk ..	20,26,740 Mds.	7,40,562 Mds.
Do. not in husk	4,42,468 „	5,45,479 „
Pulses	15,200 „	3,600 „
Jute	94,131 „	63,388 „
Linseed	2,500 „	
Sugar	1,56,879	18,160 Mds.
Molasses	93,028 „	61,543 „
Hides	40,249 Rs.	36,326 Rs.
Gunny-bags		974 No.

Besides the above, cocoanuts, betel-nuts, fish, tobacco, *sundri* logs, mats, reeds and honey were largely exported to Calcutta and other districts.

83. It will be seen that there was a large decrease under all the heads of export, except rice not in husk, in which there was a marked increase. The figures given for unhusked rice in 1892-93 are said to have been wrong. One market, that of Bardal, is said to have exported 14,00,000 maunds that year against 1,25,000 maunds in the year under report. The figures for 1892-93 are altogether excessive, as the market is not large enough to have so great an export. It is, however, observed that the figures showing the export of rice are far below the actual figures. Much it is stated is sent to Backergunge, cleaned and re-exported, and much is sent direct in boats to Calcutta from the Sunderbuns without coming under the notice of the authorities. No explanations have been furnished regarding the fluctuations under the other heads.

84. The statement below shows the rail-borne traffic of the district during the year compared with 1892:—

Articles.	1892.				1893.			
	Imported.		Exported.		Imported.		Exported.	
	Tons.	Freight. in rupees.	Tons.	Freight in rupees.	Tons.	Freight. in rupees.	Tons.	Freight in rupees.
1	2	3	4	5	6	7	8	9
Betel-nuts	38	87	1,093	3,578	.....	.....	1,173	3,789
Coal	4,940	7,909	57	421	7,338	12,729	1	4
Cotton, manufactured ...	810	2,217	.....	.....	321	987	6	24
Do. raw	.....	1	14	55	1	5	3	15
Gunny-bags and cloths ...	18	57	27	99	13	46	9	29
Grain and pulses	100	240	226	401	56	124	469	851
Hides and skins	1	1	104	343	.....	.....	170	545
Jute, unscrewed	.....	.....	9,038	34,552	.....	.....	7,137	28,011
Kerosine oil	230	516	4	2	172	392	2	4
Metals and manufactures	119	352	32	120	75	252	14	54
Oil	309	609	.....	.....	162	373	.....	.....
Provisions	232	897	240	552	320	1,263	260	602
Rice	8	24	2,902	5,706	633	1,499	634	1,142
Salt	188	385	9	20	107	213	.....	.....
Seeds	9	20	494	934	11	19	562	1,082
Sugar	51	140	4	7	45	150	5	5
Tobacco	157	499	4	11	16	33	168	506
Unclassified	687	2,439	982	3,658	575	2,268	671	2,753
Total ...	7,897	16,393	15,230	50,459	9,845	20,353	11,284	39,426

The only heads calling for any remark are the large increases in imports under coal and rice, and in exports under tobacco, and the decreases in imports under cotton manufactured, salt and tobacco, and in exports under jute unscrewed, and rice.

85. The following statement shows the transactions of the Khulna Loan Company, Limited, for the calendar year 1893:—

Receipts.					Expenditure.				
1					2				
		Rs.	A.	P.			Rs.	A.	P.
Deposits received	...	99,505	1	6	Loans advanced	...	1,08,216	8	0
Debts recovered	...	56,610	9	3	Deposits repaid	...	59,434	7	0
Interest realised	...	15,721	11	6	Interest paid	...	10,425	8	0
Costs of suits realised	...	569	11	0	Dividend paid	...	1,866	1	0
Discount	...	183	7	3	Printing charges	...	14	12	0
Miscellaneous	...	53	8	6	Establishment	...	313	15	6
Pleaders' fees realised	...	21	11	0	Contingencies	...	10	0	0
Amount refunded	...	740	0	0	Income-tax	...	133	14	11
					Postage	...	7	0	0
					Stationery and contingencies	...	41	14	9
					Law charges	...	250	6	0
					Costs of office building	...	1,804	9	3
					House-rent	...	70	0	0
					Miscellaneous	...	762	2	0
Total	...	1,73,405	12	0	Total	...	1,83,351	7	0
Balance of last year	...	14,734	3	0	Cash balance	...	4,788	8	0
Grand Total	...	1,88,139	15	0	Grand Total	...	1,88,139	15	0

The business of the Company has increased considerably during the year. The receipts have risen from Rs. 1,53,464 in 1892 to Rs. 1,73,405-12 in 1893, and the disbursements from Rs. 1,47,076-11-3 to Rs. 1,83,351-7. The Company has advanced in public estimation. During the year under review it spent Rs. 1,804-9-3 in providing an office building, and has declared a dividend at the rate of 15 per cent., which was the same as in the preceding year.

The table below shows the liabilities of the Company on the 31st March 1894:—

	Rs.	A.	P
Capital	15,000	0	0
Deposit	2,16,393	6	9
Interest	1,293	12	6
Dividend	27,052	5	0
Total	2,59,739	8	3

The rate of interest charged during the year was the same as before, viz. from 12 annas to Re. 1-9 per cent. per mensem.

86. The Khulna Trading Company was established in 1891. The statement below shows the transactions of the Company during the year 1893:—

Receipts.					Expenditure.				
1					2				
		Rs.	A.	P.			Rs.	A.	P.
Shares realised	...	407	0	0	Contingencies	...	10	0	0
Money realised by the sale of mohurs		382	12	0	Law charges	...	22	2	3
Interest realised	...	31	2	0	Contingency	...	1	11	0
Advance money realised	...	625	0	0	Postage	...	3	2	6
Proceeds of the sale of bricks	...	523	13	0	Printing charges	...	8	0	0
					Establishment	...	63	2	0
					Stamps	...	6	8	0
					Advance money	...	745	0	0
					Mohurs bought	...	340	14	0
					Cost of making bricks	...	947	7	0
					Miscellaneous	...	0	14	0
Total	...	1,969	11	0	Total	...	2,153	13	3
Balance of last year	...	323	7	0	Cash balance	...	139	4	9
Grand Total	...	2,293	2	0	Grand Total	...	2,293	2	0

The Company has only newly started and is not carrying on an extensive business.

87. It is stated that 46 so-called Insurance Companies were started in the subdivision of Bágerhat. Many of them have been and many have not been registered under the Act. The general principle appears to be that a small sum is realised as the price of the share, which it is stated goes to the promoter. Then the share-holder nominates an old woman, and when she dies a sum of money is to be collected from each of the other share-holders and paid to the share-holder whose nominee has died. It is very doubtful if this death gift will be easy to collect. This seems to me to be an unusual kind of gambling and about as untrustworthy as the insurances made on the lives of children in Europe. The Companies, it is stated, are all of recent institution.

88. As already stated, comment on most of the figures supplied is of very little use, as no comparison is possible. It should be settled clearly what figures and for what period are to be produced in this report; then possibly a little more uniformity may be obtained.

X.—ADMINISTRATIVE CHANGES.

89. The following administrative changes which took place during the past year may be mentioned as deserving of notice:—

(1) The abolition of the Barrackpore and Dum-Dum subdivisions and their amalgamation with the Barasat subdivision in the district of the 24-Parganas.

(2) The transfer of the rural sub-registry office from Manicknagar to Habra, and the establishment of a new sub-registry office at Deganga in the 24-Parganas.

(3) The establishment of a Municipal Bench of Honorary Magistrates at Khurda in the Barasat subdivision in the 24-Parganas with third class magisterial powers.

(4) The abolition of the police outpost at Navadwipa in thana Kotwali of the Sadar subdivision in Nadia and the substitution of town chaukidars.

(5) The abolition of the police outpost at Damukdia in thana Nowpara of the Kushtia subdivision in Nadia.

(6) The transfer of estate No. 3474, Pirpur, from the district of Nadia to Pabna.

(7) The abolition of the outpost at Alfadanga in Narail subdivision in Jessore and of the outpost at Gopalnagar and the Garapota police-station.

(8) The opening of a joint sub-registry office at Sripur in Jessore.

(9) The transfer of the duty of supervising petty settlements under the Tenancy Act from the Director of the Department of Land Records and Agriculture to the Commissioner of Division.

10) The raising of the rates of duty on ganja.

11) The reduction of fees for registration of documents from 12 annas to 8 annas for value up to Rs. 50.

90. As regards change No. 4, Mr. Garrett, the Officiating Collector of Nadia, observes that, considering that Navadwipa is a large municipality and that several big *mêlas* are held there annually, the propriety of abolishing the outpost there, whereby it is removed seven miles from any police-station, appears to be at the least doubtful. I am inclined to agree with him, as not only will the police-station be seven miles away, but it is on the other side of the Bhagirathi as Navadwipa is on the west bank of the river, and geographically belongs to the Burdwan district.

91. Regarding change No. 7, Mr. Fiddian, the Collector of Jessore, observes that, considering the outlying nature of the locality and the turbulent character of the people, the experiment is a doubtful one.

92. With reference to change No. 8, Mr. Fiddian observes that it has added to the convenience of the people and increased registration.

XI.—STATISTICAL ENQUIRIES.

93. Besides the usual enquiries relating to vital statistics, the price-lists under the Bengal Tenancy Act and the agricultural statistics required by the Director of Land Records and Agriculture, the only statistical enquiry worth noticing was that made during the year in Murshidabad about [illegible] statistical enquiries regarding horses and ponies, locusts and insect-pests were made during the year in the districts of this Division. Enquiries were also made regarding hailstone and injuries done by sugarcane pressing mills.

94. Mr. Fiddian, the Collector of Jessore, observes that there has been a marked improvement of late in his district in the collection of vital statistics, the registration of births having doubled in 1893 as compared with the previous year. This, I presume, is due to the subject being properly attended to.

XII.—CIVIL JUSTICE.

95. The following statement shows the number of suits instituted, disposed of and pending in each district of this Division during the past calendar year as compared with 1892:—

District.	Instituted.		Disposed of.		Pending.	
	1892.	1893.	1892.	1893.	1892.	1893.
1	2	3	4	5	6	7
24-Parganas	35,127	35,860	36,950	36,876	4,934	5,293
Nadia	19,977	20,296	20,249	20,668	1,549	1,177
Murshidabad	16,151	15,425	16,035	15,277	1,708	1,856
Jessore	27,494	26,849	28,943	28,076	2,694	2,677
Khulna	13,949	14,603	14,537	14,632	1,345	1,316
Total ...	112,698	113,033	116,714	115,529	12,230	12,319

In the 24-Parganas there was an increase of 2·08 per cent. in the number of suits instituted and a decrease of 0·2 per cent. in the number disposed of. In Nadia there was an increase of 1·5 per cent. in the number instituted and of 2·06 per cent. in the number disposed of. In Murshidabad there was a decrease of 4·4 in the number instituted and of 4·7 in the number disposed of. In Jessore there was a decrease of 2·3 per cent. in the number instituted and of 2·9 per cent. in the number disposed of. In Khulna there was an increase of 4·6 per cent. in the number instituted and of 0·6 in the number disposed of.

96. The statement below shows the number and nature of each class of suits instituted during the past year as compared with the preceding year:—

District.	Number of suits— For money or movables.		Suits under the rent law.		Title and other suits.		Total.	
	1892.	1893.	1892.	1893.	1892.	1893.	1892.	1893.
1	2	3	4	5	6	7	8	9
24-Parganas ...	18,626	17,892	14,437	15,128	2,064	2,840	35,127	35,860
Nadia ...	13,673	13,277	5,767	6,126	809	1,265	20,249	20,668
Murshidabad ...	9,161	8,196	6,027	5,706	847	1,375	16,035	15,277
Jessore ...	11,294	10,398	14,935	14,430	1,265	2,021	27,494	26,849
Khulna ...	5,131	5,637	7,944	7,955	1,012	1,040	14,537	14,632
Total ...	57,885	55,400	49,110	49,345	5,997	8,541	1,13,442	113,286

There was a falling off in the suits for money or movables in all districts, except Khulna, while title and other suits show an increase. The suits under the rent law also show an increase in the 24-Parganas, Nadia, and Khulna, while in the other two districts there was a slight decrease. In Jessore the decrease in the suits for money or movables and the increase in the number of title

suits are mainly attributed to the fact that mortgage suits, which in the preceding year had been classed as "suits for money or movables," were classed as title suits during the year under report. The decrease in the number of rent suits is said to be possibly due to the settlement of disputes between raiyats and zamindars. The fluctuations in the other districts have not been explained.

97. The statement below shows the manner in which suits were disposed of during 1893 as compared with the year preceding:—

District.	Withdrawn and decided *ex-parte*.		Contested.		Percentage of contested cases.	
	1892.	1893.	1892.	1893.	1892.	1893.
1	2	3	4	5	6	7
24-Parganas ...	29,414	29,755	7,536	7,121	20·3	19·3
Nadia ...	16,310	16,502	3,939	4,166	19·4	20·1
Murshidabad ...	12,956	12,207	3,079	3,070	19·2	20·0
Jessore ...	23,027	22,441	5,916	5,635	20·4	20·0
Khulna ...	11,539	11,588	2,998	3,044	20·6	20·8
Total ...	93,246	92,493	23,468	23,036	20·1	19·9

In the 24-Parganas 46 per cent. of the cases were decided *ex-parte*, more than one-third of the total number were withdrawn, while less than one-fifth of the number were contested. The average duration of contested rent suits and of those decided *ex-parte* was 142 and 85 days respectively against 126 and 76 in the year preceding. In Jessore the number of suits disposed of was less than in 1892. The decrease in the disposal is said to be due to decrease in the institutions. The average duration of suits (contested and uncontested) for money or movables, rent suits and title and other suits during the year was 74, 78, and 175 days respectively against 77, 100, and 190 days in the preceding year.

XIII.—CRIME.

98. The number of cognizable offences reported in this Division during the year was 15,216 compared with 15,859 in the preceding year, showing a decrease of 643 cases. The decrease occurred in the 24-Parganas, Murshidabad, and Jessore, but mainly in the first-named district, in which offences under all classes have fallen off. In Murshidabad the decrease is noticeable in cases against property, and especially under the head of burglary. The decrease in Jessore occurred chiefly in dacoities and other serious offences against property, and is said to be due to the fact that a large number of local bad characters were proceeded against under section 110, Criminal Procedure Code, and their cases were generally tried on the spot. In Nadia and Khulna, on the other hand, there was an increase in the number of cases reported. In the former district the increase occurred chiefly in the number of offences under class III, but this increase was partly discounted by a decrease under other classes. In Khulna the increase chiefly occurred in offences against persons.

99. The number of cases declared false was 718 compared with 774 in 1892, and not 793, as shown in the report for the previous year, which was

apparently a mistake. Taking the districts separately, there were 130 false cases in the 24-Parganas, 122 in Nadia, 134 in Murshidabad, 215 in Jessore, and 117 in Khulna, against 199, 127, 135, 197, and 116, respectively. The decrease was thus marked in the 24-Parganas. Prosecutions were instituted in 65 cases, or 9·0 per cent., against 75, or 9·6 per cent. (and not 112, or 14·1 per cent.) in the previous year. Of these, 18 were instituted in the 24-Parganas, 20 in Nadia, 10 in Murshidabad, 9 in Jessore, and 8 in Khulna, compared with 23, 25, 5, 15, and 7, respectively. The number of cases in which convictions were obtained was 7 in the 24-Parganas, 4 in Nadia, 3 in Murshidabad, 4 in Jessore, and 1 in Khulna, against 15, 4, 1, 4, and 2, respectively, in 1892. The Nadia and Khulna figures are bad. Writing on this subject, the Magistrate of Jessore observes that many cases declared false are not palpably and undeniably false, but only probably so, and that this prevents an extensive use of section 560, Criminal Procedure Code. He states that compensation was given in only 20 cases in 1893. The number, though small, is much better than in Nadia, where it was awarded only in 4 cases. It is to be much regretted that more use is not made by Magistrates generally of the valuable powers awarded in this section.

100. The total number of cases in which the police abstained from making enquiry was 1,737, or 11·4 per cent., compared with 1,743, or 10·9 per cent. in 1892, showing a slight decrease. Of the total number of cases, 462 were in the 24-Parganas, 384 in Nadia, 473 in Murshidabad, 270 in Jessore, and 148 in Khulna, compared with 436, 485, 336, 380, and 150, respectively, in the year preceding. It will be seen that there was a marked increase in Murshidabad, and decrease in Nadia and Jessore. The cases were as usual mostly petty ones, attempts and cases in which no property was stolen, or the property stolen could not be identified, or the offenders were unknown. In Jessore and Khulna the power of refusing enquiry seems on the whole to have been exercised with discretion. In Nadia 42 cases were investigated under orders of the Magistrate after the police had refused enquiry.

101. The total number of persons arrested during the year was 13,897 compared with 14,365 in 1892. Of these, 13,428 were sent up for trial against 13,890, and 8,732 convicted against 8,893 in the previous year, the percentage of convictions being 65·0 against 64·4 in the preceding year. As regards the several districts, the percentage was 68·1 in the 24-Parganas, 68·8 in Nadia, 69·7 in Murshidabad, 56·1 in Jessore, and 58·6 in Khulna.

102. The total number of true cases of murder in this Division during the year was 52 against 59 in 1892. Of these, 16 were in the 24-Parganas, 2 in Nadia, 7 in Murshidabad, 16 in Jessore, and 11 in Khulna, against 24, 4, 7, 16, and 8, respectively, the decrease in the 24-Parganas being marked. The number in which convictions were obtained was 11 against 15. Of these, 4 were in the 24-Parganas, 1 in Murshidabad, 3 in Jessore, and 3 in Khulna, as compared with 7, 2, 2, and 3, respectively, in the preceding year. In Nadia in no cases were convictions obtained during the year, though in 1892 one case ended in conviction. The result in Murshidabad was especially bad.

103. The number of true cases of dacoity was 25 against 36. Of these, 11 were in the 24-Parganas, 2 in Nadia, 3 in Murshidabad, 8 in Jessore, and 1 in Khulna, compared with 10, 2, 8, 16, and 0 in the previous year. The decrease in Murshidabad and Jessore is satisfactory. The number of cases which ended in conviction was 10 against 7. Of these, 2 were in the 24-Parganas, 0 in Nadia, 3 in Murshidabad, and 5 in Jessore, against 3, 1, 0, and 3, respectively, in 1892. The results in Murshidabad and Jessore are especially good.

104. There was a marked increase of 97 cases of rioting during the year, the figures being 381 compared with 284 in 1892. Of the 381 cases, 77 occurred in the 24-Parganas, 53 in Nadia, 37 in Murshidabad, 126 in Jessore, and 88 in Khulna, compared with 74, 46, 33, 51, and 80, respectively, in the previous year, showing an increase in all the districts. Though the number in Jessore was specially large, no explanation has been furnished by the Magistrate regarding it, but I observe that in the previous year there was a large decrease. The cases were chiefly due to disputes about land and fisheries. The majority of them was of a petty description. In five cases only did loss of life occur: four of these were in the 24-Parganas, and the remaining one in Khulna.

105. In none of the districts was there any caste or religious disturbance between the Hindus and the Muhammadans. In Nadia two sects of Muhammadans in Kushtia quarrelled about rubrics, and were convicted and fined. Two factions of Muhammadans also quarrelled in the Hanskali jurisdiction of the Sadar subdivision of the same district about the slaughter of a cow at the *Bakr Id*, and those who rescued the cow from slaughter were fined and imprisoned.

106. In the 24-Parganas proceedings under section 107, Criminal Procedure Code, were taken against 219 persons, of whom 92 were bound down. Fifty-seven more were bound down under section 106, Criminal Procedure Code, in addition to other punishments inflicted on them. Proceedings under section 110, Criminal Procedure Code, were also taken against 41 persons, of whom 21 were ordered to give security for good behaviour. In Nadia there were 22 cases under section 107, and 14 cases under section 106, Criminal Procedure Code. In the former 42 persons were bound down, 36 for one year and 6 for six months each, while in the latter 43 persons were bound down, 40 for one year and 3 for six months. In Murshidadad there were 12 cases during the year, 7 under section 106 and 5 under section 107, Criminal Procedure Code. In these 45 persons were bound down, 10 under section 106 and 35 under section 107, Criminal Procedure Code. In Jessore 133 cases were instituted under section 107, Criminal Procedure Code, and 184 under sections 109 and 110, Criminal Procedure Code. In the former 727 and in the latter 131 persons were bound down during the year. In Khulna there were 135 cases under section 107, Criminal Procedure Code, and 20 under section 106, Criminal Procedure Code. In the former 355 and in the latter 74 persons were bound down during the year to keep the peace. The extra police force employed at Baharbunia has been removed.

107. There were 16,397 cases of non-cognizable crime reported in this Division during the year under review compared with 16,847 in the previous year, showing a decrease of 450 cases. The decrease occurred in the 24-Parganas, Nadia, and Khulna, while the two other districts showed an increase. The decrease in the 24-Parganas has not been explained. In Nadia it is said to be mainly due to a decrease of about 400 prosecutions under the Municipal Act, of 74 cases under class I, as fewer chaukidars were prosecuted, most of them having been departmentally dealt with, a procedure which is far more preferable, and of 42 cases under the Hackney Carriage Act. The decrease in Khulna is attributed to the fact that in the early part of the year the people were poor owing to bad crops, and could not afford to spend so much on litigation.

108. In Murshidabad the increase in the number of cases is said to have occurred chiefly under the head of cattle trespass and breach of contract. In Jessore the increase is observable in all classes of offences, except class V where there was a decrease. The increase is marked in classes I, IV, and V and in offences under special laws. The Magistrate has not been able to account for the increase in class IV, as it was not a year of marked prosperity when people are fond of resorting to the Courts in petty cases. The increase in class VI is attributed to the comparatively larger number of institutions under Chapter VIII of the Criminal Procedure Code. As regards the increase in offences under special laws, it is stated that the provisions of these laws were duly enforced during the year, and that there was a marked increase under the head of cattle trespass.

109. The number of cases in which the police were employed to make enquiries was 802, or 4·8 per cent., as compared with 4·4 per cent. in 1893. Of the 802 cases, 341 were in the 24-Parganas, 43 in Nadia, 69 in Jessore and 349 in Khulna. In Murshidabad in not a single case were the police employed to make enquiries. Any increase in this procedure is most strongly to be deprecated, and from the above it appears that in the 24-Parganas and Khulna cases were sent far too readily for police enquiry.

110. The number of persons against whom processes were issued was 18,534 against 17,660, and the number that actually appeared before Magistrates was 12,827 compared with 13,032. This is said to be probably due to the compromise out of Court of petty cases of assault, &c., after the issue of summons. The number of persons convicted was 6,586, or 51·4 per cent. compared with 55·4 in 1892.

XIV.—POLICE.

111. The following statement shows the strength of the police force employed in the several districts of this Division:—

District.	District Superintendent.	Assistant Superintendent.	Inspectors.	Sub-Inspectors.	European constables.	Head constables.	Constables.	Town chaukidars.
1	2	3	4	5	6	7	8	9
24-Parganas	1	1	5	36	2	133	979	51
Nadia ...	1	...	4	33	...	51	505	94
Murshidabad	1	1	4	32	...	76	497	97
Jessore ...	1	...	5	33	...	42	394	29
Khulna ...	1	...	3	21	..	42	258	55
Total ...	5	2	21	155	2	344	2,633	326

The above shows that, compared with 1892, there was an increase of one head constable in the 24-Parganas and a decrease in the number of constables employed during the year in three out of the five districts. This is due to the substitution of chaukidars for the watch and ward of certain towns in place of constables, and to the reduction of the force on account of the abolition of certain outposts.

112. The numbers punished were as follows:—

Dismissed—

	1892.	1893.
Inspectors ...	...	...
Sub-Inspectors ...	2	3
Head constables ...	1	6
Constables ...	94	82
Total ...	97	91

The increase in dismissals in the higher ranks is very unsatisfactory. Two sub-inspectors and two head constables were dismissed in Nadia alone.

113. Punished departmentally—

	1892.	1893.
Sub-Inspectors	73	84
Head constables	158	125
Constables	341	469
Total	572	678

There was a considerable increase in the number of constables punished departmentally, especially in the 24-Parganas, Nadia, and Murshidabad districts.

114. Punished judicially—

	1892	1893
Sub-Inspectors	2	
Head constables	2	2
Constables	43	53
Total	47	

The number of constables punished judicially also shows an increase.

115. The numbers rewarded during the year were as follows:—

	1892.	1893.
By promotion	3	4
By money rewards	310	379
Total	313	383

With the increase in punishments, it is satisfactory to note an increase in rewards. They were given freely in the 24-Parganas district. Nadia also shows a substantial increase.

116. In Murshidabad Inspector Aghore Nath Chowdhry received a special reward of Rs. 1,335 from Louis Payenne and Company for detecting a heavy burglary committed in their office at Berhampur. In Jessore Inspector Mohim Chandra Das received a money reward of Rs. 200 from the Inspector-General of Police, Lower Provinces, for successfully working out two dacoity cases and an important Government currency note forgery case which occurred during the year. Sub-Inspector Protap Chandra Mitter of this district was also granted by the District Magistrate a reward of Rs. 100 for the arrest of an important absconder in a double murder case.

117. The table below shows the number that left the force: —

	1892.	1893.
On pension	36	39
On gratuity	11	6
By resignation without pension or gratuity	127	156
By dismissal	97	91
By discharge	27	23
By desertion	16	14
By death	100	97
Total ...	414	426

There was a considerable increase in the number of those who resigned during the year compared with the preceding year.

118. There were 15,216 cases of cognizable crime in this division during the year under report compared with 15,859 in 1892. Of these 11,854 were enquired into by the police against 12,582. The number of cases in which convictions were obtained was 6,994, or 59·0 per cent., compared with 52·9 per cent. in the preceding year. Deducting cases under class VI, the percentage of convictions was 36·4 compared with 30·6 in 1892. The result shows an improvement and is satisfactory.

119. The following table shows the action of the police in the matter of the recovery of stolen property :—

	Amount of property stolen.	Amount recovered.	Percentage of recovery.
	Rs.	Rs.	
24-Parganas ...	43,988	11,137	25·3
Nadia ...	26,291	6,937	26·3
Murshidabad ...	41,610	13,328	32·0
Jessore ...	55,823	16,206	29·0
Khulna ...	20,999	3,961	18·8
Total ...	1,88,711	51,569	27·3

The amount of property stolen has fallen from Rs 2,09,657 to Rs. 1,88,711, but the amount recovered shows a large increase, being Rs. 51,569 against Rs. 39,284 in 1892. The percentage of recovery was 27·3 as compared with 18·7 in the preceding year. Taking the figures for what they are worth, there has been a marked improvement in the percentage of recovery in every district, except the 24-Parganas, and, although the recovery is generally a matter of chance, yet as the police get blamed when the percentages are low, it is only fair they should get credit when the reverse is the case, as in the year under review.

120. Except in Nadia, the conduct of the police in this Division is reported on the whole to have been satisfactory. The Magistrate of Nadia observes that the general conduct of the police of his district was not satisfactory, as there were several instances of serious misconduct amongst superior officers which had to be dealt with upon their merits with some severity. In this district

a charge of extortion was laid against a head constable of Bhuluka thana. It was, however, proved false, and the complainant was prosecuted under section 211, Indian Penal Code, but was discharged for want of sufficient evidence. In Jessore great difficulty was experienced in getting men to fill up vacancies.

121. The following statement shows the number of rural police in the several districts of this Division, the number punished, and the number rewarded:—

	Number of rural police.	Number punished.	Number rewarded.
24-Parganas ...	3,351	1,244	25
Nadia ...	3,436	1,090	28
Murshidabad ...	3,911	529	39
Jessore ...	3,879	945	30
Khulna ...	2,037	1,096	27
Total ...	16,614	4,904	149

122. The above shows that there was a decrease in the number of chaukidars punished during the year compared with the figures for 1892, being 4,904 against 5,739, while the number of chaukidars rose from 16,607 to 16,614. The decrease occurred in all the districts, except Nadia and Khulna, where there was an increase. The decrease was more marked in the 24-Parganas and Jessore, while the increase in Nadia was considerable. The proportion of chaukidars rewarded compared with those punished is as usual infinitesimal. Till good work is better rewarded than it is at present, it is hopeless to expect it, or to induce a better class of men to become chaukidars. Some chaukidars in Nadia did especially good work. As usual, the punishments were chiefly for non-attendance at thanas and for not reporting crime.

123. In Murshidabad there are still many chaukidars under Regulation XX, the largest number of them being in the Kandi subdivision. Proposals were made to introduce Act VI of 1870 (as amended by subsequent enactments) throughout the subdivisions, as the chakran chaukidars were reported to be generally bad characters, whom it is not possible to look after properly. But the Magistrate on local enquiries found that the chaukidars under Act VI of 1870 in this subdivision were of no better class and bore no better characters than the chakran chaukidars, and that if these men were removed no advantage would be gained, but on the contrary they being deprived of their lands might quite possibly take to thieving. The difficulty of controlling so large a body of men can be best met by reducing their number as deaths occur, and making over their lands to those village chaukidars who have not enough, or returning them to the zamindars and assessing them for the chaukidari fund, as directed by section 49 of the Act.

124. Very little progress has been made in this Division in improving the status of the chaukidars by the appointment of men of better caste and position in society. The appointment has been held from time immemorial by men of the lowest castes, such as *Káorás*, *Bágdis*, *Muchis*, *Doms*, *&c.*, and men of better position hold aloof and do not come forward willingly to accept appointments as chaukidars. Till they are paid the equivalent of the ordinary rates of pay it is hopeless to expect a real improvement.

125. No instance of chaukidars having been employed by the police on menial and degrading duties has been reported in any of the districts of this Division. In Nadia complaints of such employment have been made in one or two cases, but in one case the charge could not be proved, and in another on enquiry it was found to be false. It is, however, believed by some officers that in places chaukidars are still so employed by the police, but this abuse, it is observed, will diminish in proportion to the attention paid to it by the inspecting officers.

126. The salaries of chaukidars in this Division vary from Rs. 3 to Rs. 6 a month, the majority of them getting Rs. 4. In all districts, except Nadia, they are now paid regularly. In Nadia it appears that 988 chaukidars

were in arrears from four to six or more months. Writing on this subject, Mr. Garrett, the Officiating Magistrate of this district, observes:—

"I do not think that the four-monthly period should be included in the table of arrears, as chaukidars can only be paid every quarter under the law, and the arrears at the end of the quarter can only be realised within a month.

"Arrears can only count from the fifth month. The law might be amended, as this is a hardship to chaukidars.

"The stupendous total of 988 men in arrears signifies nothing. According to the law there would be only 33 men in actual arrears."

127. On the whole, the chaukidars are said to have worked well during the year in all the districts of this Division. Some of them were rewarded for arresting offenders and for good service in connection with criminal cases. They have received much attention and many have got an increase of pay. They are also, it is stated, beginning to feel more independent of both the police and the panchayets.

XV.—CRIMINAL JUSTICE.

128. As reported in previous years, criminal justice is administered by the Sessions Courts, Stipendiary Magistrates, Benches of Honorary Magistrates, and Honorary Magistrates sitting singly. The total number of cases tried at the Sessions during 1893 was 289 against 271 in the preceding year. Of these, 198, or 68·5 per cent., were convicted compared with 67·9 per cent. in 1892. Taking the districts separately, the percentage of conviction was 68·5 in the 24-Parganas, 69·2 in Nadia, 62·5 in Murshidabad, 71·6 in Jessore, and 69·0 in Khulna, as compared with 70·8, 68·2, 64·7, 55·7, and 77·7, respectively. The best results were obtained in Jessore and the worst in Murshidabad. No explanation of the low percentage has been given by the Magistrate, but it is satisfactory to note that all round there has been some improvement.

129. There were 70 Stipendiary Magistrates in this Division at the close of the year. Of these, 21 were in the 24-Parganas, 19 in Nadia, 8 in Murshidabad, 13 in Jessore, and 9 in Khulna. Of these Stipendiary Magistrates, 50 exercised first class, 14 second class, and 6 third class powers. The number of Benches in this Division was 47 against 43 in the previous year. They were composed of 436 Honorary Magistrates. These were distributed as follows:—

District.	Number of Benches.	Number of Honorary Magistrates.
24-Parganas ...	18	184
Nadia	12	105
Murshidabad	5	81
Jessore	8	95
Khulna	4	36
Total ...	47	501

130. During the year 1893 Benches were established at Baduria, Taki, and Khurda in the 24-Parganas and at Chanduria in Khulna. Those at Baduria and Taki being established late in the year, no sittings were held during 1893.

131. Of the Benches, 19 exercised second class and 28 third class powers. The number of Honorary Magistrates who were authorised to sit singly was 38. Of these, 3 exercised first class, 27 second class, and 8 third class powers. In Khulna there is now no Honorary Magistrate with power to sit singly, the one vested with such powers having resigned during the year. The attendance of the Honorary Magistrates with a few exceptions was fairly regular, and they promise to play a most useful part in the administration of justice, especially the Magistrates empowered to sit singly. Among these latter Babus Moni Lall Banerji and Preonath Mullick of Alipore in the 24-Parganas are again said to have rendered substantial service. Pandit Rakhal Chandra Tewari of Diamond Harbour and Maulvi Golam Quassim of Basirhat in the same district are also reported to have been punctual and assiduous in the performance of their duties. Another gentleman, Babu Rajani Kanto Ghose, who sat singly at Narail in the district of Jessore, appears to have done good work, and to have materially helped

the Subdivisional Officer. In Khulna the attendance of Honorary Magistrates is said to be on the whole not satisfactory. The general excuse given for bad attendance on the Benches is that only petty and uninteresting cases are made over to Honorary Magistrates to try. This is, however, often unavoidable, as cases which can be disposed of at one or two sittings must be made over to them, as owing to distance and other reasons Honorary Magistrates will not, as a rule, attend two or three times following.

132. The following table shows the number of cases decided by Stipendiary Magistrates as well as by Benches and Honorary Magistrates sitting singly:—

District.	Decided by Stipendiary Magistrates.		Decided by Benches and Honorary Magistrates.	
	1892.	1893.	1892.	1893.
24-Parganas	11,600	10,229	4,442	3,946
Nadia	2,757	2,398	2,223	2,185
Murshidabad	2,067	1,606	767	1,178
Jessore	2,446	2,682	550	589
Khulna	1,687	1,690	435	411
Total	20,557	18,605	8,417	8,309

The three first-named districts have shown a decrease for the last three years in the number of cases tried by Stipendiary Magistrates. In Murshidabad there has been a marked increase in the work done by Honorary Magistrates for the same period.

133. The following statement shows the results of trials as regards persons:—

District.	Persons put on trial.		Convicted.		Percentage of convictions.		Remarks.
	1892.	1893.	1892.	1893.	1892.	1893.	
1	2	3	4	5	6	7	8
24-Parganas	19,066*	17,736	14,804	13,221	77·6	76·2	* Figures shown in this statement include those for suburbs, whereas in the report for the previous year the district figures exclusive of suburbs were given.
Nadia	6,547	6,067	4,550	3,874	71·2	63·8	
Murshidabad	3,671	3,651	2,195	2,301	59·7	63·	
Jessore	5,020	5,909	2,594	3,293	56·0	58·2	
Khulna	3,580	3,792	1,782	1,967	53·4	51·9	
Total ...	37,884	37,155	25,925	24,656	68·4	66·3	

The results show a falling off in all districts, except Murshidabad and Jessore, where there has been an improvement.

134. The following table shows the number of witnesses examined during the year compared with the year preceding:—

District.	Number of witnesses examined.		Number detained for more than two days.	
	1892.	1893.	1892.	1893.
24-Parganas	24,961	21,579	1,339	1,330
Nadia	11,954	12,365	317	484
Murshidabad	9,508	8,590	861	432
Jessore	14,791	17,281	417	334
Khulna	9,656	10,772	322	283
Total	70,870	70,587	3,256	2,863

The number of witnesses examined has not decreased in the same proportion as the number of cases or of persons put on trial, so it is satisfactory to note that the percentage of detentions is the same as in the previous year, viz. 4·5.

In Nadia there has been a marked increase in the number detained over two days, which should have been explained.

135. The following statement shows the number of remands granted in A form cases during the year under report:—

District.	Number disposed of on first day.	Number postponed—							
		Once.	Twice.	Three times.	Four times.	Five times.	Six times.	Over six times.	Number pending at the close of the year.
1	2	3	4	5	6	7	8	9	10
24-Parganas	6,274	802	378	142	73	54	22	17	24
Nadia	264	172	167	97	39	23	17	8	...
Murshidabad	283	255	118	64	28	22	8	10	25
Jessore	190	197	142	81	35	23	10	11	14
Khulna	176	143	113	71	38	17	7	13	30
Total ...	7,187	1,569	918	455	213	139	64	59	93

The percentage of cases remanded six times and over to total number of cases disposed of was 1·1 as in the preceding year. With less cases the remands should have decreased, and the increase under columns 6, 7, 8, and 9 in the 24-Parganas, columns 4, 5, 6, 7, 8, and 9 in Nadia, columns 4, 5, 6, 7, and 9 in Khulna are to be regretted. Murshidabad has shown marked improvement.

136. The table below shows the number of reconvictions in the several districts of this Division during the past two years:—

District.	1892.	1893.
24-Parganas	194	75
Nadia	60	68
Murshidabad	64	51
Jessore	27	44
Khulna	23	24
Total	368	262

The number of reconvictions shows a large falling off. This occurred chiefly in the 24-Parganas.

137. The following statement shows the amount of criminal fines imposed and realised in the several districts during the past two years:—

District.	Imposed.		Realised.	
	1892.	1893.	1892.	1893.
	Rs.	Rs.	Rs.	Rs.
24-Parganas	62,302	55,830	56,882	48,944
Nadia	19,166	18,866	15,619	13,848
Murshidabad	10,146	11,348	10,003	10,169
Jessore	14,917	17,664	12,075	16,223
Khulna	8,491	16,233	8,603	10,687
Total	1,15,022	1,19,941	1,03,182	99,871

There was an increase in the amount of fines imposed in all districts, except the 24-Parganas and Nadia. The increase was more marked in Khulna, the amount imposed being Rs. 16,233 against Rs. 8,491 in the previous year. The amount of fines realised shows a total decrease in the 24-Parganas and Nadia; but the percentage of realisations was especially unsatisfactory in Nadia and Khulna, being 73·4 and 65·8 per cent. respectively. Special efforts must be taken to enforce prompt realisations.

138. During the year under report compensation, amounting to Rs. 50, was paid in four cases of frivolous and vexatious complaints in the Nadia district against Rs. 170 in five cases in 1892. In Jessore the amount paid was Rs. 1,899 compared with Rs. 1,095 in the year preceding. None of the other District Officers have furnished information on this subject.

139. The table below shows the number of cases in which whipping was awarded during the year as compared with the year preceding:—

District.	1892.	1893.
24-Parganas	124	73
Nadia ...	30	20
Murshidabad	9	12
Jessore ...	13	25
Khulna ...	4	7
Total	180	137

There was a marked decrease in the 24-Parganas and Nadia, but an increase in the other districts. In eight cases in the 24-Parganas it was inflicted in addition to other punishments.

140. The number of European British subjects brought to trial during the year was 11 compared with 29 in 1892. Of these, five were convicted and six acquitted. All of these cases occurred in the 24-Parganas.

141. From none of the districts of this Division were any cases under Act X of 1891 (an Act to amend the Indian Penal Code and the Code of Criminal Procedure, 1882) reported during the year under review.

XVI.—REGISTRATION OF DOCUMENTS.

142. The following table shows the working of registration offices in this Division during the past two years:—

District.	Number of documents registered.		1892-93.		1893-94.	
	1892-93.	1893-94.	Receipts.	Expenditure.	Receipts.	Expenditure.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	Rs.
24-Parganas ...	73,020	70,116	85,582	38,907	76,667	39,464
Nadia ...	22,248	24,062	27,876	17,500	27,707	18,598
Murshidabad ...	11,315	13,399	18,567	8,957	19,420	10,447
Jessore ...	82,920	90,423	80,805	41,864	72,666	45,028
Khulna ...	40,063	44,949	41,197	23,264	40,860	26,505
Total ...	229,566	242,949	2,54,027	1,30,492	2,37,320	1,40,042

The total number of documents registered during the year shows an increase of 13,383 as compared with that in the preceding year. The increase occurred in all the districts, except the 24-Parganas, where there was a decrease, in spite of the fact that an additional sub-registry office was opened at Deyganga in the Barasat subdivision. This decrease was chiefly in instruments of sales and of mortgages of the value of less than Rs. 100 and in bonds, and is accounted for by the fact that in the preceding year owing to widespread agricultural distress an unusually large number of such documents were registered. There was also a noticeable decrease under the head of leases other than perpetual in this district, but it was to a great extent counterbalanced by the increase in perpetual leases.

143. In Nadia the increase occurred under the heads of sales, mortgages, perpetual leases and bonds. Under the first two heads it is attributed to the distress of the middle class landholders and the high price of food-grains and failure of crops during the last few years, and the general unwillingness of money-lenders to advance loans on simple money bonds. The increase under the head of perpetual leases is said to be due to the fact that people in general, even the cultivators, nowadays prefer to have such leases instead of temporary ones. The increase under the head of bonds is ascribed to general poverty and distress among the people owing to failure of crops.

144. In Murshidabad the increase was chiefly under the heads of sales, mortgages and leases. Under the first two heads it is attributed to more lands having changed hands, and to the natural growth of registration consequent on the increased confidence of the public in its advantages. The increase in leases is said to be mainly due to the resettlement of tenures by several zamindars of the district, including the Maharani Svarnamayi of Kasimbazar.

145. In Jessore the increase occurred in the following classes of documents:—

1. Perpetual leases.
2. Leases for one year or less.
3. Mortgages.
4. Bonds.

In the first, third, and fourth classes of documents, the increase is attributed to bad harvests and to a rise in the price of food-grains, while in the second class it is said to be due to new settlements. Another cause of increase in the number of perpetual leases is said to be the growing tendency on the part of money-lenders to prefer taking a perpetual lease of the borrower's holding or a part of it instead of a bond for the money lent, the money lent being entered as the premium on the lease. If the borrower repays the money, the *mahajan* returns the lease. If he does not repay, the *mahajan* need not go into court, but retains the lease. In some cases, it is stated, both a bond and a perpetual lease without premium are executed. The cultivator, in order that he may be able to grant a perpetual lease, styles his holding an intermediate tenure.

146. In Khulna the increase in the number of documents registered is attributed partly to scarcity in the early part of the year and partly to the general progress of registration, which is naturally aided by the reduction of fees.

147. The total receipts during the year show a decrease in all districts, except Murshidabad, while the expenditure on the other hand shows an increase everywhere. The falling off in the receipts is due to the reduction during the year of *ad valorem* fees from annas twelve to annas eight for value up to Rs. 50. In the 24-Parganas it is also ascribed to the falling off in the number of registrations. The increase in Murshidabad is accounted for by the large increase in the number of documents registered during the year. The decrease in receipts is so large that there will have to be a very marked increase in the number of registrations, if the receipts are in future to be as high as they have hitherto been.

148. The increase in expenditure is said to be mainly due to a higher scale of commission paid to Sub-Registrars owing to the larger number of documents registered and to the increased allowances paid for their establishments.

149. On the whole the working of the department during the year appears to have been satisfactory.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

150. The number of estates of each class borne on the revenue-roll of the several districts during the years 1892-93 and 1893-94 are as follows:—

Year.	Class I—Permanently-settled estates.	Class II—Temporarily-settled estates.	Class III—Estates held direct by Government.	Total.
1	2	3	4	5
1892-93 ...	9,281	725	251	10,257
1893-94 ...	9,281	722	252	10,255
Difference ...	...	—3	+1	—2

There were inter-transfers from one class to another in Jessore and Khulna. Two estates from this Division were transferred to other Divisions. Six estates (Sunderbuns lots) were removed from the revenue-rolls of the 24-Parganas on

account of their non-settlement, being proclaimed as protected forests, and five estates were added, owing to the settlement (*a*) of three Sunderbun grants, (*b*) of a piece of land previously occupied by a post office, (*c*) and of another piece of Government land. Hence there was a decrease of one estate in the roll. One estate in Nadia was released to a private proprietor, and two estates in Murshidabad, formerly struck off the revenue-roll through mistake, were brought on it again, resulting in a net decrease of two estates in the Division.

151. The following table shows the demand, collections, remissions and balances of land revenue during the past two years:—

Year.	Arrear demand.	Current demand.	Total.	Arrear collection.	Current collection.	Total.	Remission.	Balances.	Percentage of collections on demand.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1892-93 ...	1,02,759	50,96,967	51,99,726	73,153	49,78,677	50,51,830	7,614	1,40,282	97·1
1893-94 ...	1,46,919	51,01,468	52,48,387	96,623	49,58,534	50,55,157	25,747	1,67,483	96·3

Compared with the preceding year, the results cannot be considered good, as while current collections and the percentage of collections on demand fell off, remissions and balances increased. The uncollected balance at the close of 1892-93 amounted to Rs. 1,40,282, but the amount now shown as arrear demand is Rs. 1,46,919. The increase is due to additions in the *hustabood jamas* of some of the estates which had a retrospective effect.

152. The percentage of collections in each class is exhibited in the following statement:—

Class of Estates.	1892-93.						1893-94.					
	Arrear demand.	Arrear collections.	Percentage of collections.	Current demand.	Current collections.	Percentage of collections.	Arrear demand.	Arrear collections.	Percentage of collections.	Current demand.	Current collections.	Percentage of collections.
1	2	3	4	5	6	7	8	9	10	11	12	13
	Rs.	Rs.		Rs.	Rs.		Rs.	Rs.		Rs.	Rs.	
I.—Permanently-settled estates.	17,887	17,834	99·7	44,42,805	44,07,700	99·2	33,508	33,468	99·9	44,41,844	43,86,824	98·7
II.—Temporarily-settled estates.	27,813	26,125	93·9	3,09,811	2,85,106	92·02	26,774	25,028	93·5	3,13,177	2,89,925	92·5
III.—Estates held direct by Government.	57,059	29,194	51·1	3,44,351	2,85,871	83·01	86,637	38,127	44·	3,46,447	2,81,785	81·3
Total ...	1,02,759	73,153	71·1	50,96,967	49,78,677	97·6	1,46,919	96,623	65·7	51,01,468	49,58,534	97·2

The prescribed standard for the collection of arrear demands is cent. per cent. The results in the permanently-settled estates were good, being 99·9 per cent.; those in the temporarily-settled estates were 93·5, or nearly the same as last year, but those in the Government estates were very unsatisfactory, being 44 against 51·1 in 1892-93. In no district was the prescribed standard attained to, the nearest approach being made by Jessore and Khulna, where 96·7 and 95·6 per cent. respectively were collected. On the other hand, the districts of the 24-Parganas and Murshidabad show very poor results. In the previous year also these same districts occupied the same positions. The low percentage in the 24-Parganas is chiefly due to the failure of crops in consequence of excessive rain during the year under report. The tenants suffered considerably and were unable to pay. The raiyats in two Government estates in the Basirhat subdivision also stopped payment—in one on account of an appeal preferred to the High Court against the decision of the Special Judge rejecting the prayer of the raiyats to get the assessment fixed at the recent settlement reduced, while in the other the raiyats applied to the Subdivisional Officer for remission of

their rents on the ground of poverty caused by the failure of crops. That officer after an enquiry rejected their application. They then combined and withheld payment, but steps are being taken to make them pay. A heavy sum was also not realised from certain town lot-holders in the Government estate, Port Canning, who hold the lots at a loss owing to the failure of the place as a port. The question of a general reduction of the rate of rent in this estate is under consideration.

153. The Collector of Murshidabad attributes the short collections to the failure of the rabi crops in many Government estates. The current collections also, for the reasons noted above, were not up to the mark.

154. The collections in the estates under direct management in each district are shown in the statement below:—

Statement showing the state of collections from khas mahals in the Presidency Division during 1893-94.

District.	Number of estate.	Current demand.	Arrear demand.	Total demand.	Current collection.	Arrear collection.	Total collection.	Percentage of current collection on current demand.	Percentage of current collection or arrear demand.	Percentage of total collection on total demand.	Percentage of current collection on current demand in 1893-94.
1	2	3	4	5	6	7	8	9	10	11	12
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.				
24-Parganas	43	2,60,326	65,140	3,25,475	2,11,304	21,909	2,33,213	81·1	33·6	71·6	83·7
Calcutta	1	18,864	19	18,883	18,823	13	18,836	99·7	68·4	99·7	99·6
Nadia	38	16,183	2,988	19,171	13,347	2,610	15,957	82·4	87·3	83·2	88
Murshidabad	63	30,016	13,924	43,940	20,059	9,252	29,911	66·8	66·4	68·7	66·8
Jessore	75	4,381	694	5,075	4,069	567	4,636	92·8	81·7	91·3	87·5
Khulna	32	16,677	3,863	20,540	13,583	3,776	17,359	81·4	97·7	84·4	75·9
Total ...	252	3,46,447	86,637	4,33,084	2,81,785	38,127	3,19,912	81·3	44	73·8	83·01

The number of estates under direct management during the year under report was 252 with an annual rental of Rs. 3,46,447 against 251 with a rental of Rs. 3,44,351 in the preceding year. The number of estates slightly varied in four districts.

155. The lands of two estates in the 24-Parganas could not be traced, and with the Board's sanction they were removed from the revenue-roll; hence the decrease of two estates in this district. The decrease of one estate in Nadia is due to the transfer on account of temporary settlement of two estates from the list of khas mahals to class II and the transfer of one estate from class II to class III. In Murshidabad there was an increase of two estates in consequence of the entry in the revenue-roll of two diluviated estates formerly struck off through mistake. The increase in Jessore is due to the purchase of two estates by Government at a sale for arrears of revenue. The increase in the rental is owing to the settlement of some vacant holdings and resettlement of others at enhanced rates. Compared with the preceding year, the current demand increased in all districts, except Calcutta and Jessore. The decrease in Calcutta is due partly to the redemption of the revenue of certain holdings and partly to the acquisition of lands for public purposes. That in Jessore is due to the transfer of an estate from class III to class II in consequence of its settlement with the proprietor. The percentage of current collections on current demand reached the fixed standard (90 per cent.) in Calcutta and Jessore. The 24-Parganas and Khulna collected a little over 81 and Nadia over 82 per cent. The poorest result is shown by Murshidabad, where the collections amounted to only 68·8 per cent. With regard to the arrear collections, the results were very bad, except in

Khulna, where they reached 97·7 per cent. They were especially bad in the 24-Parganas, being only 33·6 per cent. Explanations of the bad results have been already given. If the irrecoverable balances were excluded from the current demand, the percentage would show some improvement. Considering the reduced condition of the tenantry in most districts owing to the failure of crops in successive years, the financial result of the management of khas mahals in the Division may on the whole be accepted as fair; but I have no doubt, from what I have seen, that Mr. Westmacott's views, that so many Deputy Collectors are inclined to neglect revenue work for criminal and thus cause these bad results, are correct. The absence of personal responsibility is far more marked in revenue than in judicial work.

156. The remissions granted during the year under report amounted to Rs. 25,747 against Rs. 7,614 in the preceding year. The bulk of the remissions was granted to the tenants of some Government estates in the 24-Parganas, who were unable to pay owing to the destruction of their crops. The remissions are classified thus:—

	Rs.
Nominal remissions	4,686
Remissions of grace	20,760
Ditto of right	301

The nominal remissions were on account of lands wrongly included in Government estates, and in some cases of lands remaining unsettled because of diluvion and desertion. Deaths, desertion of raiyats, relinquishments of holdings, poverty of raiyats, &c., were the causes of remissions of grace, while the remissions of right were granted in certain khas mahals on account of double assessment and diluvion of jôts.

157. There has been no material change either in the agency or mode of management of estates under direct management. The cost of management of khas mahals in the several districts is shown below:—

	Rs.
24-Parganas	26,109
Nadia	649
Murshidabad	2,577
Jessore	Nil
Khulna	686
Total	30,021

158. The amounts expended on the Government estates in this Division for miscellaneous (including agricultural) and sanitary improvements are Rs. 35,212 and Rs. 5,287 respectively, as shown below:—

	Miscellaneous, including agricultural improvements.	Sanitary improvements.
	Rs.	Rs.
24-Parganas	32,792	4,148
Nadia	385	680
Murshidabad	938	304
Jessore	518	...
Khulna	579	155
Total	35,212	5,287

159. The details of the improvements effected are given below. Rupees 29,972 were spent on the Orphangunge market in the 24-Parganas, on the extension of the revetment wall along Tolly's nala, on the construction of

godowns and drains and on repairs to roads and sheds. Rupees 455 were spent in repairing the tahsil cutcherries in the Diamond Harbour and Basirhat subdivisions and Rs. 822 on repairs of village roads. The re-excavation of the tank in the Subdivisional Officer's residence in Barasat cost Rs. 440. Rupees 648 were spent on the construction of a *pucka* ghat for a tank at Port Canning and Rs. 455 for additional boundary pillars in two Government estates. The construction and repairs of cutcherry houses and roads, sinking of wells, and clearing wells and tanks in certain khas mahals were the improvements effected in Nadia and Murshidabad. In Jessore the re-excavation of the post office tank was completed during the year at a cost of Rs. 318, and a cutcherry house constructed at Rs. 200. The re-excavation of tanks, erection of boundary pillars, and repairs of cutcherry houses disposed of the allotment in Khulna.

160. *Sanitary improvements.*—Rupees 2,984 were expended in filling up a tank in Government estate Punchannogram in the 24-Parganas, Rs. 840 in re-excavating a tank in Port Canning and in clearing jungle and drains in the above estate, &c. The improvements in the other districts consisted of the construction of culverts, the excavation of tanks, the sinking of wells, the clearing of jungle, tanks, &c.

161. Besides the above, Rs. 2,996 were spent in the 24-Parganas and Rs. 2,074 in Murshidabad on agricultural public works. They comprised the construction and repairs of embankments in the former district and the re-excavation of tanks in the latter.

162. No new staples were cultivated in any Government estates in the Division, the raiyats being averse to experiments. In Nadia a small area was sown with wheat, but for want of rain in December and January last the experiment proved a failure. No agricultural improvements or experiments were effected in any district and no new machinery was introduced.

163. In the 24-Parganas 62 schools were maintained in the Government estates at a cost of Rs. 2,034. In Nadia there are five schools, including a night school, situated in the khas mahals, one of which is exclusively for Christian girls, and is supported and managed by the Church Missionary Society. Rupees 343 were allotted to this district, the whole of which was utilised.

164. In Murshidabad nine schools were maintained, of which one was an upper primary with 31 pupils and eight lower primary with 176 pupils, and one girls' school with 21 girls. The total expenditure for maintaining them was Rs. 535, including Rs. 103 expended for purchase of benches.

165. Four primary and two secondary schools were maintained in Jessore at a cost of Rs. 36 and Rs. 34 respectively, and in Khulna 16 stipendiary schools with 447 pupils were maintained at a cost of Rs. 1,703 against 11 with 321 pupils in the previous year. Besides 11 others were paid by results, and one unaided school was kept up in this district.

166. The condition of the raiyats in the khas mahals is reported to be on the whole fairly good, though in parts they suffered from the loss of the winter paddy crops owing to the heavy rainfall during the year. No cases of desertion of raiyats from Government estates are reported from any district.

167. The work of inspection of accounts of Government estates was duly attended to by the Collectors, Khas Mahal Deputy Collectors and Subdivisional Officers. Mr. Westmacott also examined the accounts of several khas mahals during his tour.

168. The percentage of registration under section 62 of the Land Registration Act in the several districts is shown below:—

District.		1891-92.	1892-93.	1893-94.
24-Parganas	...	3·15	3·9	4·3
Calcutta	...	5·1	6·9	5·2
Nadia	...	11·6	8·5	11·07
Murshidabad	...	4·9	4·3	4·7
Jessore	...	2·2	2·1	6·06
Khulna	...	17·7	18·4	20·4
Total	...	5·1	5·2	6·1

169. Seven hundred and thirty-three estates including shares became liable to sale for non-payment of revenue demands. Of these, 107, or 14·5 per cent., were actually sold against 15·2 in the previous year. The falling off in the percentage and the large exemptions granted by Collectors, who afforded all possible facilities to defaulters to pay up their arrears before the sale days, tend to show that the sale law was not worked with undue rigour. The causes of defaults which brought about sales are disputes among co-sharers, indebtedness of proprietors, and the unprofitable nature of the estates.

170. The following table shows the settlements effected in each district of the Division during the year:—

Statement showing the settlements effected during the year 1893-94.

Division.	District.	Original settlement.		Resettlement.				Summary settlements.				Settlement for disposal.	
		Number.	Net revenue.	Number.	Net revenue.	Increase.	Decrease.	Number.	Net revenue.	Increase.	Decrease.	Number.	Estimated revenue.
1	2	3		4	5	6	7	8	9	10	11	12	
			Rs.		Rs.	Rs.	Rs.		Rs.	Rs.	Rs.		Rs.
Presidency	24-Parganas	2	85	6	952	631	...	7	202	2	...	8	2,000
	Nadia	...	...	16	1,786	417	759	...	...	...	...	22	12,809
	Murshidabad ...	...	...	5	1,333	53	342	5	1,051	...	...	16	13,541
	Jessore	...	...	7	1,339	349	243	...	...	...	...	5	66
	Khulna	...	...	...	...	...	...	...	...	...	...	...	...
	Sundarbans	5	4,596	2	604	301	...	5	2,026	...	...	146	11,561
	Total ...	7	4,681	36	6,013	1,751	1,344	17	3,279	2	...	197	39,977

Seven original settlements took place, viz., two in the 24-Parganas and five in the Sundarbans, yielding a net revenue of Rs. 4,681. Resettlements were effected in every district, except Khulna, and the net increase to the revenue demand amounted to Rs. 407. The decrease in Nadia is chiefly attributed to diluvion in all the estates, with the exception of one fishery mahal which was settled at a reduced jama owing to want of competition. That in Murshidabad has not been explained. Seventeen summary settlements were effected during the year against two in the preceding year. The rates adopted in these settlements were generally those fixed in previous settlements.

171. The relations between landlords and tenants continued on the whole to be fairly satisfactory, though manifestations of ill-feelings and strained relations broke out here and there and had to be checked by the timely interference of the local authorities. It is reported from Khulna that the practice on the part of one zamindar of purchasing the rights of under-tenants of another zamindar noticed in the last report gave rise to disputes, though no case of actual breach of the peace came to light. In the Bangaon subdivision in Jessore the relations between certain landlords and their tenants were somewhat strained, the raiyats, it is said, having never paid rent except through the Court. There was, however, no disturbance calling for the interference of the law. In Murshidabad three cases of strained relations between landlords and tenants were reported during the year. In the Sadar subdivision the raiyats of the village Shamnagar murdered the Dewan, a peon, and a muhurrir of their zamindar, Mr. Hills, of Patkabari. An additional police force had to be posted in the village at the cost of the raiyats in order to prevent further disturbances. It seems, however, that the quarrel was with the deceased, and not with Mr. Hills. In the second case the raiyats of the zamindar, Babu Gobinda Jeban Hazra, of Panchgram, in the Kandi subdivision, strongly opposed the zamindar's attempt to enhance their rent. There was every likelihood of a breach of the peace, but timely interference prevented it. In the third case the raiyats of Rai Jogendro Narain Raya, of Lalgola, in the Jangipur subdivision, combined together to put pressure on him not to let his zamindari in ijara to Messrs. Jardine, Skinner and Company on the expiry of the term of the present settlement, but to keep it khas.

Road and Public Works Cesses.

172. The following table shows the demands, collections, balances, and remissions of cesses in the several districts of the Division:—

District.	Demand.			Collections.				Balances.			Deduct remissions.	Net arrear.	Percentage of net balance on gross demand.
	Current.	Arrear.	Total.	Current including previously paid in advance.	Arrear.	Advance for future years.	Total.	Current.	Arrear.	Total.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
24-Parganas	2,37,880	37,588	2,75,468	2,06,240	34,389	4,642	2,45,271	31,640	3,199	34,839	785	34,054	12·36
Nadia	1,57,145	8,204	1,65,349	1,41,970	7,529	4,390	1,53,889	15,175	674	15,849	220	15,629	9·45
Murshidabad	1,46,101	31,110	1,77,211	1,26,395	16,795	5,921	1,49,591	20,726	14,315	35,041	1,018	34,023	19·1
Jessore	1,85,941	48,378	2,34,319	1,45,530	43,063	6,248	1,94,835	40,411	5,315	45,726	456	45,270	19·3
Khulna	1,42,320	19,453	1,61,773	1,29,156	16,038	2,000	1,48,394	13,164	2,815	15,979	1	15,978	9·8
Total ...	8,69,387	1,44,733	10,14,120	7,48,291	1,18,414	23,795	8,85,900	1,21,116	26,318	1,47,434	2,480	1,44,953	14·2

There has been a considerable increase in the annual cess demand compared with the preceding year. This is especially marked in Nadia, but is shared by all the districts in the Division, and is due to complete revaluations of the districts of Nadia and Murshidabad and partial revaluations in the other districts. The proportionate collections of current demand have fallen off slightly, while those of the arrears show some improvement compared with the preceding year, being 86 and 81·8 per cent. against 86·2 and 78·9 respectively. A large portion of the arrears is due from the districts of Jessore and Murshidabad. The bulk of them is due on account of rent-free tenures, and cannot be realised owing to the difficulty in tracing out the owners and their properties.

173. In the 24-Parganas the increase in the current cess demand is due to the valuations and revaluations of certain estates and tenures having been completed during the previous year, and to the revision of valuation of hâts and fairs under section 79 of the Cess Act.

174. In Nadia the revaluation took effect from 1st April 1893. The cess demand arrived at by the general revaluation of the district amounted to Rs. 1,58,504, of which Rs. 1,359 had to be reduced on objection and appeal. The net demand for realisation was therefore Rs. 1,57,145.

175. In Khulna the valuation and revaluation of 69 tenures and estates sanctioned by the Board were taken in hand in March 1892, and completed in March 1894. This has resulted in an increase of Rs. 17,000 to the annual cess demand of the district.

XVIII.—ATTACHED ESTATES, INCLUDING COURT OF WARDS.

176. There were altogether six estates under the management of the Court of Wards during the year under report, viz.—

24-Parganas	...	Bhowanipur. Baranagar. Jainagar.
Murshidabad	...	Kasimbazar.
Khulna	...	Saidpur Trust Estate. Satkhira Estate.

177. A portion of Miss M. D. J. Courjon's estate in the district of the 24-Parganas, consisting only of a house in Calcutta, No. 29, Theatre Road, and the Chanchra road estate in Jessore made over to Government by the late Raya Kali Prosad, zamindar of Bagchar, for the maintenance of the Daitala and Nilganj bridge over the river Bhairab, continue to be managed by the Collectors of those districts. There is nothing special to note in respect to these estates.

178. Of the three estates in the district of the 24-Parganas, Bhawanipur is comparatively large and important, comprising 20 entire revenue-paying estates, 17 portions of estates, 4 patnis and 38 tenures. The affairs of this

estate are in a satisfactory condition. Out of a total demand of Rs. 4,13,413, including current demand of Rs. 1,63,789, a sum of Rs. 1,96,340, being 119·8 per cent. of the current demand, was realised, and Rs. 23,820 remitted during the year, leaving a balance of Rs. 1,93,253. This result is better than that of any previous year since the assumption of the charge of the estate by the Court of Wards. Out of the outstanding balance of Rs. 1,93,253, Rs. 39,400 are reported to be bad and irrecoverable, and of this Rs. 24,105 have since the close of the year been written off under proper sanction. The recovery of Rs. 7,367 is said to be doubtful and disputed, Rs. 8.533 are doubtful but not disputed, and the rest, Rs. 1,37,953, good and are in process of recovery.

179. Rupees 19,000 were spent during the year for the following improvements within the estate, viz., the reclamation of about 1,902 bighas of land, the excavation of four tanks and construction and repair of 12 miles of kutcha roads. Rupees 250 and Rs. 650 were also spent for the support of schools and maintenance of dispensaries.

180. Out of the lands reclaimed by the estate during the last two years, settlement of 3,700 bighas has already been made, and the settlement of a further area of 5,400 bighas is expected to be concluded shortly.

181. A sum of Rs. 32,920 was invested in Government securities, and of Rs. 5,005 in purchase of lands.

182. The condition of the tenantry of this estate is fair.

183. It is satisfactory to notice that the ward, Barada Prosad Rai Chowdhuri, who, as reported in paragraph 220 of the last year's report, has been removed to Bankipore, has shown a marked improvement in his education and conduct under the guardianship of the present tutor-guardian, Babu Jnanendra Lal Roy.

184. As regards the other estates in the district nothing special has been noticed by the Collector. Their management continues to be fair as before.

185. Kasimbazar is the only estate managed in this district. It is the most important charge in the Division and is the property of the minor, Ashutosh Nath Rai. Its collections were not satisfactory during the year. Out of a total demand of Rs. 6,22,515, viz., current Rs. 3,51,491 and arrear Rs. 2,71,024, only Rs. 1,96,739, or 31·6 per cent., on the total demand were collected, leaving a balance of Rs. 4,23,038 after deduction of remission amounting to Rs. 2,738. The percentage has greatly fallen off, being only 31·6 against 53·7 of the preceding year, and 61·3 of the year 1891-92. This is chiefly due to the very heavy loss of crops in pargana Sarail, the largest mahal of the estate, caused by the unusually high flood of the year. The failure of crops in the pargana during 1892-93, as reported in paragraph 222 of the previous year's report, followed by a heavy loss in the year under report, consequent on the high flood of the year, has materially affected the circumstances of the tenantry, and it has necessitated the distribution of agricultural loans and gratuitous relief amongst them. The amounts sanctioned by the Board for the purpose, viz., Rs. 8,000 for tuccavi loan and Rs. 5,000 for gratuitous relief, are being now distributed. The scarcity will, it is hoped, be over in July, when a new harvest of *aus* and *jute* crop is to be gathered.

Murshidabad.

186. The survey and settlement operations in the pargana which commenced in December 1889 were closed in 1892-93. They effected an assessment of about Rs. 5,20,000 in the rent-roll of the estate, showing an increase of Rs. 1,68,509, or 47·9 per cent. on the old hustabood. This assessment has been mainly obtained by the assessment of the excess lands found in the possession of the raiyats, and a very small portion by raising the lower rates of rent to those prevailing in other villages for similar classes of lands with similar advantages. The new jamabandi came into force from the 1st of Baisak 1300 B.S. corresponding with April 1893, but errors and omissions having been discovered therein, arrangements have been made under the orders of the Board of Revenue, Lower Provinces, for the correction of the settlement records. The work began on the 18th February last under the personal supervision of the manager of the estate, and is now in progress.

187. A survey of the mahals, situated in the Rangpur, Burdwan, Birbhum and Murshidabad portions of the estate, under the Bengal Tenancy Act, was

sanctioned during the year, but the operations have been postponed owing chiefly, among other reasons, to the financial embarrassment of the estate consequent on the failure of crops in pargana Sarail referred to above.

188. During the year two houses, Nos. 135 and 136, Canning Street, Calcutta, were purchased on behalf of the estate for Rs. 2,30,000. In effecting the purchase, Government securities to the nominal value of Rs. 1,68,000 standing in the name of the minor had to be sold. The investment, however, has proved to be a lucrative one, the houses being let out at Rs. 1,225 a month, or Rs. 14,700 per annum, which yields interest at the rate of nearly 6½ per cent. on the capital invested. No other material additions were made to the estate during the year.

189. During the year the estate contributed Rs. 5,805 towards the maintenance of schools and pathsalas, and Rs. 9,291 in support of charitable dispensaries established by it in different localities, inclusive of the cost of the maintenance of the Arnakali Zenana Hospital established at Berhampore. This institution is likely to benefit the public, and is, I find on a recent inspection, doing well and becoming popular.

190. A sum of Rs. 12,228 was also spent during the year on works of improvement, chiefly consisting of excavation and re-excavation of tanks, and partly of construction and repairs of roads and culverts in localities where their want was felt by the tenants of the estate. Rupees 104-12 were expended in horticultural experiments and improvements within the estate.

191. An European tutor has been appointed during the year, and the minor seems to have made fair progress, considering all things. It is a great pity he was not properly taught in his younger days.

192. As the Khagra minors of the Purnea district are living with their mother in Murshidabad, the Collector of the latter district has been directed to look after them and to supervise their expenditure. The estate is being managed from Purnea

Khulna.

193. Of the two estates in the district of Khulna, Saidpur is a Trust Estate and is managed directly by the Collector of the district. Most of the estate is let out in patni, the rest being managed khas. The annual demand from the patni mahals is Rs. 1,48,966 and from khas mahals Rs. 35,710. The total demand of the year, including cesses and interest, was Rs. 2,99,044, viz., Rs. 2,20,890 on account of patni and Rs. 78,154 on account of khas mahals. Out of this Rs. 1,78,424, viz., Rs. 1,46,507 from patnis and Rs. 31,917 from khas mahals, were collected during the year, leaving a balance of Rs. 73,723 and Rs. 42,405 after the deduction of remissions amounting to Rs. 660 and Rs. 3,832 respectively. Of the total balance of Rs. 1,16,128, Rs. 70,461 have since the close of the year been collected, and there remains a balance of Rs. 45,668 on account of the year. The percentage of total collections on total demand was 59·66 per cent.

194. The decrease in collections on account of the patni mahals is reported to be due to the fact that the second patni sale-day falls outside the year and the patnidars need not pay till then. As no compulsory steps for realisation can be taken before, necessarily a large balance remains outstanding every year. The khas mahal collections were bad partly owing to unavoidable changes in the tahsil establishment at Daulatpur at the latter end of the year, which is the season for collections, and partly to the incompetence of the newly-appointed tahsildars and of the naib who has since resigned. The Collector has since submitted a proposal for a revision of establishment resulting in a saving, and this has been sanctioned. It is hoped that with this establishment the affairs of the estate will be better managed.

195. The estate contributes Rs. 60,000 per annum to the Mohsin Endowment Fund. During the year under report Rs. 45,000 only could be paid. The balance has been paid since the close of the year. The estate also contributes Rs. 2,245 and Rs. 698 annually to schools and dispensaries situated within its zamindari in the districts of Khulna and Jessore.

196. The affairs of the Satkhira estate continued to be in the same bad state as last year. The Court is in charge of a fractional share only, and the difficulties of management, necessarily very great, have been increased by the incompetence of the manager. To this incompetence is due the fact that no

figures concerning the estate could be obtained. The manager has since resigned and a new officer, who has only very recently taken charge, has been appointed in his place.

XIX.—EXCISE.

197. The following statement shows the total excise revenue realised in each district of this Division during the past two years:—

District.	Number of licenses.		Increase.	Decrease.	Revenue.		Increase.	Decrease.
	1892-93.	1893-94.			1892-93.	1893-94.		
1	2	3	4	5	6	7	8	9
					Rs.	Rs.	Rs.	Rs.
24-Parganas ...	1,097	1,132	35	...	4,18,610	4,29,263	10,653	...
Calcutta ...	1,136	999	...	137	24,99,497	25,72,405	72,908	...
Nadia ...	249	262	13	...	1,16,547	1,20,239	3,692	...
Murshidabad ...	318	424	106	...	1,56,561	1,55,400	...	1,161
Jessore ...	355	308	...	47	90,870	88,170	...	2,700
Khulna ...	141	143	2	...	75,575	75,377	...	198
Total ...	3,296	3,268	156	184	33,57,660	34,40,854	87,253	4,059
Net decrease ...		28			Net increase ...		83,194	

It is satisfactory to observe that though there has been a decrease of 28 licenses the revenue has continued to expand throughout the Division, though three of the six districts show a decrease. Of these, one (Murshidabad) also showed a falling off last year. The net increase has been Rs. 83,194. To this improvement Calcutta contributed Rs. 72,908, or 87·6 per cent., a satisfactory result, especially as it has followed an increase of Rs. 2,24,513 in the preceding year. Almost the whole of the increase was obtained from country rum and imported liquor. The large expansion of the revenue from rum in the preceding year was, as stated in the last report, due to the prohibition of the import of duty-paid rum into Bengal. This prohibition was withdrawn by Government in February 1893 on the representation of the exporters and the Government of the North-Western Provinces, but the export has nevertheless continued as before, full duty being paid in Calcutta instead of in the place of export. The increase from imported liquors is due to the enhancement of the fees for wholesale and retail licenses from Rs. 50 and Rs. 600 to Rs. 300 and Rs. 1,000 respectively in Calcutta. The increase in the other two districts, viz. the 24-Parganas and Nadia, was principally due to the rise in the rate of duty on ganja levied from 1st April 1893, and to high competition in the former district for the settlement of opium shops. The decrease in the revenue in Murshidabad, Jessore, and Khulna is attributable to a smaller consumption of country spirits owing to the straitened circumstances of the people caused by successive bad harvests. In Murshidabad the high selling price of opium affected the sales prejudicially. Consumers are said to have obtained their supply from other districts where it is sold cheaper.

198. The statement below shows the results under each head of exciseable articles during the last two years:—

Exciseable articles.	Number of licenses.		Increase.	Decrease.	Revenue.		Increase.	Decrease.
	1892-93.	1893-94.			1892-93.	1893-94.		
1	2	3	4	5	6	7	8	9
					Rs.	Rs.	Rs.	Rs.
1. Country spirits.	368	383	15	...	14,41,716	14,49,454	7,738	...
2. Rum ...	11	10	...	1	4,16,481	4,34,472	17,991	...
3. Imported liquors.	487	393	...	94	1,28,081	1,59,486	31,405	...
4. Tari ...	822	803	...	19	1,65,373	1,77,763	12,390	...
5. Pachwai ...	345	351	6	...	23,692	24,558	866	...
6. Charas ...	17	24	7	...	8,081	9,467	1,386	...
7. Siddhi ...	70	79	9	...	26,708	27,915	1,207	...

9. Madak ...	86	101	15	...	28,509	23,784	...	4,725
10. Chandu ...	18	19	1	...	18,004	11,711	...	6,293
11. Spirits used for arts, &c.	...	...	...	...	1,066	337	...	729
12. Ganja ...	384	394	10	...	4,42,480	4,56,449	13,969	...
13. Opium ...	653	708	55	...	6,55,632	6,63,282	7,650	...
14. Miscellaneous.	31	...	...	31	1,232	1,535	303	...
Total ...	3,296	3,260	118	146	33,57,660	34,40,854	94,941	11,747
Net decrease ...	28				Net increase ...	83,194		

Except the three exciseable articles, viz. madat, chandu, and "methylated spirits," all heads show an increase in revenue, far the largest being under "imported liquor." The fluctuations under the principal heads are explained below.

199. *Country spirits.*—In 1892-93 the increase in the revenue from this article amounted to Rs. 43,470. During the year under report the increase amounted to Rs. 7,738 only, four districts, viz. the 24-Parganas, Jessore, Khulna, and Murshidabad, showing a decrease. As explained before, the comparative poverty of the people during the year under report on account of bad harvests stood in the way of increased consumption. In Calcutta there was an increase of Rs. 11,935. Looking to the last triennial settlement, in which there was a keen competition among the vendors, and the result of the year's administration, the trade in this article here appears to have continued to be profitable.

200. *Rum.*—Calcutta is the only district where rum was imported during the year. The increase in this district of Rs. 18,041, though not very great, is still remarkable, considering the fact that this article showed an increase of Rs. 1,90,563 in the preceding year. The payment of full duty on this article in Calcutta instead of at the place of export in the North-Western Provinces accounts for the improvement.

201. *Imported wines.*—As observed before, enhancement of the fees for wholesale and retail licenses for the sale of these wines in Calcutta chiefly brought about an increase in revenue. It is said that the petty wholesale and retail dealers, who chiefly deal in cheap foreign liquor, have found their occupation gone, being unable to pay the enhanced fee, and the whole trade has, as was to be desired, concentrated in the hands of respectable and substantial tradesmen.

202. *Ganja.*—There was an increase in the revenue in all districts owing to better prices being obtained at the time of settlement and the enhancement of the rate of duty. Consumption shows a decrease, which is a subject of congratulation, owing to the enhancement of price and to a smaller quantity having been exported to Mauritius. The Collector of Nadia reports that dearness of food and illicit dealings are the causes of decreased consumption.

203. *Opium.*—In the majority of the districts there was an increase in the revenue due to the settlement of certain shops at enhanced fees. In some districts consumption fell off owing to the reduced circumstances of the people. The Collector of Murshidabad suspects that opium smuggling is carried on in his district, but he has been unable to procure a conviction in any case. As stated already, consumers of opium in this district obtain their supply from other places at a cheaper price. As stated in the preceding report, the demand for opium in Calcutta is largely met by illicit means, both contraband and duty-paid opium being systematically imported here from Bihar and the North-Western Provinces. The Collector says that the complete eradication of smuggling is impossible. The temptations are very great, and the facilities and ease with which opium can be transmitted and passed from hand to hand are enough to induce persons to brave the chances of detection and punishment. The illegal trade is said to flourish with impunity and baffles the vigilance and scrutiny of the excise and police officers.

204. *Madak and chandu.*—The decline in the revenue under these two heads is apparently due to the prohibition of smoking these drugs on the premises of the shops. This has been productive of more harm than good. It has led to a decrease of revenue with no corresponding advantages, as the effect has been to start private smoking dens instead of public ones in many places. The decrease under the head "country-made methylated spirits" is said to be due to heavy increase in the import of foreign methylated spirits. The cause of this increase has not been satisfactorily accounted for.

205. The excise administration in the Division has on the whole been satisfactory. In Calcutta it has been attended with marked success. Not only has there been an increase of revenue, but this increase (continued from the previous year) has been accompanied by a decrease in the number of licenses, and in some cases, *e.g.* ganja, by a decrease in consumption.

Salt.

206. There has been no change in the protected area, nor did anything of importance requiring special notice occur during the year. The sub-charchitta system in force in Backergunge was introduced in the 24-Parganas in August 1893.

207. The following table compares the consumption of salt in the two saliferous districts of this Division during the past two years:—

District.	1892-93.	1893-94.	Increase.	Decrease.	Remarks.
1	2	3	4	5	6
	Mds.	Mds.	Mds.		
24-Parganas ...	1,58,947	1,67,789	8,842	...	
Khulna ...	1,13,055	1,18,671	5,616	...	
Total ...	2,72,002	2,86,460	14,458	...	

There was an improvement in both the districts compared with the preceding year, though the decrease of that year has not been fully made up, and this was prevalent throughout every quarter of the year in both districts, except during the fourth quarter in the 24-Parganas, when there was a slight decrease. The Collector of this district ascribes the increased consumption to the good harvest collected during the year and to increased activity displayed by the police in enforcing the penal clauses of the Salt Act. The Collector of Khulna observes that the figures show a very slight increase over those of

1891-92, when the sales amounted to 1,18,038 maunds, and that consumption during the year under report may be considered to be about the normal.

208. The number of cases instituted for offences against the salt laws is shown below:—

	1892-93.	1893-94.	Increase.
24-Parganas	137	412	275
Khulna	30	42	12

Both the Collectors attribute the increase to greater activity and vigilance of the police officers in detecting cases. Mr. Collier, the Collector of the 24-Parganas, says that in the south of the district, where there is salt water close to every house, the temptation to manufacture salt is so strong that it can only be kept in check by constant raids on the part of the police, and adds that "this is not a desirable state of things, but apparently there is no help for it as long as the duty on salt is in force."

209. The table below shows the quantity of salt confiscated and the fines and forfeitures realised and rewards paid in each district during the two years:—

District.	Quantity of salt confiscated.		Fines and forfeiture realised.		Reward	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	
	Mds. s.	Mds. s.	Rs.	Rs.	Rs.	Rs.
24-Parganas	20 24	39 27	537	1,740	887	877
Khulna	9 26	18 15	134	207	67	156
Total ...	30 10	58 2	671	1,947	954	1,033

The quantity of salt confiscated in each district was nearly doubled. Nearly Rs. 800 adjudged as rewards remained unpaid in the 24-Parganas at the close of the year, as cases in which they were awarded were only decided in the latter part of the year. The Collector reports that, as an encouragement to the police and informers, the entire amount of the fines and forfeitures has been invariably distributed as rewards. In Khulna the rewards paid amounted to Rs. 156 against Rs. 67 disbursed in the preceding year. The Collector says that rewards have been paid in all cases tried under sections 16 to 19 of the Salt Act.

XX.—STAMPS.

210. The following table shows the result of the administration of the stamp revenue in this Division during the year as compared with that of the preceding year:—

Year.	Receipts.				Charges.			Remarks.
	Sale of court-fee stamps, including plain papers used with such stamps.	Sale of non-judicial stamps.	Miscellaneous receipts.	Total.	Refunds.	Other charges.	Total.	
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1892-93	27,88,967	15,64,856	10,933	43,64,756	76,687	47,697	1,24,384	
1893-94	28,23,597	15,77,464	8,383	44,09,444	74,087	48,527	1,22,614	
Increase ...	34,630	12,608	...	44,688	...	830	...	
Decrease ...	...	...	2,550	...	2,600	...	1,770	

The net increase was therefore Rs. 46,458.

211. As in the preceding year, the sale of both judicial and non-judicial stamps shows an increase, Calcutta contributing the largest share in the Division. The income from this district amounted to nearly 23½ lakhs. The revenue from the other districts is shown below:—

	Rs.
24-Parganas	6,71,647
Nadia	3,34,232
Murshidabad	2,66,264
Jessore	4,26,724
Khulna	3,16,490

212. As regards judicial stamps, there was an increase in two districts, viz. Calcutta and Murshidabad, and a decrease in the others. The increase in Calcutta is ascribed to the payment of nearly Rs. 45,000 for probate duty in respect of the estate of the late Sir William Mackinnon. The improvement in Murshidabad is possibly due to an increase of civil litigation. The decrease in sales in Nadia, Jessore, and Khulna is on account of the institution of a smaller number of probate and certificate cases and of civil and criminal suits generally. The decline of civil litigation is attributed to the reduced circumstances of the people caused by bad harvests. The decrease in the 24-Parganas was only nominal.

213. Except in the 24-Parganas, where the decrease was small, there was an increase in the sale of non-judicial stamps in all districts. The high price of food which led many cultivators to contract debts led to the execution of a large number of deeds. This helped the sale to a certain extent. The sale of receipt stamps shows a marked improvement, especially in Calcutta, which is attributed by the Collector mainly to the severity with which unstamped receipts and brokers' notes are dealt with by his office. The briskness of the jute trade has also contributed towards this increase. The increase in the other districts is due to a stricter observance of the rules requiring shopkeepers and *mahajans* to affix receipt stamps to their accounts.

214. The following statement shows the result of the action taken by the civil and revenue officers and the prosecutions instituted for infringement of the stamp laws:—

Year.	Action taken by Civil Courts on unstamped or insufficiently stamped documents.		Action taken by Collectors on unstamped or insufficiently stamped documents.		Prosecutions instituted for infringement of the stamp laws.					Remarks.
	Number of cases.	Duty and penalty levied.	Number of cases.	Duty and penalty levied.	Number of cases.	Persons brought to trial.	Convicted.	Fines imposed.	Rewards paid.	
1	2	3	4	5	6	7	8	9	10	11
		Rs.		Rs.				Rs.	Rs.	
1892-93	208	2,325	568	8,115	123	110	98	1,082	273	
1893-94	178	1,532	474	6,334	73	72	60	755	265	
Increase ...	...	...	...	...	...	...	...	...	...	
Decrease ...	30	793	94	1,781	50	38	38	327	108	

There was a decrease under all the heads during the year under review, Murshidadad alone showing an increase. In the preceding year a very large number of contracts relating to District Boards were impounded and dealt with under section 39 of the Stamp Act in Calcutta. The decrease in Nadia is attributed to a stricter observance of laws by the people. Similar incidents in 1893-94 mainly account for the falling off, but poor success was obtained in the prosecution of cases, the results being bad in Nadia. Rewards also were not disbursed with sufficient liberality. The attention of Collectors has been drawn to this important point. The administration of the stamp revenue in this Division was on the whole satisfactory.

XXI.—INCOME-TAX.

215. The subjoined table shows the gross demand, remission, net demand, collection and balance of income-tax in the several districts of this Division, including Calcutta, during the year 1893-94:—

District.	Gross demand.	Remission.	Net demand.	Collection.	Balance.	Collection in the year 1892-93.	Difference between columns 5 and 7.				Remarks.
							Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	
1	2	3	4	5	6	7	8	9	10	11	12
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			
24-Parganas ...	81,686	5,693	75,993	68,750	7,243	73,941	...	5,191	...	7	
Calcutta	19,68,818	77,479	18,91,334	17,70,462	1,20,872	17,31,695	48,767	...	2·8	...	
Nadia	50,006	1,071	48,935	48,778	157	44,372	4,406	...	10·	...	
Murshidabad ...	57,720	1,002	56,658	56,483	175	55,024	1,459	...	2·6	...	
Jessore	44,142	2,279	41,864	41,101	762	40,432	670	...	1·6	...	
Khulna	34,234	1,834	32,399	31,070	1,329	31,735	...	665	...	2·1	
Total ...	22,36,601	89,418	21,47,183	20,16,645	1,30,538	19,67,199	49,446	...	2·5	...	

The gross demand amounted to Rs. 22,36,601 against Rs. 21,27,000 in the preceding year, showing an increase of Rs. 1,09,601, or 5·1 per cent. The increase occurred in all the districts, except the 24-Parganas and Khulna, which showed a decrease of Rs. 4,681 and Rs. 584 respectively as compared with the preceding year, but it was principally in Calcutta, where it amounted to Rs. 1,08,000.

216. The percentage of remission on the gross demand was 4· against 3·6 in the previous year. The figures for each district as compared with the previous year are shown below:—

	1893-94.	1892-93.
24-Parganas ...	6·9	2·6
Calcutta ...	3·9	3·7
Nadia ...	2·1	2·005
Murshidabad ...	1·8	1·4
Jessore ...	5·1	5·5
Khulna ...	5·3	3·3

The percentage exceeded 5· in the 24-Parganas, Jessore, and Khulna. The high percentage in the 24-Parganas is said to be mainly due to the change in the circumstances of the assessees since the date of assessment. In Jessore it is due to the decline of business owing to the repeated failure of crops during the past two years, and in Khulna it is chiefly attributed to the fact that the original assessments were not carefully made by the assessor.

217. The total number of objections filed during the year was 4,332 against 3,405 in the preceding year. The following table shows the percentage of objections to assessments in the several districts compared with the previous year:—

	1893-94.	1892-93.
24-Parganas ...	17·4	8·8
Calcutta ...	11·3	9·5
Nadia ...	10·3	9·4
Murshidabad ...	9·1	6·5
Jessore ...	14·7	14·3
Khulna ...	15·9	13·1

It will be seen that the percentage of objections increased in every district. In the 24-Parganas the increase is said to be due to the fact that individual notices on post-cards were issued to all the assessees in the year under notice. In Jessore the majority of the objectors were petty money and paddy lenders whose business suffered much owing to the prevailing high price of food-grains. In the remaining districts the increase is attributed chiefly to enhanced assessments made by the assessing staff.

218. The net demand amounted to Rs. 21,47,183 against Rs. 20,50,106, showing an increase of Rs. 97,077, or 4·7 per cent. Taking the districts

separately, there was a decrease in the final demand in the 24-Parganas and Khulna, which amounted to Rs. 8,079 and Rs. 1,236 respectively, while in the remaining districts there was an increase of Rs. 1,06,392, as shown below:—

	Rs.
Calcutta	99,703
Nadia	4,528
Murshidabad	1,284
Jessore	877
Total ...	1,06,392

The increase was noticeable in Calcutta and Nadia, the percentages being 5·6 and 10·2 respectively on the final demand of the preceding year. Mr. Fiddian, the Collector of Jessore, observes on the subject: "The fact that in spite of some unfavourable circumstances arising out of the repeated failure of crops for the last two years and the consequent straitened circumstances of the people, the final demand not only did not fall off, but made an appreciable advance, is a satisfactory feature of the administration." The falling off in the 24-Parganas is attributed partly to the decline of the sugar and castor oil manufacturing business and partly to the failure of jute crops and the damage done to the fisheries in the salt-water lakes and to the brick-burning concerns by the heavy rains in the early part of the year. The decrease in Khulna is mainly due to the depression in trade owing to the failure of crops in 1892-93.

219. The percentage of collections on the net demand was 93·9 against 95·9 in the preceding year. The percentage in each district was as follows:—

	1893-94.	1892-93.
24-Parganas	90·4	87·9
Calcutta	93·6	96·09
Nadia	99·6	99·9
Murshidabad	99·6	99·3
Jessore	98·1	98·6
Khulna	95·8	94·4

The percentage was more than 95 in every district, except the 24-Parganas and Calcutta. In the 24-Parganas the low percentage of collections is attributed partly to the heavy arrears under Part I, chiefly due from the European employés of local mills, and partly to the fact that assessments were made too late to admit of any legal steps being taken for recovery of the dues before the expiry of the year. The short collections in Calcutta are said to be due to the fact that the assessments were not completed till the end of March last.

220. The incidence of the tax, excluding Calcutta, was Re. 1 to every 30 persons, and in Calcutta Re. 1 to every four persons as in the previous years.

221. As regards complaints, the Collector of Khulna reports that while on tour he everywhere received complaints that the assessor did not see the assessees, and that the first notice they received of assessment was the attachment of their property. In the other districts no complaints against the working of the Act were brought to notice other than those embodied in the objections.

222. There was no apparent change in the public feeling towards the tax which continues to be unpopular. The hardship is most felt by the assessees under the lowest class to which most of the defaulters belong. The possibility of the minimum taxable limit being raised to Rs. 1,000 has excited much interest among the educated class of the community.

223. From what I have seen in appeal cases, I am not sure that sufficient care is taken by the assessors in ascertaining the reasons for enhanced assessments. These seem to be often raised without any satisfactory reason being adduced. Profits of shops and of traders are often exaggerated by people out of ignorance or malice, and although it is the business of assessees to keep proper accounts, the absence of such accounts should not be taken as grounds for enhancement of the tax, though it supplies *primâ facie* good grounds against any reduction of the same.

XXII.—MONETARY ARRANGEMENTS.

224. The table below shows the receipts and disbursements of the subdivisional treasuries during the past year as compared with those of the preceding year:—

District.	Receipts.		Disbursements.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas	7,01,564	7,48,739	6,81,597	7,44,301
Nadia	9,42,649	8,60,220	9,14,149	8,70,933
Murshidabad	5,77,714	7,60,754	5,72,183	8,26,673
Jessore	6,34,866	6,23,897	6,31,094	6,29,635
Khulna	8,73,771	8,80,722	8,45,159	8,28,224
Total ...	37,30,564	38,74,332	36,44,182	38,99,766

The figures given for the 24-Parganas show the transactions of the sub-treasuries at Barasat, Basirhat, and Diamond Harbour only, those at Barrackpore and Dum-Dum having been abolished during the year, and the figures given for Murshidabad show the transactions of the Jangipur and Kandi sub-treasuries only, the sub-treasury at Lalbagh having been closed from 1st July 1892.

225. It will be seen that there was an increase both in the total receipts and disbursements during the year compared with those of 1892-93. The increase as regards the receipts occurred in the 24-Parganas, Murshidabad, and Khulna, and as regards the disbursements in the 24-Parganas and Murshidabad only. In the 24-Parganas there was a large increase both in the receipts and disbursements at Barasat, which is ascribed to a large portion of the transactions of the two abolished sub-treasuries having been transferred there. There was also a considerable increase in the disbursements at Basirhat, which is said to be due to an increase in the transactions relating to civil deposits.

226. In Murshidabad the subdivision of Lalbagh having been abolished, the figures for 1892-93 differ from those shown in last year's report. In the two other subdivisions there was an increase in receipts as well as in payments. In Jangipur the increase is said to be solely due to the payment of supply bills and telegraphic orders of payment issued by the Accountant-General, Bengal, for which a larger remittance was made to this subdivision. In Kandi the increase is said to represent ordinary fluctuations, and no ostensible cause is assigned for it.

227. In Khulna the increase in the receipts was small and is said to be chiefly due to the fact that much of the forest revenue was paid in at the sub-treasuries.

228. In Nadia and Jessore, on the other hand, there was a decrease both in receipts and disbursements. In the former district the decrease in receipts is attributed partly to the decreased sale of stamps and to the fact that fewer and smaller remittances were received from other districts. The decrease in the disbursements is said to be due to a falling off in payments under the heads "Judicial deposits" and "Public Works Department."

229. In Jessore the decrease both in receipts and disbursements occurred chiefly at Jhenidah and Narail. At the former sub-treasury the decrease in receipts is ascribed to the decrease in the receipts from the civil courts, the absence of the recovery of agricultural loans which had been fully paid up in the previous year, and to the payment of income-tax by the traders at Kotechandpur direct to the Sadar treasury. The decrease in receipts at Narail is said to be due to a diminution in the stamp and excise revenue. The

decrease in the disbursements, which include remittances to the district treasury, is said to be due to the decrease in the receipts.

230. The following table shows the working of the Post Office Savings Banks during the past two years in the districts of this Division :—

District.	Amount deposited.		Amount withdrawn.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas	5,99,299	6,13,323	5,17,345	6,57,955
Nadia ...	3,29,033	3,45,300	2,70,704	2,60,514
Murshidabad	1,56,486	1,86,310	1,22,157	1,40,653
Jessore	1,94,081	2,01,670	1,37,205	1,67,595
Khulna	1,27,328	1,22,450	1,02,668	98,016
Total ...	14,06,227	14,69,053	11,50,079	13,24,733

It will be seen that in the 24-Parganas, Murshidabad, and Jessore there was an increase both in the amount deposited and the amount withdrawn. In Nadia the amount deposited shows an increase, while there was a decrease in the amount withdrawn. In Khulna both accounts show a decrease. No explanations have been furnished by the Collectors of the 24-Parganas, Nadia, and Murshidabad regarding the fluctuations in their districts. The increase in Jessore is attributed to the fact that the people are becoming more and more familiar with the advantages and the security afforded by the system. Its benefits are said to be understood even by domestic servants who have begun to lodge their savings in the bank. The improvement is satisfactory, but the large drawings show that the people were not very prosperous generally. In Khulna the decrease in the deposits is said to be probably due to the scarcity in the early part of the year which reduced the savings. The decrease in the withdrawals, it is observed, cannot be explained.

231. The table below shows the amount of money-orders issued and paid in the districts of this Division during the past two years:—

District.	Orders issued.		Orders paid.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	29,48,339	31,92,744	22,14,565	25,92,296
Nadia ...	8,21,500	8,63,131	14,29,414	15,00,960
Murshidabad ...	7,86,335	8,50,505	Not furnished by the Postal Department.	
Jessore ...	8,52,348	7,78,924	8,15,783	9,38,463
Khulna ...	7,76,749	8,62,196	5,63,900	5,02,506
Total ...	61,85,271	65,47,500	50,23,662	55,34,225

The above statement shows that in the 24-Parganas and Nadia there was an increase both in the amount of money-orders issued and paid. In Murshidabad and Khulna there was an increase in the amount of the orders

issued, while the amount of money-orders paid in Khulna shows a decrease. The amount of orders issued in Jessore shows a decrease, while the amount of orders paid shows a large increase as compared with 1892-93. The increase in the 24-Parganas and Murshidabad has not been explained; that in Nadia is said to be due to the better appreciation of the system by the public in general. In Jessore the large decrease in the value of orders issued is to a certain extent attributed to the high prices of food-grains, which, by rendering living more expensive, left less for remittance to home and friends. I doubt, however, whether there are very many foreigners living in the Nadia district. The increase in the value of orders paid is said to be due to the brisk sugar trade in the last quarter of the year. As regards Khulna the increase of money-orders issued is said to be probably due to the development of the system in general, but the Collector has not been able to give any definite opinion on the subject, having no means of examining the figures in detail. The decrease in the value of orders paid is said to be perhaps due to the dullness of the rice trade early in the year in the Bagerhat subdivision.

232. The table below shows the receipts and issues of currency notes in the districts of this Division during the past two years:—

District.	1892-93.		1893-94.	
	Received.	Issued.	Received.	Issued.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas	24,96,640	22,10,660	29,20,260	28,11,400
Nadia ...	12,08,925	12,43,720	8,40,180	8,90,755
Murshidabad ...	11,57,685	11,67,600	12,30,395	12,88,990
Jessore ...	7,91,225	7,70,050	6,17,450	7,32,070
Khulna ...	4,70,170	4,66,000	3,57,990	4,03,025
Total ...	61,24,645	58,58,030	59,66,275	61,26,240

In the 24-Parganas and Murshidabad there was an increase both in the receipts and issues of currency notes, while all the other districts show a decrease. No explanation has been furnished regarding the large increase in the 24-Parganas. That in Murshidabad is said to be due to the supply of notes of lower denominations from the Currency Office for the payment of salaries to officers and to the remittance of surplus notes for higher values to the reserve treasury at Calcutta. It is also stated that the payment of land revenue is generally made in notes by the big zamindars in this district, and that the Maharani Svarnmayi of Kasimbazar generally obtains, by paying currency notes, remittance transfer receipts on account of land revenue due from her for estates lying in other districts. The decrease in Nadia has not been explained. It is stated that of Rs. 8,90,755 worth of currency notes issued from the treasury in this district, Rs. 3,30,540 were remitted to the reserve treasury and Rs. 5,60,215 paid to the public. In Jessore the decrease in the receipts is said to be apparently due to the restriction imposed by the Accountant-General, Bengal, in regard to the issue of notes of higher value, except for the payment of salaries and pensions. The decrease in the issues is also ascribed to the same cause, as also to the larger remittance to the reserve treasury. The decrease both in the receipts and issues of currency notes in Khulna is said to be chiefly due to the money-order system becoming year by year more and more popular.

233. The supply of copper coins was sufficient everywhere to meet the demands of the public.

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

234. The Eastern Bengal State Railway, including branches to Budge-Budge, Canning, and Diamond Harbour, runs for 124½ miles in the 24-Parganas district. The proposal to construct a stream tramway from Barasat to Basirhat is still under consideration of the District Board.

235. In Nadia the scheme for the construction of a steam tramway from Ranaghat to Krishnagar *vid* Santipur, which was under the consideration of Government, has been approved of in March last, with the proviso that the line should give way to a railway in the event of its being decided hereafter to make a railway between Ranaghat and Krishnagar. Government has also expressed its willingness to make over to the District Board for the purpose the embankment of the abandoned Ranaghat-Bhagwangola Railway on condition that the surplus profits of the tramway in excess of 4 per cent. are divided equally between the State and the owners of the tramway.

236. In Murshidabad the Azimganj and Nalhati branch was taken over by the East Indian Railway from 1892. The Company is acquiring 34 bighas of land for an extension of the riverside sidings of the Azimganj station.

237. In Jessore and Khulna no new railways were constructed during the year. The portions of the Bengal Central Railway which pass through these districts were maintained.

238. In the 24-Parganas the circular canals (10 miles in length) and Tolly's nala, including Kaorapuker khal (37 miles), were maintained at a cost of Rs. 42,838 during the year against Rs. 43,231 in the previous year, while the gross revenue from tolls in these two canals was Rs. 4,07,471 against Rs. 4,63,994 in 1892-93. The Sunderbuns channels yielded a gross income of Rs. 5,495 from tolls against Rs. 4,955 in the year preceding. There are also two khals of an aggregate length of 17 miles in this district. That between Mograhat railway station and Jainagar is navigable all the year round and is in fair condition. No expenditure was incurred on it during the year. The Sorisa khal is navigable only in the rains. A sum of Rs. 375 was spent for clearing silt from this khal.

239. A sum of Rs. 35,615 was spent in maintaining 220 miles of schedule D and two miles of tuccavi embankments against Rs. 30,915 in the previous year. These are reported to be efficiently maintained. Rupees 10,875 were spent in constructing new sluices and retired lines of embankments.

240. There are 68 drainage and irrigation sluices, of which 46 are maintained by Government, 4 by the Calcutta Corporation, and 18 by the zamindars and raiyats concerned. All these sluices are reported to be in good order. The Churial khal drainage works consisting of a drainage channel (9½ miles long) effected the drainage of 134 villages covering an area of nearly 31 square miles.

241. During the year 22 cuts were allowed in different places in the embankments, of which 20 were for drainage and 2 for irrigation purposes. Besides 10 surreptitious cuts were made in the embankments, but the offenders were not detected.

242. The District Board spent during the year Rs. 16,755 on original works, which consisted mostly in improving roads, Rs. 1,348 in making sanitary arrangements in the fairs at Sagur and Hurwa. This amount has since been realised from the proprietors. They also spent Rs. 465 on improving the drainage of some of the culverts on the Grand Trunk Road, Rs. 8,200 in re-excavating tanks at Hurwa and Nowra, Rs. 1,039 in improving the drainage of the Soonti nadi, and Rs. 2,181 on arboriculture.

243. In Nadia the District Board spent Rs. 3,503 on original works, viz., roads and inspection bungalows, Rs. 1,044 on the construction of wells and excavation of tanks, and Rs. 869 on arboriculture.

244. In Murshidabad the District Board spent Rs. 12,935 on original works, viz., roads, buildings, bridges and culverts. An iron bridge across the Jibanti river was completed during the year at a total outlay of Rs. 4,975. A sum of Rs. 727 was spent on constructing two *mar* boats to facilitate communication, Rs. 1,363 on constructing wells and excavating tanks, Rs. 510 on improving and maintaining certain drainage cuts, and Rs. 248 on arboriculture.

245. In Jessore the District Board spent Rs. 923 on petty original works. Rs. 797 on excavating tanks, Rs. 1,330 on arboriculture, and Rs. 2,436 on repairing dák and inspection bungalows. Rupees 9,846 were also spent on repairs to

Government buildings, and Rs. 919 in constructing a dead-house at the Sadar station.

246. In Khulna a building for the office of the Deputy Conservator of Forests, Sunderbun Division, was constructed at a cost of Rs. 10,000. Rupees 2,791 were spent by the Khulna Municipality for the improvement of the town and Rs. 501 by the Satkhira Municipality on completing the excavation of a tank at Palashpole. The District Board spent Rs. 1,250 in sinking wells and excavating tanks and Rs. 2,611 on constructing the third section of the Khulna-Satkhira road and the latter end of the Nehalpur-Gourambhug road, and Rs. 1,298 on constructing iron bridges on the Kaliganj-Debhatta and Satkhira-Pathelghatta roads. The construction of iron bridges over the dead river Jamuna and the Dantbhanga bil was taken in hand during the year, but was not completed.

XXIV.—COMMUNICATIONS.

247. In the 24-Parganas 85$\frac{1}{3}$ miles of the Provincial roads were maintained at a cost of Rs. 66,087. The average expenditure per mile was Rs. 774 against Rs. 1,042 in the previous year. With the exception of some portions of the Calcutta-Jessore and Diamond Harbour roads, the rest of the roads are in very fair order.

248. The maintenance of 141$\frac{1}{2}$ miles of the district metalled and bridged roads cost the Board Rs. 66,786, or Rs. 472 per mile, against Rs. 469 in the previous year. The average expenditure per mile is considered very low for their annual upkeep. The roads have, however, been kept up in passable order throughout the year. A sum of Rs. 15,881 was spent in maintaining 254$\frac{3}{4}$ miles of unmetalled but bridged roads and 59 miles of unmetalled roads with temporary bridges, showing an average expenditure of Rs. 50 per mile against Rs. 40 in the previous year. These roads are under the direct management of the several Local Boards, but are not maintained in a satisfactory condition. There are 992$\frac{1}{2}$ miles of village roads under the several Local Boards, and a sum of Rs. 15,959 was spent for their repairs against Rs. 13,468 in the previous year at an average cost of Rs. 16 per mile.

249. In Nadia there were, as in the previous year, 129·5 miles of metalled roads and 591 miles of unmetalled roads. Besides this, six roads aggregating 38·08 miles in length were under construction during the year, of which one measuring 1·44 mile in length was completed. The total expenditure on the upkeep of the district roads amounted to Rs. 42,170 during the year against Rs. 36,897 of the preceding year. On the metalled roads the expenditure was larger than in the previous year by Rs. 10,355. This is due to the Board's resuming during the year the repairs of the Kristnaganj-Baramesia, Chuadanga-Jhenidah and Chuadanga-Meherpur roads, all of which had been abandoned for many years back. The outlay on repairs of unmetalled roads showed a decrease of Rs. 5,082, and is attributed by the Collector to the fact that in the last winter, when earthwork was in progress on these roads, Mr. Westmacott objected to the work being done during the dry months, as in his opinion the earthwork in connection with the repairs should as a rule be done in the rains.

250. There were 526 miles of village roads under the several Local Boards. The expenditure on these roads amounted to Rs. 2,259 during the year against Rs. 2,850 of the previous year. Mr. Garrett observes:—"The year was a trying one as regards its effect on metalled roads. The rain in the first half was heavy and unseasonable, and it interfered greatly with the repairs of metalled roads. In the latter half an utter absence of rains told very hardly on these roads, increasing the wear and tear of metalling on them. The floods were worse than usual; but they did not do much harm to the roads of the district. Some interest is taken in arboriculture in this district, as 932 trees of different kinds were transplanted on the roads during the year and 1,187 seedlings planted out in five nurseries. Rupees 818-1-3 were spent in all."

251. In Murshidabad there were 543$\frac{1}{2}$ miles of district roads. The expenditure incurred on the maintenance of 24 miles of bridged and metalled roads was Rs. 11,193; that on 213 miles of unmetalled but bridged roads was Rs. 9,573; on 100$\frac{1}{2}$ miles of unmetalled roads with temporary bridges Rs. 4,168; and on 206 miles of low level roads Rs. 6,757. Out of 1,152 miles of village

roads, 551 miles were repaired at a cost of Rs. 9,137 An iron bridge was built across the Jibanti on the Kandi road at a cost of Rs. 4,975. I have seen the metalled road between Berhampore and Jeaganj and have found it in first-rate order.

252. During the year a ferry steamer of Messrs. Hoare, Miller and Company plied for some four or five months between Berhampore and Azimganj. A steamer of the same Company carried on river-borne traffic in passengers and goods between Calcutta and Jeaganj nearly the whole of the year. This steamer went up to Jangipur during some months of the rains. Much inconvenience is at present felt for want of a regular steamer service between Azimganj and Baluchar throughout the whole of the year owing to the shallowness of the river in the hot weather.

253. In Jessore the chief means of land communications are as follows:—

(1) The Bengal Central Railway from Khulna to Calcutta.
(2) The branch line from Bangaon to Ranaghat.
(3) Forty-one miles of the Jessore-Calcutta road (Provincial).
(4) Fifty-five district roads extending over a length of 488 miles.
(5) Numerous village roads under the several Local Boards extending over about 434 miles. To this 13 miles were added during the year.

254. The actual outlay on the Jessore-Calcutta road was Rs. 2,845 on original works and Rs. 13,710 on repairs. Original works on the district and village roads were executed at a cost of Rs. 5,096 and Rs. 2,279 respectively. The total outlay on repairs and maintenance of district and village roads was Rs. 39,102. The Local Boards of Magura and Narail have begun the work of constructing tow-paths along the banks of the Navaganj river. The work is in progress.

255. On the whole, the state of the roads of this district is reported to be good and creditable to the District Engineer. Rupees 1,330 were spent on planting out trees on the sides of different roads.

256. Three steamers plied in this district during the year—one belonging to the Flotilla Company, which ordinarily works between Nawapara and Benodepur and runs up to Magura during the rains, and two belonging to Rai Dhanput Singh Bahadur, one of which plies between Jhinkergatcha and Kotechandpur and the other between Jhinkergatcha and Kapilmoni on the river Kobaduk. Owing to confusion in the affairs of their proprietor the last-mentioned two steamers ceased to work for sometime, but are again working. The Chandpur steamer runs at present to Tarpur only, navigation beyond that place not being feasible owing to the shallowness of the river.

257. Khulna is a river district, and communication is principally carried on by means of the numerous rivers and creeks which are to be found everywhere. At the same time there are about 18 miles of railway, 410 miles of district roads and 562 miles of village roads.

258. District and village roads were repaired at a cost of Rs. 33,309. The average cost per mile of village roads was Rs. 23. This includes repairs and renewals to temporary bridges.

259. There are steamer services between Khulna and Kachua in this district and between Jhinkergatcha and Kapilmoni, the greater part of which is in this district. There are also services between Khulna and Keshubpur and Nawapara and Narail which are of use to some of the people in the district. Most of the traffic is carried on by country boats.

XXV.—WORKING OF THE PURI LODGING-HOUSE ACT.

260. As reported last year, the Puri Lodging-house Act is in force only in the town of Navadwipa, or Old Nadia, and its provisions were not extended to any other town during the year under review.

261. Since the introduction of the Act, the Municipal Commissioners of the town have had the control and management of the funds raised under its provisions; but since the close of the year the formation of a Managing Committee under rule 2 of the model rules under the Lodging-house Act has been sanctioned by Government to assist the District Magistrate in carrying out the working of the Act. During the year under report all arrangements

for the sanitation of the town on the occasion of fairs were made by the Municipality.

262. The rate of fee levied on every lodger for whom accommodation is provided was reduced during the year from 8 annas to 4 annas with a view to induce the big *mohants* to take out licenses, but the object has not yet been attained. They still oppose the working of the Act, and during the last *Dhulat mela* these men and owners of private houses lodged several pilgrims with or without a charge. The Magistrate is, however, trying to break through the opposition.

263. The annexed statement drawn up in the form prescribed in paragraph 2 of Government Circular No. 9M. (Municipal), dated 23rd February 1893, gives a detailed working of the Act during the year 1893-94.

Statement showing the working of the Lodging-house Act during 1893-94.

Serial number.	Name of place where Act is in force.	Licensed lodging-houses.		Prosecutions.						Income.										Expenditure.										
		Number.	Number of lodgers for whom accommodation provided.	Number of cases disposed of.	Number of persons accused.	Number of persons convicted.	Number of persons acquitted.	Amount of fines		Opening balance.	Fees for licensing and regulating lodging-houses.	Fees for issue of Health Officer's certificates.	Other fees (if any).	Fines.	Contributions from other funds.	Miscellaneous.	Total (excluding opening balance).	Total (including opening balance).	Health Officer's pay and allowances.	Head Office expenditure.	Local expenditure.					Contribution to other funds.	Miscellaneous.	Closing balance.	Grand Total.	Deficit.
								Imposed.	Realised.											Establishment.	Contingencies.	Establishment for collection and supervision.	Dispensaries and other medical expenditure.	Conservancy.	Construction.	Repairs.				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32
47 Nadia or Navadwipa.		85	2,100	1	1	...	1	...	...	Rs. A. P. 36 4 0	Rs. A. P. 739 0 0	Rs. A. P. 50 0 0	...	...	...	...	Rs. A. P. 789 0 0	Rs. A. P. 825 4 0	Rs. A. P. 180 9 0	...	...	...	Rs. A. P. 47 1 6	Rs. A. P. 603 14 3	Rs. A. P. 110 5 6	Rs. A. P. 11 14 3	...	Rs. A. P. 277 8 0	...	Rs. A. P. 1,231 5 3	Rs. A. P. 406 0 6

It will be seen that last year 85 houses were licensed against 79, and that they supplied accommodation to 2,100 pilgrims against 1,215 in the previous year. Rupees 739 were realised as fees for the issue of licenses against Rs. 660-8, and Rs. 50 as fees for the Health Officer's certificate against *nil* in the preceding year. The amount of fees would have been greater had local assistance been given as readily as it was given by the Municipal Commissioners before the last general election which came off on the 22nd December last. The new Commissioners have given indication of obstructiveness, which is expected gradually to die out as soon as the new Committee takes up the work in right earnest. From the statement it appears that Rs. 406-0-6 were spent in excess of the receipts. These were evidently met from the Nadia Municipal Fund.

264. On the whole it appears that the successful operation of the Act is still a work of time, and it is doubtful whether the opposition offered by the *mohants* will entirely disappear in the course of a few years.

265. There was only one prosecution under the Act during the year under report, but the accused was acquitted.

XXVI.—EDUCATION.

266. Statement No. XXX showing the state of education in this Division during the year under report is annexed.

267. The following table summarises the statistics of educational institutions of all classes for the past two years:—

Class of Institution.			1892-93.		1893-94.	
			Schools.	Pupils.	Schools.	Pupils.
Public Institutions—						
Secondary	High English	...	78	13,344	77	12,654
	Middle „	...	151	11,212	161	11,708
	„ vernacular	...	217	13,337	223	12,870
Primary	Upper	...	520	20,314	514	19,855
	Lower	...	4,371	123,136	4,089	117,467
Special		...	83	756	75	609
Female		...	361	9,024	396	10,089
Total Public Institutions			5,781	191,123	5,535	185,252

Class of Institution.	1892-93.		1893-94.	
	Schools.	Pupils.	Schools.	Pupils.
Private Institutions—				
1. Advanced teaching—				
(*a*) Arabic or Persian ...	5	141	2	25
(*b*) Sanskrit ...	72	749	69	700
2. Elementary teaching—				
(*a*) Vernacular only or mainly ...	17	134	17	166
3. Teaching the Koran only ...	5	96	2	21
4. Other schools not conforming to the departmental rules ...				
Total Private Institutions	99	1,120	90	912
Grand Total	5,880	192,243	5,625	186,161

Taking the Division as a whole, the results of the year are not favourable. There was a net decrease of 255 schools with 6,079 pupils. The decrease in the number of pupils has occurred in all classes of institutions, both public and private, except middle English and female schools and elementary vernacular. Middle vernaculars, though they show a decrease in pupils, have increased in the number of schools which is hardly a source of congratulation. The lower primary schools alone fell off by 282 with 5,669 pupils, owing generally to agricultural distress, aggravated by cholera and fever. Upper primary decreased by six schools with 459 pupils. Middle English and female schools gained by 10 and 35 with 496 and 1,065 pupils respectively.

268. The Division comprises an area of 12,052 square miles with a population of 7,853,566 souls, of whom 3,956,405 are males and 3,897,161 females. The number of schools during the year being 5,625, there was on the average one school for every 2·1 square miles. Reckoned at the conventional rate of 15 per cent., the number of male children of a school-going age would be 593,460, and the number of female children 584,574. The number of pupils actually at school was 172,169 males and 13,995 females, or 29·01 and 2·3 per cent. respectively of all boys and girls of a school-going age. It appears that Jessore shows the lowest percentage, viz. 19·9, in the proportion of the boys actually at school to boys of a school-going age, while the 24-Parganas shows the highest, viz. 43·8.

269. The following table compares the expenditure on education during the past two years:—

Heads of charges.	1892-93.					1893-94.				
	From public sources.			From private sources.	Total expenditure.	From public sources.			From private sources.	Total expenditure.
	Provincial revenues.	District funds.	Municipal funds.			Provincial revenues.	District funds.	Municipal funds.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Secondary education	70,882	44,046	4,761	3,50,402	4,70,091	70,386	44,381	3,402	3,55,250	4,73,419
Primary ditto	15,901	65,962	4,936	2,57,436	3,44,235	13,663	61,206	8,371	2,18,538	3,01,778
Female ditto	11,709	3,862	2,250	32,118	49,939	11,652	4,331	1,895	38,346	56,204
Special ditto	21,506	...	510	16,299	38,315	23,456	..	360	17,186	41,002
Scholarships	10,142	2,341	...	144	12,626	9,481	2,538	...	284	12,303
Buildings ...	2,085	630	254	1,079	4,048	3,641	797	210	784	5,432
Furniture and apparatus	1,930	939	40	...	2,909	272	685	120	63	1,140
Miscellaneous	7,615	8,608	798	6,464	22,895	10,848	6,370	710	9,989	27,917
Superintendence	37,160	28,755	...	...	65,915	34,052	30,434	...	...	64,486
Total ...	1,78,960	1,54,563	13,549	6,64,541	10,11,603	1,77,431	1,50,742	15,068	6,40,440	9,83,681

The total expenditure from all sources except municipal funds decreased by Rs. 27,922, viz., from Provincial revenues by Rs. 1,529, from district funds by Rs. 3,811, and from private sources by Rs. 24,101. The expenditure from municipal funds increased by Rs. 1,519. The decrease from Provincial revenues is due to the policy of the gradual withdrawal of State aid from secondary and primary education and of throwing upon the people and the municipalities those responsibilities. The municipalities have contributed more largely their shares towards primary education, though not to the extent wished for. During the year under review they raised their contribution towards primary education from Rs. 4,936 to Rs 8,571. The District Boards had to curtail their expenditure owing to the inadequacy of funds. The diminution in private contributions is the largest, and is attributed mainly to agricultural distress.

270. The subjoined table compares the schools of different classes under the control of the District Boards during the past two years:—

District.	Schools.													
	1892-93.							1893-94.						
	Aided.	Middle vernacular.		Aided primary.		Aided girls'.	Total.	Aided.	Middle vernacular.		Aided primary.		Aided primary.	Total.
	Middle English.	Managed by District Board.	Aided by District Board.	Upper.	Lower.			Middle English.	Managed by District Board.	Aided by District Board.	Upper.	Lower.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
24-Parganas	16	3	32	76	708	14	939	16	3	32	65	889	14	1,019
Nadia	31	3	13	59	437	39	582	30	3	12	59	376	52	532
Murshidabad... ...	13	...	11	47	485	7	563	15	...	13	47	471	9	555
Jessore	19	3	29	103	601	83	838	21	3	28	105	541	84	782
Khulna	15	2	33	79	1,121	18	1,268	18	2	31	82	767	28	928
Total ...	94	11	118	364	3,442	161	4,190	100	11	116	358	3,044	187	3,816

271. The total number of schools under the control of the District Boards fell off by 374. The decrease is shared by all districts, except the 24-Parganas, where there was an increase of 80. Aided middle English schools increased by 6 and girls' schools by 26, while aided middle vernacular schools fell off by 2. The increase in girls' schools was shared by all districts, except the 24-Parganas, where the number remained unchanged. The middle English and middle vernacular schools remained stationary in the 24-Parganas, increased in Murshidabad and decreased in Nadia, while the former increased in Jessore and Khulna and the latter decreased. The upper and lower primary schools decreased by 6 and 398 respectively. The loss in the first-named occurred in the 24-Parganas, while that in the latter was shared by all districts, except the 24-Parganas, the largest decrease (viz. 354) having occurred in the district of Khulna. The decrease in upper primary schools is said to be due to the District Board changing the rules in regard to rewarding these schools, while that in lower primary schools in Khulna is attributed to the scarcity of the last year which, though it did not affect the schools of the higher and middle schools, seriously affected the schools used by the children of the poorer classes.

272. The following table compares the number of pupils in all classes of institutions district by district:—

District.	Number of pupils—															
	1892-93.								1893-94.							
	In public institutions.				In private institutions.			Grand Total.	In public institutions.				In private institutions.			Grand total.
	Secondary schools.	Primary schools.	Special schools.	Total.	Advanced.	Elementary.	Total.		Secondary schools.	Primary schools.	Special schools.	Total.	Advanced.	Elementary.	Total.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
24-Parganas	12,570	54,911	250	67,731	268	139	407	68,138	12,238	57,713	171	70,122	229	55	284	70,406
Nadia	8,164	20,713	123	29,000	267	...	267	29,267	7,868	19,168	97	27,133	262	...	262	27,395
Murshidabad ...	5,200	17,308	129	22,637	216	...	216	22,853	4,996	18,232	117	23,345	67	...	67	23,412
Jessore	6,467	27,527	106	34,100	70	91	161	34,261	6,168	23,991	94	30,253	87	132	219	30,472
Khulna	5,492	32,015	148	37,655	69	...	69	37,724	6,169	28,160	130	34,399	80	...	80	34,479
Total ...	37,893	152,474	756	191,123	890	230	1,120	192,243	37,369	147,284	609	185,252	725	187	912	186,164

It will be seen that there was a general decline in the number of pupils attending institutions of every description. In public institutions the number of pupils in secondary schools decreased in all districts, except Khulna, where

there were 617 more. There was also a decrease in the number of in primary schools in all districts, except the 24-Parganas and Murshidabad, where they increased by 2,802 and 924 respectively. The pupils in special schools decreased in all districts. In private institutions the number of pupils in advanced teaching declined in all districts, except Jessore and Khulna. The pupils in elementary teaching diminished in the 24-Parganas, but increased in Jessore.

273. The following table compares the results of the Entrance examination in this Division for the past two years :—

1893.				1894.			
Number of competing schools.	Number of successful schools.	Number of candidates.	Number of passed candidates.	Number of competing schools.	Number of successful schools.	Number of candidates.	Number of passed candidates.
1	2	3	4	5	6	7	8
76	73	660	450	76	69	635	301(*a*)

(*a*) Excluding three private candidates.

The percentage of success has gone down from 68·2 to 47·2. This is said to be in keeping with the general failure at the last examination, as only 41 per cent. of the candidates passed against 68 per cent. in the previous year. Of the 301 passed candidates 294 were Hindus, 6 Muhammadans, and 1 Christian.

274. No information has been given regarding the Krishnagar College in Nadia and Berhampore College in Murshidabad. In Jessore the Narail Victoria College had on the 31st March 1894 a roll number of 73 pupils, of whom 66 were in the second-year class and 7 in the fourth-year class. In the last B.A. and F.A. examinations 3 and 11 candidates respectively passed from this College. There are arrangements for foot-ball, cricket and indigenous games for boys in this College. The zila school at Khulna is in a satisfactory state. It had on the 31st March 1894 a roll number of 201 pupils.

275. The results of the Middle English and Middle Vernacular Scholarship examinations are given in the following table :—

Class of schools.	Number of competing schools.	Number of successful schools.	Number of candidates.	Number passed with—	
				Middle English certificate.	Middle Vernacular cetificate.
Middle English schools ...	115	100	404	184	45
Middle Vernacular schools	161	124	492	20	243
Total	276	224	896	204	288

The percentage of success in Middle English and Middle Vernacular Scholarship examinations declined from 80·9 and 68·2 to 56·5 and 53·4 respectively. This heavy decline is said to be mainly due to the extreme unhealthiness of the season, especially about the time when the examination was conducted.

276. The following table exhibits the comparative statistics of primary schools for the past two years :—

Primary education.

	1892-93.		1893-94.	
	Schools.	Pupils.	Schools.	Pupils.
Upper primary schools for boys—				
Aided by Government or by District or Municipal Boards	498	19,523	493	19,081
Unaided	22	791	21	774
Total ...	520	20,314	514	19,855

	1892-93.		1893-94.	
	Schools.	Pupils.	Schools.	Pupils.
Lower primary schools for boys—				
Aided by Government or by District or Municipal Boards	3,789	109,216	3,407	100,635
Unaided	582	13,920	682	16,832
Total ...	4,371	123,136	4,089	117,467
GRAND TOTAL ...	4,891	143,450	4,603	137,322

Primary schools, both aided and unaided, show a diminution of 6 schools with 459 pupils. The aided lower primaries also show a decrease of 382 schools with 8,581 pupils. The unaided lower primaries, however, gained by 100 schools with 2,912 pupils, principally in Khulna. The net loss is therefore 288 schools with 6,128 pupils, and is shared by all the districts, except the 24-Parganas and Murshidabad. In addition to the general causes already explained at the outset of this section, the loss is attributed in Nadia to the fixing of Rs. 5 as the minimum amount of reward payable to a *guru* which caused the weak schools to disappear, and to the insufficient allotment made by the District Board in Khulna, to the abolition of the chief *guru* system, and to the want of local knowledge on the part of the Board Sub-Inspectors, who joined their posts only two months before the close of the year, and in Jessore to the apathy of the people, especially the lower class Muhammadans, who preponderate in this district and who are averse to sending their children to schools for instruction. This last reason is not always brought to notice, but it is one which seems to have considerable force.

277. The following table shows the comparative statistics of attendance in, and expenditure on, primary schools for the past two years :—

	1892-93.							1893-94.						
	Number of schools on the 31st March.	Number of pupils on the rolls on the 31st March.	Expenditure—					Number of schools on the 31st March.	Number of pupils on the rolls on the 31st March.	Expenditure—				
			From public funds.			From private sources.	Total.			From public funds.			From private sources.	Total.
			Provincial revenues.	District funds.	Municipal funds.					Provincial revenues.	District funds.	Municipal funds.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

The total expenditure on primary education from all sources except municipal funds decreased by Rs. 42,457, viz., from Provincial revenues by Rs. 2,238, from district funds by Rs. 4,756, and from private sources by Rs. 38,898, of which Rs. 29,294 decreased in Khulna alone owing to agricultural distress. The expenditure from municipal funds increased by Rs. 3,435. The decrease in the district fund expenditure is partly due to the exclusion of the amount of uncashed cheques.

278. The following table shows, district by district, the allotment made for primary education during the year under report and the expenditure incurred therefrom :—

District.	Allotment—			Expenditure—			Schools of different classes aided from primary funds.			Pupils attending schools.			Cost per school in rupees.	Cost per pupil in annas.
	For non-Board schools.	For Board schools.	Total.	On non-Board schools.	On Board schools.	Total.	Non-Board.	Board.	Total.	Non-Board.	Board.	Total.

Total for 1892-93	10,810	78,767	89,577	9,047	69,656	78,703	336	3,957	4,293	12,084	113,770	125,854	19	10

[*This table excludes the municipal area.*]

The expenditure both on non-Board and Board schools fell short of the allotments in all the districts of the Division by Rs. 1,894 and Rs. 15,761 respectively. The average cost per school in the Division increased from Rs. 19 in the previous year to Rs. 19-8, and per pupil from annas 10 to annas 10-7 in the year under review. The average cost per school rose in all the districts, except the 24-Parganas, where it diminished by 3·5 without loss of efficiency. The average cost per pupil shows a decrease in the 24-Parganas and an increase in all other districts.

279. The following table compares the results of the upper and lower primary scholarship examinations for boys during the past two years :—

District.		Number of schools on 31st March.		Number of competing schools.		Number of candidates.		Number passed.		Scholarship gained.		Remarks.
		1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	
1			3	4	5	6	7	8	9	10	11	12
24-Parganas ...	Upper	173	169	82	54	173	148	111	106	6	6	
	Lower	1,318	1,382	633	550	1,848	1,665	289	329	8	...	
Nadia	Upper	73	78	51	52	98	186	46	61	4	4	
	Lower	590	552	197	199	524	456	274	178	9	...	
Murshidabad ...	Upper	50	50	38	33	98	89	65	55	3	3	
	Lower	537	544	217	186	654	535*	204	190	8	...	* Excluding one girl from a boys' school.
Jessore	Upper	125	120	72	57	148	155	94	88	5	5	
	Lower	751	655	172	134	461	356	238	129	12	...	
Khulna	Upper	99	97	54	52	127	110	60	74	4	4	
	Lower	1,175	956	83	125	233	354	64	67	12	...	
Total ...	Upper	520	514	297	248	644	608	376	384	22	22	
	Lower	4,371	4,089	1,302	1,194	3,720	3,366	1,069	893	89	...	

The number of competing upper primary schools fell off by 49, but it is satisfactory to note that the percentage of success has risen from 58·3 to 63·1. Eight middle schools sent up 22 candidates to this examination, of whom 15 came out successful. These passes have not been included in the above statement. The number of competing lower primary schools decreased by 108. Comparing the results of the lower primary scholarship examination, it appears that the percentage of success in the 24-Parganas was 19·7, in Nadia 39·03, in Murshidabad 35·7, in Jessore 36·2, and in Khulna 18·9.

280. The following table compares the statistics of native girls' schools for the past two years :—

Girls' Schools.	1892-93.		1893-94.	
	Schools.	Pupils.	Schools.	Pupils.
Aided by Government or by District or Municipal Boards ...	294	7,760	321	8,570
Unaided	67	1,264		1,519
Total ...	361	9,024(*a*)	396	10,089(*b*)
Girls in boys' schools ...	...	4,096	...	4,061
Grand Total		13,120(*a*)	...	14,150(*b*)

(*a*) Includes 136 boys in girls' schools.
(*b*) Includes 279 boys in girls' schools.

The total number of girls' schools increased by 35, and the pupils by 1,065, inclusive of an increase of 143 boys in girls' schools. The number of girls reading in boys' schools of all classes fell off by 35.

281. The following statement compares the results of the upper and lower primary scholarship examinations for girls :—

District.		1892-93.		1893-94.	
		Number passed.	Scholarships gained.	Number passed.	Scholarships gained.
1		2	3	4	5
24-Parganas ...	Upper ...	2	...	1	...
	Lower ...	9	3	9	1
Nadia ...	Upper ...	...	...	2	...
	Lower ...	14	3	15	4

	Lower ...	13	1	17	...
Jessore ...	Upper ...	...	..	1	...
	Lower ...	1	...	...	...
Khulna ...	Upper ...	2	...	...	...
	Lower ...	13	4	15	4
Total ...	Upper ...	4	...	4	...
	Lower ...	50	11	56	9

The number of passes in the upper primary scholarship examination remained the same as in the preceding year, while the number of passes in the

lower primary scholarship examination remained unchanged in the 24-Parganas and increased in the other districts, except Jessore, from which not a single girl passed, the total number increasing by 6; but the number of girls who won scholarships declined from 11 to 9.

282. The following table gives the number of Muhammadan pupils and their percentage to the total number of pupils in the different classes of schools for the past two years:—

Class of Schools.	1892-93.			1893-94.		
	Total number of pupils.	Number of Muhammadan pupils.	Percentage of Muhammadan pupils on total number of pupils.	Total number of pupils.	Number of Muhammadan pupils.	Percentage of Muhammadan pupils to total number of pupils.
1	2	3	4	5	6	7

Private Institutions.						
Advanced	890	141	15·8	725	25	3·4
Elementary	134	35	26·1	166	87	52·4
Koran schools	96	96	100	21	21	100
Other „	...	...	...	...	...	...
Total ...	1,120	272	24·2	912	133	14·5
Grand Total ...	192,243	54,857	28·5	186,164	49,843	26·7

The number of Muhammadan pupils decreased by 5,014, or by 1·8 per cent. The decrease was in public as well as private institutions. With the exception of middle English and upper primary schools, Muhammadan pupils decreased in all the public institutions, the largest diminution, viz. 4,810 pupils, taking place in the lower primary schools for reasons already explained under the head of primary education. The Muhammadan pupils fell off in the advanced private institutions and the Koran schools, but increased sliglitly in the elementary schools.

283. The following table shows the share which the Muhammadan candidates took at the various departmental examinations :—

District.	1892-93.			1893-94.		
	Middle scholarship examination.	Upper primary.	Lower primary.	Middle scholarship examination.	Upper primary.	Lower primary.
1	2	3	4	5	6	7
24-Parganas	9	10	55	12	15	61
Nadia	7	5	81	3	7	60
Murshidabad	15	12	68	8	19	68
Jessore	17	20	86	11	14	38
Khulna	16	9	28	5	13	15
Total ...	64	56	318	39	68	242

There is a decrease in the middle and lower primary scholarship examination certificates gained by Muhammadan students, but the number of passes at the upper primary scholarship examination shows some increase. The largest decrease in the number of passes at the middle scholarship examination occurred in Khulna, and in those at the lower primary scholarship examination in Jessore. One Muhammadan candidate stood first in the Murshidabad district at the middle vernacular scholarship examination, and obtained a Government as well as the Mosley scholarship. Another Muhammadan candidate obtained a middle vernacular scholarship from Jessore and another from Khulna. An upper primary scholarship was obtained by a Muhammadan pupil from each of the districts of the 24-Parganas, Nadia, and Khulna.

284. At the last University Entrance examination two Muhammadan students passed from the 24-Parganas and one from each of the other districts.

285. Of indigenous education, the most important is the advanced teaching in Sanskrit which is carried on in *tols*. The number of *tols* and pupils during the year was as follows :—

District.	Tols.	Pupils.
24-Parganas	21	229
Nadia	33	262
Murshidabad	3	67
Jessore	9	62
Khulna	3	80
Total	69	700

286. The most important *tols* are the following :—

(1) The *Mulajore tol* in the 24-Parganas maintained from the proceeds of an endowment made by the late Babu Prossonno Kumar Tagore, C.S.I., of Calcutta.

(2) The *Navadwipa tols*. The maintenance allowance, amounting to Rs. 2,400, was paid to the pupils in the *Nyaya* and *Smriti tols* only.

(3) The *Victoria Jubilee tol* at Berhampore founded by Srimati Arnakali Devi of Kassimbazar.

287. In the preceding year five advanced schools for teaching Arabic or Persian with 141 pupils were returned from Murshidabad alone. During the year under review two such schools with 25 pupils have been returned from

Jessore only. As in the previous year there was one Koran school with seven pupils in the 24-Parganas and another such school with 14 pupils in Jessore.

288. The relations between the District Board and the Education Department continued satisfactory during the year.

XXVII.—DISPENSARIES.

289. Statement No. XXXI annexed to this report shows the working of the several dispensaries in the Division. Their number was 49 against 46 in the previous year. The increase is due to the opening of a dispensary at Chitpur in the 24-Parganas, the Arnakali Zenana Hospital at Berhampore in Murshidabad, and to the placing of the dispensary at Chuadanga in Nadia under Government supervision.

290. In the 24-Parganas there were 21 dispensaries, of which 7 receive both in-door and out-door patients, and the others out-door patients only. Of the former, the Sagore Dutt Hospital at Kamarhati, which is under the management of the Administrator-General, is the most flourishing, and at that and Kandi (Murshidabad) alone, do the out-door patients exceed 100 a day. Next in importance are the Cossipore and Russa dispensaries, which are well provided with funds and are very popular. The Barisa and Barasat dispensaries have been considerably improved during the year. The Diamond Harbour dispensary has been provided with a new building. Among the out-door dispensaries the best are at Chetla, Naihati, and Halisahar. These are all located in good buildings and are well provided with the necessary equipments. The Chetla dispensary has proved to be very popular and has obtained an annual grant-in-aid of Rs. 500 from the Calcutta Corporation. The total number of in-door and out-door patients treated at all the dispensaries during the year was 2,013 and 98,695 against 2,031 and 84,778 respectively in the previous year. There was a great increase in the attendance at most dispensaries probably due to the unusual prevalence of malarious fever. The total expenditure incurred in maintaining the dispensaries was Rs. 35,786, the greater part of which was met from private subscriptions and endowments. The small amount of aid given by the District Board of this district is noticeable.

291. The following statement shows the working of the Lunatic Asylums at Dullunda and Bhawanipur, the Campbell Hospital at Sealdah and the Police Case Hospital at Alipore:—

Name of Institution.	Average number of patients daily aided.		Cost incurred by Government.	
	1892.	1893.	1892.	1893.
1	2	3	4	5
			Rs.	Rs.
Bhowanipur Lunatic Asylum	37	37	20,359	20,474
Dullunda ditto ...	257	247	28,808	26,770
Campbell Hospital ...	462	685	46,907	53,402
Alipore Police Hospital ...	27·46	...	1,460	...

The Calcutta Municipality continues to subscribe Rs. 30,000 annually towards the expenses of the Campbell Hospital. There was a marked increase in the number of patients during the year.

292. In Nadia there were nine dispensaries under Government supervision during the year. That at Krishnagar is in charge of a first grade Assistant Surgeon, while those at Ranaghat, Meherpur, and Kushtia are under the Civil Hospital Assistants attached to the respective subdivisions. The dispensary at Santipur is under the charge of a Licentiate of Medicine and Surgery, and

those at Ula, Chakdaha, Kumarkhali, and Chuadanga are under local native doctors. The dispensaries at Krishnagar, Ranaghat, Meherpur, and Kushtia receive both in-door and out-door patients, while the rest treat out-door patients only. The number of patients, both in-door and out-door, treated at all the dispensaries was greater than that of the previous year in all dispensaries, the totals being 508 and 38,998 against 456 and 26,775 respectively. The total expenditure incurred in maintaining the dispensaries was Rs. 10,239, of which the greater part was borne by the local municipalities. The amount of private subscription is very small.

293. There are two other dispensaries in the Meherpur subdivision—one at Shikarpur and the other at Natudaho. The former is maintained by the Church Missionary Society, and the latter by Babu Nafar Chunder Pal Chaudhri, a local zamindar. These two dispensaries gave relief to a large number of patients who needed it owing to the prevalence of malarious fever and cholera.

294. In Murshidabad there were eight dispensaries, six of which receive both in-door and out-door patients and two out-door patients only. The total number of in-door and out-door patients treated at the dispensaries was 1,212 and 51,143 against 1,134 and 47,985 respectively in the previous year. There was a great increase in attendance at all the dispensaries, except at Murshidabad, where it fell off slightly. The total expenditure incurred in maintaining the dispensaries was Rs. 23,189, the greater part of which was met from private subscriptions and endowments. The opening of the Arnakali Zenana Hospital at Berhampore, which is set apart exclusively for the treatment of native females, has greatly benefited the female population of the town of Berhampore. There is accommodation for six in-door patients, and it is to be hoped that ladies of a superior class will now avail themselves of the opportunities offered them.

295. In Jessore there were six dispensaries, of which those at Jessore and Magura receive both in-door and out-door patients. The total number of in-door and out-door patients treated at all the dispensaries during the year was 242 and 28,315 against 235 and 18,577 in the previous year. There was an increase in the attendance at all dispensaries, which indicates increased popularity. The total expenditure incurred in maintaining the dispensaries was Rs. 7,137, of which the greater part was borne by the local municipalities and the District Board. A grant of Rs. 25 a month has been made by the District Board for the entertainment of a female civil hospital assistant, and Rs. 300 as contribution towards the construction of a female ward to the Jessore dispensary.

296. Besides the above, a new dispensary has been opened since the close of the year at Bangaon with the aid of the District Board, supplemented by local subscriptions. Another new dispensary is to be opened shortly at Nahatta by the Raja of Naldanga with the aid of a grant from the District Board. The District Boards of Jessore and Khulna have shown themselves the most liberal towards this important subject. Land has also been acquired by the Jessore Municipality for a contagious diseases hospital.

297. In Khulna there are five dispensaries, of which those at the Sadar and Satkhira receive both in-door and out-door patients only. The total number of in-door and out-door patients treated at the dispensaries was 117 and 16,732 against 131 and 16,507 in the previous year. The attendance increased at Khulna and Satkhira and decreased in the other dispensaries. The attendance in all the dispensaries was very small. This requires the attention of the local authorities. The total cost of maintaining the dispensaries was Rs. 3,985, of which the greater part was borne by the local municipalities and the District Board.

298. Besides the above there are two dispensaries maintained by private gentlemen—one at Morrelganj by Maharaja Durga Charan Law, and the other at Shamnagar by Rai Hari Churn Chowdry, a local zamindar. A dispensary is also maintained at Sripur in the Debhatta Municipality by the Hita Sadhini Sabha of that place.

XXVIII.—LIBRARIES.

299. The district and the subdivisional office libraries are reported to have been kept in good condition and order during the year under report. Besides the "Rivers Thompson Library" at Ranaghat, another library has been

opened there by certain ex-students of the local school. Both of these libraries are mostly used by the students. There has not been much improvement in the status of the Jessore Public Library during the year under report. It appears that there was an income of about Rs. 319, of which Rs. 242 were raised from subscriptions; but as the payment of dues on account of repairs executed in the previous year and cost of establishment, including their arrear pay, swallowed up more than half the income, not more than Rs. 9 could be spent on the purchase of books. It is said that the subscribers appear to value the library chiefly for the daily newspapers, which are taken in and circulated among them, and that the books of the library are not much read. As only Rs. 5 a month can be spared for a clerk, the library is open for only a very limited time during the day. There are public libraries at Satkhira, Sripur, Tengra, Bhawanipur, Senhati, and Mulghar, in the district of Khulna. The Satkhira library is said to be not in a good state. The Town Hall and public library buildings at Khulna are reported to be in good condition, but no improvement has been made to them since the close of the year 1892-93.

XXIX.—MUSEUMS.

300. As reported in previous years, there are no museums in any of the districts of this Division.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

District and Local Boards.

301. The administration of the District and Local Boards under the provisions of the Bengal Local Self-Government Act III of 1885 has now been carried on in this Division for eight years.

302. In the 24-Parganas the District Board is composed of 25 members, including the Chairman, of whom 12 were elected. It held 13 meetings during the year against 12 in the previous year. The average percentage of attendance at each meeting was 46·8 per cent. of the members against 52 in the previous year. The reason for the decrease has not been given. Besides the general meetings of the Board, the Education Sub-Committee and the Finance Committee met several times during the year.

303. The number of Local Boards in the district was reduced from 6 to 4 during the year owing to the abolition of the Barrackpore and Dum-Dum subdivisions. This change had the effect of reducing the number of members from 59 to 51. All the Local Boards had non-official Chairmen. The following table shows the number of meetings held by the Local Boards and the average attendance of members at each meeting during the year:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Alipore	13	6·6
Diamond Harbour ...	13	7·2
Barasat	13	6·9
Basirhat	4	5·2

The small number of meetings held by the Basirhat Local Board was, it is said, due to the small amount of work which it had to do, but it is difficult to understand why its monthly accounts and other petty matters were not put up before it more regularly. If it had charge of primary education more work might be found for its members.

304. The Local Boards continued to be in charge of the village and district unmetalled roads and cattle-pounds.

305. On rural sanitation and water-supply the District Board spent Rs. 1,860 during the year. Of this Rs. 1,040 (of which Rs. 400 were contributed by the Barasat Municipality) represents the cost of clearing jungle and removing obstructions in the bed of the *Soonti* in the Barasat subdivision. Both the District Board and the Barasat Municipality are trying their best to remove the obstructions to the water-courses of this stream. It also expended Rs. 1,348 on sanitary and conservancy arrangements in connection with the fairs held at Saugor Island in the Diamond Harbour subdivision and at Harwa in the Basirhat subdivision.

306. In Nadia the District Board consists of 21 members, including the Chairman, 10 of whom are elected. It held 14 meetings during the year against 13 in the previous year, the average attendance being 12·07 against 10·92 in the previous year.

307. As in the previous year, there were four Local Boards in the district, three of which were presided over by non-official Chairmen. The following table shows the average attendance of the members and the number of meetings held by the Local Boards during the year:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Kushtia	7	4·4
Sadar	9	4·8
Meherpur	11	4·5
Ranaghat	6	6

The number of meetings held has decreased in every case, except at Meherpur, and in no place was sufficient. The average attendance of members in all the Local Boards, except the Sadar, shews a slight improvement, but it is still very bad.

308. The District Board of Murshidabad, which was reconstituted in the beginning of the year under report, consists of 21 members, including the Chairman, of whom 10 were elected. It held 12 meetings during the year against 18 in the previous year. Two of these were, however, adjourned meetings, the average attendance being 8·41 against 7 in the previous year.

309. The Local Boards were also reconstituted during the year. The subjoined table shows the number of meetings held by them and the average attendance of members at each meeting during the year:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Sadar	13	5·5
Kandi	12	5 1
Jangipur	19	7·6

310. In Jessore the District Board consists of 25 members, including the Chairman, of whom 12 are elected. It held 21 meetings against 16 in the previous year, the average attendance being 12·2 against 10·37 in the previous year. This is satisfactory.

311. The subjoined table shows the number of meetings held by the Local Boards during the year and the average attendance of the members at each meeting:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Sadar	14	6·4
Narail	12	4·4
Jhenidah	7	6
Magura	8	3·7
Bangaon	10	7·5

The attendance at Magura was very bad and indifferent at Narail; at Jhenidah and Bangaon there was a marked improvement. The matters placed under the management and control of the Local Boards were almost the same as in the previous year, viz., pounds, ferries, dispensaries, village roads, and education. The management of the middle schools was, however, very properly transferred to the District Board, as the Local Boards could not give satisfaction in regard to the punctual despatch of business and in their dealings with the secretaries of schools.

312. The District Board of Khulna, which consists of 17 members, including the Chairman, held 14 meetings during the year against 15 in the previous year. The average attendance at each meeting was 11·4 against 8·46.

313. The following statement shows the number of meetings held and t average attendance at each meeting of the Local Boards during the year :—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Sadar	12	6·5
Bagerhat	5	6
Satkhira	11	6·5

Although the number of meetings held at the Sadar and Satkhira Local Boards has improved, the attendance has fallen off. The Bagerhat Local Board shows no sign of improvement in either.

314. The following is a summary of the views of the District Officers on the working of the District and Local Boards.

315. 24-*Parganas.*—The working of the District and Local Boards was on the whole satisfactory. The members of the District Board evinced much interest in the disposal of the several matters placed before them for consideration. The Finance Committee met several times during the year and did much useful work.

316. *Nadia.*—The working of the Local Boards was not satisfactory. The non-official executive officers of the Board did not seem to be as zealous and energetic as they should have been. The members of the District Board generally took interest in their work.

317. *Murshidabad.*—The working of the Local Self-Government Act was fairly satisfactory; but it is much to be desired that the members of both District and Local Boards should take more interest in the actual out-of-doors work carried on under the Boards.

318. *Jessore.*—The District Board worked smoothly and the attendance of members was fairly good. It was, however, difficult to get together the Finance Committee for the purpose of auditing accounts, which consequently fell into arrears. The work of the Education Committee was attended to with more zeal. The brunt of the work still falls on the Chairman and Vice-Chairman. The Local Boards generally have not proved as successful in the management of pounds and ferries as was expected, but the Vice-Chairman of the Bangaon Local Board, Babu Ganga Churn Chatterji, deserves special mention for his creditable management of the pounds and ferries under that Board. As the members of these Boards are drawn from the neighbourhood and are supposed to know its circumstances better than any one else, it was thought that they would be able to settle the pounds and ferries advantageously with suitable persons and to collect the rents more easily and fully; but this has not been the case.

319. *Khulna.*—The District Board works well. The attendance is comparatively large, and members take an interest in the business. The Khulna Local Board is fairly well managed, but this cannot be said with regard to the other Local Boards. All the Local Boards have failed in collecting pound and ferry rents punctually.

320. The results generally seem to be much the same as in other parts of the Province, namely, that while the District Board works well and members take interest in their work, the Local Boards are as a rule distinguished for general apathy. The reason generally assigned, and with a fair amount of truth, is that as a rule the work is insufficient and of an uninteresting nature; but until it is seen that they carry out efficiently the work made over to them, the District Board exercise a wise discretion in declining to increase their powers.

321. One of the main difficulties of the Local Board question lies with regard to the Chairman. The Subdivisional Officer ordinarily ought to be the Chairman, as he alone probably knows the wants of the whole subdivision and can weigh the respective claims of its different parts; but apart from the natural desire of Government to encourage as far as possible local self-government by appointing a non-official Chairman, and the fact that there is a certain amount of jealousy, especially in the neighbourhood of Calcutta, by non-official members, the frequent changes among the Subdivisional Officers render their appointment as Chairman often impossible. As far as the people generally go, local self-government is, and is likely to be for some time, an absolute impossibility.

Municipalities.

322. The number of municipalities in this Division was 37 at the end of the year as at the close of the preceding year. It has been decided, however, on the representation of the mill-owners at Titaghur, to separate the Titaghur ward of the South Barrackpore Municipality in the 24-Parganas and to form a new municipality out of it.

323. The fourth general election took place in the latter part of the year, viz. on the 21st and 22nd December 1893. Except in the districts of Jessore and Khulna, great excitement over the elections prevailed, and a keen canvass and hard contests took place between the candidates in most of the municipalities. The legality of the proceedings of the presiding officers in the elections in the South Suburban Municipality in the district of the 24-Parganas, and in the Berhampore Municipality in the district of Murshidabad, was questioned by the rate-payers and defeated candidates in those municipalities, but the present election rules being defective, inasmuch as they do not give any power to the controlling authorities to interfere in these matters, nothing could be done.

324. The important privilege of nominating a member of the Bengal Legislative Council had been granted to the 22 municipalities of this Division which had an income of not less than Rs. 5,000 a year, and on the 15th May 1893 a meeting of the delegates sent by the municipalities was held in my office, at which they acquitted themselves well by unanimously electing Mr. Lal Mohan Ghose, a Barrister-at-Law, as their representative, to be recommended as a member of the Council of His Honour the Lieutenant-Governor for the purpose of making laws and regulations.

325. The following statement shows the income and expenditure of the municipalities, district by district, during the year under report compared with that of the previous year:—

District.	Income.		Expenditure.		Remarks.
	1892-93.	1893-94.	1892-93.	1893-94.	
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
24-Parganas	4,68,618	4,76,279	3,74,132	3,46,305	The figures for 1892-93 as given in the last year's report do not tally with those now given, as the figures were calculated on different principles. This year the figures have been made to tally with the Municipal Administration Report.
Nadia	90,216	94,190	82,299	85,678	
Murshidabad	96,146	96,614	84,187	85,135	
Jessore	25,971	29,035	24,217	26,175	
Khulna	33,822	46,402	32,301	22,478	
Total ...	7,14,773	7,42,520	5,97,136	5,65,771	
Increase	...	27,747	...	...	
Decrease ...	...	...	...	31,365	

The above figures show an increase of Rs. 27,747 in the income of the municipalities which is shared by all the districts of this Division. No explanation of the increase in the district of the 24-Parganas has been given, but I observe that it occurred principally in Cossipore-Chitpore, Maniktala and the South Suburban Municipalities. South Barrackpore showed a marked decrease. In Nadia it is attributed to the collection of the arrear taxes and to the realisation of latrine fees in the municipalities of Krishnagar and Kumarkhali, where in some of the wards Part IX of the Municipal Act was newly extended. The increase in Murshidabad is only nominal. In Jessore it is due to better collection, and to that made in the last month of 1892-93 having been credited to the account of the year under review. The increase in Khulna is owing to Rs. 25,000 of the special Government grant of Rs. 50,000 being credited in the year under report against Rs. 9,000 in the previous year. As regards expenditure there is a decrease of Rs. 31,365 in spite of an increase in the districts of Nadia, Murshidabad, and Jessore. In the 24-Parganas the decrease occurred mainly in the Cossipore-Chitpore Municipality, in which all available

funds are being kept to provide for the supply of filtered water by the Calcutta Corporation. Maniktala on the contrary showed a marked increase. In Khulna the Commissioners of all the municipalities failed to undertake road and other works, though there were funds available. It is very unsatisfactory to find Municipal Commissioners failing to carry out works provided for in their budget estimates.

326. The attendance of Municipal Commissioners at meetings has improved in the districts of the 24-Parganas and Nadia, but in other districts it continues to be unsatisfactory. Important municipalities like North Barrackpore, South Suburban, North Dum-Dum, Barasat and others failed to hold 12 meetings a year. Certainly want of work cannot be given as an excuse. South Barrackpore held 18 meetings.

327. The following is a summary of some of the principal improvements effected in some municipalities of this Division.

328. In the Baranagar Municipality in the 24-Parganas a plot of land about 10 bighas in area was acquired and raised for trenching purposes. In Cossipore-Chitpore 2,188 feet of saucer drains were constructed and some *kutcha* drains were made *pucka*. The Commissioners of the South Barrackpore Municipality constructed a number of culverts at a total cost of Rs. 3,156. In Barasat obstructions to the river Soonti were removed from Jogotighata, three miles north of Barasat, down to the mouth of the river, a distance of 9 miles, at a cost of Rs. 1,040 (of which Rs. 640 were contributed by the District Board). The Commissioners of the Maniktala Municipality obtained a loan of Rs. 25,000 from Government for the supply of filtered water. According to previous arrangements the sum was made over to the Calcutta Corporation for laying pipes, &c., in the main road and a few other roads. The work was completed during the latter part of September 1893, and the filtered water is being supplied by the Calcutta Corporation at the rate of four annas per thousand gallons.

329. In Nadia a survey and level of the towns of Ranaghat, Nadia, Kushtia, and Kumarkhali were undertaken in the latter part of the year preliminary to the drainage of these municipalities. In Krishnagar, which is more advanced than the others, it is contemplated to carry out a drainage scheme by excavating the bed of the Anjana, and the plans and estimates have been drawn up. The Municipal Commissioners have obstinately refused to increase their income by raising the rate of taxation, notwithstanding the repeated advice given to them; hence they have not the necessary funds to carry out this scheme, and look to Government for help. The state of things in the Santipur Municipality reported in the previous year has improved to a certain extent.

330. In the Berhampore Municipality in the district of Murshidabad some of the filthy *kutcha* drains were made *pucka*.

331. In Jessore re-excavation of three big tanks was undertaken by the municipality during the year. The cost for two of them was placed by their owners at the disposal of the Chairman, and for the other was met from the municipal funds. These three tanks are expected to do much to remove the scarcity of water in Jessore, though a great deal yet remains to be done to place the town in a satisfactory basis as regards its water-supply. In the same municipality two main *kutcha* drains, measuring 3,514 feet, have been constructed to divert the course of the station water towards the Harnia bil.

332. The condition of the Jessore Municipality, both internal and external, has greatly improved under its present Chairman, Babu Umesh Chandra Ghose. This gentleman is reported to personally supervise all works executed in the municipality with a view to enforce economy. The rate of taxation in the Kotechandpur Municipality is very low and should be raised. Much of the area of the Moheshpur Municipality is rural, and its limited income does not permit any improvement in sanitary and conservancy arrangements. The rate of assessment in this municipality is also unusually low. It should be abolished.

333. The Khulna and Debhatta Municipalities in the district of Khulna are reported to be well managed, while in Satkhira there were some differences among the Commissioners, but the Magistrate found nothing unfavourable to remark on as regards the work done. The leading zamindar of the place has

now become its Chairman, and this may be looked on as a good sign. The municipality at Chanduria ought to be abolished. It used to depend chiefly on an indiscriminate tax levied on all carts found in its limits, but this practice has been stopped, and its finances have suffered considerably accordingly. In Khulna the Municipal Commissioners arranged for pumping up water from tanks into settling reservoirs, which appear to be very popular, and have increased their number by two more during the year.

334. The tendency to increase establishments still continues, and though far more interest is taken in Municipal than in Local Board work, there is no doubt that many Commissioners strive at earning popularity or to gain some private ends rather than give up their time and work for the public weal. So far from many of the municipalities of this Division being in advance, as they should be, of the average municipalities of the province, I have no hesitation in saying that they are distinctly behind, and I would suggest that some of the native papers should, instead of working always about the imaginary misdeeds of Government, devote some of their columns to the misgovernment in municipalities and honestly try to effect an improvement therein.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

335. Statement XXXII shows the extent to which Muhammadans are employed in this Division. There is little to add to what was written on this subject in last year's report. Considering the proportion of educated Muhammadans to educated Hindus, the percentage of appointments held by Muhammadans appears to be fair in all the districts of this Division, except Murshidabad.

336. In Nadia there was some decrease in the number of ministerial appointments held by Muhammadans during the year under report, owing to the abolition of the temporary clerks on the completion of the cess revaluation operation of the district.

337. In Jessore there was a decrease in the number of Muhammadan menials during the year as compared with the previous year. The decrease took place in the Civil Courts owing to reduction. Mr. Fiddian, the Collector of Jessore, observes that the disproportion of Muhammadans in the ministerial service is due to their backwardness in education. In his opinion the educational statistics are not, however, very hopeful, as they show a decrease in the number of pupils as compared with the previous year.

338. The Collectors of Murshidabad and Khulna have made no observation on the subject. In Murshidabad the proportion of educated Muhammadans to educated Hindus and that of Muhammadan employés to Hindu employés were 1 to 2·71 and 1 to 4·5 respectively.

339. I am always glad to see Muhammadans employed, as the appointments held by them are far short of what they are entitled to according to their population; but until the leading men among them apply themselves with far more vigour than at present to the cause of education, it is hopeless to expect any marked increase. In fact Government will have constantly to be on the look-out that their number does not decrease, as with the decrease in superior appointments held by Europeans, there is naturally an increase in those held by Hindus, and the latter are naturally more inclined to appoint Hindus in preference to Muhammadans. The absence of ministerial officers of the latter persuasion from District Boards is most marked, as they are only to be found in two out of the five districts of this Division.

XXXII.—POST OFFICES AND TELEGRAPHS.

340. As usual, the District Officers have not been able to obtain complete information on the subject for the year under report. The following is a summary of such information as has been received. There is nothing to show in the reports as to how far District Officers themselves visited these offices and made enquiries about the sales of stamps and issue of money-orders. The success which has attended many offices in selling small packets of quinine is also a subject which should have been commented on. The enquiries which I made in Darbhanga showed it to be in Bihar a most successful experiment, and a measure which has been thoroughly appreciated by the people.

341. The table below shows the number of post offices in this Division and the number and mileage of the main lines during the year under review:—

District.	Number of post offices.			Main lines.					
				Imperial.		Zamindari.		Total.	
	Imperial.	Zamindari.	Total.	Number.	Average mileage.	Number.	Average mileage.	Number.	Average mileage.
1	2	3	4	5	6	7	8	9	10
24-Parganas ...	71	8	79	...	...	...	...	49	359
Nadia ...	85	6	91	44	428½	12	141	56	569½
Murshidabad ...	34	5	39	8	123	18	207	26	330
Jessore ...	57	6	63	26	241	16	216	42	457
Khulna ...	34	5	39	13	126	17	273	30	399

The number of Imperial post offices increased in the 24-Parganas and Nadia by 10 and 1 respectively, while it decreased in Murshidabad by 2. The post office at Patkabari has been transferred to the Chuadanga head office in Nadia, and the branch post office at Dewanserai has been abolished. The number of post offices in Jessore and Khulna remained the same as in the previous year. The Collector of Khulna observes that the number of post offices shown in last year's report was wrong. Five post offices are partly zamindari and partly Imperial. The number of main lines increased in Jessore only by 1, and decreased in Nadia and Murshidabad by 1 and 8 respectively, while the average mileage increased in Khulna only by 10 and decreased in the 24-Parganas and Murshidabad by 21 and 62 respectively. In Murshidabad the decrease is ascribed to the closure of certain zamindari main lines owing to the abolition of some police outpost. Why no information as to the number of the different kinds of lines is supplied by the 24-Parganas it is difficult to say.

342. The number of letters, &c., received for despatch and issued for delivery in the districts during the year was as follows:—

District.	Number of letters, &c., in 1893-94.	Number of letters, &c., in 1892-93.
24-Parganas ...	9,658,136	10,260,484
Nadia ...	(Not given.)	
Murshidabad		
Jessore	3,130,523	3,256,032
Khulna	(Not given.)	

It will be seen that both the 24-Parganas and Jessore show a decrease. In the 24-Parganas the decrease is mainly under the heads "Newspapers" and "Packets of all kinds," and is ascribed to the fact that the figures given by the Postal authorities under these two heads represent only the number received for delivery, the number received for despatch not being available. As regards Jessore, the figures do not appear to be accurate. The figures generally are not worth commenting on.

343. The following table shows the working of the several telegraph offices during the past two years:—

District.	Name and number of telegraph offices.	Messages sent.		Messages received.	
		1893-94.	1892-93.	1893-94.	1892-93.
1	2	3	4	5	6
24-Parganas	16 offices (names not given) against 14 offices in 1892-93 ...	16,599	11,807	9,130	8,593
Nadia	2 offices—Krishnagar and Santipur	1,971	1,732	2,183	1,981
Murshidabad	4offices—(Berhampore, Murshidabad, Jeaganj and Jangipur) against three offices in 1892-93	2,780	2,866*	2,527	2,562
Jessore	1 office—Jessore	1,237	1,133	812	720
Khulna	2 offices—Khulna and Bágerhat	939	801	1,339	641

* In the previous report 4,266 appears to be a mistake for 2,866.

These figures show that there was a considerable increase in the messages sent in the 24-Parganas, Nadia, Jessore, and Khulna, and in the messages received in the 24-Parganas, Nadia, Jessore, and Khulna. The increase is said to be due to the better appreciation by the public of the advantages of telegrams in carrying on urgent business. The decrease in Murshidabad is said to be due to more telegrams having been sent and received in 1892-93 on account of the volunteer race which took place at Berhampore in that year. The figures in the above table relate only to the Government telegraph offices. There are also telegraph offices at all railway stations which take away a certain amount of business from the post office telegraphs. We have no information as to the extent of business thus transacted. A further reduction in the rate of telegrams would, I believe, lead to a still larger increase of revenue. No District Officers have discussed the question whether there is room for more telegraph offices or not, but the number in Jessore, Nadia, and Khulna looks as if it was capable of expansion. Probably all subdivisions should have combined post and telegraph offices.

XXXIII.—POUNDS.

344. The following table gives the statistics of the pounds under the District Boards in the Division during the year under report compared with the preceding year:—

1	2	3	4	5	6	7	8	9	10	11	12
District.	Year.	Number of pounds.	Arrear demand.	Current demand.	Total demand.	Collections, including arrears.	Balance.	Remissions.	Net balance.	Expenditure.	Remarks.
			Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
24-Parganas	1892-93	100	1,146	5,583	6,729	5,714	1,015	594	421	55	
	1893-94	101	421	5,920	6,341	5,628	713	50	623	80	
Nadia	1892-93	170	7,708	26,281	33,989	26,227	7,762	3,743	4,019	1,275	
	1893-94	173	4,019	26,182	30,201	26,129	4,072	81	3,991	504	
Murshidabad	1892-93	75	666	15,347	16,013	15,172	841	...	841	296	
	1893-94	75	841	16,966	17,807	14,439	3,368	...	3,368	391	
Jessore	1892-93	140	7,963	20,309	28,272	20,444	7,828	...	7,828	601	
	1893-94	140	7,828	21,397	29,225	21,629	7,596	433	7,163	555	
Khulna	1892-93	66	2,588	4,552	7,090	5,197	1,893	91	1,802	43	
	1893-94	64	1,802	5,015	6,817	4,192	2,625	...	2,625	100	
Total	1892-93	551	20,021	72,072	92,093	72,754	19,339	4,428	14,911	2,360	
	1893-94	553	14,911	75,480	90,391	72,017	18,374	604	17,770	1,630	

The first thing that strikes me in this statement is the very large arrear demand, which shows that as a whole the administration of pounds is very indifferently looked after. Jessore and Khulna stand out remarkably badly in this respect, though Nadia and Murshidabad also figure very poorly. It is satisfactory to see that remissions have been much less than usual.

345. Taking the Division as a whole, the number of pounds increased by 2 and the current demand by Rs. 3,408. The collections, including arrears, however, fell off, being 95·4 per cent. of the current demand against 101 per cent. in the previous year. The net balances have increased by Rs. 2,859. The expenditure in connection with the pounds was reduced by more than one-fourth.

346. In the 24-Parganas the number of pounds increased by 1 and the rental by Rs. 337. The collections show a decrease of Rs. 86 only. A sum of Rs. 948 was realised during the year as sale-proceeds of unclaimed stray cattle, &c., making up the total pound collections to Rs. 6,576 against Rs. 6,823 in the previous year. The new pound forms prescribed in Government Circular No. 37M., dated 22nd May 1893, were introduced from January 1894.

347. In Nadia the number of pounds increased by 3, but the current demand fell by Rs. 99. The net balance outstanding at the close of the year amounted to Rs. 3,991, which is heavy. It is in course of realisation under the Public Demands Recovery Act and by *kistibandis*. Complaints of malpractices by farmers in the form of illegal seizure and impounding of unoffending cattle by means of hired emissaries are not rare in this district.

348. In Murshidabad the number of pounds remained stationary, but there was an increase of Rs. 1,619 in the rental. The collections were, however, not as good as in the previous year, the balances outstanding being

Rs. 3,368 against Rs. 841. The decrease in collections is due to the fact that the farmers could not make much profit on account of the excessive rain of last year. They constantly defaulted, and the pounds were regularly resold at a loss. The balance will have to be recovered under the certificate procedure, but a great part of it is sure to be irrecoverable.

349. In Jessore also the number of pounds remained stationary, but the rental increased by Rs. 1,088. Collections increased by Rs. 1,185. The net balance outstanding was reduced from Rs. 7,828 to Rs. 7,168, but it is still far too heavy. A good deal of the balance which is covered by certificates is irrecoverable and will have to be written off. As a rule, respectable men seldom came forward to bid for the pounds, and the Local Boards settled them with those who offered the highest bids without enquiring into the character and solvency of the bidders. The result was that the farmers defaulted, and in the course of the certificate proceedings taken against them it came to light that they were men of no means. The Magistrate writes on the subject as follows:—"The difficulty of managing pounds seems to have increased of late owing to the strong prejudice felt by the Hindu community against having anything to do with seizing cows and putting them in pounds, where they may be subjected to hardship. Only Muhammadans of a common kind can usually be secured as lessees of pounds. A case in the Bangaon subdivision came to my notice, where a Hindu of the blacksmith caste took the lease of a pound, and for this he was boycotted by his fellow castemen."

350. In Khulna the number of pounds decreased by 2, but the current demand increased by Rs. 462, owing to the resettlement of some pounds at enhanced rates. The collections were, however, less by Rs. 1,005, owing partly to the scarcity during a part of the year, and partly to the apathy and neglect on the part of the Local Boards, by whom the pounds are managed. The net balance at close of the year was Rs. 2,625 against Rs. 1,802 in the previous year. Those balances which are really irrecoverable should be struck out as soon as possible.

351. The Magistrates of the 24-Parganas and Murshidabad have given no information regarding municipal pounds in their districts. In Nadia there were during the year 25 municipal pounds against 23 with an income of Rs. 3,733 against Rs. 3,457 in the previous year. All of these were farmed out. The numbers of municipal pounds in Jessore and Khulna remained stationary, but the incomes fell from Rs. 1,512 and Rs. 932 in the previous year to Rs. 1,250 and Rs. 712 respectively in the year of report. All the pounds in the Jessore Municipality were managed *khas*. I should recommend a change.

352. As regards management of pounds in the district, Local Boards as a rule rarely give any help in bringing to notice the irregularities in their management. If it was not necessary to give them some work, often to justify their existence, I would gladly see pounds taken away from them. It cannot be too often impressed upon them that if they wish to see the expenses of education increased, they should give more careful attention to the management of pounds.

FAIRS.

353. The most important fairs held in the 24-Parganas are—

1. Ganga Saugor *mêla*. | 2. Pir Gora Chand's *mêla*.
3. Gazi Sahib's *mêla*.

The Ganga Saugor, which is a religious bathing festival, was held during the year under report from the 9th to 14th January on the Saugor Island near the junction of the Bhagirathi with the sea. The fair is reported to have been smaller than usual on account of a corresponding fair at Allahabad, the number of people collected being estimated to be between 20,000 and 30,000. The usual arrangements to maintain order were made, and a Joint-Magistrate was deputed from the Sadar station to be present during the festival. There were a few cases of petty theft and extortion, which were, except two or three, all disposed of on the spot. There was no outbreak of any epidemic disease, but a few sporadic cases of cholera and bowel-complaints are reported to have occurred, and there were two deaths. The sanitary and conservancy arrangements were made by the District Board at a cost of Rs. 1,075, which was afterwards recovered from the proprietors.

The other two fairs are held in honour of Muhammadan pirs or saints Pir Gora Chand's fair was held at Harwa in the Basirhat subdivision from the 23rd February to 2nd March. About 50,000 people are reported to have attended. Here was also no outbreak of any epidemic diseases. There were a few cases of fever and bowel-complaints and one case of cholera, but none of them ended fatally. The District Board made all sanitary arrangements in this fair also at a cost of Rs. 312. The third or Gazi Sahib's fair was held at Bansra in the Sadar subdivision from the 20th to 22nd June, and was attended by about 50,000 people. There was no outbreak of any epidemic disease in this fair also.

354. In Nadia the principal fairs held during the year were the *Rash Jatra* at Santipur, the *Dól Jatra* at Ghosepara, and the *Chaitannya mêla* at Navadwipa. Each of these was attended by about 30,000 people. The *mêlas* at Kulia and Chakdaha also deserve mention. The former was attended by about 15,000 people. Sanitary and conservancy arrangements were either made by the local municipalities or by the owners of the lands on which the fairs were held. In Navadwipa the sanitary arrangements were made from the fees derived from the Lodging-house Act which is in force in this municipality.

355. An agricultural exhibition was held at Kushtia in March last, and lasted for a week. Government made a grant of Rs. 250 for its expenses, and Mr. N. N. Banerjee, an Assistant to the Director of Land Records and Agriculture, visited it, accompanied by an overseer of the Department, and issued instructions to the Managing Committee for the encouragement of the cultivation of Naini Tal potatoes and Buxar wheat by the cultivators.

356. The principal fairs in Murshidabad are—

1. Tulsi Behar *mêla*.
2. Kapileshur *mêla*.
3. Chatta *mêla*.
4. Patkabari *mêla*.
5. Gons *mêla*.

Of these the Tulsi Behar *mêla* is of some importance, and lasts for nearly a month. The other fairs are of short duration, and are gradually losing their importance and utility. No epidemic disease is reported to have broken out in any of these.

357. Of the fairs held in Jessore, those that deserve any notice are the Jubilee *mêla* at Magura, the *Rash mêla* at Satrajitpur in the Magura subdivision, and the *Rash mêla* at Gilapole in the Jhenidah subdivision. The Jubilee *mêla* was held from the 25th February to the 20th March. At this *mêla* there was an exhibition on a small scale. The exhibits were poor, but still small rewards were paid to encourage agriculture as well as art. Silk cocoons were exhibited in connection with a recent attempt to revive that industry in the neighbourhood. The *Rash mêlas* at Satrajitpur and Gilapole are religious gatherings. Both were held in November. The former lasted for a fortnight and the latter for a month and-a-half. Temporary shops were opened at both places.

358. In Khulna no fair of any importance was held during the year.

ZAMINDARI DÁK.

359. The following statement shows the receipts and expenditure on account of the zamindari dák service in this Division during the year under report as compared with the preceding year:—

District.	Rate per cent. at which levied.		Amount levied.		Expenditure.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
24-Parganas	0 8 0	0 7 0	7,865 13 6	10,074 10 2	7,643 8 10	7,656 0 6
Nadia	0 12 0	0 12 0	7,970 11 6	9,228 14 2	5,867 11 10	5,997 5 10
Murshidabad	0 9 0	0 9 0	9,677 2 10	6,863 1 5	6,200 6 1	6,275 0 9
Jessore	1 0 6	0 14 0	11,056 0 0	7,213 0 6	8,058 13 11	8,152 10 9
Khulna	1 0 0	1 0 0	9,089 0 0	6,875 0 0	7,634 4 1	7,568 5 1
Total ...	...	...	45,658 11 10	40,254 10 3	35,404 12 9	35,649 6 11

360. The number of post offices remained the same in all the districts of the Division. In the 24-Parganas the line from Bhangore to Chailabi, 32 miles

long, was abolished from 1st December 1893, owing to the abolition of the police outpost at Chailabi, and the total length of the lines was thus reduced from 230 to 198 miles. Owing to this reduction a monthly saving of Rs. 47 was effected, but an increase of Rs. 5 per mensem was granted to the pay of each of the branch postmasters of Bhangore, Debipur, Kulpee and Harwa, and also to the pay of the zamindari dák clerk of the Alipore post office. The net saving therefore amounted to Rs. 22 a month only.

361. In Murshidabad 5 of the 24 dák lines in the district were abolished during the year owing to the abolition of the five outposts named below: –

1. Ranitolla.
2. Sherpur.
3. Jajan.
4. Dhanirampur.
5. Rangamati.

362. In none of the other districts was any change in the dák lines made during the year.

363. Under the orders of the Board of Revenue, contained in the Resolution dated the 5th January 1893, the cess was levied at the rates shown in column 3 of the table given above. This rate has been fixed for five years, from 1st January 1893.

364. The Board also by their Resolution quoted above have changed the kist days of 1894 from 28th March and 28th September to the 12th January and 28th September, *i.e.*, the 12th January has been substituted for 28th March, and these dates have been fixed for the next four years, *i.e.*, up to 1898.

365. The total collections during the year show an increase in the 24-Parganas and Nadia, while in the other three districts there was a decrease. The increase in the 24-Parganas is said to be due to the payment for the March kist of the year 1892-93 having been mostly made by the assessees in April 1893. It is also attributed to the fact that under the orders of the Board quoted above there have practically been three kist days during the year, viz., those of April 1893, September 1893, and January 1894. The increase in Nadia is said to be chiefly due to the large collection of fines and excess payment. In Murshidabad the decrease in the receipts for 1893-94 is ascribed to a large part of the demand of that year having been paid in advance in 1892-93. The decreases in Jessore and Khulna have not been explained. In the former district it is probably due in part to the reduction in the rate of the cess from Re. 1-0-6 per cent. to Re. 0-14-0 per cent. The total expenditure shows an increase in all districts, except Khulna. In Nadia it is stated that the head clerk of the zamindari dák cess office having in 1892-93 been under suspension for some time, there was some saving in the expenditure, while during the year under report there has been no such saving. In Jessore the increase in the expenditure is attributed to the fact that more officers were on privilege leave than in the year preceding. The fluctuations in the other districts have not been explained, and do not require special notice.

366. There was no complaint reported during the year, and the management of the lines was satisfactory.

367. The amalgamation of the Zamindari Dák Department with the District Land Revenue Tauzi Department has been ordered by the Board to come in force from the 1st April 1894.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

368. There are no important social or political institutions in any of the districts of this Division. The residents of the 24-Parganas district, who are inclined to interest themselves in social and political institutions, are able, owing to their proximity to Calcutta, to join the institutions and associations which exist there. There are rate-payers' associations in several municipalities in this district and in Nadia. They concern themselves for the most part with the affairs of the municipalities in which they are established. The Indian Association of Calcutta is said to have branches in Diamond Harbour in the 24-Parganas and in Krishnagar in Nadia. In the latter place it did not discuss any particular subject of interest, and in fact held no meetings at all. It is also reported that there are insignificant branches of the Congress Committee in Krishnagar, Chakdaha, Meherpur, and Kushtia in Nadia. These branch

committees do not regularly meet to discuss questions of public interest, but only when the general Congress meeting is advertised with a view to depute representatives.

369. In Nadia there are two social institutions, viz the Santipur *Bandhab Sabha* and the Ranaghat *Mitra Sabha*, which are doing useful work in the way of charity to poor and helpless widows and orphans.

370. In Murshidabad there are three Associations, viz. the Murshidabad Indian Association, the Murshidabad Muhammadan Association, and the Anjaman-i-Hydri. During the year under review the first did not discuss any important social or political questions; the second only deals with matters connected with the moral and intellectual improvement of the Muhammadans of the district; the third is a purely religious institution, and is reported only to help and assist the poor and needy.

371. In Khulna there is no political institution of any importance.

372. Among the social institutions only the Jessore and Khulna Sanmilani, which look after zanana education and the physical and moral training of boys, and the Sripur *Hitasadhini Sabha* which maintains a charitable dispensary in Sripur, deserve notice.

STATE OF PUBLIC FEELING.

373. Public feeling is generally confined to a small section of the community, viz., the upper and the educated classes. The masses of the people are seldom affected by anything which does not touch their purse and the practical concerns of their daily life. To matters of general interest they are practically indifferent.

374. Public opinion is formed and guided by the Calcutta press, which has a large circulation in almost all the districts of this Division. Municipal discussions which are not uncommon excite much feeling and discussion, often from personal motives, but they are purely of local interest and attract no attention beyond the towns concerned. Some excitement attended the fourth general election of Municipal Commissioners in which much interest was evinced.

375. The income-tax continues to be distasteful to those whose pockets it has touched.

376. Last year no subject caused any very special excitement. The only subjects which exercised the public mind were (1) the ninth National Congress held at Lahore; (2) the Provincial Conference held at Calcutta; (3) the currency legislation or the exchange question; (4) the grant of exchange compensation allowance to European officers; (5) the exemption of piece-goods from the provisions of the Amended Tariff Act; (6) the privilege granted to the municipalities and other local bodies and associations to nominate members for the Bengal Legislative Council; (7) the simultaneous examination question; (8) Bill to amend the Bengal Municpal Act III (B.C.) of 1884; (9) the cadastral survey in Bihar; (10) the cow-killing question; (11) questions put in Council by members in exercise of the power of interpellation granted to them. Public feeling was worked upon for some time by unfavourable criticisms on the administration of Lord Lansdowne. The selection of Meherpur as the headquarters of the amalgamated subdivisions of Meherpur and Chuadanga also evoked same local feeling.

377. The relation between Muhammadans and Hindus has been generally peaceful during the year under review.

THE PUBLIC PRESS.

378. In the 24-Parganas the total number of presses was 27 against 25 in the preceding year.

379. Of the presses, 1 is owned by Government, 1 by the Oxford Mission, 8 by Muhammadans, 15 by Hindus and 2 by Native Christians.

380. The Oxford Mission Press continues to issue two fortnightly newspapers, viz., the *Epiphany* and the *Indian Churchman*, and two periodicals, viz., the *Calcutta University Magazine* and the *Indian Churchman* (quarterly review). The Post Despatch Press issues the *Trannodaya*. The Metropolitan Steam

Press issues a weekly paper called the *National Guardian*. The Secular Press issued a periodical called the *Cosmopolitan*, which has since ceased to exist. The Saptahik Sangbad Press, the Cossipore Horticultural Press and the Bharati Press issue periodicals called *Amader Patrika*, *Sanskrit Chandrika*, and *Bharati* respectively. These papers and periodicals have only a limited circulation. The other presses did not publish any newspaper or periodical; they were maintained by receipts from job work.

381. In Nadia, as in the preceding year, there were three printing presses, viz., two in the town of Krishnagar and one in Kumarkhali in the subdivision of Kushtia. These presses generally print dakhilas and insignificant books. No newspaper is published in this district.

382. In Murshidabad there were 10 presses against 9 in the preceding year. Of them the Arunodaya Press publishes a Bengali weekly newspaper called *Pratikar*, and the Gourgobinda Press issues a paper called *Murshidabad Pratinidhi*. The circulation of these papers is limited and their tone moderate.

383. In Jessore there were, as in the preceding year, four presses at work, viz., the Suvakari Press and the Daw Press in the town of Jessore, the Sarkar Press in Narail, and the Chikitsa Prakash Press in Garibpur in the subdivision of Bangaon. Of them the first three executed job works only. The proprietor of the Daw Press having been convicted of forgery of currency notes and sentenced to 10 years' transportation, his press has been closed. The last-named press published vernacular books on medicine and hygiene and a vernacular weekly journal called *Samaj-o-Sahitya*. The circulation of this paper is too limited to deserve mention.

384. In Khulna there was only one press as in the preceding year. It issues no newspaper, but is maintained by printing forms required by the local offices and private persons. A monthly vernacular journal called the *Ghosak* has recently been started by a local Native Christian. It is printed and published in Calcutta.

385. Of the vernacular papers published in Calcutta, the following are the most important:—

		Estimated circulation.			Estimated circulation.
1.	The *Bangavasi*	... 20,000	7.	The *Bharat Mitra*	2,000
2.	The *Banganivasi*	... 8,000	8.	The *Sudhakar*	2,000
3.	The *Sanjivani*	... 4,000	9.	The *Dainik*	1,200
4.	The *Samaya*	... 4,000	10.	The *Som Prakash*	800
5.	The *Sulabh Dainik*	... 3,000	11.	The *Sahachar*	500
6.	The *Hitavadi*	... 3,000			

The *Bangavasi*, *Dainik*, and *Banganivasi* are orthodox in their views as regards social and religious matters. The *Sanjivani*, which is an organ of the *Sadharan Brahmo Samaj*, and the *Samaya* are heterodox in social and religious questions and advocate the cause of raiyats and coolies. The *Hitavadi* supports the Congress and is liberal in social matters. The *Sudhakar* is an orthodox Muhammadan paper, which is of use as showing what Musalmans think of controversial questions. The *Sahachar*, edited by a senior Pleader of the Alipore Judge's Court, is generally moderate in its views and language.

386. The administration of Government in all departments was freely criticised by the vernacular papers. The Police, Criminal and Civil Justice, the University and Legislature, all passed under review and received their share of comment.

387. Of the English newspapers conducted by natives, the *Indian Mirror*, *Amrita Bazar Patrika*, *Reis and Rayyet*, *Hindu Patriot*, *Indian Nation*, *Hope* and *Bengali* are largely read, and are generally conducted with considerable literary skill.

388. The tone of the press as reflected in the native press has been as hitherto generally antagonistic to the legislative and administrative actions of Government. They are also apt to criticise unfavourably the actions of Government officers of all ranks. Their great object seems to be to hamper Government in every way. If one was to believe them, one would believe that hardly any Government actions were done for the benefit of the people at large, and that honesty was as a rule unknown among officials. On the people at large,

their vapourings have fortunately but little effect, but the attention paid to them by ignorant and mischievous people in England undoubtedly encourages them, and makes their writers believe that they attract much more attention than they really do. The *Cacoethes scribendi* has never been better exemplified than it is in many of the papers at the present time. On one subject, however, they have been sensible, and that is on the so-called "tree-daubing scare." They have with good reason jeered at the terrible state of alarm in which so many Europeans have lately found themselves merely because of sensational articles and letters in some of the Anglo-Indian contemporaries.

XXXV.—CHARACTER OF OFFICERS.

* * * * * * *

XXXVI.—CONDUCT OF ZAMINDARS.

* * * * * * *

XXXVII.—GENERAL REMARKS.

396. I did not take charge of the office of the Commissioner of this Division till the end of April after the close of the year under report; and as it was the busiest time of the year, when all annual returns and reports have to be prepared, I have not hitherto been able to make a tour in any of the districts of this Division except a short tour in Murshidabad or to inspect any of the local offices. This report has therefore been compiled from the information which has been furnished by the District Officers in the different reports which have been received from them, and I have been able to add very little from my own personal knowledge.

397. As far as I can judge, the year has been an uneventful one on the whole. Mr. Maguire, the Collector of Khulna, made the following observations, in which I fully agree:—"The history of an Indian district is generally the history of some calamity—a famine, a cyclone, or a tornado; and in this sense that district may be said to be happy which has no history, and this may, I think, be truly said of Khulna in the year 1893-94." This remark applies generally to all the districts of this Division during the past year.

398. The successive bad harvests for the last four years, consequent on the unseasonable and unequal distribution of rain, pressed hard on the people, especially of the middle class, whose condition was not on the whole very favourable. The year under report was healthier than its predecessor, but still the mortality from malarious fever and cholera was great.

399. It is to be hoped that the Sanitary Drainage Bill will do good, but there is a very decided opinion that good drinking water is wanted in preference to drainage, especially as there is but little doubt that the landlords do not, either from poverty or from other reasons, devote as much money to the keeping up of tanks and to water-supplies as they did in old times. The raiyats also are not so willing as they were to give help on the subject.

400. In spite of all that is being done, the spread of elementary education is slow; that it is making way is, however, a source of congratulation. During the year under review owing to agricultural distress there has been a considerable decrease in the number of the lower primary schools and their pupils.

401. The relations between landlords and tenants were generally satisfactory. There was no tension of feeling between the Hindus and Muhammadans, and the cow-killing question which disturbed the peace of the north-western part of this province spread very slightly to this Division.

402. During the year under review some advances were made regarding improvement of drainage of a portion of the Barasat subdivision in the 24-Parganas by opening out a dead river called the Soonti for a distance of about 9 miles. The immediate effect of this has been that the free flow of the water of the river has been established, the drainage of Barasat and neighbouring villages improved, and the water of the river, which was absolutely filthy before, is now good enough to be used for drinking and culinary purposes. Boats also now proceed up the river. It is also reported that malarial fever has not been so prevalent since the improvement was effected.

403. Nothing has, however, yet been done to open the Anjona at Krishnagar in Nadia. A scheme has been prepared for the purpose, but it has not been finally approved of by Government.

404. Proposals have been made for constructing a steam tramway from Ranaghat to Krishnagar *vid* Santipur, and if they are carried out, they will remove a long-felt want.

405. During the year under report the list of ancient monuments prepared in 1886 was revised. Some additions and corrections have been made to it. Mr. Maguire, the Collector of Khulna, visited nearly all the chief antiquities in his district. Some of the monuments possess some historical interest.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON WARDS' AND ATTACHED ESTATES IN THE LOWER PROVINCES FOR THE YEAR 1893-94.

REVENUE DEPARTMENT—LAND REVENUE

Darjeeling, the 8th October 1894.

RESOLUTION—No. 763T—R.

READ—

The Report of the Board of Revenue on Wards' and Attached Estates in the Lower Provinces for the year 1893-94.

The report was submitted to Government in due time on the 27th August 1894. The number of wards' estates under the charge of the Court of Wards was 78, and of attached and encumbered estates 67, against 74 of the former and 66 of the latter in the preceding year. There was thus an increase of four wards' estates and one attached estate in comparison with the year 1892-93. Of the total number of estates, 16 wards' estates and 5 attached and encumbered estates were under management for a part of the year only according to Appendix I of the Board's Report, having either been taken charge of or released during the year.

Revenue and rents due to Government and superior landlords.

2. The total demand for revenue and cesses (current and arrear) due to Government was Rs. 51,13,516. Rupees 78,876 of the arrears and Rs. 50,20,141 of the current demand were paid, being 99·8 per cent. of the total demand. The balances, which show a considerable reduction, being Rs. 14,499 only, were chiefly due from the Basudebpur estate in Midnapore and the Sheohar estate in Muzaffarpur. The former was a heavy defaulter in the previous year, and was discharged from management during the year of report. The Sheohar estate was taken in charge on the 5th September 1893 with arrears due to Government amounting to Rs. 6,684, of which Rs. 2,931 were left unpaid.

3. The amount of rent and cesses due to superior landlords was Rs. 6,22,729, of which Rs. 1,09,294 were the arrear from the previous year. The payments amounted to only Rs. 4,95,586, leaving the large balance of Rs. 1,24,299, the major portion of which was due by three estates, viz., Haturia, Bamna, and Satkhira. The first two were taken in charge during the year heavily involved in debt, while in Satkhira the bulk of the balance is due to disputes between the estate and co-sharers. The lastnamed estate was in an embarrassed condition in 1892-93 also.

Rent and cesses due to the estates.

4. The following statement shows the demand, collection, and balances of rent and cesses due to the estates during the five years ending with the year of report:—

Year.	Demand.			Collections.			Percentage on—		Remissions.	Balances.
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Current collection on current demand.	Total collections on current demand.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			Rs.	Rs.
1889-90 ...	1,06,46,289	1,00,15,159	2,06,61,448	.....	.....	1,02,24,501	...	102*	24,53,188	81,84,059
1890-91 ...	79,81,432	98,29,588	1,78,11,020	.....	.....	98,29,082	...	98*	7,57,443	74,24,535
1891-92 ...	77,67,017	91,53,100	1,69,20,117	30,69,365	60,69,371	91,38,736	66·3	99·8	12,12,179	65,69,202
1892-93 ...	62,03,663	92,99,637	1,55,02,300	29,04,156	61,96,739	91,00,895	66·6	97·8	3,05,695	60,96,710
1893-94 ...	66,78,027	97,32,203	1,64,10,230	29,84,402	64,12,911	93,97,313	65·8	96·5	4,35,740	65,77,177

5. The percentage both of current collections and of total collections on the current demand was lower than in either of the two preceding years. The falling off is attributed to loss of crops by floods and unfavourable agricultural results in many parts of the country, especially Tippera, Backergunge, and Midnapore. Out of the 21 larger estates with a rental of Rs. 50,000 and upwards,

the percentage of total collections on the current demand exceeded a hundred in only eight cases:—Burdwan, Khagra, Bhawanipur, Maldwar, Kanika, Deo, Rajkrishna Banerjee, and Sukraj Rai. The current collection on the current demand in the Courjon estate in Noakhali reached only 80·6 per cent. against 90 per cent. in the previous year. The total amount of balances of rent and cesses due to estates at the end of the year was Rs. 65,77,177, of which Rs. 7,82,871 were due when the estates were taken in charge, and Rs. 57,94,306 accrued subsequently. Rupees 47,64,287 of the balances are said to be good and in process of recovery. The bad and irrecoverable balances increased by Rs. 2,64,454.

Debts due by estates.

6. The table given in paragraph 11 of the Board's report shows the debts due during the year, the payments and reductions by compromise, and the debts due at the end of the year, by all estates under management, including those which were in charge for only a part of the year. To be of any statistical value, the table should include only the estates under the management of the Court throughout the year, or at least it should separate them from the new and relinquished estates. The figures thus reduced show that the total amount of debts due during the year was Rs. 36,27,063, the payment and reductions by compromise Rs. 11,66,215, and the debts due at the end of the year Rs. 24,60,848. The Court of Wards withdrew from the management of the Basudebpur estate in Midnapore, and have since the close of the year released the Bamna estate in Backergunge on account of their hopelessly embarrassed condition.

Management charges.

7. Separating new or relinquished estates from those under management throughout the year, the management charges were Rs. 7,16,772, and the percentage on the current demand for rent and cesses was 7·3. Except in Burdwan, where the enormous rental of the Burdwan Raj Estate reduces the percentage of charges, and in Chota Nagpur and Dacca the charges were between 10·4 and 14·4 in the other Divisions. The new general management rate under Act X of 1892, which came into force from the beginning of the year 1893-94, yielded Rs. 1,32,092 out of a demand of Rs. 1,42,961, which includes Rs. 5,560 of arrears of the previous year. The balance remaining unrealised at the end of the year was therefore Rs. 10,869. On the other hand, there were advance payments amounting to Rs. 6,573.

Survey and Settlement.

8. Survey or settlement operations, or both, under the supervision of the Director of Land Records, were in progress in portions of the Burdwan Raj khas mahals, in the Talipabad, Dakhin Shahbazpur and Tikari estates, and had been practically completed in the Sarail, Kujang (included in the Burdwan Raj) and Kanika estates. Portions of the following estates were also under survey and settlement:—Malighati, Turkoa, Syudpur, Maldwar, Chandrakumar, Madhupur, Siri, Dhalbhum, and Pandra. It is contemplated that wards' estates in Chittagong, Cuttack, Balasore, Puri, Muzaffarpur, Saran, Champaran, and Darbhanga will be included in the general settlement operations in these districts.

Improvements.

9. In the Resolution on the Board's report for the year 1891-92, the following observations were made:—"Sir Charles Elliott cannot too strongly insist upon the policy of devoting a liberal expenditure to improvements in solvent estates which have come under the charge of Government. Every manager of such estates should make out and keep by him a programme or list of projects and estimates, and this list should, if possible, be sanctioned beforehand, so that he may be ready to spend on these works any surplus sums he may have; and Commissioners and Collectors, when on tour, should call for these lists of projects and discuss them with managers and arrange them in order of importance." The Board, in paragraph 15 of their report for the year 1892-93, noted that the attention of the local officers had been drawn to these orders. But the Lieutenant-Governor discovered that in certain estates in the districts of Backergunge and Noakhali, which came under his inspection in July last, no such list had been prepared, and no attempt had been made by the managers to follow the orders of Government. The present report furnishes ample evidence of the general tendency to disregard these orders. The following table shows that there has been some improvement, and the total amount spent on all manner

of useful objects has risen above 7 lakhs of rupees and exceeds the record of any past year. But the expenditure on schemes of direct improvement to the estates amounted only to Rs. 1,58,406, a small sum compared with the amount of investments in landed property and Government securities, Rs. 5,59,441, and the year closed with a cash balance of Rs. 18,63,446. The Lieutenant-Governor trusts that in future more serious efforts will be made to spend the surplus usefully:—

Year.	Subscriptions and donations to schools.	Subscriptions and donations to dispensaries.	Maintenance in efficient condition of estates, buildings and other immoveable property.	Improvement of land and property for benefit of ward.	Surveys and settlements.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1889-90 ...	69,301	38,732	2,24,439	66,930	2,24,168	6,23,570
1890-91 ...	59,241	32,255	2,13,178	58,404	1,26,523	4,89,601
1891-92 ...	61,155	37,598	1,91,397	92,864	2,67,345	6,50,359
1892-93 ...	64,059	36,524	2,16,870	1,57,782	97,104	5,72,339
1893-94 ...	59,844	46,527	2,46,225	1,58,406	2,01,899	7,12,901

10. In the great Burdwan estate, with an income of over 50 lakhs of rupees, Rs. 91,062 were spent on surveys and settlements and Rs. 23,752 on improvements, which apparently include the sum of Rs. 9,679 shown in statement XXVII of the Divisional Administration Report of Orissa to have been expended on improvements in the Kujang estate appertaining to the Burdwan Raj. There is room for large expenditure in the Kujang estate on judicious sea embankments.

In the Tikari estate, yielding an income of about 7½ lakhs of rupees, Rs. 39,288 were spent on works of improvement, such as gilandazi, wells for irrigation, &c., against Rs. 26,350 in the preceding year.

In the Kasim Bazar estates over Rs. 12,000 were laid out on the excavation of tanks for drinking water. In Bhawanipur, Rs. 12,104 (or according to the Commissioner's Annual Report, statement XXVII, Rs. 18,321) were expended on works of improvement, but most of this was devoted to clearances of jungle in the Sundarbans and very little to improvement of the inhabited part of the estate, though there is much demand there for further outlay on the water-supply of the villages.

11. With the exception of these four estates—Burdwan, Tikari, Kasim Bazar, and Bhawanipur, Tikari being the best in this respect—the subject of improvements appears to have been generally neglected: the worst of the remaining 17 of the larger estates being Khagra, Basudebpur, Dhalbhum, Courjon, Rajkrishna Banerjee, and Sukraj Rai, of which the first four spent nothing on improvements. The case of Dhalbhum is particularly bad; the year closed with a cash balance of Rs. 25,319, but there was no expenditure under this head. The Lieutenant-Governor has separately called the attention of the Board to the management of the Courjon estate, with which he is not satisfied. In the Divisional Administration Report, Mr. Oldham observes with regard to the management of this estate as follows:—"Worst of all is the Courjon estate. We have had it now for over 20 years, and beyond some paltry subscriptions have done nothing for the tenantry, while we have been rigorous rent-receivers and enhancers. The large amount of claims written off in my time showed in detail how freely and carelessly certificates used to be issued. The excuse for this system is that it came to us with a debt of Rs. 1,25,000 which was fully cleared last year. This debt was absolutely personal and had nothing to do with the maintenance of the estate or the tenantry.

I represented that at least one portion of the estate in which the operation was practicable at an estimated cost of Rs. 6,000 should undergo a survey and settlement. No reply has yet been received." In the Rajkrishna Banerjee estate the expenditure on improvements was only Rs. 245, though there were no debts—a fact which does not correspond to the high character borne by the Manager of the Chittagong Wards' Estates. The Sukraj Rai estate spent the extremely small sum of Rs. 97 on improvements. In the Maldwar estate in Dinajpur Rs. 4,678 are shown in statement XXVII of the Commissioner's Divisional Administration Report to have been spent on improvements, while the Board's Report shows an expenditure of Rs. 2,130 only. No explanation is, however, given as to the manner in which this amount was laid out. The Shankarpur estate shows a surplus of Rs. 49,100, and an expenditure of only Rs. 1,450 on improvements. (The Divisional Report states the expenditure on improvements at Rs. 2,505.) The Dakhin Shahbazpur estate in Dacca spent only Rs. 800 on improvements, while the charges on account of maintenance, &c., of the proprietor and family amounted to Rs. 42,968. The Lieutenant-Governor has drawn the attention of the Board separately to the management of this estate also. The Chandrakumar estate in Shahabad spent only Rs. 600 on improvements, but the debts of the estate are heavy. The Dhanwar estate in Hazaribagh spent the sum of Rs. 1,923 on improvements, which is insufficient in comparison with the cash balance of the estate.

12. In this connection the Lieutenant-Governor desires to draw the attention of the Board to the following remarks of the Officiating Commissioner of Burdwan in his recent Divisional Administration Report for 1893-94:—"The administration of wards' estates in the Midnapore district has not been as satisfactory as might be expected. In taking involved estates under our administration, we hope to improve their condition and to make them over in a solvent state. We have not done this either in respect of Basudebpur or in respect of Beraberia, which were in our hands for years; and the condition of some other estates which were released within the past few years was quite as bad at the time of release. It is to be hoped that we shall succeed better in future, and that all estates in Midnapore now under the Court of Wards will improve by our administration." The following remarks of Mr. Romesh Chunder Dutt are also quoted as being to the point:—"Cholera is mainly due to bad drinking-water as malarial fever is mainly due to obstructed drainage; and as the supply of drinking-water is improved, cholera must abate. This has been so in Calcutta, where cholera raged furiously in every hot season, thirty years ago, and the disease has never raged to the same extent since the town got a supply of filtered water. It is to be hoped that every district town will sooner or later be supplied with filtered water, and that tanks will be reserved in every village. A very great deal has yet to be done to improve the sanitation of the country; but it is impossible for District Boards to undertake this with their present resources which are meagre, and are barely sufficient for roads and education."

Certificates.

13. The following statement illustrates the working of the certificate procedure in wards' and attached estates during the five years ending with the year 1893-94:—

Year.	Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending-more than six months.	Pending less than six months.	Total.	Amount of demand covered by the certificates.	Total annual rent and cesses of estates.	Percentage of column 9 to column 10.
1	2	3	4	5	6	7	8	9	10	11
								Rs.	Rs.	
1889-90	23,018	15,397	38,415	17,628	13,546	2,241	20,787	6,32,705	1,00,15,159	6·3
1890-91	21,167	10,975	32,142	18,438	12,193	1,511	13,704	4,60,970	98,29,588	4·6
1891-92	13,704	13,299	27,003	17,148	8,107	1,748	9,855	4,75,633	91,53,100	5·1
1892-93	13,210	8,648	21,858	11,765	9,053	1,040	10,093	8,58,414	92,99,437	9·2
1893-94	10,281	7,477	17,758	11,633	4,334	1,761	6,095	6,71,210	97,32,203	6·9

The Board observe that the decrease in the number of certificates filed, from 8,648 to 7,477, was due to the orders of Government prohibiting the issue

of certificates in wards' estates, of which a survey has not been made and record of rights prepared. But during his tour in July last, the Lieutenant-Governor found that in Noakhali the certificate procedure was applied to the estates in the district, though none of them had been surveyed or had a record of rights. So far as the orders of Government are carried out, it will be well if information were given as to what substitute has been employed for the certificate procedure, and if civil suits have been filed, corresponding statistics to those in the preceding table should be given about them.

Estates taken in charge or released.

14. The Board report that eleven estates were taken in charge and ten released during the year. The section of the Board's report which refers to the relinquishment of estates, contains a remarkable record of good work done, especially in the case of the Dighapatia estate. The estate lies in 15 districts, the ancestral portion of it belonging, under the will of the late Raja, to his eldest son, Kumar Promada Nath Rai, and the self-acquired estates to his three younger sons. The rent-roll of the eldest ward stood at the time of assumption of charge by the Court of Wards in January 1884, at Rs. 4,36,639, and that of the younger wards at Rs. 1,50,210. On the date of release the rent-roll of the former was Rs. 4,89,254, and of the latter Rs. 2,19,650, the increase in the first case being due to purchase of new properties and the settlement and resettlement of waste and relinquished lands; and in the second case, principally to properties being brought under direct management in consequence of the default of patnidars. The gross value of Government securities and cash balance on the date of assumption of charge was Rs. 3,65,628 in the case of the eldest ward, and nothing in the case of the younger wards. On the date of release the amount of the former was Rs. 16,70,107, and the latter Rs. 4,04,841. The estates are free from debts, while the debts due to the eldest ward's estate were reduced from Rs. 4,74,499 to Rs. 1,77,708. The debts due to the younger wards have increased from Rs. 23,745 to Rs. 79,638, on account of default made by certain patnidars. The portion of the younger wards' estate which was managed direct, is held in coparceny, and, as the co-sharers would not join, no works of improvement were undertaken. But the eldest ward's estate spent during the period of its management by the Court of Wards, Rs. 76,006 in subscriptions and donations to schools, Rs. 44,757 in subscriptions and donations to dispensaries, and Rs. 80,332 on works of improvement of which Rs. 30,810 were laid out in the excavation of tanks. This estate maintained and supported two high class English schools, nine middle vernacular and middle English schools, twenty-seven patshalas, one Sanskrit tol, and two girls' schools, granted allowances to boys in indigent circumstances, and contributed towards the construction of school buildings. A good library is also maintained at Dighapatia at the expense of the estate for the benefit of the people. The charitable dispensaries at Dighapatia, Bonaghati, and Naukhila are entirely supported by the estate, and contributions were granted to the dispensaries at Pabna, Bogra, Nator, Noagaon, Bongram, and Sara. The eldest ward read up to the full course of the F A. examination in the Presidency College, after which he left the College to learn zamindari business. The second ward, Kumar Basanta Kumar Rai, has successfully passed the B A. examination with double honours in English and Philosophy, while the third and fourth wards are now in the second-year class of the Presidency College. The Lieutenant-Governor has perused the following passage of the Board's report regarding the eldest ward with much pleasure:—"It is believed that his future career will show that the care bestowed on his education by the Court of Wards was not thrown away. He fully appreciates the system of management of the Court, and it is expected he will pursue that line of conduct which the Government hopes and expects from zamindars who have the interest and good of the people at heart."

15. The number of estates managed during the year, under the Chota Nagpur Encumbered Estates Act VI of 1876, was 55, being the same as in the preceding year. Three estates were released during the year, and one was brought under protection during the year. The following statement shows the demands, collections, and balances for 1893-94:—

District.	Arrear demand.	Current demand.	Collections.	Percentage of collections on current demand.	Remissions.	Balances.	Advance collections on account of the ensuing year.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.		Rs.	Rs.	Rs.
Hazaribagh	42,380	94,434	96,921	102·6	8,992	30,901	26,986
Lohardaka	59,506	91,607	92,369	100·8	2,094	56,650	124
Palamau	4,868	15,697	16,930	107·8	373	3,262	.....
Manbhum	31,122	95,619	85,116	89·0	1,241	40,384	129
Singhbhum	1,60,450	87,347	73,424	84·2	8,882	1,05,491	30
Total ..	2,98,326	3,84,704	3,04,760	94·8	21,582	2,96,688	21,278

16. The progress made in the liquidation of debts is shown in the following statement:—

District.	Due at the commencement of the year.	Ascertained and incurred during the year.	Total.	Payments.	Reduction by compromise.	Balance due at the close of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh ...	6,51,832	28,070	6,79,902	2,42,656	11,761	4,25,485
Lohardaga ...	2,24,995	7,607	2,32,602	39,382	100	1,93,120
Palamau ...	1,21,563	2,726	1,24,289	12,235	.....	1,12,054
Manbhum ...	2,18,057	12,521	2,30,578	32,008	.....	1,98,570
Singhbhum ...	1,77,565	6,131	1,83,696	20,959	.....	1,62,737
Total ...	13,94,012	57,055	14,51,067	3,47,240	11,861	10,91,966

It is not possible to gather from the facts and figures contained in the Board's report to what extent the schemes of repayments of debts were carried out in each district, and it would be well if a column were added to the above table to show what portion of the total debts fell due, under the scheme of repayment, to be discharged within the year. The Manbazar estate in Manbhum is mentioned as having been deficient in this respect, but it is not stated how far the payments fell short of the provisions of the scheme for liquidation of debts of this estate.

17. The Lieutenant-Governor desires to thank the Board of Revenue for their successful management of the estates under their charge. The names of the officers who are specially commended by the Board will be noted in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

REVISED RULES FOR THE REGULATION OF APPOINTMENTS IN THE SECRETARIAT CLERICAL SERVICE OF THE GOVERNMENT OF BENGAL AND ATTACHED OFFICES.

FINANCIAL DEPARTMENT.—MISCELLANEOUS.

Darjeeling, the 10th October 1894.

RESOLUTION No. 364T.—F.

READ—

The Resolution of the Government of India, Home Department, No. $\frac{2 \text{ Exam.}}{188-199}$, dated the 5th June 1894.

Read again—

The Resolution of this Government in the Appointment Department, dated the 16th March 1889.

The system laid down by the Government of India for the regulation of appointments in the clerical service of the Secretariat of that Government and of its attached offices was extended to the same service of the Government of Bengal by the Appointment Department Resolution quoted in the preamble. The rules of the Government of India on the subject were adopted for the Bengal clerical service with some slight modifications, and competitive examinations (to be held simultaneously with those for appointments under the Government of India) were prescribed for candidates desirous of employment under the Government of Bengal. An essential part of this scheme was the separation of the clerical service into two Divisions—an Upper and a Lower; the minimum limit of pay for the former being fixed at Rs. 100, and appointments carrying pay below that sum being comprised in the latter.

2. By their recent Resolution cited in the preamble, the Government of India, while retaining the rules for the examination and appointment of candidates for the Lower Division, have abolished the examination for the Upper Division, the passed candidates appointed to vacancies in that Division having proved unequal to the duties with which they were entrusted; and it has been ruled that in future vacancies in the Upper Division will ordinarily be filled by the promotion of men already serving in the Lower Division.

3. The experience of the Government of India in respect of the Upper Division appointments appears to be more or less that of the heads of offices and departments in Bengal, who, as a rule, have been unwilling to appoint to vacancies in the Upper Division men who were selected for their success in a competitive examination, but have no experience in office work. At the same time, the number of candidates for appointments in the Upper Division has been much less than was expected. The Lieutenant-Governor, therefore, considers that in Bengal also an Upper Division examination need not be maintained. It seems to him, moreover, that this examination being abolished, the separation of the offices into two divisions will be no longer necessary. The distinction between the Upper and the Lower Division, by pay only, and not by class of work, has been purely arbitrary, and hardly designates any real difference in the demand for special ability. The divisions will accordingly cease to exist. There will be a single examination for admission into the clerical service, and promotion will be given throughout each office according to seniority and merit combined, subject, however, to the recognized proviso that the head of the office may introduce outsiders into appointments requiring special experience or fitness, when they cannot be suitably filled in the office itself. It is necessary also that a proportion of the vacancies should be reserved for the appointment of registered apprentices, and of European and Eurasian candidates, who should receive some appointments, and this proportion is fixed at one-third. The remaining two-thirds of the vacancies will be open to the successful candidates at the examination held under the rules appended to this Resolution.

4. The clerical service rules have hitherto been in operation in certain specified offices in the mufassal as well as in Calcutta; but it has been found that passed candidates are generally unwilling to accept appointments on small pay out of Calcutta, while, on the other hand, the pay which will tempt passed candidates to accept posts in the mufassal is generally sufficient to secure a more experienced man locally. In these circumstances the Lieutenant-Governor considers that the mufassal offices which have hitherto been under the operation of the clerkship rules may well be left outside their scope for the future.

5. The rules framed under the Appointment Department Resolution of 1889 have been revised in accordance with this Resolution, and are now republished for general information. They will come into force with effect from the date of publication in the *Calcutta Gazette*, and will apply only to the offices named below. All other officers are left free to make their own arrangements for filling up vacancies: —

1. The Bengal Secretariat.
2. The office of the Board of Revenue.
3. Ditto Inspector-General of Jails.
4. Ditto ditto of Police.
5. Ditto ditto of Registration.
6. Ditto ditto of Civil Hospitals.
7. Ditto Director of Land Records and Agriculture, Bengal.
8. Ditto Sanitary Commissioner.
9. Ditto Superintendent of Emigration and Protector of Emigrants.
10. Ditto Superintendent of Stamps and Stationery.
11. Ditto Collector of Calcutta.
12. Ditto ditto of Customs, Calcutta.
13. Ditto Commissioner of Excise.
14. Ditto ditto of the Presidency Division.
15. Ditto Superintending Engineer, South-Western Circle.

ORDER.—Ordered that this Resolution, together with the revised rules, be published in the *Calcutta Gazette*, and that a copy of each be forwarded to the heads of the offices concerned, to all Departments of this Government, and to the Accountant-General, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Offg. Secretary to the Govt. of Bengal.

Rules for the Regulation of appointments in the Clerical Service of the Secretariat of the Government of Bengal and of the attached offices.

1. The Clerical Service of the Secretariat of the Government of Bengal and of the attached offices will no longer be divided into two sections, the Upper and the Lower Division. Promotion will in future be regulated throughout each office by seniority and merit combined. The head of the office will, however, retain the power of introducing outsiders into appointments requiring special experience or fitness, when they cannot be suitably filled by promotion in the office itself.

2. An examination of candidates for the Clerical Service will be held in communication with the Government of India in Calcutta in January of each year. Subject to the permission of the Government of India, the arrangements for the examination will be made by the Board of Examiners, Fort William, who will be assisted by paid Examiners, and will act in communication with the Financial Secretary to the Government of Bengal. Before the examination commences, a distinguishing number will be given by the Secretary to the Board of Examiners to each candidate, with which he will mark each of his papers of answers.

3. There will be a preliminary test in dictation and handwriting which candidates must satisfy. The examination in these subjects will not be competitive, but marks will be assigned for the purpose of testing proficiency. The papers of candidates will be examined as soon as possible after this examination, and the Examiners will require any candidate who

fails to obtain two-third marks in each subject to withdraw from the further examination. The remaining subjects will be—

	Marks.
(1) English composition	100
(2) Précis-writing	100
(3) Geography	50
(4) History (English and Indian)	50
(5) Arithmetic: Euclid, 1st book, and Algebra up to Simple Equations	50

Any candidate obtaining less than one-fourth marks in either subject (1) or subject (2) shall be disqualified, and no candidate will be credited with any marks in subject (3), subject (4) or subject (5) unless he obtains one-fifth of the marks in that subject.

4. Candidates who have passed the Entrance Examination of an Indian University, or, in the case of Europeans and Eurasians, by standard VII prescribed by the Code for European Schools, will alone be admitted to the examination. Every candidate for an appointment must send a written application for permission to appear at the examination to the Secretary to the Board of Examiners between the date of issue of the notification announcing the number of vacancies to be competed for (*vide* Rule 6), and the sunset of the 15th day of December (inclusive).

[FORM.]

To the Secretary to the Board of Examiners,
Fort William.

SIR,

I REQUEST permission to present myself at the ensuing examination of candidates for appointments in the Clerical Service of the Secretariat of the Government of Bengal and the attached offices.

2. If successful, I should elect to serve in the office of the

3. A treasury receipt for the fee of Rs. 10 is forwarded herewith.

I am, &c.

5. The application under the last rule should be in the form given in the margin, and must be accompanied by a treasury receipt for the sum of Rs. 10. This sum the candidate is required to pay into the treasury nearest his place of residence by way of examination fee. With the application must also be forwarded—

(1) The candidate's certificate of the Entrance or any higher University Examination, or of standard VII prescribed by the Code for European Schools.

(2) Evidence (except in the cases provided for by Rule 7) that the candidate at the date of making his application is not less than 18 and not more than 24 years of age. The date of the candidate's birth must be stated.

(3) In case the candidate has been educated at a school in which students' good-conduct registers are kept, and in case a year has not elapsed since he left school, a copy of the candidate's register for the last year of his attendance at school certified by the Head Master. In other cases a certificate that the candidate is of good moral character, from the head of the institution in which he has last been educated, or from some respectable house-holder to whom he is well known in private life, and who is himself known to a District or Sub-divisional Magistrate or to the head of some Government office—this last fact being certified by the countersignature of the officer in question.

(4) A certificate from a Government Medical Officer of or above the rank of Surgeon-Captain, that the candidate is in good health and of sound constitution.

6. The number of candidates to be selected by the examiners will be notified in the *Calcutta Gazette* on or before the 31st October. This number will be determined in communication with the heads of the offices concerned, with reference to the number of vacancies existing or estimated as likely to occur within the course of the following year, plus a margin of 10 per cent for casualties.

7. Persons who have at any time held a permanent appointment in any of the offices affected by the Resolution, but who may have lost such appointment owing to its abolition or on reduction of establishment, may present themselves for examination under these rules, provided they are under 40 years of age on the day of the examination.

8. As soon as practicable after the open competitive examination, the Board of Examiners will report the result to the Financial Secretary to the Government of Bengal. The report will take the form of a list giving the names of selected candidates, and the exact dates of their births; the distinguishing numbers of unsuccessful candidates; and the number of marks obtained by each candidate, whether successful or unsuccessful, in each subject of examination. The Financial Secretary will then circulate a list of selected candidates to the heads of the offices concerned. Candidates will be given their choice of departments as far as possible, and the Financial Secretary will intimate such choice, if made, to the head of each office. The head of each office will, however, be at liberty to offer a vacant appointment which may occur in his office to any selected candidate on the list. This offer should be made through the Financial Secretary, who will keep each office informed as the names of selected candidates are removed from the list. No candidate selected in a later year shall be offered an appointment until the offer has been made to, and refused by, the selected candidates of an earlier year remaining on the list.

9. The name of a candidate shall be removed from the list in the following circumstances:—

(*a*) If he is not already in service—when he reaches the age of 25 years.

(*b*) When he has twice refused an appointment in any Department, or when two years have elapsed from the date of entry of his name in the list.

10. One-third of the vacancies in each office may be filled up by the head of the office from the registered apprentices or by the appointment of outsiders. The remainder will be reserved for the successful candidates at the Clerical Service Examination. If, however, such a candidate is not available for any vacancy, it will be at the disposal of the head of the office.

11. Appointments of men not in the list of successful candidates of the Clerical Service shall, if the person appointed is not already in Government service, be made subject to the conditions that such person—

(*a*) is at the time of appointment not less than 18 and not more than 25 years of age;

(*b*) produces satisfactory evidence that he possesses a minimum educational qualification equivalent to the Entrance standard of one of the Indian Universities;

(*c*) produces similar evidence that he is of good moral character;

(*d*) produces a certificate from a Government Medical Officer of or above the rank of Surgeon-Captain, to the effect that he is in good health and of a sound constitution.

12. An officer already in Government employ may be appointed to any vacancy without regard to the qualifications specified in the preceding rule.

13. Every candidate, whether selected by examination or otherwise, who receives an appointment, will be on probation for twelve months, and if at any time during that period or at its close his work is not considered satisfactory by the head of the office in which he is employed, he may be discharged and will have no claim to gratuity or compensation. If, however, he was admitted from another office, he may be relegated to his former appointment, or, so far as may be practicable, transferred to another appointment of the same pay. To provide for such cases, arrangements should be made by which promotions in the place of the transferred clerks should be sub. *pro tem.* until the latter have passed their period of probation.

14. The above rules will apply to the Secretariat offices of the Government of Bengal, to the offices of the—

Board of Revenue,
Commissioner of the Presidency Division,
Inspector-General of Jails,
Inspector-General of Police,
Director of Land Records and Agriculture,
Inspector-General of Registration,
Inspector-General of Civil Hospitals,
Sanitary Commissioner,
Superintending Engineer, South-Western Circle,
Superintendent of Emigration and Protector of Emigrants,
Collector of Customs,
Superintendent of Stamps and Stationery,
Collector of Calcutta,
Excise Commissioner,

and to such other offices at Calcutta under the Government of Bengal as may hereafter be notified.

15. These rules shall take effect from the date of their publication in the *Calcutta Gazette.*

16. Copies of these rules may be obtained on application at the office of the Financial Secretary to the Government of Bengal, Calcutta.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE HOWRAH BRIDGE FOR 1893-94.

No. 2255Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 11th October 1894.

RESOLUTION.

READ—

The Administration Report of the Howrah Bridge for 1893-94.

The following statement shows the actual receipts and expenditure of the bridge during the year under review, as compared with the previous nine years:—

2. The income during the year amounted to Rs. 1,55, 217, being less than that of the previous year by Rs. 7,282. This was due mainly to the transfer of the steam-tug *Hetty* to the port during half the year. The receipts from the tug showed a falling off of Rs. 6,932, as her earnings for six months only were credited to the bridge account. Railway traffic showed an increase of Rs. 955 over the receipts of the previous year. The Corporation of Calcutta has not yet repaid the sum of two lakhs, which was advanced to that body in connection with the construction of the Harrison Road as a loan without interest from the reserve fund.

3. The expenditure amounted to Rs. 14,043, showing a decrease of Rs. 15,253 as compared with that of 1892-93. The wearing surface of the bridge was maintained in thorough order, a large quantity of the surface planks and battens having been renewed. The wood used for the wearing surface, which was specially imported by the Commissioners from Johor near Singapore, has been found most suitable for the purpose. The superstructure, timbers, fenders, sheathings of pontoons, were repaired and renewed as found necessary and all the other works which were found to be necessary to keep the bridge in thorough order were carried out.

4. As in the previous year, in addition to the ordinary receipts, the following sum, which may be classed as extraordinary, was received:—

	Rs.
Interest on Government securities of pontoon renewal fund ...	2,000

The corresponding expenditure under the same head was—

Sinking fund on loan	3,458

5. The cost of lighting the bridge with electricity was, during the year under review, Rs. 9,137, against an estimate of Rs. 6,400. The annual working expenses of this system of lighting were originally estimated at Rs. 4,660, as against Rs. 5,448, the cost of lighting the bridge with gas. In 1892-93 the charges amounted to a sum of Rs. 12,386, as compared with Rs. 4,591 during 1891-92, when electric lighting was not introduced. The large expenditure was explained to be due to certain abnormal charges which were not likely to recur, and it was further added that with the experience gained, the cost of working could be reduced to Rs. 6,400 per annum. The working expenses during the past financial year, have, however, considerably exceeded this estimate, and the Lieutenant-Governor observes that no reason has been assigned for it, nor any detailed account given. This must not happen again.

6. The bridge was opened for the passage of vessels on 146 occasions during the year, of which 104 were on the ordinary fixed days of the week, and 45 were on Sundays, on special application. The number and description of vessels which passed though the bridge on these occasions are given in the table below:—

	1893-94.	1892-93.	1891-92.	1890-91.	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
1	2	3	4	5	6	7	8	9	10	11
Sea-going vessels	291	309	254	414	362	380	331	295	366	403
Inland steamers and flats	1,060	1,129	1,400	1,059	941	878	899	848	1,102	944
Steam-tugs	549	453	306	540	491	456	397	387	406	342
Port Commissioners' vessels	161	183	66	92	53	20	46	56	69	56
Government steamers and flats	2	...	...	5	16	7	6	10	6	10
TOTAL ...	2,063	2,074	2,086	2,110	1,863	1,741	1,679	1,596	1,949	1,755

7. One sea-going vessel collided with the bridge, and there were 77 collisions of other vessels, against 52 in 1892-93 (the lowest number on record), and 95 and 149 in 1891-92 and 1890-91, respectively.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 13th October, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
DURWAN DIVN. 1	Burdwan Oct. 13, '94	1·21	Weather—seasonable. Harvesting of *aus* continues. *Aman* and sugarcane doing well. Fodder and water sufficient. Prices of common rice:—
	Kalna ...	Nil	
	Katwa ...	Not reported.

The extreme variation of temperature	13·6
The maximum temperature	88·4
	Miles.
The highest velocity of the wind in one hour	10
	%
The mean relative humidity	88
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	81
	Inches.
The total fall of rain from 7th to 13th October 1894	1·65
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·38
The total fall from 1st January to 13th October 1894	44·64
The average fall of the corresponding period for 24 years, Surveyor-General's Office	61·95

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; t, thunder; ⌓, dew; d, drizzling rain.

* Mean of 6 days.

Explanation.—Summary—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the
The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The
mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisions[illegible]

for the week ending Saturday, the 13th of October 1894.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th May 1894. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·10 inch of rain has fallen.

CALCUTTA, *the 16th October* 1894.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 13TH OF OCTOBER 1894.

DURING the previous week Bengal had been affected by two barometric depressions or feeble cyclonic storms. The second feeble storm had formed on the 2nd instant in the north-west angle of the Bay, and had rapidly moved in a north-westerly direction through the extreme western districts of the province into the North-Western Provinces, and had broken up at the close of the week probably not far from Naini Tal. The small storm had as usual brought up with it another but rather light advance of south-west monsoon winds, and thus at the close of the week conditions were of light monsoon character over the whole province, and a moist south-easterly and easterly wind current was flowing freely inland from the Bay.

On the 7th pressure in Bengal had risen slowly at all except a few stations in the extreme south-east of the province, and it had become very uniform, while it was still in small to moderate defect. The south-easterly and easterly winds were on this day being partly driven back by an advancing north-westerly wind current, and northerly winds were appearing in South-West Bengal and Orissa, while north-westerly winds were blowing at many of the stations in Bihar and Chota Nagpur; over the remainder of the province also winds were becoming irregular in direction. Hence with the partial withdrawal of the moist easterly winds general rainfall ceased, but owing to the feeble interaction which was taking place, local showers were falling, and in some cases the local falls were heavy. On the 8th the conditions which had become established on the 7th became more pronounced, pressure had again risen, and the north-westerly and northerly winds had extended to the great majority of stations, and again only local showers were reported over the greater part of the province. On the 9th, however, these conditions were partially reversed, pressure began to fall at the western stations, though it continued to rise over the remainder of the province. Pressure became relatively low in the Central Provinces and also along the west coast of the Bay, and a moist easterly and south-easterly wind current set in over the province, driving back the north-westerly and northerly winds, and hence again on the 9th fairly general rain began to set in over the whole province. On the 10th pressure had continued to fall over the northern half of the province, though it was still rising over the southern half, and while pressure was in excess over the south-eastern districts by amounts ranging up to 0·073″ at Chittagong, it was in defect at the northern, north-western and western stations by amounts ranging up to 0·08″ at Buxar. The very strong easterly element in the wind directions which had been established on the 9th began to give way again slightly on the 10th, on which day winds were more generally southerly. Rainfall had, however, been reported generally over the province on the 10th. On the 11th pressure had fallen slowly to moderately over the whole province, and had become in defect by amounts ranging up to a tenth of an inch at Buxar, while on the other hand very slight excess temperatures were recorded at the extreme south-western stations. The easterly element in the wind directions had again given way, and southerly and south-westerly winds were generally blowing, and with the further disappearance of the easterly winds rainfall had again become less general except at the eastern stations, and those near the hills. On the 12th pressure had risen in the west of Bihar, while it had fallen elsewhere. A feeble tendency towards a cyclonic circulation of winds was set up in Bihar, but over the remainder of the province winds were southerly and south-westerly. Conditions were therefore disturbed in Bihar, and heavy rain was reported there and in North Bengal and Assam, while showers only occurred in the south of the province. On the 13th, or the last day of the week, pressure had again risen over the western half of the province and fallen over the eastern half, and a diffused low pressure area existed over Central and South-West Bengal, while winds also became irregular and perhaps slightly cyclonic in direction. The area of lowest pressure was, however, retreating southwards and carrying the disturbed weather with it, but on this day moderate general rain was received in practically all districts.

Pressure has been below the normal for the greater part of the week, and the mean pressure has shown a considerable defect. The variations have been largest at the stations in the west of Bihar, where the defect has equalled about 0·06 inch and 0·07 inch at such stations as Dehri, Buxar, Arrah, and Motihari, while at the southern and south-eastern stations the defects were very small and pressure was almost normal. Indeed, at Chittagong and Silchar slight excess pressures have been registered. For the whole province of Bengal the general defect has equalled about 0·04 inch, and in Assam it has equalled only 0·018 inch.

Temperature has been decidedly high almost throughout the week, and the average mean temperature of the province has been in excess by one degree. The largest excess amounts of about two degrees have been registered in North Bengal and Bihar, while on the other hand temperature has been fairly normal in East and South-West Bengal and Orissa.

In Assam the mean temperature has averaged 0·5° in excess.

Rainfall.—The heaviest falls have occurred in Bihar, which has received an average amount of two and-a-quarter inches. North Bengal has received rather less, the average fall having been 1·96 inches. In the remaining divisions of South-West Bengal, East Bengal, Orissa, and Chota Nagpur, the falls have averaged a little less than an inch in each case.

The falls have been rather largely in excess in Bihar and North Bengal, about normal in South-West Bengal and Chota Nagpur, and decidedly in defect in East Bengal and Orissa. In all divisions, however, even in those cases where the actual falls have been largely below the normal, the number of rainy days in the week has been larger than usual, and hence it would appear that, though lighter than usual, the showers have been decidedly more numerous.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 85 per cent., North Bengal 183 per cent., East Bengal 60 per cent., Bihar 189 per cent., Orissa 57 per cent., and Chota Nagpur 87 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 110 per cent. of the normal.

In Assam during the week Silchar has received 3·19 inches of rain, Dhubri 1·34 inches, nd Sibsagar 0·64 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 13th of October 1894:—

Meteorological Divisions.	Temperature.						Rainfall.									
			Averages for week.				Of week.			Rainy days.			Since 1st of month.		Since 16th May 1894.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR THE YEAR 1893-94.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 23rd October 1894.

RESOLUTION No. 107T G.

READ—

The Annual General Administration Report of the Orissa Division for the year 1893-94.

Mr. Cooke held charge of the Division throughout the year, and his Report, which is concise and tersely written, gives an interesting account of the subjects to which he and his Collectors devoted their attention during their tours of inspection. It does not, however, contain many such pregnant suggestions for administrative reforms as have been brought forward in the reports from some other divisions.

2. Mr. Stevenson held charge of the district of Cuttack throughout the year, with the exception of a brief interval of privilege leave. Mr. Cornish closed his long connection with Balasore towards the end of March 1894, and was transferred on grounds of ill-health to Bankura. Mr. Walsh, District Magistrate of Puri, took furlough from December 1893, and was succeeded by Mr. Coxe. There was practically no change in any of the four sub-divisions in the Division. The Lieutenant-Governor has much pleasure in acknowledging the good work of Messrs. Stevenson and Cornish, and their assiduous care of the interests of the districts which they have administered so long.

3. The attempt to introduce a system of maintenance of the settlement record in Khurda (discussed in paragraph 16) was actively carried on, but the general conclusions seem to be that the record had been allowed to get too

much out of order, and must be put right once for all before a system of regular mutation of names as changes arise can be carried out.

4. The Lieutenant-Governor is glad to notice, in paragraph 32 of the Report, the intelligent and painstaking enquiry made by Mr. McPherson, Sub-divisional Officer of Khurda, into the condition of the people in that sub-division. The question of the result of giving free right of transfer or mortgage to raiyats is one of the most important questions of the day, and Mr. McPherson is right in saying that the coming re-settlement ought to be used so as to throw light on it. His conclusion that the unskilled labourers' wages have not risen in spite of the rise in prices, and that the numbers of the landless classes are rapidly increasing, will probably be agreed in by those who have made similar enquiries in tracts far from any large centre of employment such as towns and factories. In his 191st paragraph the Commissioner has reverted to this subject, and expresses a doubt whether the day labourer in Orissa is as badly off as is supposed. He quotes the remarks of "an officer who has good opportunities of observing that many of this class are not free agents, that they have as a rule taken advances from a cultivator or a contractor and cannot leave such service, and that better wages will not tempt them to do so unless the temptation of an advance is added. The same officer adds that this position of semi-slavery enables the employer to obtain their services much below the wage that would be paid by another person, and that the labourers are ground down to the lowest scale that is consistent with their survival." Mr. Cooke holds that this is the possible explanation of the fact that wages do not rise in Orissa, as has been pointed out by Mr. McPherson and others.

5. His Honour would have been glad if more information had been given on the subject of salt administration, which is one of the specialities of the Orissa Division. It would have been useful if in paragraph 40 statistics had been given of the number of prosecutions and the punishments inflicted for illegal manufacture and possession of salt, a matter to which much public attention has been turned of late, and on which much nonsense has been written.

6. The remarks in the end of paragraph 62 betray the same curious confusion of mind between judicial interference and executive interference with the proceedings of a Subordinate Magistrate which the Lieutenant-Governor has not infrequently observed elsewhere. It is a common mistake to think that, if a Magistrate sitting as an Appellate Court corrects a judgment of a lower Court, he is acting judicially and rightly, but if he pays a visit of inspection and points out errors to his subordinates, he is interfering as an Executive officer and acting wrongly. In the Lieutenant-Governor's opinion he is acting rightly and judicially in both instances: in the one case he is curing the defects of the past, in the other he is providing a remedy against their occurrence in future. The Government circular No 4116J., dated 29th August 1893, referred to the publication of censure on judicial action, not to the advice which an experienced Magistrate is entitled to give to inexperienced subordinates. In the particular case in point, His Honour considers that the Magistrate of Cuttack was quite right in advising the Bench of Honorary Magistrates to guard against the indiscriminate summoning of accused persons unless the complaint is *primâ facie* valid.

7. *Paragraph* 75.—Great delay has occurred in connection with the land acquisition work for the East Coast Railway; but the Lieutenant-Governor regrets to see that the Report is silent on the subject. It would have been useful if the Commissioner had shown what rate of compensation has been awarded per mile as compared with the original estimate, how that rate was composed, how much was paid to proprietors, tenants, &c., and on what basis it was calculated. It should also have been stated how long the Deputy Collector has been engaged on this work, what portion is finished, and what still remains. This is a class of work which requires close inspection and is too much left without supervision.

8. The Lieutenant-Governor regrets to find in the Commissioner's Report such a sentence as the following quoted from the Collector of Cuttack:—"I have reason to believe that the raiyats' real complaint is that they are not given water when they want it, and they not unnaturally ask, why should we pay for what is not given as required, but at the sweet will and pleasure of the canal officers? Especially do they complain that they do not get water to irrigate their lands so as to render them fit for ploughing. They say that the rule is to supply no water till the crop is growing, while in a season like the present, when there has been no rain for some months, water is urgently needed

for preliminary cultivation." Mr. Stevenson has since explained that his intention was only to quote complaints he had heard, not to endorse them as supported by himself. The fact is that the supply in the Mahanadi in the hot weather is not sufficient to admit of water being given for ploughing, and is but barely sufficient for the purposes of navigation. The credit and the interests of the Canal officers are involved in their success in encouraging the spread of irrigation. With their enormous *clientèle*, and the climatic fluctuation in the rains, there must be occasional delays; but the idea that they give or refuse water "at their sweet will and pleasure" can only spring up in the minds of a few malignant or ignorant persons. It is believed that the opening of the new head sluice for the Kendrapara Canal, and the alteration in the shutters of the Baitarni weir, will do much to remove the difficulty in the supply of water which is complained of.

9. The Lieutenant-Governor is glad to notice in paragraph 89 that a sum of nearly Rs. 24,000 was spent in the Kanika Estate in Cuttack on the repairs of the embankments which were destroyed by the cyclone of May 1893, but regrets that the Commissioner has not dwelt at greater length on the subject of improvements in Wards' estates throughout the Division, on which upwards of Rs. 41,000 were spent. His Honour surmises that the expenditure was chiefly on embankments. A scheme of complete embankment on the sea side of the Kujang Estate should now be prepared with the approval of the Irrigation Department. The collections in this estate, both in this and the previous year, were extremely bad, and no explanation of the cause is given in paragraph 88.

10. The Lieutenant-Governor concurs in the suggestion made in the latter part of paragraph 106 of the Report, that the Assessors of income-tax ought to learn the figures in Gujrati and Marwari to enable them to form a fair estimate of the incomes of large traders whose accounts are kept in those languages. The attention of the Board of Revenue will be specially drawn to this matter.

11. *Paragraphs* 114-120.—The subject of providing accommodation for pilgrims at Puri under the Lodging-house Act IV (B.C.) of 1871 is one of the most important questions peculiar to Orissa which the Commissioner and his officers have to deal with. The Lieutenant-Governor approves of the proposal "to erect at Puri" (and also along the road between Puri and Cuttack) "corrugated iron shelters which, while not competing with the licensed lodging-houses, will afford protection to numbers of pilgrims who cannot be accommodated in lodging-houses, even had they the means to pay for accommodation." It would be useful if the Commissioner could see his way to supply statistics of the number of pilgrims to Puri. As almost all those who come by land enter by one road, it should not be difficult to establish a registering station to record the statistics. Though the Puri Lodging-house Act was extended to Jajpur town in September 1890, it has not yet been enforced owing to the bye-laws and model rules not having been sanctioned. The Commissioner should see that no further delay occurs in the submission of these bye-laws and rules for the final sanction of Government.

12. The Lieutenant-Governor regrets the decrease in the number of schools and pupils under the head of Public Instruction, noticed in paragraphs 122 and 123 of the Report. According to the Report there has been a net decrease of 2,399 scholars in the Division, which is surprising, as the recent Resolution recorded on education under Municipalities and District Boards placed this Division very high in respect of the number of scholars. The Lieutenant-Governor has noticed with satisfaction the liberality of Babu Satyendra Nath De, who has instituted scholarships at Balasore for proficiency in gymnastics.

13. *Paragraphs* 165 *and* 166.—The Lieutenant-Governor is glad to notice the marked improvements in the District Board and Municipality of Puri as compared with the state of things that existed last year. His Honour concurs with the Commissioner in attributing the improvements in the Puri Municipality to the Chairman, Dr. Banks, who has devoted himself to his duties with marked and untiring energy.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR 1893-94.

No. 993R., dated Cuttack, the 7th July 1894.

From—H. G. Cooke, Esq., Offg. Commissioner of the Orissa Division,

To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the following Report on the General Administration of the Orissa Division for the year 1893-94. The subjects have been arranged in accordance with the instructions contained in Government order No. 762, dated 24th February 1893.

2. The district reports were received in this office on the dates mentioned below against each:—

Cuttack	...	1st June 1894.
Balasore	...	30th May ,,
Puri	...	8th June ,,

Complete information was not received from-

Cuttack till	...	29th June 1894.
Balasore ,,		30th ,, ,,
Puri ,,		5th July ,,

I.—CHARGE.

3. The subjoined tables give the details of such changes as occurred in the divisional, district, and subdivisional administration during the year under report:—

(a) Commissioner.

Division.	Name of officer.	From—	To—
1	2	3	4
ssa ...	Mr. H. G. Cooke ...	1st April 1893 ...	31st March 1894.

(b) District officers.

District.	Name of officer.	From—	To—
1	2	3	4
Cuttack ...	Mr. G. Stevenson ...	1st April 1893...	29th July 1893.
		31st October ,, ...	31st March 1894.
	,, E. H. Walsh ...	30th July ,, ...	30th October 1893.
Balasore ...	,, R. Cornish ...	1st April ,, ...	8th July ,,
		9th October ,, ...	14th March 1894.
	,, S. L. Maddox ...	9th July ,, ...	8th October 1893.
	,, L. P. Shirres ...	15th March 1894...	26th March 1894.
	,, C. H. Bompas ...	27th ,, ,, ...	31st ,, ,,
Puri ...	,, E. H. Walsh ...	1st April 1893...	22nd July 1893.
		4th November ,, ...	30th November ,,
	,, A. C. Sen ...	23rd July ,, ...	3rd ,, ,,
	,, H. R. H. Coxe ...	1st December ,, ...	31st March 1894.

(c) *Subdivisional Officers.*

Subdivision.	Name of officer.	From—	To—
1	2	3	4
Cuttack. Jajpur	Babu Monmohan Chakravarti ...	1st April 1893 ...	31st March 1894.
Cuttack. Kendrapara ...	„ Nabin Chandra Das ...	Ditto ...	Ditto.
Balasore. Bhadrak ...	„ Nagendro Nath Ghose ...	Ditto ...	Ditto.
Puri. Khurda ...	Mr. S. K. Agasti	Ditto ...	17th April 1893.
	„ H. McPherson	18th April 1893 ...	31st March 1894.

The year's administration was characterized by unusual changes in the personnel of the District Officers, especially in Balasore and Puri. The subdivisions of Jajpur, Kendrapara, and Bhadrak fared better, there being continuity in the incumbency of the officers in charge of them.

II.—TOURS AND INSPECTION OF OFFICES.

4. The details of the tours made by the officers of this Division are shown in the following tables:—

(a) *Commissioner of the Orissa Division (and Superintendent of Tributary Mahals).*

Name.	Number of days on tour.												Total.
	April 1893.	May.	June.	July.	August.	September.	October.	November.	December.	January 1894.	February.	March.

5. My tour as Commissioner and Superintendent of Tributary Mahals extended over 134 days, of which 78 days were spent in the Tributary Mahals, an account of which will be given in the Annual Administration Report of those mahals, and 56 days in the regulation districts. Of this, 27 days were devoted to inspection in the Puri district, 18 days in the Balasore district, and 11 days in the subdivisions of the Cuttack district.

6. I started for Puri on the 12th May 1893, and *en route* at Pipli discussed settlement work with the Assistant Settlement Officer, Mr. Nathan. I reached Puri on the 15th. On the 16th I inspected the jail, the pilgrim hospital and dispensary, and began office inspection in all its branches, which I concluded on the 30th May 1894.

7. My tour of the Balasore district commenced on the 22nd July 1893. I got to Balasore on the 24th, and on the 25th visited the jail, pilgrim hospital, and the Raja Shyamanand Dé dispensary. I also availed myself of an interview with Raja Boikunth Nath De Bahadur, Chairman of the Municipality, to discuss with him municipal and other matters. Excluding three days, from 28th to 30th July 1893, during which I paid a visit to the Tributary State of Nilgiri, I occupied myself up to the 5th August in inspecting the distillery, the Collector's and Magistrate's offices in all their branches, the municipal office, the zilla school and the District Board's and sub-registry offices. On my way back to head-quarters I visited the Bhadrak subdivisional office, which I inspected from the 7th to the 8th August 1893.

8. The Kendrapara subdivisional office was inspected in October 1893 in all departments, including the sub-treasury and sub-registrar's offices, Municipal, Local Board's, fauzdari, and excise offices.

9. The inspection of the Khurda subdivision was undertaken in November 1893. I reached the subdivisional head-quarters on the 7th, on which date the offices being closed, I accompanied the Subdivisional Officer to a neighbouring village (Minchin Patna), where I saw the state of the crops and irrigation works there. On my way back to Khurda, I was shown the practical working of the proposed alterations in the milan khasra rules. At Khurda I inspected the sub-jail, charitable dispensary, and sub-treasury. The District Officer having concluded a very protracted inspection less than two months before, and the Subdivisional Officer's own inspection having been concluded less than a week before on 4th November 1893, it was not thought expedient to make a detailed inspection. I therefore confined myself to dealing with points that struck me as requiring attention when I inspected in March 1893, and to

questions which had arisen in the course of the Collector's and the Sub-divisional Officer's inspections, and on such matters of peculiar interest as *milan khasra*.

10. The year's inspection work closed with a visit to Jajpur subdivisional office. On the 9th and 10th of March 1893, all the different departments, including the Municipal and Local Board offices in this sub-division, were dealt with.

11. All the District and Subdivisional Officers were in camp for periods in excess of the prescribed amount of touring, and their tours appear to have been pretty well distributed throughout the year. The tours of Mr. McPherson, the Subdivisional Officer, are most interesting and important, as will appear from the extract given below.

12. The following extracts from the district reports show how the camping time was spent in each district. The Collector of Cuttack writes:—

"In June I proceeded to Kendrapara and in July to Jajpur for the half-yearly inspections of the subdivisional offices and the sub-treasuries, the sub-registry, Local Board and Municipal offices, and all other public institutions situated at the subdivisional head-quarters.

"In November I toured through Kanika, visiting also that portion of the estate which lies on the north bank of the Baitarni river in the Balasore district, and inspected the Manager's office and the settlement office, discussing with the Manager sundry matters connected with the settlement of the estate. A combination had been formed by some of the tenants, incited by certain mustajirs, to resist the new settlement, and I interviewed large bodies of them at Ganja and elsewhere. It was clearly explained to them that they were being leniently treated, and that if there were any trouble the mustajirs themselves would be the first to suffer. Eventually the combination was broken up and the new rates introduced without trouble. The schools and the newly-opened dispensaries at Ghanteswar and Rajnagar were also inspected, and the state of the Kanika embankments and flood damages ascertained.

"In this tour I also visited Aul, inspecting, as usual, the thana, pound, kanungos' offices, &c. I discussed with the Raja some boundary questions pending as between killas Aul and Kanika, and got him to agree to an amicable settlement in place of a law suit. The Government Pleader, as a mutual friend of both Raj families, has been good enough to agree to assist, and I have asked him to conclude the matter, if possible, before the present Manager leaves Ganja.

"In December I visited the tracts along the High Level Canal and Jaganath road. I inspected the outposts at Tangy and Barachana (finding that at Khandittar just closed, it having been abolished, as were Barachana and Tangy soon after), thana Dharmasala, and Dharmasala District Board dispensary; also all the *chatties* on the Trunk Road up to Akhuapada, the office of the Manager of Madhupur ward's estate, Madhupur Garh, the seat of the wards, and various places in the estate where local enquiry was desirable. I ultimately reached Jajpur, where all the Government offices situated at subdivisional head-quarters were inspected.

"In January I visited Dompara and Banki Government estate, inspecting the tahsil office, the sub-treasury, the thana and all other public institutions in that estate, as also outstills, &c., and made enquiries as to excise matters. I next proceeded to killa Kujang side, and toured through parts of that ward's estate. The Port and Customs offices at Hukitolah, the outpost at Mahakalpara, the Kujang sub-manager's office, and some of its "Ara" cutcheries were inspected, and various enquiries made in the estate as to estate matters, Government lands taken up along the creeks, &c. On my way back to Cuttack I inspected the Tirtol and Jagatsinghpur thanas, the Jagatsinghpur sub-registry office, the Gobindpur and Kissennagar outposts, the Biribati and other kanungos' offices, and the Chati serai and District Board dispensary at Nuabazar.

"In February I visited (walking) the country along the Patamundai Canal, inspecting village roads, outposts, kanungos' offices, state of crops, and ultimately reaching Kendrapara by the Indipur to Kendrapara road. All the public offices and the sub-treasury at the station were thoroughly inspected.

"In September Mr. Walsh visited Kendrapara to hold an enquiry regarding the exclusion of certain areas from that municipality, and in October he went to Banki for half-yearly inspection, and thereafter to Ganja, where he inspected the Kanika Manager's office.

"All the important parts of the district were thus visited during the year, offices at head-quarters and at subdivisions and wards' estate offices being fully inspected twice. All the thanas, with the exception of two, a large number of outposts, kanungos' offices, pounds, schools, excise shops, the District and Local Board roads were inspected, as also the *chatties* along the Jaganath Trunk Road, and enquiry was also made into the state of crops, public health, material condition of the people, relation between landlords and tenants, &c., &c."

13. As regards the tours of the Subdivisional Officers of Jajpur and Kendrapara, the Collector writes as follows:—

"They visited almost all places of importance, some once, some twice or thrice, and inspected the offices of all kanungos, the police-stations and outposts, most of the excise shops and pounds, schools, village and District Board roads, and made enquiries into the state of crops, public health, and material condition of the people in their respective subdivisions."

14. Of the officers who held charge of the Balasore district, Messrs. Shirres and Bompas, who received charge at the close of the year, did not go on tour. Regarding the tour of the other two officers and the Subdivisional Officer of Bhadrak, the Officiating Collector, Mr. Maddox, writes as follows:—

"During the year Mr. Cornish inspected police-stations at Soro, Chandbali, Basta, Basudebpur, Bhadrak, and Dhamnagar, and outposts at Remna, Singla, Acquapada, Barikpur, and Rasalpur, and pounds at Soro, Basta, Haldipada, Chandbali, Basudebpur, Remna, Bhadrak, and Dhamnagar, and dispensaries at Soro, Chandbali and Bhadrak. He also visited and inspected Port and Customs offices, khas mahal office, Honorary Magistrate's office at Chandbali. He also inspected subsidiary jail, khas mahal office, girls' school, subdivisional office and sub-treasury at Bhadrak. He also inspected pathsalas, roads, *chatties*, excise shops, ganja shops, and opium shops at different places, and flagstaff, &c., and enquired into the state of crops. He also inspected Moharbhanj office and manager's office, jail, and thana of Nilgiri.

"I in my tour inspected subsidiary jail, dispensary, sub-treasury, Local Board, subdivisional office, khas mahal office and registration office, high class English school, and girls' school at Bhadrak. I also inspected outposts at Mahapada, Kamarda, Bhograi, and manager's office at wards' estates Jamkunda and Shahabander, and police-station at Soro, and enquired into the state of crops, &c.

"The Subdivisional Officer in his tour visited every part of the subdivision, inspected ferries, pounds, pathsalas, kanungos' offices, excise shops, khas mahals, and road works. He visited lodging-houses at Chandbali and Jaganath road. The accounts of sarbarakars of khas mahal were examined locally. He made enquiries about the prospects of crops."

15. The Collector of Puri, Mr. Coxe, gives the following account of the camping done during the year in that district. He says:—"Mr. Walsh visited Khurda in April 1893 to inspect and discuss milan khasra work. In May he visited Jajpur on the Jaganath road, with the view of building a temporary cholera hospital.

"Mr. Sen went along the Jaganath road in August and visited Khurda. In September Mr. Walsh on his return visited Bhubaneswar, Khurda, and Jenkia.

"My own tours have been largely connected with my work in the Tributary States. In December I tried a Ranpur case. In January I visited Khandpara. In February I made a fortnight's tour through Ranpur and Nayagarh. At the end of March and beginning of April I tried a Ranpur case that lasted three or four days, and in May I had to try two Nayagarh cases.

"As it is difficult to get to the Tributary States and back to Puri under a week, if any work has to be done, it may be imagined that these five visits were a serious impediment to my becoming acquainted with the Puri district itself. Besides the Tributary States and Khurda, I have visited Satpara, Bhubaneswar, and the Jaganath road, but the north-east and south-west corners of the district are unknown to me."

16. The following is taken from the report of the Khurda Subdivisional Officer:—

"For the purposes of the milan khasra work, the subdivision having been divided into three circles, assigned to different officers, including the Subdivisional Officer himself, his tours were necessarily confined to a much more circumscribed area than usual, and the major portion of these tours was devoted to operations directly or indirectly connected with this work.

"Owing to lack of survey instruments, which were not received till January 1894 and not distributed till end of February 1894 and the rains, it was impossible to undertake milan khasra operations during the months from May to August 1893 in more than a few mauzas immediately surrounding the headquarters. In September and October, experiments with a view to revising and improving the milan khasra rules were undertaken in a few mauzas at no great distance from Khurda. As a result of this, the Subdivisional Officer found reason to confirm him in his belief that to pave the way for milan khasra operations it was necessary to make extensive and thorough enquiries into the unauthorized cultivation of waste lands, and to compel the raiyats as a body to apply for registration of all unauthorized changes.

"During November and December 1893 and from January to March 1894 applications for waste lands of 303 villages of zillas Khurda and Dandimal were disposed of by personal enquiries at the spot or from some places very near to the sites. In this way no less than 7,644 applications were disposed of. Simultaneously with this waste land work, the work of mutation of names in respect of raiyati holdings was also vigorously prosecuted.

"From October 1893 to March 1894 inclusive, the total number of petitions received was 28,332 against 4,121 from April to September 1893 inclusive, and the total number for the whole year 1893-94 was 32,453 against 4,737 for the year 1892-93.

"During a short time in the latter end of March 1894, the Subdivisional Officer inspected the progress made in the milan khasra work by a large number of sarbarahkars in the direction of Bolegarh, and found it almost without exception satisfactory. In his opinion the work now being done can be equally well utilized, whether the old milan khasra rules are maintained, or whether the new plan, which has been suggested by Mr. Finucane during his late visit to Khurda, be adopted by Government.

"The very seasonable and plenteous rainfall of 1893-94 obviated the necessity of any considerable portion of the touring season being devoted to relief work or enquiries into failure of crops. The only enquiries made had reference to the standing case of loss of crops, chiefly lying in Balavadrapur and the Mogulbandi zillas, on account of floods in the Daya river, the left bank of which it has been decided to abandon. A number of affected villages in zillas Khurda and Dandimal were visited by the Subdivisional Officer, the enquiries in the other zillas being made by other circle officers. The loss of crops for the present year, though considerable, was less than the average, and there was no reported loss of life or of cattle."

Besides the above, the Subdivisional Officer's tours were utilized in frequently visiting an experiment in potato cultivation which was being made on a portion of flooded area near the point where the Khurda-Puri road crosses the Daya river, and in visiting and inspecting the offices of some of the kanungos, the Khurda and Banpur stations, most of the outposts, and the two estate dispensaries. A number of estates' improvements, agricultural, and sanitary works were also inspected. Enquiries were made as to the progress of vaccination, the sarbarahkars as a body being urged to help to the best of their ability, and the Barunai, Gurujung, Atri, and Khandagiri fairs were visited, and arrangements for the preservation of sanitary conditions were made in the case of larger fairs.

Amongst matters of a miscellaneous nature which engaged the Subdivisional Officer's attention during his tours, were enquiries into local irrigation disputes, investigation of complaints against sarbarahkars, enquiries about *toila* cultivation, visits to the four forest blocks of Dandimal deforested in 1892, a visit to the temple of Bhubaneswar to report on a petition calling on Government to maintain the temple in repair, and a visit to the disputed land in Bargarh mauza claimed by the Bhubaneswar temple.

17. The following table shows the dates when the different district and subdivisional offices and treasuries were inspected by different officers:—

(*d*) Inspections made by—	District Offices.		
	Cuttack.	Balasore.	Puri.
1	2	3	4
(1) Commissioner ...	September 1893	July and August 1893.	May 1893.
(2) Collector ...	„ „	September 1893	August and September 1893.
	March 1894	March 1894	March 1894.

(*e*) Inspections made by—	District Treasuries.		
	Cuttack.	Balasore.	Puri.
(1) Commissioner			
(2) Collector	April 1893 September „ March 1894	September 1893 March 1894	September 1893.

(*f*) Inspections made by—	Subdivisional Offices and Sub-Treasuries.			
	Jajpur.	Kendrapara.	Bhadrak.	Khurda.
1	2	3	4	5
(1) Commissioner ...	March 1894	October 1893	August 1893	November 1893.
(2) Collector ...	July 1893	June „	„ „	September „
	December „	February 1894	December „ February 1894	

18. In addition to the above, the Banki office and sub-treasury were also inspected twice by the Collector of Cuttack, once in October 1893 and once in January 1894. The Subdivisional Officers also made half-yearly inspections of their respective offices and sub-treasuries.

III.—WEATHER AND CROPS.

19. The necessary statistics under this head are given in appendices I and II as usual. Appendix I shows that during the year under report the rainfall was far more than in the two preceding years and in excess of the average rainfall of each of the districts, which is shown in the Census Report to be as follows:—

Cuttack	...	59·51
Balasore	...	66·38
Puri	...	52·01

the rainfall during the year under report being 72·18, 73·58, and 68·60, respectively, as per appendix I. The rainfall was not only excessive, but was very badly distributed and proved unfavourable to several crops, as will appear from the following. The Collector of Cuttack says:—

"The weather was very abnormal throughout the year, the first half (April to September) being unusually rainy—more like East Bengal or Assam—and the last half, November to March, practically rainless. This abnormal weather prejudicially affected the crops in general."

He says further that on account of heavy and excessive rainfall, floods, and a cyclone in the ploughing and sowing season, a part of the area both of *beali* and *sarad* never dried sufficiently to admit of cultivation. There were, again, high floods in the following September, followed by cessation of rains. The outturn of the above two crops was therefore not more than 9 annas on an average. The *rabi* was similarly affected by excessive rain at the time of sowing, and cessation of rain afterwards. Excessive rainfall and floods are reported to have similarily affected the paddy crop in Balasore, where the outturn is, however, reported to be 15 annas in the Sadar and 12 annas in the Bhadrak subdivision.

In the district of Puri the excessive rain and floods in the early part of the rainy season are reported to have seriously affected the *beali, sarad* and sugarcane crops in the Sadar subdivision, where the outturn of the winter rice crops is estimated at 12 annas, taking 16 annas to represent the average crop. The subdivision of Khurda was not, however, so much affected, the undulating character of the soil facilitating the draining off of superfluous water. The outturn there was full 16 annas. The deficiency in the district was made up by the *dalua* crop, which does not depend on rain water, being grown on swampy places. The divisional result was thus not worse than in the preceding year or the year before, taking all the crops into consideration, as will appear from Appendix II.

IV.—PUBLIC HEALTH.

20. The table below shows the details of mortality from various causes which occurred in the several districts of this Division during 1893 as compared with that of 1892:—

District.	Number of deaths from—														Ratio of deaths per mille of population.	
	Cholera.		Small-pox.		Fever.		Bowel-complaints.		Injuries.		Other causes.		Total.			
	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Cuttack	21,289	2,884	4,200	2,135	28,759	22,641	4,674	3,328	1,226	1,281	14,060	14,745	74,208	47,014	38·34	24·26
Balasore	14,926	1,825	Not given.		14,140	11,290	Not given.		Not given.		14,307	12,610	43,373	25,725	43·61	25·91
Puri	9,997	1,763	2,261	2,415	5,490	7,293	3,152	2,671	464	585	12,276	12,701	33,640	27,428	37·86	29·02
Total ...	46,212	6,472	6,551	4,550	48,389	41,224	7,826	5,999	1,690	1,866	40,643	40,056	151,311	100,167	39·0	25·8

21. The public health during the year, as is evident from the foregoing statistics, was better than that of the preceding year, but worse than the two previous ones, the mortality as compared with that of 1892 being only 25·8 per mille of the population, as against 39 in 1892, 25·0 in 1891, and 22·5 in 1890. There was a decrease in deaths under almost all heads of complaints, that under cholera being the most striking. This disease is reported not to have broken out in an epidemic form in any of the districts, although unusually large numbers of pilgrims passed through the Division on the occasion of the special Naba Kalibar festival in connection with the Rath Jatra. This happy result is attributed to a plentiful supply of water as a consequence of the unusually heavy rains of the year, which also contributed towards keeping the season cool. Towards the close of the year it is reported from Balasore that a short outbreak of cholera occurred in the Bhadrak subdivision, which was almost confined to villages on the banks of the rivers Salandi, Baitarni and Matai. The Collector notices this as a curious fact, it being supposed that some impurity must have been washed down with the water from the Gurjats. The Collector of Puri mentions with

satisfaction the fact that though there was a great increase in the number of pilgrims that visited Puri, cholera in an epidemic form was totally absent. He writes: "The sanitation of the town and the roads leading thereto, where most of the cholera is found, is looked after as far as limited means will allow, but I fear the arrangements, as elsewhere in rural India, are too elementary to have much effect on the death-rate. A shower of rain has probably as much effect in preventing disease as a dozen latrines."

The Subdivisional Officer of Khurda states: "The abundant rainfall confined the ravages of cholera to a few sporadic cases. Khurda subdivision is not traversed by the most important of the pilgrim routes, but in addition to the pilgrims from Central India by the Sambalpur road, it is liable to visit by worshippers of Siva at Bhubaneswar and neighbouring shrines. Fortunately these visits did not bring in their train their usual accompaniments, death and disease."

22. The decrease in the death-rate from cholera in a year of an exceptionally large gathering of pilgrims, and the facts above stated, go to support the theory of Mr. Cornish, noticed in the last year's report, paragraph 11, that cholera is not connected with the influx of pilgrims.

Vaccination.

23. The following table gives the statistics of vaccination:—

District.	Number of vaccinators.	Number of persons vaccinated.	Successful.	Unsuccessful and unknown.	Cost of establishment.	Average cost per head.	Average cost per head of successful cases.	Number of cases inspected.	
								Found successful.	Found otherwise.
1	2	3	4	5	6	7	8	9	10
					Rs. A. P.	Rs. A. P.	Rs. A. P.		
Cuttack	87	17,487	16,088	1,399	2,159 12 3	0 1 4	0 1 6	16,088	1,399
Balasore	42	23,852	23,392	460	1,563 0 0	0 1 0	0 0 11	26,754*	556*
Puri	35	18,123	17,394	729	1,654 7 8	0 1 5	0 1 6	16,401	427
Total	164	59,462	56,874	2,588	5,377 3 11	0 1 5	0 1 6	59,243	2,382
Total for 1892-93 ...	98	43,890	42,308	1,582	2,987 1 11	0 0 10	0 0 9	37,554	1,372

* The difference between these and the total number vaccinated is due to the fact that those cases which have been inspected by different inspecting officers have been taken as so many different cases inspected.

24. Of the number of licensed vaccinators in Cuttack, seven were apprentices. The Civil Surgeon of Cuttack, who is the Superintendent of Vaccination, inspected only 100 cases, and the rest were inspected by his staff, consisting of one Inspector and three Sub-Inspectors. He offers the following remarks on the vaccination of the district:—"The working of vaccination is very backward. Besides seeing about a hundred vaccinated cases, I have on my visits to dispensaries inspected several roadside villages and found a large number of children unprotected. I am myself very much occupied by the charge of a medical school and a large and increasing number of cases in a large hospital, and am hardly able to devote any time to vaccination. The vaccination is very backward, and requires a special Deputy Superintendent to organise and develop it. An effort was made to introduce and extend calf-vaccination in the district, as it is in full vigour in town. I vaccinated and sent to various parts of the district several calves. The result has not been satisfactory, as the people object and the vesicles dry up before their consent is obtained."

25. The decrease in the number of vaccinators in the Balasore district is said to be due to the system of a security deposit of Rs. 10 having been required from each vaccinator, in consequence of which those who failed to deposit their security withdrew their names from the establishment. It is not known if this system is in force in the other districts of the Division, and if it is, the effect seems to have been otherwise in them. The increase in the number of persons vaccinated in Puri is attributed by the District Officer to the better organization of the Civil Medical Officer, the greater industry of the vaccinators, and the increased popularity of the operations.

26. The following extract is reproduced from the report of the Puri Collector, showing vaccination work in that district:—

"The most noteworthy feature in the year's history of vaccination is the introduction of free vaccination. Hitherto the vaccinators have, I believe, been employed for the larger proportion of their time in collecting their fees, and vaccination has proportionately suffered; but in the year under report the Board

sanctioned an expenditure of Rs. 850 on vaccination, and operations were thereafter performed free of cost. The figures show an increase of operations, but the inspecting staff has been and is so incompetent that I do not think the comparison of figures leads to any trustworthy result. I believe the figures have been far more rigidly tested this year than in previous years, as the change in the position of the vaccinators has necessitated it; but it is a difficult thing to ascertain whether a vaccinator who claims 150 successful operations in a month has really done the work alleged or not. I regret the experiment that has been made, though I admit its success. It seems to me unreasonable that people should expect to be vaccinated gratuitously, and that Rs. 1,000 should be provided annually out of the public money to meet the expectation. Sooner or later it will be necessary to revert to the old system, and then the old opposition will be found to have been multiplied a hundredfold. It has been decided, for reasons which my predecessors and myself have been unable to appreciate, to refrain from making vaccination compulsory. The discontinuance of the experiment of free vaccination probably this very year will, speaking very generally, place before us the alternative of compulsory vaccination or none. As there seems no hope of the adoption of the former alternative, the experiment, however successful, is regrettable. The success, so far as the performance of successful operations go, is undeniable. Little reliance can be placed on the total figures either of this or of past years, but the personal observation of the Civil Medical Officer has shown beyond doubt that a great deal of good work has been done, probably far more than in previous years."

The good work I believe to be as much due to the zeal and interest that Dr. Banks shows in the work, as to the fact that vaccination is free. I lean to Mr. Coxe's view that vaccination should be made obligatory in Puri.

27. Two cases were instituted in Cuttack under Act V (B.C.) of 1880, and two persons sent up for trial were both convicted, against three cases in 1892-93, in which two persons were convicted and one acquitted. There were four cases of practising inoculation under Act IV (B.C.) of 1865, and five persons were sent up. They were all acquitted. In the preceding year 40 persons were sent up in 26 cases, and of these 21 were convicted and 19 acquitted.

28. There was no case, either under Act V (B.C.) of 1880 or Act IV (B.C.) of 1865, during the year in the Balasore district. In the previous year there were two cases only, under Act IV (B.C.) of 1865, of which one was declared false and the other resulted in the conviction of one person. The Magistrate of Puri is silent on this point. His attention will be called to it.

V.—MATERIAL CONDITION OF THE PEOPLE.

29. The effect of the unusually heavy rainfall of the year and the consequent floods has already been noticed, the outturn of the staple rice crop being estimated at 9, 13 and 14 annas in the three districts of Cuttack, Balasore and Puri respectively. The condition of the people is reported to have varied in proportion to the outturn; in Cuttack it is reported to have been not satisfactory, in Balasore not bad, and in Puri satisfactory. I cannot think, however, that the condition of the tenantry, except in special cases where crops have entirely failed, is bad anywhere. The landless class, here as elsewhere, are poor, and their poverty has been aggravated by high prices. The following extracts from the district reports describe the condition of the districts severally:—

30. Mr. Stevenson of Cuttack writes: "For the last three years there has not been anything like a bumper crop, and during the year 1893-94 the outturn in many parts of the district was very poor in consequence of the unusual rainfall in spring, especially at the time of the cyclone of May 1893, which was attended with a heavy rainfall. This, besides interfering with cultivation, resulted in a large stock of paddy stored in pits being swamped and destroyed.

"There was also a large export of rice, though owing to bad harvest this was comparatively less than in 1892-93. All these circumstances combined caused the price of rice and of all other food-grains to rule very high—a fact which told very severely upon the agricultural as well as upon the non-agricultural classes of the population, the former having sold off their stocks to satisfy the demands of their mahajans, from whom they had received advances of grain and cash, and the latter more specially, as they, being non-producers of cereals,

had to depend entirely upon the markets, and their incomes did not increase in proportion to the rise in prices."

31. The Collector of Balasore states:—"The excessive rainfall, and the floods in consequence of it, caused the crops to suffer in some parts of pargana Bhgrai in north of the district, and in parganas Kauna, Bhra and Byang in south of the district. The labouring classes of the affected parts are feeling some difficulty, but are not in distress nor in need of any assistance. The relief works in pargana Kamarada, which were opened on account of the loss of crops in the previous year, were closed in November 1893 at the harvest of winter rice crop. The high price of food-grains prevailed in the district during the year under report, but the raiyats could not reap the benefits from it, as the landlord and the mahajan between them took practically all the crops of the year in satisfaction of their demands. It will take more than one good year to improve the condition of the people. In parts of the district, especially towards Chandbali, there is a tendency to over-export during the cold season, with the result that prices rise abnormally in the early month of the rainy season till the new crop is assured. On the whole the condition of the people is not bad in the district."

32. The Subdivisional Officer of Khurda has given much thought to the matter as regards the condition of the people of his subdivision, and his interesting remarks are reproduced below :—

"The population of Khurda is almost entirely agricultural, that is, nearly every person has some more or less direct connection with the tillage of the soil. Nevertheless, for purposes of enquiry into the material condition of the people, it is, I think, possible to divide roughly the population into four classes—

(1) The trading or mahajan class.
(2) Agriculturists proper.
(3) The artisan class.
(4) The class of unskilled labourers.

"The present year has been, I believe, for the first two classes a year of more than average prosperity. It has been a year of excellent harvest, so far as the staple crop is concerned, following on an equally favourable year. Prices have remained at the high level at which they have stood for the last two or three years, and there has been no increased demand in the shape of enhanced rent. The person who owns land and subsists by its cultivation has thus every reason to be satisfied with its present position. The prosperity which has attended the agricultural class during the last two years has been, as a matter of course, reflected on the trading and mahajan classes.

"It remains to consider how the rise in prices has affected the artisan and unskilled labourer. Whatever may be their condition, it is safe to say that, so far as the present year is concerned, they are neither better nor worse off than in the preceding year. There has been no appreciable change in prices either of food or of labour during the last three years; and as there was no falling off in the sources of employment during the year under report, it may be safely presumed that no exceptional hardship has marked their condition during the year under report.

"I am, however, of opinion that no sufficient attention has been paid in the past to the question how far the condition of the third and fourth classes is gradually altering for the better or worse as a general fact. The change from year to year may not be appreciable, and yet a comparison of relatively distant dates may afford very well marked indications of the process of change.

"The enquiries I have made in this matter have not been sufficiently extensive to enable me to state any well-established theory, but they suggest two important considerations which are worthy of further investigation:—

"(1) That while the skilled labourer, *e.g.* the mason, carpenter, blacksmith, &c., has been able to advance the price of his labour with the price of food, the unskilled labourer's wages have been almost stationary for the last 20 years during which there has been a rise in the price of food of not less than 50 per cent.; and

"(2) That there is a rapid increase in the numbers of the landless classes.

"With regard to the first consideration, I have made verbal enquiries of some of the older residents, sarbarahkars and contractors, and verified their statements by reference to the accounts of one of the chief Khurda contractors. The figures thus got have been compared with the price of the staple crop (rice) for the last 25 years as shown by the Khurda kanungo. All whom I have asked are agreed that the present condition of the cooly is one of great hardship, and that the ordinary necessaries of life are with difficulty procurable by him.

"The second of the two considerations affects the first, because the artisan and the unskilled labourers in Khurda, though not at any period supported by the tillage of their own lands, have most of them possessed a few plots whereby they have eked out their earnings. The information available from estate mutation records seems to show that a process is going on whereby these small holdings are being gradually transferred to the hands of mahajans or wealthy raiyats.

"During the last twelve years there have been about 48,000 cases of mutation by sale. In a thousand cases disposed of in the present year, I found that no less than 426 of the vendors were persons whose original holdings were less than one acre, and 283 vendors sold all the land they had. An extension of the percentage found in the selected cases to the whole number of mutations would seem to indicate a transfer of about 13,000 persons from the land-holding to the landless classes during a period of 12 years.

"These notes are given for what they are worth. I am conscious that there is no less reliable source of information than badly prepared statistics, and my only object has been to suggest the direction in which enquiry may be pursued in future. The coming Khurda settlement of 1897, if proper statistical enquiries are made, ought to throw a flood of light on the question how far it is politic to entrust to raiyats a free power of land mortgage and transfer such as was accorded to them in the current settlement.

"Considerable attention, I find, has been paid in the past two years to the concession of *toila* cultivation to aborigines and Uriyas as a means of improving their condition.

"During the year 1893-94, 1,140 acres were granted to 1,175 applicants. Of this amount 459 acres were granted to Uriyas and 681 to 11 aborigines. Applications were refused in 372 cases. While these were the facts as shown on paper, I have no doubt whatever that a much larger amount of land was actually cultivated in *toila*. No check was made of the excess cultivation, as it was not deemed advisable to effect a sudden reversal of the policy pursued by my predecessor. By limiting the amount of grant to three máns per head, and refusing applications in cases where the culturable waste of a village was reported to be only a few acres, I attempted to discourage the practice. I do not think that in a good year, when harvest is abundant and there is no deficiency in the sources of labour employment, we should allow the best part of the grazing lands, fuel, and timber stock to be destroyed by persons who are either thriftless and indolent cultivators, or mere nominees of sarbarahkars and wealthy raiyats. It may be a good thing to allow the cultivation of forest lands, even though to the prejudice of the general community, in years when there is scarcity causing distress amongst the poorer classes, but it is not a policy to be pursued indiscriminately year by year. The amount of *toila* granted last year was 2,520 acres and 1,654 acres to aborigines and Uriyas respectively."

* * * * * * *

VI.—EMIGRATION AND IMMIGRATION.

33. No emigrants or immigrants were registered during the year, either under Act I of 1882 or XXI of 1883; but the marginally-noted free emigrants passed through the cooly depôts in Cuttack and Balasore. Their number compared with the previous year shows an increase.

	Adults.	Children.
Cuttack ...	487	124
Balasore ...	152	7

34. The number of depôts for the accommodation of free emigrants during the year remained the same as in the previous year in Cuttack, viz. three, and increased by one in Balasore, making the number four. These depôts were

regularly inspected by the Magistrates and police officers, their sanitary condition was found good, and no abuses of any sort coming to light.

35. Besides the usual movement of labourers between Calcutta and Chandbali, the Subdivisional Officer of Khurda reports that a number of people belonging to Ganjam and other Madras districts came to Khurda to work on the East Coast Railway, some up-countrymen engaged in the same work having also temporarily settled there.

VII.—PRICES OF FOOD AND LABOUR.

36. Appendices III and IV exhibit the prices of food-grains and wages of labour which prevailed during the year.

37. Owing to comparatively good harvests in Balasore and Puri and to the decrease of exports to the northern part of Balasore, where there was insufficient crop, the prices of the staple food-grain were much easier there than in the two preceding years, being 17 seers 1 chitak in each, as against 16 seers 8 chitaks and 14 seers 15 chitaks in 1892-93, and 13 seers 7 chitaks and 15 seers 4 chitaks in 1891-92 respectively. It was in Cuttack alone that the prices ruled high, the price of common rice having risen from 16 seers 9 chitaks in 1891-92 and 16 seers 3 chitaks in 1892-93 to 14 seers 14 chitaks in the year of report. The causes which contributed to bring about this result are thus set forth by the Collector of Cuttack. He writes: "The outturn of the crop of 1892-93 was below the average, and there were large exports by Bombay merchants; what remained had been stored in pits—as usual in the hot weather, the season of fires—when the unusually heavy rain of May 1893 destroyed a large portion of the stock. This, combined with the low outturn of the year, caused the prices of food-grains to rule higher than usual."

38. The wages of labour remained almost stationary in Cuttack and Puri; Balasore shows some increase, which is attributed partly to a better class of artisans being available, and partly to increased demand for labour.

VIII.—MINES AND MANUFACTURES.

39. There is nothing to add to what I said last year under this head. With regard to the manufacture of salt, the only important industry in the Province, no salt was manufactured in Balasore: the district of Puri is capable of producing salt in two places—(1) the mouth of the Devi, and (2) the Chilka tracts. The Devi tracts were not worked during the year under report. The two factories, Gurbai and Tua, on the Chilka, were worked.

The following is a statement of the quantity of salt manufactured and sold, and the number of malangis employed:—

Year.	Quantity manufactured.	Quantity sold.	Number of pans worked.	Number of malangis employed.
1	2	3	4	5
	Mds.	Mds.		
1892-93 ...	52,962	50,250	145	519
1893-94 ...	15,422	15,103	565	1,695

40. The Madras system was in force during the year. Though larger numbers of malangis were employed and more pans worked, the outturn was far less than in the preceding year, and this is ascribed to the unfavourableness of the season. From the factories at the Devi, 8,860 maunds of the old salt was sold in addition to the above.

IX.—TRADE AND COMMERCE.

41. There has been a decrease of Rs. 30,07,226 or 20·7 per cent. in the aggregate value of the sea-borne trade as compared with the figures of the preceding year. The following table exhibits in detail the value of the imports and exports port by port for the past five years:—

Port.	Year.	Value of imports.	Value of exports.	Total value of trade.
1	2	3	4	5
		Rs.	Rs.	Rs.
Cuttack	1889-90	1,01,652	16,78,647	17,80,299
	1890-91	1,47,122	30,16,554	31,63,676
	1891-92	41,176	41,56,594	41,97,770
	1892-93	1,79,990	32,35,176	34,15,166
	1893-94	1,10,422	23,83,956	24,94,378
Balasore	1889-90	60,50,495	40,84,336	1,01,34,831
	1890-91	57,84,542	46,11,557	1,03,96,099
	1891-92	76,70,184	48,49,255	1,25,19,439
	1892-93	66,16,673	41,30,047	1,07,46,720
	1893-94	50,70,781	36,01,509	86,72,290
Puri	1889-90	2,139	2,21,362	2,23,501
	1890-91	11,031	5,44,457	5,55,488
	1891-92	7,485	6,00,608	6,08,093
	1892-93	160	3,30,232	3,30,392
	1893-94	334	3,18,050	3,18,384

42. The Collector of Cuttack attributes the decrease in the export trade partly to the poor rice harvest during the year and partly to the Bengal-Nagpur Railway, which now carries off the rice from the Sumbulpur side, for which the Mahanadi was formerly the only outlet. The fall in import is explained to be due partly to the trade between Calcutta and Cuttack being carried on *viâ* Chandbali in Balasore, and partly to the reduction of the price of kerosine-oil in America. The Collector of Balasore attributes the decrease in export to the decline of the Malabar coast trade, and that in import to the increase of imports through the Coast Canal. The decrease in export in Puri is explained to be due to the non-exportation of rice to the Indian ports during the year. Properly speaking, there is no import trade in Puri. Occasionally a few Government stores are imported by sea.

43. Inland trade is not registered, and no statistics are available for it. The Collector of Balasore, however, reports that the value of the trade by the Coast Canal amounted to Rs. 4,64,433, and that 386 tons of rice and paddy were exported from his district, against 867 tons in the previous year, by Range No. III of the High Level Canal. The chief articles of trade of the Province are rice, pulses, oilseeds, cocoanuts, cotton twist, yarn, jute, cloths, hides, horn, dried fish, tobacco, spices, betelnuts, timber, salt, lac, nux vomica, resin, kerosine and other oils, copper, lead, gold, silver, ironware, &c.

44. The passenger traffic during the past two years is shown in the following statement:—

Number of passengers arrived and departed		in 1892-93	290,833
Ditto	ditto	1893-94	297,843

It will be seen that there was an increase of 7,010 passengers during the year under report as compared with the figures for the previous year. The increase is attributed to a larger influx of pilgrims to Puri during the last Car festival.

X.—ADMINISTRATIVE CHANGES.

45. The following are the changes worth noticing:—

Cuttack	...	14
Balasore	...	13
Puri	...	11
Total	...	38

1st—Abolition of 38 police outposts, as per margin, in the three districts, under Government Resolution No. 1333J., dated 2nd March 1894.

2nd—Constitution of a special police-station for the town of Cuttack.

3rd—Employment of chaukidars instead of constables in the towns of Cuttack, Jajpur, and Kendrapara.

4th—Appointment of an additional Excise Sub-Inspector in the district of Puri to guard against smuggling of exciseable articles from the Tributary States.

5th—Conversion of the Khurda Bench into an Independent Bench.

6th—Reversion of the permanent kanungos from the settlement work to the regular line in the district of Cuttack.

7th—The peshkush or tribute of killa Keonjhar was ordered to be paid into the Balasore instead of the Cuttack treasury.

46. The Magistrates of Cuttack and Puri do not welcome the abolition of so many outposts. The former is afraid that it will encourage bad characters to frequent the Trunk Road, occasion delay in police investigation, and create difficulties in *post-mortem* examination in cases of unnatural death. The latter regrets that the reasonable suggestions of his predecessor have not been taken into consideration, and thinks it most injurious to abolish the outposts of Kakatpur, Brahmagiri, and Kanas.

The Collector of Cuttack says that its benefits have been neutralized by the want of good men in the higher grade, in consequence of which the town sub-inspector has still to be deputed to investigate important cases. Regarding the chaukidars also, the Collector says that their employment is likely to prove a failure in Cuttack town, "where the men enlisted, the best to be obtained, are as a rule a bad lot, and now that they find it is not to be all play and money-making, they are resigning freely." The Collector of Cuttack says that the sadar kanungo and kanungos have come back with no addition to their stock of knowledge, having been employed as ordinary muharrirs in the Settlement Department.

XI.—STATISTICAL ENQUIRIES.

47. With the exception of the usual statistics of rainfall, crops, mortality, prices-current, &c., no statistics of importance were collected during the year under report.

XII.—CIVIL JUSTICE.

48. The statistics for statements VI, VII, and IX have been supplied by the District Judge, and those for statement VIII by the Collectors, as rent suits are tried by the revenue courts in this Division. The number of civil suits disposed of and those pending show an increase in such suits. There has been a noticeable increase in title suits and a decrease in those for money before all the courts. I am not in a position to account for this. It is satisfactory to note the increase in the number of suits disposed of and the decrease in the number of witnesses detained over two days before all the courts, though there is an increase in the total number of witnesses examined. The pending file has somewhat increased in the courts of the Munsifs of Kendrapara and Jajpur.

49. As regards rent suits (statement VIII) all the districts show an increase in the total number of suits, as well as in disposals. The increase is ascribed to the settlement proceedings in Balasore, and to the institution of an unusually large number of suits by the Rani of Puri for recovery of arrears in Puri. The increase in Cuttack is said to be due partly to bad crops for the last two or three years, and partly to the settlement proceedings. The pending file for the Division has increased, though there is an increase in the number of cases disposed of. The result is satisfactory on the whole. The columns 12 to 14 are blank against the officers in Cuttack. To account for this the Collector says that attendance register of witnesses was not opened for want of forms. This is not satisfactory.

XIII.—CRIME.

50. The number of cognizable and non-cognizable cases during the year under report is compared below with those of the preceding year:—

District.	Cognizable cases.				Non-cognizable cases.				Total.			
	1892.	1893.	Increase.	Decrease.	1892.	1893.	Increase.	Decrease.	1892.	1893.	Increase.	Decrease.
1	2	3	4	5	6	7	8	9	10	11	12	13
Cuttack	2,832	3,160	328	...	2,656	2,088	132	...	5,688	6,148	460	...
Balasore	1,244	1,562	318	...	2,246	2,173	...	73	3,490	3,815	325	...
Puri	3,013	3,531	518	...	1,175	1,428	253	...	4,188	4,959	771	...
Total ...	7,089	8,333	1,244	...	6,277	6,589	312	...	13,366	14,922	1,556	...

51. The year is criminally the worst since 1889. The increase in each district is accounted for in the following manner:—In Cuttack the increase in cognizable cases is partly in offences against property and partly in offences prosecuted by the town police; and that in non-cognizable cases is partly under class IV, minor offences against the person, and partly under the Indian Salt Act. To account for this the Collector says:—"Settlement operations, as well as the suspension of agricultural operations for a long time, owing to extremely heavy rainfall, contributed greatly to this increase." In Balasore the increase in the cognizable cases is ascribed to the settlement operations, while the decrease in non-cognizable crime is too small to call for any remark. In Puri the increase under both heads is ascribed on the one hand to a large concourse of pilgrims leading to a considerable increase in offences under Act V of 1861 and under the Puri Lodging-house Act, and on the other hand to active prosecutions under the Excise and Forest Law.

52. The following table, however, shows a considerable increase in the total number of cases, both cognizable and non-cognizable, since 1889:—

District.	1889.	1890.	1891.	1892.	1893.
1	2	3	4	5	6
Cuttack	5,004	4,675	4,997	5,688	6,148
Balasore	4,273	4,169	3,296	3,490	3,815
Puri	3,767	3,242	4,031	4,188	4,959
Total ...	13,044	12,086	12,324	13,366	14,922

It has to be seen whether the variations are solely due to such temporary causes as have been assigned from year to year, or to an increasing criminal tendency of the people, or to the activity of the officers in bringing the offenders to justice, or to all these causes combined. The attention of the Magistrates will be invited to this, and they will be requested to deal with the matter specially.

53. It is, however, satisfactory to note that the Division continues to be free from serious crime.

XIV.—POLICE.

54. The following are the changes in the numerical strength of the police during the year under report. In Cuttack the long-felt want of a special sub-inspector for the town was supplied by the addition of one of the third grade to the sanctioned strength. In Balasore ten constables were replaced by the same number of town chaukidars.

55. The police was, moreover, reorganized as noted under heading "Administrative changes." The views of the District Officers of Cuttack and Puri regarding the abolition of some of the outposts have also been noted.

56. In addition to the sanctioned strength, a special police force of 4 head-constables and 100 constables was entertained for 30 days, at the cost of the

Superintendent of the Puri Temple, during the Car festival. Another force of one head-constable and 20 constables was similarly entertained during the Rath Jatra at Bhubaneswar, at the expense of the Temple Committee.

57. Statement X gives the required statistics under this head. It shows a slight improvement in the divisional result. During the year under report, out of 4,485 cases tried, 3,975 or 88·6 per cent. ended in conviction, against 3,170 out of 3,638 cases or 87·1 per cent. in the preceding year. It is difficult to say how much of this is due to the efficiency of the staff, the conduct of the police not having been favourably reported on in two of the districts. The Magistrate of Cuttack says: "Generally speaking, discipline is inclined to be lax among the constables, and the District Superintendent is doing what he can to improve it. Detective ability is at a very low ebb." The Magistrate of Balasore observes thus:—"On the whole the conduct of the police has not been good, especially among the literate head-constables. The constables have not behaved themselves as they did in the previous year. Some of the sub-inspectors have worked satisfactorily." The Collector of Puri has offered no remarks under this head. His attention has been invited to this.

58. There is an increase in the number of punishments over that of the preceding year. In Cuttack the number of officers and men departmentally and judicially punished was 96 against 71, and that in Balasore 74 against 57 in the preceding year. In Puri 45 men were punished both judicially and departmentally. No comparison can be made with the preceding year, as the figures for it have not yet been supplied.

59. No case of torture is reported; but in Cuttack one head-constable was convicted under section 161, Indian Penal Code, for taking an illegal gratification, and in Puri one constable was convicted under section 379, Indian Penal Code, and another was punished for associating with bad characters.

60. As regards the condition of the rural police, the matter is under consideration of the Government in connection with the Provincial settlement. I submitted a special report after the conference held by His Honour the Lieutenant-Governor during His Honour's visit to Cuttack in April last. I do not therefore think it desirable to reproduce the views of the Collector or myself, the unsatisfactory condition of the system, as well as that of the chaukidars, being well known. It may, however, be noted here, with regard to their conduct, that in the district of Cuttack 49 of them were punished judicially and 59 departmentally. Of the former, two are reported to have been convicted of dacoity. The reports of Balasore and Puri are silent on this point.

One case is reported from Puri of a constable having employed a chaukidar on menial duty. The former was duly punished.

XV.—CRIMINAL JUSTICE.

61. Required statistics under this head are given in the statements XI to XVI (both inclusive). Eight thousand four hundred and seventy-two cases were disposed of by the Stipendiary and Honorary Magistrates during the year 1893, against 7,782 in the preceding year.

62. The Stipendiary Magistrates convicted 5,379 out of 8,260 persons brought to trial. One thousand seven hundred and twenty-two persons out of 2,519 tried were convicted by the Honorary Magistrates. The percentage of conviction in the case of the former was 65·1, and that of the latter was 68·3, against 64·9 and 62·7 respectively in the previous year. There has been much improvement in the result of appeals preferred against the decisions of Honorary Magistrates, the ratio per cent. of orders confirmed to those appealed against being 76·78 as compared with 65·8 of the preceding year. In the case of Stipendiary Magistrates the ratio increased from 73·2 to 74·82. The percentages of convictions to persons tried by the several benches were as follows:—

Cuttack Sadar	41·3
Jajpur	25·3
Kendrapara	38·8
Balasore ...	55·5
Bhadrak ...	37·6
Puri	91·4
Khurda	45·8

The poorest result is noticeable in the Jajpur Bench, where the percentage has fallen from 27·1 in the previous year to what is shown above. Commenting on the working of this Bench, and with reference to my remarks contained in paragraph 33 of the last year's report, Mr. Stevenson, Magistrate of Cuttack, quoting the remarks of the Subdivisional Officer, observes as follows:—

"The members of the Jajpur Bench are all very regular in attendance; but they have still apparently a tendency to acquit unduly. I, as last year reported, requested the Subdivisional Officer, who is on the spot, to inspect the records of the cases tried by the Bench at intervals and in an informal manner (he not being in a position to call for records under section 435, Criminal Procedure Code), to note and indicate to the Bench, also in informal fashion, any apparent error. This he has been doing, and the result of one inspection he gives below: 'I find that out of 12 cases now examined, two only ended in convictions; all the others in acquittals. In these ten cases of acquittals, two were acquitted under section 248, Criminal Procedure Code, two under section 245, Criminal Procedure Code, and six either for want of proof or as civil disputes. Evidently the Bench Magistrates require such strict and reliable proofs that very few cases stand. Comparing the two cases in which conviction was made with the six cases in which acquittals were made, I hardly find any such difference in evidence as would warrant the difference in result. Taken from another point of view, I find the ten cases of acquittals to consist of one police case, two complaint cases in which the accused were summoned, and seven complaint cases in which the complainant was called upon to prove his case.

"In all the last seven cases the Bench Magistrates thought fit to summon the accused, and all ended in acquittals. Now, in my opinion, some of these complaints were so evidently civil disputes as to have been dismissed under section 203, Criminal Procedure Code; but the Bench Magistrates preferred summoning the accused, putting them to unnecessary expense and trouble, and ultimately passing verdict of acquittals.'

"I regret that from the Commissioner's remarks upon my last year's report, the above procedure did not seem to meet with his approval. But where, as at Jajpur, the Bench sits at a distance from head-quarters, and I cannot myself see the records, I can devise no better mode of check, and neither the High Court nor Government has found fault with the procedure."

The recent orders of Government (*vide* Circular No. 4116J. of 29th August 1893) condemn the practice referred to.

63. The attendance of Honorary Magistrates was on the whole satisfactory, many gentlemen having attended more than 75 per cent. of the calls; they rendered material help in the disposal of criminal cases, and relieved the Stipendiary Magistrates of an amount of work which formed almost a third of the cases disposed of by them. There is only one Bench, viz. Puri Sadar, which sits daily.

64. No improvement is noticed in the matter of remands during the year under report as compared with the preceding year. Although the number of cases remanded more than six times decreased from 15 in 1892 to 12 in 1893, the ratio per cent. of A cases remanded six times and more to A cases disposed of increased from ·9 to 1·14. The number of A cases disposed of on the first hearing was smaller during the year under review than that of the year preceding, being 1,085 against 1,166 in 1892.

65. The result of sessions trials was almost the same as in the previous year, the percentage of convictions being 73·3 against 74·1 of the preceding year. Much improvement is noticed in Puri, where the percentage rose from 68 to 75.

66 The realization of criminal fines during the year was not satisfactory. The balance at the end of the year amounted to Rs. 21,538 against Rs. 18,473. Cuttack alone shows improvement in this respect, the outstanding balance in that district having decreased from Rs. 8,851 to Rs. 7,403. Nearly half of the divisional balance is outstanding in Puri. The Magistrate of the district submitted a remission statement for Rs. 6,520, but I hesitated to sanction such a wholesale remission, especially as fines imposed at the end of 1893 were included in the list submitted in May 1894. I have informed the Magistrate that I would remit fines up to 1892 if he thinks that all reasonable steps have been taken for their recovery.

XVI.—REGISTRATION OF DOCUMENTS.

67. Appendix XVII shows the required statistics under this head. The number of documents registered rose to 25,501 from 21,676 in the preceding year. All offices except the Bhadrak office show increase more or less. To account for the increase in his district the Registrar of Cuttack says:—"The increase in the number of registrations was chiefly in sales and mortgages, a circumstance which to some extent reflects the condition of the people at large. Survey and settlement operations in progress throughout the district accounted also in part for the increase, as people desired to have the best evidence of title; and an increasing appreciation of the advantages of registration was also to some extent responsible for this." The Collector of Balasore attributes the increase of 30 per cent. only to the provincial settlement. The Collector of Puri says the increase in his district is due partly to appreciation of the value of registration, and partly to the settlement proceedings having opened the eyes of the raiyats to the fact that their holdings are transferable.

68. It is to be noted that both the Collectors of Cuttack and Puri observe that increase is noticeable both in compulsory and optional registrations. In the district of Puri optional registration rose to 2,113 from 1,690 in the preceding year. The figures for the other two districts are not available. Making allowance for the causes assigned by the District Officer in the year under report as well as in the preceding one, I am inclined to attribute the increase in optional registration in some measure to the Full Bench Ruling of the Calcutta High Court in Makhan Lal Pal *versus* Bunku Behari Ghose, page 623, Indian Law Reports, Calcutta, Volume XIX, which in a manner makes optional registration compulsory under the Registration Act. It has, however, to be seen how far this is borne out by facts. The District Officers will be requested to consider the matter from this standpoint.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND LAND REVENUE ADMINISTRATION.

69. The prescribed statements XVIII to XXV give the required statistics under this head. The subject-matter having been dealt with in detail in the Land Revenue Administration Report, a brief review only is given here, as usual.

70. Out of the gross divisional demand, Rs. 18,86,592, the sum of Rs. 18,42,933 was collected, giving a percentage of 97·6 against 97·9 in the preceding year. The slight fall is mainly due in Cuttack to the non-adjustment of the balance due from certain estates sold against their sale proceeds, and in Puri to the fact that disturbances in the Tributary State of Ranpur caused delay in the payment of the tribute, which was not recovered till after close of the year. In Cuttack the accounts could not be adjusted pending decision of the appeals preferred towards the close of the year. This may be easily avoided by holding the sales earlier.

71. The divisional percentages of collection on gross and current demands in temporarily-settled and Government estates are compared below with that of the previous year:—

Class.	Percentage of gross collection on gross demand.		Percentage of gross collection on current demand.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
II ...	99·6	99·7	99·6	100·1
III ...	92·2·	90·8	79·05	96·2

The slight increase in class II and the slight decrease in class III do not call for any special remark. It may, however, be noted that the percentage

of collection was 99 and 96·6 in the Government estates of Banki and Khurda respectively.

Sales of estates for arrears of revenue.

72. There were 24 sales under the Revenue Sale Law against 25 in the preceding year. There is nothing special to notice in this connection.

Survey and Settlement.

73. The provincial survey and settlement works were actively carried on during the year. There were no other minor operations. As the former are dealt with separately as a special subject, statistics are not given here.

Certificate work.

74. The required statistics are given in statement XXI. The number pending at the beginning of, and that filed during, the year was less than in the preceding year. The year under report, however, closed with a heavier file. The Collector of Cuttack says that the increase in his district is due to the facts that the demands of the cess certificates were realized during the last quarter, but satisfaction could not be entered, as the treasury chalans did not reach the certificate offices before the close of the year, and that some miscellaneous certificates were filed during the last quarter.

Land acquisition.

75. Statement XXIII gives the required statistics. It will be seen that there is a decrease in the number of cases disposed of in Cuttack. The Collector attributes this to the small plots of land involved in the cases, and to the petty sums to be disbursed, which led to the unsatisfactory attendance of parties. Acquisitions were mainly made for the distributaries of the Jajpur canal, the drainage of the Taldanda canal, and the East Coast Railway. The department made pretty fair progress.

Partition.

76. Statement XX shows that ten cases were disposed of against 17 in the preceding year. Of the 61 cases pending, 30 cases have been stayed under the Board's orders No. 538, dated 11th December 1891, pending the completion of the provincial settlement, and the proceedings in one case was confirmed after the close of the year. As regards the balance, no special remarks seem to be called for, some of them having been almost completed.

Land Registration.

77. The required statistics are given in statement XXIV. There is a considerable increase in the number of cases instituted, it being especially great in Balasore. This is mainly due to the settlement proceedings in progress. In Puri alone it is said to be partly due to vigorous proceedings taken under section 65 of Act VII (B.C.) of 1876. It is satisfactory to note the increase in the number of cases disposed of and the decrease in those pending.

78. There were certain defects in the initial registration work of the district of Cuttack. After personally inspecting the work and discussing the matter with the Collector, I reported the matter to the Board, who were pleased to sanction a special establishment for the purpose of supplying defects. Satisfactory progress was made during the year, and the special work is expected to be soon finished.

79. Complaints were received of the inconvenience entailed on the public in having to come in to Cuttack to file applications for mutation. Some relief has been afforded by allowing such petitions to be filed at the subdivisions, but it is not found practicable to deal with the cases otherwise than at the district head-quarters.

Irrigation.

80. This is now dealt with separately as a special subject. It may be noted here that there was considerable decrease in the area leased out. In the district of Cuttack the area leased during the year was 86,790 acres against 128,748 acres in the preceding year. The Collector of Balasore has also noticed the decrease in his district, though no figures have been given. In both the districts the decrease is due to non-renewal of the lapsed leases. The Special Deputy Collector is reported to have ascribed it to the fact that there was more or less rain throughout the kharif season. But the Collector of Cuttack gives a different reason. He says thus:—"But I have reason to believe that the raiyats' real complaint is that they are not given water when they want it, and they not unnaturally ask, why should we pay for what is not given as required, but at the sweet will and

pleasure of the canal officers? Especially do they complain that they do not get water to irrigate their lands so as to render them fit for ploughing. They say that the rule is to supply no water till the crop is growing, while in a season like the present, when there has been no rain for some months, water is urgently needed for preliminary cultivation."

The decrease is no doubt due to the change both in the system of supplying water and the collection of the dues, the present arrangement being considered less lenient than its predecessor. The present system has not been long enough in force to admit of criticism.

Road and Public Works Cesses.

81. The divisional percentage of the balance on the gross demand was 11·3 against 8·7 in the preceding year. The districts of Balasore and Puri show a decrease, while Cuttack shows an increase in percentage, which is as follows:—

District.	1892-93.	1893-94.
1	2	3
Cuttack	13·1	17·8
Balasore	6·09	5·8
Puri	2·8	2·1

82. In his cess report the Collector of Cuttack thus accounts for the increase in the balance: "The percentage of collection of the current demand was 81·3 and that of arrears 83·2 as against 87·7 and 60 respectively in 1892-93. That the percentage of current collections is no higher is due chiefly to the difficulty experienced by persons paying cess direct to Government in collecting from their raiyats, another reason being the bad harvests of the year. Payment of the current demand was also affected by the calls upon the payers to make good, all at once, arrears that had been accumulating and were brought to light by the enquiry above noted." The enquiry referred to involved an adjustment of road cess collection accounts for past years. The increase in the percentage of the arrear collection may be taken as a set-off for the fall in the total collection.

XVIII.—WARDS' AND ATTACHED ESTATES.

83. No attached estates were under the management of the revenue authorities of the Division during the year. Killa Patia in the Cuttack district remained under the management of the Civil Court as reported last year.

84. The assessed jama of this estate, including cesses and miscellaneous receipts, amounted to Rs. 9,132 for the year under report. The total expenditure on account of management and other charges, including the allowance of Rs. 2,400 per annum for the maintenance of the proprietor and his family, amounted to Rs. 5,132.

85. The decree-holders were paid Rs. 1,910, and the total amount of debt liquidated up to the end of the year under review was Rs. 52,415, leaving an outstanding balance of Rs. 36,868, of which Rs. 14,230 is principal and Rs. 22,638 interest. The payment of a comparatively small amount to the decree-holders during the year was, it is explained, due to non-realization of rents from most of the tenants, some of whom were unable to pay their rents in consequence of failure of crops for three successive years, while the rest being refractory had to be sued.

86. The statistics for Wards' estates are given in Appendix XXVII.

87. The following Wards' estates were managed by the revenue authorities during the year under report:—

Cuttack	1. Kanika. 2. Kujang. 3. Madhupur.
Balasore	4. Jamkunda. 5. Shahbanda.
Puri	6. Rorang. 7. Malighati.

88. Taking the Division as a whole, the collections in the Wards' estates show some improvement over the results of the previous year, the percentage of total collection on the total demand being 53·4 against 41·51 in 1892-93. But this is not so high as it should be. Taking the estates individually, Kanika shows the best results, as will appear from a comparison of the following percentages as compared with 1892-93, and Kujang the worst:—

	Percentages of total collection on total demand in—	
	1892-93.	1893-94.
Kanika	90·8	107·6
Kujang	21·3	33·3
Madhupur	74·5	62·4
Jamkunda	93·3	94·3
Shahbanda	52·3	61·5
Rorang	85·4	73·5
Malighati	69·9	69·1

89. The following events may be noted in connection with the Wards' estates of this Division:—Rani Sulakhyana Pata Mohadei, the mother and guardian of the late Raja Padmanabh Bhunj, who was a pensioner of Kanika, drawing Rs. 300 per annum, died on 1st May 1893.

On account of strong winds accompanied with heavy rain and high floods, but chiefly owing to the May cyclone, all the Wards' estates of Cuttack suffered more or less during the year, and amongst these the Kanika estate suffered the most. The houses of many tenants fell, there was a loss of cattle and property and considerable loss of paddy stored in pits, the total loss caused to raiyats being estimated at about a lakh of rupees. Besides this, the estate's embankments suffered more or less, the estimated damage under this head being Rs. 30,000. A sum of Rs. 23,718 was sanctioned by the Board for the repairs of these embankments.

In spite of these disasters, it is noteworthy that the financial results of the year's administration of this estate show no deterioration, but on the contrary an improvement.

In the Kujang estate the cutcherry houses were very much damaged by the cyclone of May 1893. No work could be done for several days, and postal communication was interrupted. Houses fell and others had their thatch blown away, while, as in Kanika, paddy stacks suffered. There were successive floods in this estate in July and August 1893; but fortunately these caused no damage to crops, but those of September 1893 injured the *sarad* crop in several villages.

Sugarcane and the ripe *beali* crop in Madhupur were very much damaged by the high winds and heavy rains of 21st to 23rd September 1893.

The chief cause of the short collections in the Shahbanda estate in Balasore is the hostile attitude of the uncle and aunt of the minor, who are instigating the raiyats to withhold their rents. They have brought a civil suit in the Court of the Subordinate Judge of Alipore, claiming $\frac{2}{3}$rds share of the entire property. The case is still pending decision. The raiyats are also reported to have suffered to some extent on account of partial failure of crops owing to the flood of the river Subarnarekha.

The low percentage of collections in the wards' estates of the Puri district is attributed partly to the local kistbundis, according to which six *pans* of the current demand in Rorang and four *pans* in Malighati fell due in the last two months of the year, and hence legal coercive measures could not be concluded within the year. There was also a change in the collection agency in *hastabud* villages.

90. Survey and settlement operations are in progress in the Madhupur estate in Cuttack and in the Jamkunda and Shahbanda estates in Balasore.

91. The education of all the minors is well looked after. The Rorang minor, who has been transferred to Cuttack, is living with the Kanika minor; both are reading at the Ravenshaw Collegiate School. They are making fair

progress in their studies. The Board have sanctioned the removal of the Madhupur minor to Cuttack for studying in the Ravenshaw Collegiate School, and a competent private tutor has been engaged. The Jamkunda minor, who was promoted to the third class of the Balasore zila school and was getting on well with his studies, is reported to have fallen into bad company since the death of his guardian tutor. Proposals are now before the Board for engaging the services of another tutor, pending whose appointment the minor has been sent home to his mother at Jamkunda.

The Shahbanda ward is reported to have somewhat improved in his studies. He is now 20 years old, but is still in the 4th class. Both these minors receive some practical instructions from the managers of their estates, with a view to their acquiring an insight into zamindari matters. The Collector reports that he is arranging for the wards to learn something of the practical working of the Tenancy Act at the attestation camps of the Assistant Settlement Officers engaged in the settlement operations of their estates.

XIX.—EXCISE.

92. The statistics under this head are given in statement XXVIII according to the instructions in paragraph 2 of your No. 2737, dated the 27th November 1893. The result is an increase of the excise revenue throughout the Division, the total figures for the year under report being Rs. 6,10,535 against Rs. 5,60,977 in the previous year. It is to be noted here that the former sum includes the Rs. 19,904 credited into the treasury during the year by the Manager of Dhenkanal State, as reported in paragraph 72 of the last year's report. The result is still satisfactory.

93. Increase is noticeable under all the heads except under license fees for country spirit and tari. In Cuttack the licenses for the sale of distillery liquor were settled under the guaranteed system. They were put up to auction as regards still-head duty only, not as regards license fees, and were settled with those who offered to pay the highest amount of duty. But it has not been explained why the license fees fell to Rs. 10,124 from Rs. 13,888 in the previous year. The Collector's attention will be invited to this. The Collector of Puri has not explained the decrease in his district; the license fees for country spirit being Rs. 2,622 against Rs. 2,988 in 1892-93, though the quantity consumed rose to 3,051 gallons from 2,473 gallons.

94. All the districts show an increase in the quantity of country spirit consumed. In Cuttack it is ascribed to the partial introduction of outstills; in Balasore it is said to be due to the presence of the large number of up-country men in connection with the revenue survey of the district; and in Puri the increase is the result of the tari shops remaining unsettled for a greater portion of the year in consequence of the opposition to the tree-tax system. The decrease in the license fee of tari is confined to the district of Puri, and is due to the said opposition.

95. Ganja and bhang show a decrease in the quantity consumed. As this has been a subject of special discussion, it seems desirable to note here the views of the District Officers. With reference to the fall in the quantity consumed in his district, the Collector of Cuttack says thus :—"The only reason that can be suggested for the fall is that owing to the increase in the retail price consequent on the increase in license fees and duty simultaneously, illicit consumption of Gurjat ganja in places where it is easily procurable has increased, and that in places where it is not easily procurable the poorer consumers have reduced their consumption and taken to the use of other intoxicants perhaps more deleterious." The Collector goes on to say:—"The duty on all kinds of ganja was raised during the year, and having regard to the facility with which Gurjat ganja can be here procured, we have, I think, gone as far as we safely can in this direction." With regard to this, the Collector of Puri says thus:—"The duty is so high that the temptation to smuggle is irresistible. It is believed that the Khurda subdivision is flooded with the drug, and that it can be obtained anywhere very cheaply. In my opinion it should, as regards duty, be placed on the level of bhang or sidhi, to which it is more akin, as regards the mode of consumption, than the

Rajshahi ganja." With reference to my No. 1852P., dated 26th October 1893, from the Political side, the Government has in its No. 2486S.R., dated 19th April 1894, ordered that the matter will remain pending until receipt of the Indian Hemp Drugs Commission's report. The only fact to be noticed now is the resort to more deleterious intoxicants referred to by the Collector, who does not, however, say what these are. His attention will be invited to this with a view to ascertain how far this has led to the increase in the consumption of other exciseable articles.

96. As to opium issued to the vendors in the Gurjat States, it was found selling cheaper in the Gurjats than in Mogalbandi, in consequence of lower rates of license fee in those States. It was decided by the Board that the supply should be issued to each State according to a scale fixed. The Collector of Cuttack says this arrangement has proved salutary.

97. The tree-tax system of tari is reported to have worked well in Balasore.

XX.—STAMPS.

98. The following table exhibits the receipts and charges under this head during the year 1893-94 as compared with the preceding year:—

YEAR.	District.	RECEIPTS.				CHARGES.			Net. revenue.
		Sale of judicial stamps.	Sale of non-judicial stamps.	Miscellaneous receipts.	Total.	Refund.	Other charges.	Total.	
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1892-93	Cuttack	1,60,952	43,837	4,032	2,08,821	1,717	3,274	4,991	2,03,830
	Balasore	50,667	17,576	1,979*	70,222	459	1,270	1,729	68,493
	Puri	57,017	32,981	1,047†	92,845	189	1,851	1,990	90,855
	Total ...	2,69,536	94,394	7,058	3,71,888	2,315	6,395	8,710	3,63,178
1893-94	Cuttack	1,81,359	45,757	5,013	2,32,129	631	3,515	4,146	2,27,983
	Balasore	60,654	19,478	2,882	83,014	112	1,478	1,590	81,424
	Puri	70,462	34,962	2,749	1,08,173	128	2,069	2,197	1,05,976
	Total ...	3,12,475	1,00,197	10,644	4,23,316	871	7,062	7,933	4,15,383
	Increase ...	42,939	5,803	2,686	51,428	...	667	...	52,205
	Decrease ...	...	...	...	...	1,444	...	777	...

* This differs from the last year's figures by Rs. 127, duty and penalty levied by Collector not having been included under this head.

† There is a difference of Rs. 16 as compared with the entry made as per last year's report. This is due to subsequent correction of return No. XXXV by the Collector.

There has been an increase of Rs. 51,428 in the sale of judicial and non-judicial stamps and in miscellaneous receipts. The increase is distributed as follows:—

	Rs.
Judicial	42,939
Non-judicial	5,803
Miscellaneous	2,686

99. The sale of court-fee stamps chiefly contributed to the increase which is explained by the Collector of Cuttack to be due to the increase in the number of cases instituted during the year, and to the fact that process fees at a higher rate were levied for serving notices under sections 6, 7 and 10 of Act XI of 1859, under Board's Circular No. 11 of September 1893. In Balasore a large number of mutation cases were instituted during the year on account of settlement operations going on in that district, in consequence of

which there was an increase in the sale of court-fee stamps. The Collector of Puri attributes the increase in his district chiefly to the institution of mutation cases in the Khurda subdivision consequent on the milan khasra operations, and to a larger number of rent suits having been filed during the year than in the preceding year.

100. In explaining the increase under the head non-judicial stamps, the Collector of Cuttack reports that a greater number of documents (sales, mortgages, &c.) were executed during the year on account, probably, of bad times. In Balasore it is attributed to the transfer of properties of higher value during the year under report than in the preceding year. In Puri the increase under this head amounted to Rs. 1,981, for which no explanation has been furnished by the Collector.

101. It is satisfactory to note that although there was increase under receipts, the charges decreased by Rs. 777. The decrease was mainly under the head "Refund of value of stamps purchased." This is due to the refund of the price of stamps of higher values in the previous year than in the year under report. The net revenue shows an increase of Rs. 52,205, which is satisfactory.

102. The table below shows the action taken by Civil Courts and Collectors on unstamped or insufficiently stamped documents, and prosecutions for infringement of stamp laws:—

Year.	District.	Action taken by Civil Courts on unstamped or insufficiently stamped documents.		Action taken by Collectors on unstamped or insufficiently stamped documents.		Prosecutions instituted for infringement of the stamp laws.				
		Number of cases.	Duty and penalty levied.	Number of cases.	Duty and penalty levied.	Number of cases.	Persons brought to trial.	Convicted.	Fine imposed.	Reward paid.
1	2	3	4	5	6	7	8	9	10	11
			Rs.		Rs.				Rs.	Rs.
1892-93	Cuttack	53	299	19	103	5	5	5	26	...
	Balasore	...	...	15	126	6	6	6	40	...
	Puri	7	59	13	88	1	1	1	16	...
	Total	60	358	47	317	11	11	11	82	...
1893-94	Cuttack	48	330	19	228	3	4	1	5	15
	Balasore	2	11	9	65	5	8	8	63	...
	Puri	26	234	15	108	5	7	3	40	...
	Total	76	575	43	401	13	19	12	108	15
	Increase	16	217	...	84	2	8	1	26	15
	Decrease	...	...	4	...	...	...	...	...	...

All the districts except Cuttack show increase in the number of cases in which duty and penalty were levied by the civil courts. The amount of duty and penalty realized by these courts also increased from Rs. 358 in 1892-93 to Rs. 575 during the year under report. This is due to the fact that almost all the cases instituted during the previous year were petty ones, and the amount of penalty realized in each amounted to Rs. 5. As regards cases in which action was taken by revenue courts, the amount of penalty and duty levied increased by Rs. 84, although there was a slight falling off in the number of cases. The increase amounted to Rs. 125 in the district of Cuttack, which the Collector attributes to the fact that in the preceding year all the cases were of a petty nature. Balasore shows a decrease of six cases with an amount of Rs. 61, which the Collector reports is probably due to greater carefulness on the part of the people in affixing proper stamps on documents. The result of prosecutions in stamp cases was not satisfactory. Only 63·1 per cent. of persons brought to trial were convicted, against 100 of the preceding year. Cuttack and Puri are responsible for the result. In the former three out of four persons brought to trial were acquitted for want of evidence. In the latter only three

out of seven persons tried were convicted. The Collector of Puri has not furnished any explanation for the large number of acquittals in his district. His attention will be drawn to this.

103. A reward of Rs. 15 was paid to a muhárrir of the Banki tahsil office, in the district of Cuttack, for giving information of a case of evasion of the stamp law in respect of three documents. No reward was paid in Balasore or Puri.

XXI.—INCOME-TAX.

104. The required statistics are given in statement XXIX. There is an increase in the net divisional total collection, the figures being Rs. 57,134 during the year under report against Rs. 55,239 in the preceding year. This is due to an increase in Balasore and Puri and a decrease in Cuttack; the latter shows a decrease of 4·5, while the other two show an increase of 6·2 and 14·1 per cent. respectively in the net revenue.

105. There is an increase in the number of assessees in all the districts, though Cuttack shows a decrease in the revenue. Of the 2,701 persons originally assessed, 484 assessees preferred objections. Of these, 63 objections were fully, and 89 partially, successful. The result of objections in each district is as follows:—

District.	Number of objections filed.	Number in which assessees were exempted or the tax reduced.	Percentage of successful objections.
1	2	3	4
Cuttack ...	212	85	40·0
Balasore ...	135	45	33·3
Puri ...	137	22	16·6
Total ...	484	152	.....

It will thus be seen that Balasore shows more careful work and Puri stands next. The same result is to be seen in appeals to the Commissioner, which were as follows:—

District.	Number of appeals.	Number of cases in which reduction or exemptions were made.	Percentage of appeals against the order of the Collector.
1	2	3	4
Cuttack ...	17	3	8·0
Balasore ...	7	2	5·2
Puri ...	13	2	9·5

106. To account for the large proportion of successful objections, the Collector of Cuttack says: "Roughly they are due to the Sadar subdivision, especially the town, being reassessed; to the greater facility people there have for objecting; to their greater proneness to contest everything; and to the difficulties of arriving at a fair estimate of the incomes of large traders who are up to all modes of evasion, and many of whose accounts are kept in foreign languages, as Gujrati and Marwari."

As to the alleged facility in the Sadar subdivision for filing objections, and the tendency of the people to contest everything, these may account for an increase in the number of objections preferred, but they cannot be the cause of the objections being successful. As to the difficulties of arriving at a fair estimate of the incomes of large traders, I believe it is not peculiar to those in Cuttack. The Income-tax Department labours under the same difficulties and disadvantages everywhere. The difficulty arising from the accounts being kept in foreign languages is a genuine one, and it exists, I believe, more in the town of Cuttack than elsewhere.

The assessor should, I think, provide against such difficulty by learning at least the figures of such foreign languages, and the Collector will be desired to take action in this direction.

XXII.—MONETARY ARRANGEMENTS.

107. The following table shows the receipts and issues of currency notes during the year of report as compared with the previous year:—

District.	Receipt.								Issues.							
	Received in payment of Government dues.		Received from public in exchange for silver or other notes.		Received from Bank of Bengal or other treasuries.		Total.		Issued in payment of Government dues.		Issued in exchange for silver or other notes.		Remitted to other treasuries.		Total.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Cuttack ...	3,41,635	1,85,230	1,82,560	59,755	1,77,000	1,80,500	7,01,195	4,25,485	3,75,810	4,00,020	1,86,120	82,045	1,29,950	12,480	6,91,880	4,94,545
Balasore ...	75,450	54,340	27,810	39,975	47,725	68,000	1,50,985	1,62,315	86,075	1,03,445	75,875	70,160	175	4,555	1,62,125	1,78,160
Puri ...	81,570	54,700	48,080	61,840	47,500	38,000	1,77,150	1,54,540	89,215	65,905	72,230	52,120	37,955	28,105	1,99,400	1,46,130
Total ...	4,98,655	2,94,270	2,58,450	1,61,570	2,72,225	2,86,500	10,29,330	7,42,340	5,51,100	5,69,370	3,34,225	2,04,325	1,68,080	45,140	10,53,405	8,18,835

There was a marked decrease both in receipts and issues of currency notes during the year in the districts of Cuttack and Puri, which is ascribable to slackness of trade. The increase in Balasore is chiefly attributed to the settlement operations and to the briskness of foreign trade.

108. The following table shows the transactions in the Post Office Savings Bank during the past two years:—

District.	1892-93.			1893-94.		
	Number of deposits.	Amount deposited.	Amount withdrawn.	Number of deposits.	Amount deposited.	Amount withdrawn.
1	2	3	4	5	6	7
		Rs.	Rs.		Rs.	Rs.
Cuttack	3,964	1,29,612	99,160	3,520	1,11,852	98,564
Balasore	2,177	73,779	53,117	2,034	71,242	53,072
Puri	869	24,693	19,244	1,074	37,251	24,186
Total ...	7,010	2,28,084	1,71,521	6,628	2,20,345	1,75,822

The result of the year shows a decrease in the number and amount of deposits as well as withdrawals for the Division. There was increase only in the district of Puri. The decrease in Cuttack is not very marked, and is attributed to the report that the rate of interest was to be lowered, as has been done from 1st April 1894. That in Balasore is reported to be due to the fact that the limit of deposit in each account in a year has been reduced from Rs. 500 to Rs. 200 only.

109. The following table shows operations in connection with money-orders:—

ISSUED.

DISTRICT.	Revenue money-orders.				Ordinary money-orders.				Total.

Puri	337	2,344	243	2,754	16,502	4,62,424	17,422	5,67,377	16,839	4,64,768	17,665	5,70,131
Total ...	12,977	1,35,977	11,581	1,11,164	88,952	21,84,718	141,361	24,74,343	1,01,929	23,20,695	152,942	25,85,507

There has been a considerable increase both in issues and payments, the number and value in each being 2,228 with Rs. 71,643 in the former, and 51,013 with Rs. 2,64,812 in the latter. Revenue money-orders, however, show a falling off in all the districts, the reason for which in Balasore is said to be that proprietors seem to think that less risk is incurred by paying in revenue through their agents, as there is no apprehension of mistake in credit; while in Puri the petty zamindars only, whose shares of estates and amount of Government revenue are small, and who live at a great distance from the head-quarters, avail themselves of this system to remit their dues, payments of big zamindars being made through the mukhtars and revenue agents at head-quarters. The decrease in Cuttack is explained as follows by the Collector:—

"This is attributable to the fact that many money-orders being defective or having been received after the kist day in November 1892 and April 1893, the estates concerned were brought on the defaulters' list, and though most were afterwards removed therefrom on the petition of the proprietors, this might have tended to shake their confidence in the system. With defects in the form of land revenue money-orders I have dealt in the Land Revenue Report. Delays in the post-office also prejudice the people against remitting by money-order; but the fault is chiefly their own, as they invariably put off remitting till the last moment. There are also interested persons, revenue agents and others, who profit by an adherence to the old custom of money being paid into the treasury direct. Such lose no opportunity of setting the people against the money-order system, resort to which has affected their incomes. It will doubtless make its way into more general favour in course of time."

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

110. The East Coast Railway was still under construction during the year under report, though work has again been suspended since the close of the year for want of funds. The progress of the work was, however, much impeded by various causes, and there remains still much to be done. The route to be followed for the last 25 miles to Cuttack has yet to be determined. The earthwork and bridges of the remaining parts of the line are reported to be three-fourths completed; the large bridge over the Mahanadi is not being built.

111. Two branch lines from the East Coast Railway to Puri are under consideration. The one from Chhatipur in the Khurda subdivision was surveyed and plans and estimates were prepared. As an alternative to this, it is proposed

to run a line from Cuttack to Puri along the existing road. Nothing is reported to have been done with regard to this line. A report was submitted as to the route which the proposed line from Sambalpur to Cuttack should follow.

112. The Public Works Department was engaged in extending the distributary system of the Jajpur, Kendrapara, Gobri and Patamundai canals, and the embankments along the right bank of the Baitarni and the left bank of the Bura rivers. These with the minor drainage works are nearly completed.

XXIV.—ROADS AND COMMUNICATIONS.

113. Nothing important took place under this head. The District Boards of Cuttack and Puri constructed seven and five new village roads respectively, and the latter a road from Astrang to Kakatpur. The existing roads were maintained in good condition.

With regard to Mr. Allen's proposal to make over to the District Board the two trunk roads in the district of Puri, mentioned in paragraph 94 of last year's report, the required proposal has not yet been received from the Collector of Puri, though his attention was invited to it. The proposal seems more likely to be well received now than formerly, as an Executive Engineer's division of Puri has been abolished and merged in another division.

XXV.—WORKING OF THE PURI LODGING-HOUSE ACT, IV (B.C.) OF 1871.

114. The subjoined statement gives the necessary information under this head:—

Name of Fund.	Receipts.		Expenditure.		Number of *chutties*.	Number of licensed houses.	Number of lodgers to be accommodated.
	1892-93.	1893-94.	1892-93.	1893-94.			
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Puri Town Lodging-house Fund.	5,526	20,239	7,208	11,273	...	638	17,050
Chandbali Town Lodging-House Fund.	725	671	546	570	1	52	2,475
Amalgamated Jagannath Road and Trunk Road Lodging-house Fund—							
In Cuttack ...	3,275	3,742	1,234	1,037	23	108	3,968
In Balasore ...	2,210	2,249	2,250	2,162	35	149	2,618
In Puri ...	2,314	4,501	3,440	4,561	14	175	4,181
Total ...	14,100	31,402	14,678	19,603	73	1,122	30,292

Except Chandbali, there was an increase in the number of lodging-houses and lodgers in the Puri town and *chutties* along the trunk road during the year under report. The total number of licensed lodging-houses was 1,122 with accommodation for 30,292 lodgers, against 704 houses for 19,833 lodgers in the previous year. The marked increase in the number of lodging-houses and lodgers, and consequent increase in receipts, was chiefly due to the unusual number of pilgrims that visited Puri on the occasion of the late Car festival, and to the great energy shown by Dr. Banks in carrying out the objects of the Act. To the same cause may be attributed the fact that in Puri the receipts under the head of fines also considerably increased, owing to a larger number of prosecutions, which numbered 138 against 27 in the previous year.

115. During the year 11 pucka and 34 kutcha houses with good ventilation were constructed, 175 pucka latrines repaired and constructed, 87 pucka drains

made and improved, 946 windows opened and 1,065 windows enlarged. It is in contemplation to erect at Puri corrugated iron shelters which, while not competing with licensed lodging-houses, will afford protection to numbers of pilgrims who cannot be accommodated in lodging-houses, even had they the means to pay for accommodation. This is a measure strongly called for by the circumstance that the Car festival takes place in the month of July in the height of the rains. Last year there must have been over a hundred thousand pilgrims, and the registered accommodation at Puri itself is for 17,050 only, which cannot suffice even in an ordinary year. The state of things on the roads is, I fear, worse than that in the town of Puri. Allowing for the fact that most pilgrims come by water as far as Cuttack, there is shown to be only accommodation for 4,181 pilgrims in the *chutties* south of the Katjuri, which, even if they suffice for the gradual influx of pilgrims, do not suffice for the rapid efflux at the termination of the festival.

Whatever the sufferings of pilgrims may be—and I conceive that they have suffered for centuries—such sufferings are nothing now compared with what they were in the past, and this is due chiefly to the enterprise of the Steamer Companies, which has made the pilgrimage more rapid and more easy.

116. The *chutties* along the Jaganath Trunk Road are under the District Health Officer, who is reported to have inspected them regularly. The Act was extended to Bhubaneswar towards the latter end of the year, and subsequently to Satyabadi.

The food sold in the *chutties* was regularly examined and, if found unfit for human consumption, was destroyed. In addition to 9 permanent mehters, 11 extra mehters were temporarily employed. The Magistrate thinks the supply of mehters altogether inadequate.

117. In Balasore the lodging-houses were frequently inspected by the Health Officer. The *chutties* and bazars were kept clean and the houses made more commodious and better ventilated. The Magistrate thinks the working of the Act was satisfactory.

118. In Cuttack out of 23 *chutties* lodging-houses, licenses were applied for by residents in 17. No applications were made from the remaining six small *chutties*. Five house-holders were sent up for keeping lodgers without licenses. None of them, though convicted, applied for licenses, as the fines imposed by the trying Magistrate were small and had no deterrent effect. The opposition of the tenants to the Act seems gradually decreasing. A muharrir and a sweeper were added to the strength of the staff during the year under report. The former was appointed to help the Inspector in collection work, and the latter to clean the three *chutties* (Kuakhia, Manipur and Khanditur). Dr. Banks again brought to my notice that the Puri Health Officer had a good deal of his time occupied with collection duties. If these are really found to interfere with his duties as a sanitary officer, it would be well that Puri should follow the example of [illegible] sweepers were entertained during the pilgrim season at Nayabazar and Jobra near Cuttack.

119. The number of prosecutions was 36 against 32 persons, and that of convictions was 24 against 12 of last year. The Magistrate writes: "I inspected all the chief *chutties* during the year, and found all in good order: on the whole, certainly as well kept as those of Balasore and Puri districts that I have seen."

120. Though the Puri Lodging-house Act was extended to Jajpur town by Government No. 2087 of 15th September 1890, it has not yet been enforced owing to non-receipt to date of sanction to the bye-laws and model rules proposed. The numerous amendments suggested by the Magistrates in the bye-laws and model rules are under consideration, and amended editions will shortly be sent to Government for final sanction.

XXVI.—EDUCATION.

121. The required statistics under this head are given in statement XXX according to the instructions in paragraph 2 of your No. 2737, dated the 27th November 1893. The following is the note furnished by the Officiating Inspector of Schools of Orissa.

122. The following statement summarizes the comparative statistics of educational institutions of all classes:—

Class of Institution.	1892-93. Schools. Cuttack.	Balasore.	Puri.	Total.	Pupils. Cuttack.	Balasore.	Puri.	Total.	1893-94. Schools. Cuttack.	Balasore.	Puri.	Total.	Pupils. Cuttack.	Balasore.	Puri.	Total.	Average number of pupils. 1892-93.	1893-94.

123. There has been a loss of 104 schools and 3,057 pupils under the head of public institutions, and a gain of 114 schools and 658 pupils under the head of private institutions. There was thus a net increase of 10 schools with a net decrease of 2,399 scholars. The palpable loss of schools and pupils in Balasore is ascribed to the high market prices of food-grains which ruled throughout the year in consequence of the agricultural distress caused by the high floods which swept over the northern and southern parts of the district.

124. Of the 106,298 pupils under instruction, 102,014 are Hindus, 3,060 Muhammadans, and 1,021 Christians. Of the remaining 203, 13 are Brahmos and the rest are children of the primitive communities.

125. The total expenditure on all classes of institutions was Rs. 3,66,507, and the expenditure on superintendence, scholarships, buildings, and on other miscellaneous heads amounted to Rs. 57,407. Thus the aggregate expenditure on all accounts was Rs. 4,23,914, of which Government contributed Rs. 66,850, District Boards Rs. 78,991, and Municipal Boards Rs. 4,902.

126. A further improvement is visible in the way of the enforcement of the principle regulating the distribution of the municipal expenditure on education. Of the total outlay of Rs. 4,902 from municipal funds, Rs. 3,498 or 88 per cent. were devoted to primary and female education.

127. The population of the Division amounted by the census of 1891 to 3,877,294, of whom 1,896,725 were males and 1,980,569 females. Reckoned at the usual proportion of 15 per cent., the number of male children of school-going age would be 284,507, and the number of female children 297,085. Of the scholars on our returns, 100,886 are boys and 5,412 girls. It is thus seen that out of every 100 boys that might be at school, only 35 are being educated, the corresponding percentage for girls being as low as 1·8, a figure which, though insignificant by itself, will nevertheless be found favourable in comparison with the general percentage for the whole province.

128. The great disparity between Balasore and Puri as regards the percentage of boys at school and the total number of school-going age, as referred to in paragraph 17 of the Government Resolution No. 693T G., dated 2nd November 1893, can, I think, be accounted for otherwise than by resorting to the theory that it is due to differences in the degree of interest taken in education by the local Educational and District Officers. The fact that the disparity has continued to exist, though with some slight variations, ever since the introduction of the primary education scheme, lends no countenance to the above theory.

The only rational explanation of the disparity is afforded by the circumstance that the aggregate numerical strength of the literate castes (*i.e.* Brahmos, Karans, Khandaits, Rajus, etc.) in Balasore is more than double that of Puri. The disparity may also be partly traced to the fact of Balasore being more populous than Puri, as also to the predominance of the Panda class, whose attitude towards education is one of complete indifference.

129. A comparison like the one instituted in the paragraph above referred to between Patna and Orissa, and which is only based on the figures representing the total population and the gross educational expenditure of the two Divisions, would be misleading, as it loses sight of many other important aspects of the question which, if duly considered, would show Orissa in a more favourable light. Patna, with a population more than four times as great as that of Orissa, returned 9,353 schools in 1892-93, the corresponding number returned from Orissa being 7,405. The percentage of pupils to population of school-going age in Patna was 11·1 against 35·9 in Orissa. The percentage of public to the total expenditure on education in Patna was 36·9 and in Orissa 35·5.

When grants were originally made from provincial revenues for purpose of primary education, their distribution was regulated by the respective capability of the several divisions or districts to utilize these grants, as evidenced by the actual number of primary schools then existing in them. Orissa, which had a well-developed primary system of its own, thus succeeded in obtaining a larger grant than it could have secured on the mere basis of population, and the outlay seems to me to be justified by the relatively higher position which it has all along maintained as regards the percentage of boys actually under instruction.

130. As regards the substitution of inspecting pandits for chief gurus, there is no room for reform as far as this Division is concerned, the latter system having long since been in full operation in all these districts. It is also satisfactory to find that the stipendiary pathsalas do not absorb an unduly large share of the primary allotment. Lower primary schools for boys in Orissa are as a rule aided under the system of payment-by-results.

Ravenshaw College.

131. The number of students on the rolls on the 31st March last was 68, the same as in the preceding year. The expenditure for the year was Rs. 21,904, of which the grant from provincial funds amounted to Rs. 15,953. The cost to Government of each student was Rs. 177 against Rs. 180 of the preceding year.

At the B.A. examination held in 1893, 17 candidates appeared, of whom only 2 passed, and out of 40 students who appeared at the F.A. examination, only 5 passed. The one candidate who appeared at the M.A. examination failed.

Two candidates were sent up for the B.L. examination in November 1893. They both failed.

University Entrance and the departmental examinations.

132. Out of 164 students sent up to the University Entrance examination, only 42 have passed successfully, the percentage of success being 40 against 80 of the preceding year. The unfavourable result, however, is not peculiar to Orissa, almost all the schools controlled by the Calcutta University having more or less shared in the general decline.

No marked fluctuations are noticeable in the results of the departmental examinations for the last two years, except the lower primary scholarship examination, the results of which present a marked disparity between Cuttack and Puri on the one hand, and Balasore on the other, in spite of an identical set of question papers framed by the Inspector of Schools for all the districts. The appointment by the Inspector of a Central Board of Examiners selected from all the districts, and paid as at present by District Boards in whose offices the results are tabulated, is an arrangement designed to minimize all chance of diversity in the valuation of answer papers.

Moral training.

133. The importance of influencing the character and manners of the scholars, as well as their intellects, appears to be kept prominently before the schools, and although the advance in this direction may not be easily gauged, it is believed that some good at least is being done. No serious breaches of discipline came to notice during the year under report.

Physical training.

134. Gymnastic and elementary drill are taught in most of the high English schools of this Division. In Balasore, Babu Satyendra Nath De, a leading zamindar of the town, has placed a sum of Rs. 1,100 in the hands of Government, out of the interest of which four prizes of Rs. 5 each are awarded to school-boys who display proficiency in gymnastics. It is to be hoped that this good example will be followed by the public-spirited zamindars in the other districts.

The middle and primary schools of Orissa are too poor to do anything in this direction. It is reported that the Puri District Board intends to introduce simple physical training into the middle schools under its direct management.

The appointment of a special gymnastic master in the Cuttack Training School, which is the chief recruiting ground for vernacular teachers in Orissa, would be a step in the desired direction.

Special institutions.

135. The most important institutions under this head are the Cuttack Training, the Medical and Survey Schools, all of which are resorted to for purposes of training by students from the four districts and the Tributary Mahals. The Cuttack Training School has 43 pupils on its rolls against an equal number in the year next preceding. The great bulk of the teachers of middle vernacular schools in Orissa are ex-students of this useful institution.

There are elementary training schools at Balasore and Puri. In order to make these schools serve any useful purpose, the period of training in them should, I think, be extended from six months to one year.

136. The Cuttack Medical School, under the management of Surgeon-Lieutenant-Colonel J. M. Zorab, M.B., registered 118 pupils, of whom 6 were females. Nineteen hospital assistants were turned out of the institution during the year under report. The school has up to date sent out 187 certificated hospital assistants, 72 of whom are in Government service and 37 in that of Native States.

The variety of operations performed in the attached hospital and the number of patients afford a good field for practical training of the students both as regards dressing and examining cases before the teachers.

Particular care and attention are also given to the teaching of Medical Jurisprudence, both theoretically and practically. A careful watch is always exercised on the morality and discipline of the students in their boarding-house, hospital and school, and breaches of discipline are rarely noticed.

The female class of this institution, though still numerically small, has taken a predominant place in the medical education in Orissa, and has amply fulfilled the favourable anticipations formed of it by its original founder.

137. The roll-number of the Cuttack Survey School, which is under the control of the Principal of the Ravenshaw College, is 42. Out of 18 candidates who appeared from the institution at the last final examination, 16 were successful.

There are two industrial schools at Balasore, in which carpentry and needle-work are taught, and which partake more of the character of bazar workshops than of regular technical institutions.

138. The District Boards of Cuttack, Balasore and Puri have created a few scholarships out of public funds at their disposal, for the purpose of enabling Uriya youths to receive training at the Jobra Workshop, the Calcutta School of Art, and the Sibpur Engineering College.

Female education.

139. There are 101 special girls' schools attended by 2,541 pupils, the total number of girls under instruction, including those attending boys' schools, being 5,412.

The number of special girls' schools in Cuttack has declined considerably, and the loss is attributed to an unavoidable reduction of expenditure following close upon previous excessive outlay on this class of schools by the Local Boards concerned.

A girl belonging to the Cuttack Female Orphanage successfully passed the middle English scholarship examination during the year under notice.

Four girls passed the middle vernacular, 16 the upper primary, and 68 the lower primary scholarship examinations, against 10, 16 and 86 respectively in the preceding year.

Muhammadan education.

140. The total number of Muhammadan pupils under instruction is reported to be 3,060 against 3,114, showing a loss of 54 pupils.

Forty-eight Muhammadan pupils successfully passed the University Entrance and the departmental examinations, against 34 in the previous year.

No school in Orissa has been more successful in promoting the higher education of Muhammadan boys than the high English school of Kendrapara. I agree with the Inspector of Schools in thinking that if any school deserved a grant from the Mohsin Fund, surely it is Kendrapara.

In respect of educational facilities the Muhammadans of Orissa are better off than the other sections of the population. Apart from the advantages which they enjoy in common with the latter, they have special schools, special scholarships, and special free-studentships, and the rules regarding the age of admission are also relaxed in their favour.

Education of aboriginal and backward races.

141. These pupils numbered 190 against 298 in the preceding year. The decline under the head is attributed to the closure of a few Sonthal schools in the wood-land pargana of Fatiabad in Balasore, brought about by a sudden rise in the price of food-grains in that tract. The pupils returned from Balasore are mostly Sonthals, and those from Puri semi-Hinduized Konds.

During the year under review, six Sonthal boys from Balasore successfully passed the lower primary scholarship examination.

There are seven special primary schools for children of low castes in Cuttack and Puri.

Thirty low-caste pupils passed the lower primary scholarship examination during the year under notice, viz., 28 from Balasore and 2 from Puri. None got scholarships.

Indigenous education.

142. Under this head are shown Persian maktabs, Koran schools, Sanskrit tols, and elementary village pathsalas that do not conform to the departmental standards of instruction.

The maktabs numbered 40 with an aggregate roll number of 668. The Bhadrak and Dhamnagar maktabs do really impart instruction of a superior character in Persian classics to the Muhammadan pupils attending them. The others are scarcely worthy of the name of maktabs.

The number of Sanskrit tols has declined from 68 to 62, with a corresponding reduction in their attendance. The defunct tols were for the most part ephemeral institutions opened under the rumoured prospect of obtaining Government aid, and their loss is immaterial from an educational point of view. The two best tols in Orissa are the Puri Sanskrit School established at Puri in 1865 by the Maharaja of Balarampur in Oude, and the Sriram Chandra tol recently established at Balasore by the Chief of Moharbhanj. The financial condition of the former is very satisfactory. It has a capitalized fund of Rs. 13,000 invested in Government four per cents., and it receives a yearly grant of Rs. 1,300 from the Maharaja of Balarampur.

The Sriram Chandra tol at Balasore is a promising institution, and it has been placed on a stable financial footing by an adequate yearly grant sanctioned by its founder out of the revenues of the Moharbhanj State. The young Chief also takes a lively interest in the welfare of this school, which appears to me to be the best outcome of the late movement on the subject of the improvement of Sanskrit learning in Orissa.

A new tol has also been sanctioned for the Kanika Ward's estate, which is expected to commence work from the current session.

143. Associations have been formed at Cuttack, Balasore and Puri, with the object of improving the efficiency of Sanskrit tols by subjecting them to periodical examinations and rewarding them according to the results shown by them. Some of the tols in Cuttack and Puri and the adjacent Tributary States were thus examined and rewarded.

144. Thirty-three tols sent up 107 candidates, of whom 61 were successful, 50 of them belonging to the Puri district alone, and the rest to Cuttack and the Tributary States of Dhenkanal, Hindole and Talchere.

145. The total receipts of the Cuttack and Puri *Samitis* amounted to Rs. 789, and the expenditure to Rs. 553. The difficulty experienced in realizing

subscriptions and donations in this the very first year of the working of these *Samitis* does not augur well for the future success of these movements.

146. The municipalities and the District Boards of Orissa have not as yet contributed anything for the encouragement of Sanskrit tols. The municipality and the District Board of Puri, the traditional seat of Sanskrit learning in Orissa, ought to have moved in the matter long ago.

147. With reference to paragraph 5 of your letter above quoted, referring to paragraph 17 of the Government Resolution, as to education in this and the Patna Divisions, the Officiating Inspector ascribes it to the existence of a larger number of primary schools in Orissa when the Government grant was made for the purpose. The matter is still under my consideration, and a report may be submitted if necessary. I think the problem put by Government can be better solved by the Director of Public Instruction than the Commissioner of either Division, as neither knows the circumstances of the other Division, while the Director of Public Instruction has the advantage of knowing both.

XXVII.—DISPENSARIES AND HOSPITALS.

148. The required statistics under this head are given in statement XXXI. It shows 23 dispensaries against 19 in the preceding year. This increase of four dispensaries is due to opening of two in the Kanika Ward's estate, one at Nayabazar on the Jaganath road, and to the inclusion of the Satpara dispensary in the district of Puri, which the Collector says was not shown last year. The one at Nayabazar is very useful to the pilgrims, being situated at a place where they land from steamers near Cuttack. It is maintained by the District Board. Anantpur dispensary is the same as the one at Tekhri shown in the last year's report, the site of the dispensary having been changed owing to the removal of the office of the Manager of Kujang Ward's estate to Anantpur. Government sanction arrived for a dispensary in the Government estate of Banki, but it could not be opened before the expiry of the year, as no native doctor was deputed to take charge. A separate set of wards for females was added to the Bhadrak dispensary. The building for Srimati's Female Hospital at Balasore was completed during the year, but it could not be opened to patients. Lastly, the management of the Chandbali hospital was transferred to the District Board of Balasore.

149. As in the previous year, there is a considerable increase for the Division in the daily average number of both in and out patients, the figures being 120·36 and 612·98 respectively, against 92·07 and 543·01 in the preceding year. The increase is noticeable in all but a few dispensaries. The slight decrease in the average number of in-patients in Jajpur and out-patients in Dharmasala calls for no remark. But the decrease in the number of out-patients at Khurda, Pipli and Balianta in the district of Puri deserves special notice with reference to paragraph 18 of the Government Resolution on the last year's report. It is to be noted that there was a large influx of pilgrims on account of the special festival at the time of the Rathjatra, and there is a decrease in the average number of daily out-patients in the abovementioned three dispensaries situated within the reach of the pilgrim road. The Collector of Puri says nothing as regards the decrease in Khurda. With regard to the other two dispensaries he says thus:—"The dispensaries at Balianta and Pipli are kept by the Jaganath Road Fund, as they are supposed to be principally intended for pilgrims, though as a matter of fact they are used by residents in the proportion of five to each pilgrim." Further on he says: "I intend to give up the Balianta hospital and only have a temporary building there, as at Jajpur, during the Car festival for the use of the pilgrims, in case the Board does not bear part of the charge of the two dispensaries."

As far as the pilgrims are concerned, temporary dispensaries are calculated better to serve the purpose, as the influx of pilgrims is large only at particular occasions, and that again varies in number from year to year. As regards Satpara dispensary, the Collector's idea is to abolish it as of little use, and to apply the funds thus saved to the dispensaries at Pipli and Balianta as noted above.

There has been a slight increase in the cost of diet in all the dispensaries. The rate of cost and the increase in it in the Jajpur and Dharmasala dispensaries deserve note, and the Collector has been requested to account for both. As regards others, no remarks seem to be called for.

150. On the whole, the dispensaries appear to have worked satisfactorily. The Cuttack General Hospital showed an increase in major and minor operations. In his last visit the Inspector-General of Civil Hospitals is reported to have been satisfied with the variety of major and minor result operations and the practical knowledge of the students of the medical school. The results of the school were also satisfactory. The Committee appointed to enquire as to the advisability of keeping up the institution was satisfied that it was a useful one, and recommended its retention.

151. As regards the Lady Thompson Dispensary, the Collector of Cuttack says:—"The Lady Doctor, Miss Bose, has left, probably not to return. Indeed, as far as I can learn, the finances of the institution could not much longer have permitted of her salary being paid. The appointment of a lady doctor was not the success that was expected. People here are very conservative. This dispensary would be much more practically useful were it made an ordinary dispensary to meet the wants of this end of the town, with a female hospital assistant attached, who could treat women in the cottage hospital in the compound." There is some truth and force in what the Collector says. The Collector will be requested to move the Committee of Management to take his suggestion into consideration.

XXVIII.—LIBRARIES.

152. There is no public library in the Division. The district and subdivisional libraries are reported to be in good order, except that some of the books in Puri require rebinding.

153. In Cuttack the catalogues were revised during the year in terms of Board's circular No. 6 of May 1889. A list of the obsolete and superfluous books was prepared and circulated in other offices at head-quarters and in subdivisions, and a copy was also sent to the District Officer of Angul. Those books that were required by other officers have been sent, and the rest will shortly be sold by public auction, of which notice has issued. The Balasore library, too, was revised during the year. The re-classification and re-cataloguing of the books of the Sadar library in Puri, referred to in the last year's report, have been completed.

154. In Puri there is a very large collection of manuscript copies of Sanskrit works in the Sankaracharjya Math (the monastery founded by the disciples of the Hindu religious reformer Sankaracharjya). The number of volumes is estimated at about one thousand, written in Devanagri, Telugu, Dravidian, Uriya and Bengali characters, on palm-leaf and paper. It is said that the work of cataloguing this library was once undertaken by Government at the instance of Dr. Rajendra Lala Mitra, but it is not known if the task was completed. The library is said to be very valuable.

XXIX.—MUSEUMS.

155. There is no museum in this Division.

XXX.—LOCAL SELF-GOVERNMENT.

156. The number of Local Self-Government institutions during the year under report was the same as in 1892-93, viz.—

District.	*Institutions.*
Cuttack ...	1. The District Board. 2. The Sadar Local Board. 3. The Kendrapara Local Board. 4. The Jajpur ditto. 5. The Cuttack Municipality. 6. The Kendrapara ditto. 7. The Jajpur ditto.
Balasore ...	The District Board. 9. The Sadar Local Board. 10. The Badrak ditto. The Balasore Municipality.
Puri ...	The District Board. 10. The Sadar Local Board. 11. The Khurda ditto. The Puri Municipality.

157. The year under report was the seventh since the Bengal Local Self-Government Act, III (B.C.) of 1885, came into operation in this Division. The third general election of the members composing the three District Boards and three municipalities took place during the year under report.

158. The three tables given below show in detail the working of the District and Local Boards and of the Municipalities in this Division :—

District Board.

District.	Number of members.			Number of meetings held in—		Number of meetings adjourned for want of quorum.	Average attendance of members.		Total Receipts.		Total expenditure.	
	Appointed by Government.	Elected by Local Board.	Total.	1892-93.	1893-94.		1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.

Total ...	43	32	75	103	81	8	...	...	1,17,737	1,09,160	1,15,123	1,06,426

There is a decrease in the number of meetings held by the three District Boards and several Municipalities, and an increase in the number of meetings held by the several Local Boards.

Mr. Stevenson writes as follows:—

Cuttack.

"The attendance of members was more regular than in 1892-93, and at all meetings the Chairman presided, as desired by Government, when at head-quarters. The Vice-Chairman continued to render valuable assistance.

"The average attendance of members has improved in the Jajpur and Kendrapara Local Boards, and has fallen off in the Sadar Local Board, where, with the exception of a few, the members did not evince much interest in the conduct of business.

"The Chairman of the Local Board attributes this apathy on the part of the members 'partly to the paucity of the work and partly to the petty nature of the charge devolved upon the Board, as very little is left for its functions since the transfer by the District Board to itself of the control of secondary education and sanitation.' There may be something in this, but the District Board took action in terms of paragraph 11 of Government Resolution on Local Self-Government and the working of the District Boards for 1891-92.

"There was no change in the duties of the District Board, which were (1) the charge of pounds, (2) middle and primary education, (3) dispensaries, (4) ferries, (5) district and village roads, (6) water-supply."

Municipality, Cuttack.

159. The majority of the Commissioners in the Cuttack Municipality are reported by the Chairman to have taken a lively interest in municipal affairs. The sanitary condition of the town was on the whole good, and the working of the municipalty was generally satisfactory except as to office supervision.

The fourth general election of Commissioners took place during the year under report. The elections excited but little public interest, the total number of voters who attended being only 541 out of 1,643 persons entitled to vote.

Jajpur.

160. The Municipal Commissioners held 17 meetings as against 26 in 1892-93, of which 2 were adjourned for want of a quorum, against 5 in 1892-93. Roads and conservancy were duly seen to, and two new ferries and six urinals were added. The dispensary was almost entirely maintained by the municipality.

Kendrapara.

161. The sanitary condition of the town was better than in 1892-93, when cholera appeared as an epidemic and 225 deaths occurred. An agitation was set on foot by some residents for the exclusion of certain alleged agricultural and isolated villages from the municipal area. The matter was enquired into and the result reported to Government, who directed that the matter should be kept in abeyance till the passing of the new Municipal Act.

The Magistrate reports that something was done towards clearing jungle in all the municipalities, but not nearly so much as should have been.

Balasore.

162. The District Board had the control and management of the following branches of administration—(1) secondary schools, viz., middle class and middle vernacular, (2) special schools, including madrassas and schools for aborigines, (3) ferries, (4) roadside drains, (5) examination of primary schools, (6) grant of scholarships and rewards.

To two Local Boards were delegated the powers of administering grants for pounds, roads (both village and district), primary schools (both for boys and girls). The Bhadrak Local Board had, in addition to these, been specially entrusted with the management of the Bhadrak and the Chandbali dispensaries, the dâk bungalow at Chandbali, and the supervision of Salundi and Acquapada ferries, as they lie within the jurisdiction and easy reach of that Board. The District Officer remarks that "the powers delegated to the Local Boards have been well exercised. On revision of the delegation of powers to these Boards in order to harmonise with the clear wishes of Government, the Sadar Local Board have been relieved as an experimental measure of the administration of the district roads from the beginning of the current financial year; the Bhadrak Local Board to retain them within its jurisdiction so long as the Subdivisional Officer is the Chairman."

163. There were three bye-elections held during the year to fill up vacancies caused by removal or transfer of Commissioners. The fourth general election of this Municipality was also held on 15th January 1894, and 12 members were elected. The elections at each centre were attended by about little more than one-fourth the number of qualified voters. The election of Chairman and Vice-Chairman was smoothly carried out. Dr. Williams was elected Chairman and Babu Radha Charan Das Vice-Chairman. The Magistrate remarks:—"I am glad to be able to state that the so-called party feeling amongst the Commissioners did not hinder good and useful work, and I would add that under the new Chairman healthy signs of, if not unity, at least toleration, are being displayed."

Municipality.

164. Mr. Coxe writes:—"The average attendance of the members was 6·57 against 4·6 of the previous year, which shows an improvement. Babu Harish Chandra Ghose, a local pleader, continues to be the Vice-Chairman, and devotes considerable time and pains to the work of his post, in which he takes much interest.

Puri District Board.

The management of the pounds, ferries, and village roads throughout the district, except Khurda sub-division, was made over to the Local Board from 1st April 1893, and from the number of meetings held and the average attendance of the members, it is evident that the Board has taken much more interest in the administration of the services it was entrusted with than before.

165. The condition of the Municipality is improving. The net income of the Municipality was Rs. 35,604, exlcusive of Rs. 5,000 received from Government as loan for the Baradand drainage work.

Puri Municipality.

The main roads of the town were metalled with laterite stone and the lanes with broken pots, as last reported. Cattle straying about the streets are now impounded, and the pilgrims are not allowed to feed them with grass or straw, except at Pejnala and Sargadwar. The construction of the Baradand drainage work is approaching completion. The result of the last audit of the municipal account was on the whole satisfactory, and the irregularities pointed out are now being attended to.

166. I am able to bear testimony to a marked improvement in the District Board and Municipality of Puri over the state of things that existed last year, and I have separately reported to Government with regard to each of them. The great improvement in the Puri Municipality I attribute to the zeal and energy of the Chairman, Dr. Banks, whose devotion to his duties is conspicuous.

167. In the case of the Cuttack Municipality, I was not favourably impressed with the office work. The office appeared to be undermanned and not to have any clerk of the requisite ability to deal with the affairs of a large office. On the other hand, I can compliment the Chairman on the state of the roads and drains and on the manner in which, with the assistance of some of the Uriya Commissioners, he contrives to widen roads without recourse to the Land Acquisition Act.

In the case of the Cuttack District Board, the services rendered by Mr. Das, Vice-Chairman, are again entitled to special acknowledgment.

168. The Balasore Municipality, while maintaining its executive efficiency, has till recently been conspicuous for faction. I think the Commissioners have done wisely to elect as their Chairman an officer entirely beyond the reach of such influences.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

169. In statement XXXII are given the required statistics under this head. There is nothing to add to what I said last year. The Muhammadans appear to have a fair share of employment.

XXXII.—POST-OFFICES AND TELEGRAPHS.

170. No new post-offices were opened during the year. On the contrary, one branch post-office was closed in the district of Cuttack, and the branch office at Kendrapara was made a sub-post-office and the sub-post-offices at

Aul and Raghunathpur in the same district were reduced to branch offices. The reason for these changes is not known to me. No new lines of telegraph were constructed. An office was, however, opened at Jellasore in the district of Balasore. There is in the district of Puri a line of telegraph along the East Coast Railway line, which is worked only for the Department. Both the Departments are prospering well.

XXXIII.—ZAMINDARI DÂK.

171. The following table shows the working of the zamindari dâk during the year as compared with the preceding one:—

District.	Number of estates paying cess.		Percentage on sadar jama.		Receipts.		Expenditure.		Number of lines maintained.		Number of runners employed.		Number of overseers employed.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
	2	3	4	5	6	7	8	9	10	11	12	13	14	15
			Rs. A. P.	Rs. A. P.	Rs.	Rs.	Rs.	Rs.						
Cuttack	1,581	1,593	0 13 3·93	1 0 0	8,101	9,323	7,940	7,995	28	28	78	78	5	3
Balasore	818	818	1 4 6	1 2 0	5,251	4,806	4,704	4,982	19	19	51	51	3	4
Puri	364	402	1 13 3	2 0 0	5,210	5,414	4,776	4,655	10	10	29	29	3	3
Total	2,763	2,813			18,562	19,003	17,510	17,632	57	57	158	158	11	10

172. During the year under report, the mustajirs or farmers of Government revenue-free estates which are the property of individuals in the district of Puri were assessed with this cess under paragraph 4 of the Board's circular No. 1 of July 1880. This partly accounts for the increase in the receipts in that district. The difference in the rate of assessment partly accounts for the difference in the other districts.

173. No permanent new lines were opened. Three temporary lines were, however, maintained for eight months in the district of Balasore, at the instance of the Postmaster-General, for reasons not reported by the Collector. Nor is it clear whether this will be necessary annually. Further report will be called for and submitted. The other changes noticeable in the above statement call for no special remark.

174. In paragraph 155 of the last year's report it was stated that it might be necessary to revise the rate fixed for Cuttack to meet the charges for carrying the camp dâk of the Magistrate and subdivisional office, which it had been the practice to meet from contract contingencies. The Collector's report shows that a little more than Rs. 48 only was spent for this purpose, though additional temporary runners had to be entertained. It is reported at the same time that nothing was spent for carrying the dâks of the kanungos and outposts. The Collector's report does not state clearly whether chaukidars are still employed. Nor is it clear what is meant by "the rule not being generally known," when it is remembered that, not the public, but a limited number of Government officials only, are concerned. The Collector will be requested to altogether put a stop to the practice of employing chaukidars for carrying such dâks.

The collection work appears to have been done smoothly on the Collector's side.

175. There are said to have been 40 fairs in the district of Cuttack during the year under report, against about 40 in the preceding one. It is not clear whether new ones were started. It is desirable that the District Officers should pay particular attention to the site, water-supply, and other matters of sanitary consideration when new fairs are started. It seems also desirable from this point of view that the sites for new fairs should be reported beforehand to the District Officers, who should decide on their suitability. The attention of all the District Officers will be invited to this. No special arrangements were, however, made or necessary at any of the fairs in this district, except the Baruni

Fairs.

Jatra held in the town of Jajpur, when the municipality provided temporary latrines. No epidemic broke out at any of the fairs, and the police kept proper order.

176. In the district of Balasore a small sum was spent in erecting latrines and digging trenches only at Kawpur fair in the Bhadrak subdivision, and steps were taken to look after sanitary arrangements at other fairs of less importance.

177. In the district of Puri the fairs were the same as reported last year. The Ruth Jatra festival was attended by a larger number of pilgrims than usual. Cholera broke out, but fortunately the number of deaths was insignificant. Sanitary precautions were adopted by the Puri municipal authorities. At the Makar fair in the Khurda subdivision a temporary latrine was constructed and a small staff of sweepers engaged.

178. There were 121 pounds in charge of the District Boards, 56 in Cuttack, 42 in Balasore and 23 in Puri, against 53, 43, and 22 respectively in the previous year.

Pounds.

179. In the district of Cuttack the receipts fell from Rs. 7,168 in 1892-93 to Rs. 6,576 in 1893-94. The Collector says no special reason can be assigned for the decrease; it is, however, alleged that the decrease was noticeable in the pounds near the canal embankments, and is attributed to the leniency of the canal authorities in impounding cattle trespassing on the embankments. This explanation does not seem to be satisfactory. The District Board has, however, farmed all its pounds with advantage for the current year, while it retained direct management of all the pounds during the year under report.

180. In the district of Balasore, 25 pounds were farmed out and 17 retained under direct management. The former show an increase in the receipts on account of competition, while the latter show a decrease which is ascribed to continuous rains and floods, on account of which the cattle could not be let out to graze. It is not clear, however, how the rains and floods affected the receipts of one class of pounds and not those of the other. The Collector will be requested to explain this.

181. There is a decrease in the receipts from pounds in the district of Puri, where the District Board farmed out 22 and retained one under direct management. The decrease is not, however, real, as it is due to a part of the demand remaining unrealized at the close of the year, for reasons not given.

182. With regard to the cows and bulls wandering in the streets of the town of Puri, noticed in paragraph 161 of last year's report, the municipal authorities are reported to have now taken steps for impounding such cattle.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

183. The following are the Societies in the Division:—

(1) The Orissa Association at Cuttack.
(2) The Landholders' Association at Cuttack.
(3) The National Society at Balasore.
(4) The Orissa Sanskrit Samiti at Cuttack.
(5) The Graduates' and Under-graduates' Association at Cuttack.
(6) The Kayastha Sabha, or the Association of Bengali Kayasthas at Cuttack.
(7) The Utkal Samilani Sabha, or the Association of Uriyas at Cuttack.
(8) The Cuttack Total Abstinence Society at Cuttack.
(9) The Sanatan Dharmarakshini Sabha at Puri.
(10) The Gorakshini Sabha, or the Societies for the Protection of Cows at Cuttack and Puri.
(11) The Puri Temple Repair Committee.

The first, second, and third are political in character, but exist in name only. The fourth and fifth are literary and did something during the year. The Sanskrit Samiti did useful work in taking measures for the organization of the Sanskrit tols and for holding Sanskrit examinations. The Graduates' and Under-graduates' Association appears to have stirred once when the abolition of the Cuttack Medical School was under consideration. The sixth and seventh deal with social matters and do not appear to have done anything during the

year. The eighth and ninth are of little importance. Though the name shows that it is a religions institution, the Sanatan Dharmarakshini Sabha was formed, the Collector of Puri says, to defend some Bairagis at Puri, and the Society is about to cease to exist, as the case of the Bairagis has been judicially decided. The Gorakshini Sabha is a thing of the past, as reported last year. No signs of its vitality have been noticed.

The eleventh is a temporary committee, and did useful work in raising subscriptions and continuing the repairs to the temples at Puri. The repairs of the Bhogamundap and the temple of Bemala were completed. The former was in a dangerous state; iron joists supported by iron pillars were set to support its dome. The floor of the temple of Lakshmi was marbled. Some work was done to the principal temple also. All the works were carried out without any accident. Many works are still in progress. Since the transfer of Babu Bularam Mullick, the Joint-Secretary, Babu Hari Bullab Bose is the principal local authority.

184. The Native Press was represented by the newspapers reported last year. They are—

1. *Utkal Dipika.*
2. *Balasore Sambad-bahika.*
3. *Uriya and Navasambad.*

All the papers were conducted loyally and with moderation. The tone of the Uriya press contrasts favourably with that of the vernacular press of Bengal. The first-named paper is the most widely circulated of the three. It deals generally with questions that concern Orissa, such as the settlement, manufacture of salt, and occasionally with questions of general interest, such as opium, Sanskrit study, cooly law, service rules, and the quarrel between the Hindus and Muhammadans. It deplored the bad feeling that had arisen between Hindus and Muhammadans, without espousing the cause of either section of the community. The other two papers chiefly concerned themselves with questions of local interest.

During the year under report a new periodical was started. With regard to this new periodical the Collector of Cuttack says as follows:—"Another paper called *Indradhanu* (Rainbow), a periodical published at irregular intervals, was started during the year by some of the leading educated men of the town and interior. It was originally set on foot to criticise and bring to notice the works of Upendra Bhunja, the first and perhaps most renowned poet of Orissa, and thereby to give him prominence as a writer. There was a move in opposition by another party, which attempted to give precedence to some other and more modern writers. This latter party published a periodical called *Bijuli* (Lightning) at the press of the Raja of Bamra, a Tributary State in the Central Provinces. For some time the two factions waged a paper war in their respective organs; but of late a more pacific feeling has prevailed."

185. As I reported last year, public opinion in Orissa restricts itself to such matters as are intimately connected with the material welfare of the people, such as the settlement now in progress. The public in Orissa less, if possible, than in Bengal concerns itself with politics, and in this respect the public, with its imperfect means of ascertaining the truth, acts wisely.

186. The marked difference between Orissa and Bengal is to be met with among the educated and half-educated classes: these in Orissa maintain the same attitude of trustful reliance on the good faith of the Government that was not unknown in Bengal a quarter of a century ago. They are the upholders of the Government rather than its detractors. There is no indication at present of that ignorant and vindictive censoriousness that too often characterizes the attitude of a small section of the educated and half-educated classes in Bengal, and which, if it did not usually fall on barren soil, might lead to political danger.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

187. * * * * * * *

XXXVI.—CONDUCT OF ZAMINDARS.

188. A consideable number of the zamindars of Orissa appear to be wanting in aptitude for the management of their own affairs; many are seriously

in debt, and it is a very common incident that they are not at the trouble of ascertaining what is due as revenue to Government on the dates of payment of the half-yearly instalments, and thus fall into difficulties under the Sale Law. I am inclined to think that in this respect they are more indolent than the zamindars of Bengal. I cannot attribute the embarrassments that have come to my notice either to the Land Law, under which they have enjoyed for 60 years the increased value of their properties which arises from a rise of rents in the case of all but *thani* raiyats, and to the extension of cultivation; nor can I attribute it to extravagance except, perhaps, in connection with marriages, sradhs, distribution of alms, and other religious observances. They certainly are not conspicuous for a display of wealth, nor can they be relied on, as a rule, to support liberally any great public objects. Their charity runs in older and I venture to think less desirable channels, namely, the gratuitous support of vagrants of the religious or pseudo-religious class. Under the above circumstances it might be anticipated that we should find them harsh and oppressive landlords, desirous of recovering their fortunes at the expense of the tenantry; whether from the survival of patriarchal relations here more than elsewhere, or from that indolence which is assumed to be characteristic of the Uriya, such does not seem to be the case. The land system of Orissa, moreover, protects a large class of the tenantry from enhancement during the currency of a settlement, which acts as a further check on the landlord. I do not, therefore, think it can be stated that the zamindars of Orissa are oppressive landlords.

189. The Collector of Cuttack says that in his district the conduct of the zamindars was good on the whole. There was a dispute between the Raja of Sukinda and his raiyats. It was, however, settled amicably. It was once reported that killa Aul was in confusion, but nothing has as yet come to light to show that the raiyats there are oppressed. The Collector of Balasore speaks favourably of Raja Baikuntha Nath De Bahadur, Babu Rajnarayan Das, Bhunya Abdus Soban Khan, Kailash Chandra Rai Mahasay, and Rai Govind Bullab Roy Mahasay.

190. There appears no improvement in the relations between the zamindars and raiyats in the district of Puri. The Collector says as follows:—

"The largest zamindar in the district is the Government. The next leading zamindars, as reported last year, are—

"(1) The Raja of Puri. Matters about himself and his estates remain much the same as reported last year by Mr. Walsh. I have never seen the Raja, but the information available to me goes to show that though he may at times have a glimmering of conscientiousness, he is not all that can be desired. He is too much a slave of his attendants ever to make a real attempt to improve himself. The Rani has at last been induced to appoint a competent manager, and it is to be hoped that this appointment will do good.

"(2) The Raja of Parikud seems an excellent landlord as far as I can judge, and to be cursed with unreasonable raiyats over whom he seems to be prevailing.

"(3) The jagirdar of Malud's estate continues to be managed by me as receiver on behalf of his creditors.

"(4) The Chaudhuri of Bhinjarpur. It is understood the Chaudhuris are not at one among themselves. Their estates have fallen into arrears and have been advertised for sale.

"(5) The zamindars of Kothdesh (two brothers) have been much involved in debts of late, and have been very irregular in payment of Government dues. Their estate has at present been advertised for sale, and will, I fancy, be sold next July. It is regrettable that an old and distinguished family should be broken up, but the end is inevitable. They are hopelessly involved, and have not the necessary sense or knowledge to save themselves.

"(6) Of the principal mahants of the several maths at Puri, who hold endowment land, the mahant of Emar is the only person who manages his property well and is the wealthiest. The rest I am informed either mismanage their property or are involved in debt.

"On the whole, there is but little recognition in this district of the principle that property involves any duties beyond ostentation." I may add that I have seen very little evidence of ostentation in Orissa.

XXXVII.—GENERAL REMARKS.

191. The year was rather a favourable one than otherwise for crops, except in the Cuttack district, which appears to be in a normal condition of short crops, and has been so for the last three or four years. Prices have everywhere been high, which cannot, I think, be attributed to a deficient harvest, but rather to the influence of prices ruling elsewhere. So far as the agricultural tenant is concerned, I see no reason to think that his condition is otherwise than prosperous, as he must derive some advantage from high prices. The condition of the day-labourer here as elsewhere is not good; there are no local industries which divert this class from being the servants of the tenantry, nor does it appear that they readily leave such service when the oportunity offers. Relief works, when tried, do not seem to attract labour even at periods of the greatest pressure from high prices.

Yet when it is considered how great is the number of Uriyas who leave Orissa for employment in Calcutta and elsewhere, it cannot be alleged that the Uriya is wanting in the enterprise necessary to take his services to a better market than is to be found locally. This leads me to doubt whether the Uriya day-labourer can be so badly off as would at first sight appear. I have heard it stated by an officer who has good opportunities of observing, that many of this class are not free agents, that they have as a rule taken advances from a cultivator or a contractor and cannot leave such service, and that better wages will not tempt them to do so unless the temptatiom of an advance is added. The same officer says that this position of semi-slavery enables the employer to obtain their services much below the wage that would be paid by another person, and that the labourers are sweated down to the lowest scale that is consistent with their survival. It is possibly here that we must look for the explanation of the fact that wages do not rise in Orissa, as has been pointed out by Mr. McPherson, Subdivisional Officer of Khurda, and others. The only way that we may hope that this bondage will be broken will be by creating a larger demand for unskilled labour. Manufactories are not likely to exist in Orissa, but a railway will doubtless stimulate an increasing number to leave Orissa for places where labour is better remunerated.

The settlement progressed on the whole quietly; less is heard now of the oppression of amins, and the time has not yet come for the raiyats to learn how the settlement will affect them, and they maintain a quiet attitude.

The East Coast Railway has come to a standstill, the decision of the difficult question as to where the Mahanadi bridge is to be built being still under consideration.

The year is remarkable for the large number of pilgrims that visited the Puri temple on the occasion of the Car festival. Ever since Puri has been a place of pilgrimage, pilgrims have visited the temple at considerable personal inconvenience and risk to health and life, and it is a subject of congratulation that in 1893 the abnormally large concourse, which is estimated to have exceeded 100,000 persons, showed an exceptionally low rate of mortality.

The Steamer Companies did yeoman's service in transporting pilgrims to and from Calcutta, and the sufferings experienced were materially lessened thereby. It would be interesting to compare the statistics as to mortality in 1893 with those of a similar occasion before steamer lines existed, and when the whole distance between Calcutta and Puri, over 300 miles, was traversed by road.

The Hemp Drugs Commission visited Orissa, and witnesses were examined at Cuttack and Puri. The Uriya is not in favour of the prohibition of the use of hemp drugs. Similarly, the Uriya witnesses before the Opium Commission were opposed to the prohibition of the use of that drug.

RESOLUTION ON THE REPORT ON EXCISE ADMINISTRATION IN THE LOWER PROVINCES FOR 1893-94.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 17th October 1894.

RESOLUTION—No. 433T.-F.

READ—

The Report of the Commissioner of Excise for the year 1893-94, with the observations of the Board of Revenue thereon.

There was no administrative change in the management of this Department during the year. Mr. Krishna Govinda Gupta was Commissioner of Excise throughout the year, and he had the direct assistance of three Deputy Collectors, one of whom was his Personal Assistant, and two were peripatetic Inspectors of Excise. In 18 districts the Department was in charge of Special Deputy Collectors whose whole time was, or should have been, given, and whose pay was charged, to the Excise Department, while in the remaining districts excise work was entrusted to a half-time Deputy Collector on the ordinary staff. In all but three of the former districts there are central distilleries, the working of which demands the careful supervision of the Special Deputy Collectors. The distilleries generally are in immediate charge of Sub-Deputy Collectors or of Kanungos, as Superintendents. Their number was reduced during the year by the closing of those at Hooghly and at Maniktola in Calcutta, and since the end of the year the Mymensingh distillery has also been abolished. The number of Sub-Deputy Collectors now employed is 9, and of Kanungos, inclusive of the Deputy Superintendents of certain distilleries, 27. The Commissioner has not reported how far the old excise darogas have been replaced in the subordinate establishment by men of a superior class. This subject should be noticed in the next report.

2. *Inspections.*—The amount of inspection done by the Commissioner and the Inspectors was satisfactory. With regard to Collectors, it is reported that the central distilleries were insufficiently inspected in Birbhum, Murshidabad, and Monghyr, and that excise inspection generally was neglected in Bogra, Rangpur and Tippera. The Board should draw the attention of the Collectors, of these districts to the matter, and insist on the inspection work being properly done in future. In paragraph 7 of their report, the Board mention certain districts in which the Special Deputy Collectors are stated to have been employed, more or less, on judicial work in breach of the rule that their whole time should be given to excise work. It appears, however, from the Administration Report of the Commissioners, that in 1893 no judicial work was done by those officers in Mymensingh and Champaran, and that only in Midnapore was the amount excessive. The rule should be strictly carried out in future. It is satisfactory to notice that in 16 out of the 18 districts in which Special Deputy Collectors are employed, the minimum number of days prescribed for inspections in the interior (120) was attained or exceeded. Since the close of the year orders have been issued fixing the minimum number of days for touring by these officers at 150, and directing that they are not to be employed on magisterial duties or placed in charge of treasuries. In the other districts the Deputy Collectors of the ordinary staff supervising excise are not to have charge of the treasury, and are required to spend 90 days on tour. The number of days prescribed for these officers last year was 60, and the Lieutenant-Governor is glad to find that there was a deficiency in the tours in only three districts, excluding the Sonthal Parganas and Darjeeling, the circumstances of which are exceptional. The only serious deficiency (24 days) was in Tippera;

the cause of this should have been explained. A subordinate staff of inspecting and preventive officers is maintained in all districts. The movements of these officers should be closely and constantly watched and controlled by the Deputy Collectors and Collectors.

3. *Financial results of the year.*—The revenue from exciseable articles was, as in previous years, realised from fees on licenses for wholesale and retail sale of spirits or drugs, distillery fees, and duty on the actual quantity of country rum, country spirit prepared in the central distilleries, opium, ganja and bhang passing into consumption. Duty on imported liquors forms part of the Imperial customs revenue. A further enhancement of the duty on ganja, and the substitution of a distillery fee of 2½ annas per gallon, London-proof, for the former fee of one anna per gallon irrespective of strength, were the principal changes made last year in rates. The total receipts of the year, according to the figures returned by the District Officers, amounted to Rs. 1,21,37,096, or Rs. 6,37,096 in excess of the budget estimates. The total charges having been Rs. 6,47,740 against a budget estimate of Rs. 6,96,000, the net receipts were Rs. 1,14,89,356. The Accountant-General's figures show receipts larger by Rs. 28,563, but the discrepancy has to be reconciled. An annual statement of the charges should be obtained from him for comparison with the figures supplied by the Collectors. All exciseable articles show an increase of revenue in the past year, with the exception of madak, chandu and methylated spirits, the largest increase being obtained from the license fees of outstills and the duty on ganja. The incidence of the excise revenue per head of the population amounted to two annas and eight pies, against five annas and five pies and eight annas and four pies respectively in Madras and Bombay, and one anna and nine pies in the North-Western Provinces and Oudh for the year ending the 30th September 1893. The expenditure, on the other hand, decreased by Rs. 6,000; the details of the sub-heads as compared with 1892-93 are given in paragraph 44 of the Commissioner's report. There is an increase of Rs. 9,230 under salaries, with a decrease of Rs. 6,666 under rents and rates, and of Rs. 4,000 under petty construction and repairs. The Commissioner of Excise should furnish details of "petty construction" in future reports, as was done in paragraph 59 of his report for 1892-93.

4. *Relation of growth of consumption to growth of revenue.*—The Board's observation in paragraph 12, that the accepted principle of raising a maximum of revenue from a minimum of consumption, has been carefully kept in view, receives support from the following figures showing the revenue derived from, and the consumption of, the chief articles of excise in the past two years:—

	Revenue.		Percentage of difference.	Consumption.		Percentage of difference.
	1892-93.	1893-94.		1892-93.	1893-94.	
1	2	3	4	5	6	7
	Rs.	Rs.		L. P. gallons.	L. P. gallons.	
Distillery liquor ...	24,03,063	24,45,174	+1·8	402,156	416,887	+3·6
Outstill shops ...	26,27,080	28,07,224	.....	.....	.....	.....
Country rum ...	4,19,717	4,35,308	+3·7	80,176	83,554	+4·2
				Mds.	Mds.	
Opium ...	20,85,635	21,34,867	+2·4	1,934	1,960	+1·3
Ganja ...	23,86,066	25,35,045	+6·2	5,451	5,116	−6·1

The consumption of distillery liquor increased more than the revenue derived therefrom. This occurred mainly in Bihar, and is accounted for by the reduction of the duty in that province, which was intentionally made in order to enable that liquor to compete with the cheap outstill liquor and check illicit dealing in the latter. In other Divisions, where higher rates of duty are levied, consumption fell of. In the case of outstill liquor the returns of consumption obtained from the license-holders' books are too untrustworthy for quotation,

The revenue from country rum would have amounted to Rs. 4,39,600 in the past year if the full duty of Rs. 5 per gallon had been paid in Bengal on 1,073 gallons imported from Shahjehanpur which passed into consumption. If this sum is taken as the true revenue, the increase over the previous year was 4·7 instead of 3·7 per cent, and exceeded the increase in consumption. The increase in revenue from opium and ganja also gives a larger ratio than the increase in consumption. The reduction in the consumption of ganja, accompanied by a large increase in the revenue, is specially remarkable.

5. The gross revenue, the charges, and the net revenue in the past five years are shown in the following statement:—

Year.	Revenue.	Charges.	Net revenue	Percentage of charges.
1	2	3	4	5
	Rs.	Rs.	Rs.	
1889-90	1,04,73,431	5,31,382	99,42,049	5·07
1890-91	1,04,60,932	6,47,112	98,13,820	6·1
1891-92	1,11,29,813	6,67,792	1,04,62,021	6·
1892-94	1,16,00,621*	6,53,715*	1,09,46,906*	5·6
1893-94	1,21,37,096†	6,47,740†	1,14,89,356†	5·3
Difference between the past two years	+5,36,475	—5,975	+5,42,450	—·3

* Revised figures.
† Figures subject to revision by Accountant-General.

Saving a slight fall in 1890-91, the revenue has steadily advanced, the net increase last year over the preceding year being Rs. 5,42,450. The charges at the same time show a gradual decrease in the past three years. Distributed according to the Divisions, the revenue compares thus for the past two years, after exclusion of the advance collections of each year:—

Division.	1892-93.	1893-94.	Difference + or —
1	2	3	4
	Rs.	Rs.	Rs.
Burdwan	11,57,570	11,61,512	+3,942
Presidency	32,14,624	35,64,906	+3,50,282
Rajshahi	8,81,117	9,37,755	+56,638
Dacca	8,12,196	8,11,233	—963
Chittagong	2,68,588	2,65,973	—2,615
Patna	24,28,015	25,85,849	+1,57,834
Bhagalpur	12,09,774	13,08,328	+98,554
Orissa	5,64,242	6,18,447	+54,205
Chota Nagpur	8,37,868	8,75,374	+37,506
Total ...	1,13,73,994	1,21,29,377	+7,55,383

There was thus an increase of over 7½ lakhs last year on comparison of the revenue received in each year on account of the year itself. There were slight decreases in only two divisions, Dacca and Chittagong, while large increases were obtained in the Presidency (including Calcutta), Patna and Bhagalpur Divisions

6. *Revenue under different heads.*—Classified under the different heads, the revenue (without adjustment of advance collections) has been as follows in the past five years:—

Articles of Excise.	Revenue.					1893-94 compared with 1892-93.	
	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	Increase.	Decrease.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Country spirits	47,07,132	45,28,262	48,14,643	50,30,143	52,52,898	2,22,755	...
Rum	1,00,659	98,383	2,29,072	4,19,717	4,35,308	15,591	...
Imported liquors	2,14,090	2,31,095	2,23,644	2,07,092	2,33,162	26,070	...
Beer	16	71	174	193	224	31	...
Tari	8,26,314	8,45,586	9,57,405	9,50,379	10,16,375	65,996	...
Pachwai	2,32,682	2,72,288	3,04,168	3,34,557	3,46,518	11,961	...
Charas	3,535	6,594	7,568	9,097	10,776	1,679	...
Siddhi, sabzi or bhang	43,141	44,847	48,464	53,558	55,752	2,194	...
Majum	2,067	1,910	1,962	1,984	2,069	85	...
Madak	82,825	81,467	86,343	79,689	78,379	...	1,310
Chandu	35,216	36,267	35,332	31,032	24,476	...	6,556
Spirits used for arts	143	466	772	1,066	337	...	729

					Net increase ...	Rs. 5,36,475	

* Revised figures, owing mainly to the inclusion of the revenue of the new district of Angul and Khondmals.

The revenue from country spirits, which fell by nearly 2 lakhs in 1890-91, has steadily advanced since, and in 1893-94 exceeded the receipts in that year by over 7 lakhs. Tari and pachwai show an unbroken advance since 1889-90, and rum, ganja and opium have also made steady progress from the same year save for a falling off in one year in each case. The settlements of licenses for the current year have again been very favourable, and the fees show up to the 31st May an increase of Rs. 4,44,099 over the amount in the past year.

7. *Country spirit.*—No article of excise contributes so largely to the revenue as country spirit. In the past year the receipts from this source amounted to Rs. 52,52,898, or 43·3 per cent. of the total excise revenue, against Rs. 50,30,143, or 43·4 per cent. in 1892-93. Country spirit is manufactured either at central distilleries or at outstills. The central distilleries are maintained by the Government; stills are worked within them by distillers, and the liquor is passed out, after the levy of the distillery fee and the duty, for sale at licensed shops. Except at a few subdivisions, the circumstances of which are exceptional, the distilleries are located at the head-quarters of the districts, the subdivisions being sometimes served by depôts supplied from them, from which the liquor is taken by the retail vendors. The central distillery system is in force throughout the following divisions and districts:—Burdwan, except certain wild tracts of Bankura and Midnapore, where outstills are allowed; the Presidency, Dacca and Orissa, except the jungle tracts of Cuttack along the frontier of the Tributary States, where outstills were re-introduced in the past year; the Giridih subdivision of the Hazaribagh district; and the Sonthal Parganas district. In the Patna Division, and the districts of Monghyr and Bhagalpur, a dual system of central distilleries and outstills is maintained, the areas served by the distilleries being defined, and outstills being placed at such a distance from the boundary as to minimise the risk of smuggling of outstill liquor into those areas. In the Rajshahi and Chittagong Divisions, in the Chota Nagpur Division, except a small portion of Hazaribagh and Manbhum, and in the districts of Purnea and Malda of the Bhagalpur Division, the outstill system only is in force. In all districts the number of distillery or outstill shops, or of both, sanctioned is fixed with due regard to the requirements of the drinking population, as ascertained by careful enquiry renewed from time to time, and to the policy steadily maintained by the Government of affording no undue facilities for procuring liquor; the sites are selected in consultation with the magisterial and other local authorities, changes being made in deference to their views and the opinion of respectable residents; and the licenses are sold by auction, at upset prices fixed with reference to consumption, so far as it can be estimated, and the prices obtained in previous years.

8. *Changes effected or proposed in the management of Sadar Distilleries.*—The modification in the rate of the distillery fee already referred to was a change of some importance made during the year in the rules relating to central distilleries. It is yet too early to judge its effect, but a comparison of columns 19 and 24 in table V shows that the receipts under this head have fallen in the Patna Division, where it was too high before, considering the weakness of the liquor distilled, and have risen elsewhere, where the spirit distilled is stronger. So far, therefore, the object of the change has been achieved. Another change was the introduction of locked receivers for the spirit passing from the stills on distillation, in order to prevent any fraudulent abstraction. The Board (paragraph 27) were not satisfied that the advantages obtained were commensurate with the annoyance caused by the restriction, and prohibited its extension to distilleries where it had not been tried; but Mr. Westmacott is personally of opinion that the principle is sound that distillers should not have access to the receivers without the presence of an excise officer. The extension of the system must depend on the reports received of its working in the places where it is in force. On the question of issuing liquor from the distilleries at fixed strengths obtained by blending liquors distilled at different strengths, referred to in paragraph 25, the Lieutenant-Governor's remark in the Government order of the 9th June 1894, which referred only to compulsory distillation at a certain strength, not to blending, appears to have been misunderstood. In paragraph 15 of the Resolution on the Annual Report for 1891-92, as also in the Government order of the 19th March 1892, the Lieutenant-Governor desired to convey approval of the system, while expressing the opinion that it should be enforced with discretion. He agrees with the Commissioner and the Board that minute differentiation of strength in the issues from the distilleries should not be allowed, and that the fixing of a few standards of strength, conformably to the wishes of the distillers, who know the tastes of the consumers, tends to simplify the accounts and act as a check on the distillery establishments. The Board are, therefore, at liberty to maintain and, if necessary, extend the system. The plan of fixing minimum prices for the retail sale of liquor, whether at distillery shops or at outstills, which involved minute interfence and was never effectual, has been abolished; but the Commissioner now advocates, in paragraph 74 of his Report, that Government should fix the prices to be charged by distillers to the retail vendors, on the ground that the former have practically a monopoly of manufacture in central distillery areas, and that a reduction in the price of distillery liquor will minimise the temptation to smuggle or deal in contraband liquor. The Board (paragraph 30) discourage the proposal as an interference with free trade, and the Lieutenant-Governor agrees with them. The Board observe (in paragraph 32) that it has been considered a desirable policy to encourage the distillers to issue weak instead of strong lipuor, but they do not advocate a policy of interference. The Lieutenant-Governor considers that the interference has been on the part of Government, which, by imposing a heavy still-head duty, has encouraged traders to distil at high strength: and the object of lowering the duty and the distillery fee is to allow things to take their course, and the tastes of the consuming classes to be consulted. In Bihar, where the demand is for a cheap, weak and comparatively innocuous liquor, the distillation of strong spirit had the tendency of encouraging drunkenness, or else of driving consumers to the use of illicit spirit.

9. *Changes in the management of outstills.*—With regard to outstills, effect was given from the beginning of the past year to the order of Government, in paragraph 14 of the Resolution on the Report for 1891-92, directing the withdrawal of the restrictions on the capacities of the stills and the fermenting vats, which were introduced some years since on the recommendation of the Excise Commission, but were found after full trial to be vexatious and ineffectual in practice. The licensees of outstills cannot, however, increase the size of the stills already sanctioned without the approval of the Collectors and the Excise Commissioner. The Lieutenant-Governor anticipates no evil results from the change, but the subject should be noticed in the next report. Mr. Westmacott (paragraph 25) deprecates the abandonment of the system followed by him when Excise Commissioner, of fixing the upset prices for the licenses for outstill shops on the basis of the quantity of liquor sold, a system which was condemned in paragraph 19 of the Resolution quoted above. Seeing that the information

procurable as to the quantity of liquor sold at the outstills is generally untrustworthy, the Lieutenant-Governor is of opinion that the average fees realised at the auctions in the previous three years must be the main guide for the calculation of the upset prices.

10. *Revenue from country spirit.*—Of the total revenue from country spirit, Rs. 24,45,174 were contributed by the central distilleries and the shops dependent on them, and Rs. 28,07,724 by the outstills, there being in the former case an increase of Rs. 42,111 and in the latter of Rs 1,80,644 over the receipts in the previous year. The number of distillery shops settled increased from 1,175 to 1,255, or by 80, and of outstill shops from 2,007 to 2,034, or by 27; but the total number of shops of the two classes was still much below the annual average of the five years 1888—93. The increase in each case in the past year is explained to be partly due to the settlement of a larger number of the sanctioned shops during the past year. For the purpose of ascertaining the number of new shops it is necessary to compare, not the number of shops actually leased, which is always a little below the sanction, but the number of sanctioned shops in each year. This comparison should be made in future reports, and explanation of any increase given. From figures separately supplied by the Excise Commissioner, it appears that for the past year the number of sanctioned distillery shops was 1,292 against 1,243 in 1892-93, and of outstill shops 2,041 against 2,029. The Lieutenant-Governor trusts that the Board and the Commissioner will continue to check carefully all proposals for an addition to the number of existing shops, and to accord their sanction only in cases where the opening of a new shop is found necessary to meet a local demand which might otherwise be supplied by illicit dealing. In the Burdwan Division there was a decline in revenue from country spirit in all districts except Birbhum, but the loss was almost made up by increased receipts from pachwai and tari. It is clear from the figures furnished by the Commissioner that illicit distillation prevails largely in the Jahanabad sub-division of the Hooghly district and in Bankura, and the Lieutenant-Governor will be prepared to consider any proposals which the Board may desire to submit for the entertainment of special police in these tracts. The Presidency Division shows an increase of nearly Rs. 8,000 in the revenue, and a simultaneous decrease of nearly 6,000 gallons in consumption. In the Rajshahi Division, with Purnea and Malda, an increase of Rs. 40,820 was obtained. The Dacca Division shows a slight increase, a heavy falling off in Dacca, and a slight one in Backergunge, being compensated by a large rise in Mymensingh and a smaller one in Faridpur. The decrease in Backergunge is attributed partly to the use of country-made Eau-de-Cologne as a stimulant, which will be noticed further on. In the Chittagong Division the consumption of spirit is very limited. The revenue rose during the year owing chiefly to better settlements of the licenses. The Patna Division, with the addition of the districts of Monghyr and Bhagalpur, yields the largest revenue from country spirit, the amount received in the past year being Rs. 18,09,289 against Rs. 16,85,515 in 1892-93, showing an increase of Rs. 1,23,774, which was obtained in both the distillery and the outstill areas. Even the revenue from distillery liquor, which has long been on the downward grade, has commenced to rise as shown in paragraph 93 of the Commissioner's Report, and this may be the result of the measures lately taken to reduce its costliness. The lower classes of these districts are much addicted to drink, but the liquor consumed is ordinarily weak, and there is also a very large consumption of tari, which is still weaker. An increase of revenue was also obtained in the Sonthal Parganas and the Orissa and Chota Nagpur Divisions, Palamau contributing the largest amount in the latter division, owing to the closer attention paid to excise since its formation into a district.

11. *Reduction in the number of distilleries.*—The suggestion (paragraph 30) that some of the smaller distilleries should be abolished, and their place supplied by depôts furnished from other distilleries, should form the subject of a separate report. The substitution might perhaps be advantageously effected in the Sonthal Parganas, where five central distilleries are now kept up.

12. *Country rum.*—With the view of checking the competition of country rum with country spirit, the substitution of a strong for a weak liquor being undesirable in the interests of the people, the duty on rum was raised from Rs. 4 to Rs. 5 per gallon London-proof in certain districts from the 1st April 1892.

The effect of the change in 1892-93 was a decrease in consumption, but a recovery took place in the past year. The total quantity passing into consumption from the distillery at Sibpur and by importation from Shahjehanpur in the North-Western Provinces and Aska in the Madras Presidency was 83,554 gallons London-proof against 80,176 gallons London-proof in 1892-93, showing an increase of 3,378 gallons London-proof. These figures, however, include the exports to Assam. If these exports are excluded, the actual increase in consumption in Bengal itself was, as the Board report, 640 gross gallons. In future reports the quantity exported to Assam and consumed in the districts outside Calcutta should be shown in London-proof gallons. The duty rose during the year from Rs. 4,00,321 in 1892-93 to Rs. 4,13,734. The income from license fees being insignificant, the total revenue from rum rose from Rs. 4,19,717 to Rs. 4,35,308.

13. *Imported liquor.*—The excise revenue from imported liquor is made up entirely of fees for licenses for wholesale vend, and for licenses for retail in shops, at hotels and railway refreshment rooms, and on steamers. The total receipts amounted during the year to Rs. 2,33,162 against Rs. 2,07,092 in the preceding year. The number of hotel, railway refreshment room and steamer licenses increased, but licenses for wholesale and retail shops fell off considerably in Calcutta owing to the enhancement of the fees from Rs. 50 and Rs. 600 to Rs. 300 and Rs. 1,000 respectively. This reduction is satisfactory, as it implies the closing of a large number of shops for the sale of cheap imported spirits. Regarding these spirits the Commissioner writes (paragraph 101):

"Most of the cheap and low class foreign spirits imported into Calcutta is made in North Germany from starchy roots, and is shipped here from Hamburg and London. All the varieties of these spirits (brandy, whisky, gin, spirits of wine, and spirits, other sorts), except some consignments of gin, are imported over-proof, in order to save freight. Nearly three-fourths of the total quantity imported is Hamburg spirits of wine, the average strength of which is seldom less than 63° O. P. The greater portion of the imported liquors sold in the native shops is concocted in Calcutta from these spirits of wine. The manipulation begins after they are cleared from the Custom House. The strength is reduced according to requirements, flavouring essenses and colouring matter are added, and the mixture is variously sold as whisky, brandy, gin and even as port and sherry. Gaudy and flaring labels are used, and the number of brands, specially of brandies and whiskies, is enormous, though care is apparently taken to avoid a close imitation of any recognized trade marks or an infraction of the provisions of the Merchandise Marks Act, the Penal Code, or the Sea Customs Act, as amended by Act IV of 1889. These manipulated spirits are sold at an average strength of 40° U.P. The cost price of a dozen bottles is about Rs. 8, and the wholesale price Rs. 10-8 to Rs. 12. The retail price varies from Re. 1-4 to Re. 1-6 a bottle, which leaves a very large margin of profit. The importers of such spirits are known, and they have been warned that if they sell German spirit so labelled as to show it to be French brandy, English gin, Scotch whisky or anything other than what it really is, they will make themselves liable to prosecution."

The Board add—

"A condition has been inserted in all the licenses issued for the current year binding the licensee not to possess or sell any spirituous or fermented liquor other than country rum, unless the bottle bears a label or capsule, or the cork is sealed with a seal showing the name and style of the firm or shop by which, and the place at which, the liquor has been bottled, and the country of manufacture. It is beyond the power of the law to prevent the bottling and concoction of imported liquors so long as the provisions of the Indian Penal Code relating to trade marks are not infringed, and so long as the requirements of the Merchandise Marks Act are satisfied. The measure adopted should go some way towards diminishing the use of liquors locally manipulated, as the purchaser will know that it is not the original article which he is buying."

14. *Tari.*—Tari, or the sap drawn from palmyra and date trees, is an important source of excise revenue, the receipts last year having amounted to Rs. 10,16,375 against Rs. 9,50,379 in 1892-93. The liquor is used as a stimulant in a fermented state: when fresh and unfermented, it is a pleasant beverage having no intoxicating effect: when fermented, it is said to be nearly the same strength as about weak country liquor, but experiments should be made with the hydrometer to support this assertion. It is not distilled in this Province. Fresh tari is largely used in some districts for the manufacture of molasses, and is in such case exempt from taxation, the exemption extending to the whole of the Dacca Division under a notification issued by

the Government in 1883. In other districts a small fee only is levied, 2,461 licenses granted in the past year having yielded a revenue of only Rs. 7,211. The tari revenue is thus practically derived entirely from the fermented juice. The districts of Bihar contribute by far the largest share, and the proper regulation of tari taxation in those districts is a matter of great importance. A commencement has been made towards the introduction of the Madras system of fixing the license fee according to the number of trees tapped, a schedule of trees being filed by every applicant for a license, and the trees being subsequently marked for identification; but for the full introduction of the system it may be necessary to amend the law. The Board have been requested to submit a report on the subject, furnishing an estimate of the initial cost of registering and marking the trees, and of the future annual cost of the establishment required for maintaining the registers and detecting breaches of the rules, and this report is awaited. If further delay is unavoidable, the Board are requested to report at once on the further question which has been referred to them, whether an officer should be deputed to Madras to study the system on the spot. It is desirable that any information required for the further development of the system should be obtained as early as possible, in order that arrangements may be made before the settlements of the licenses for the ensuing year.

15. *Pachwai.*—This liquor, prepared by the fermentation of rice or marwa (*Eleusine Corocana*) and other grains, is a favourite beverage of the aboriginal or hill tribes who are found mainly in the districts of Burdwan, Birbhum, Bankura, Midnapore, Murshidabad, the Sonthal Parganas and Darjeeling. In other districts licenses are granted where settlements of the aboriginal tribes exist. Besides the licenses for sale, which yielded last year a revenue of Rs. 3,27,827 against Rs. 3,17,699 in 1892-93, licenses for home consumption are granted to the headmen of villages at low fees fixed according to number of households. In certain tracts free home-brewing is permitted. These relaxations of the ordinary excise rules are necessary in the interests of the aborigines, to whom pachwai is nutritious as well as stimulating, and who, if subjected to a stricter system, might be driven to the illicit manufacture and use of stronger liquor. The system appears to have worked well in the past year, and it has the Lieutenant-Governor's full approval. An attempt is being made to compel vendors of pachwai to keep accounts of their transactions, and also to ascertain the quantity of material used and the alcoholic strength of the liquor, with the view of obtaining better information for the fixing of the license fees. The attempt should be persevered in for statistical purposes and for general information, but the Lieutenant-Governor does not desire to see any increase in the rate of taxation on this simple and useful beverage.

16. *Ganja.*—The proceedings of the Hemp Drugs Commission, whose report has not yet been received, have attracted special attention to ganja and its congeners during the year. Ganja is grown under close supervision in a compact area, with Naogaon in Rajshahi as its head quarters, and is exported thence to golahs (or bonded storehouses) in the districts, from which it is issued on payment of duty to retail vendors. With a smaller area under cultivation there was a considerable increase in the outturn last year. The total quantity consumed in Bengal during the year, however, shows a satisfactory decline from 5,451 to 5,116 maunds, while the revenue, owing mainly to the increase in the rates of duty, rose from Rs. 23,86,066 in 1892-93 to Rs. 25,35,045. Bhagalpur, Purnea, Mymensingh, Monghyr, Puri, Gaya and the Sonthal Parganas gave the largest increases in receipts. The figures of consumption in Orissa show that, while the total quantity for the province has fallen from 241½ to 236¼ maunds, the quantity of Garjhat ganja consumed in the district of Puri has increased from 5 maunds 14 seers to 18 maunds. It would thus appear that the enhancement of the duty on this kind of ganja has not checked its licit use in Puri. In Cuttack and Balasore, however, the drug did not come under taxation, although its consumption on the borders of the Tributary States is suspected. The local officers must continue their efforts to check any smuggling. The exports include 145 maunds sent to London, no mention of such exports having been made before: the nature and growth of this trade should be watched.

17. *Production and distribution of ganja.*—A perusal of section XII of the Excise Commissioner's Report leads the Lieutenant-Governor to think that

care should be taken to trace and compare the consumption of ganja year by year. The figures for 1893-94 appear to stand as follows:—

			Mds.
Estimated produce (paragraph 123)			9,755
Exported from Rajshahi (paragraph 125)			7,434
Quantity unaccounted for, and remaining in producers' godowns			2,321
Details of quantity exported			7,434
		Mds.	
Consumed in Bengal (paragraph 130) ...		5,116	
Sent to North-Western Provinces (paragraph 133)		463	
„ Nepal (paragraph 134)		234	
„ Mauritius		59	
„ Sikkim ...		1	
„ Hill Tippera		2	
„ Orissa Tributary States ...		4	
„ Assam } Duty free		731	
„ Kuch Bihar } Duty free		76	
London } Duty free		145	
Total accounted for ..			6,831
Balance remaining (presumably) in golahs			603

A statement of this kind should be drawn up year by year, and the manner of disposal of the balance unaccounted for should be traced. The actual balance in the golahs at the close of each year should be verified.

18. *Bhang.*—Bhang is a variety of hemp found wild in many districts of Lower Bengal and Bihar. For excise purposes it is stored and retailed in the same way as ganja, but the quantity thus taxed must be a fraction only of what is actually used, and the facility with which it can be procured renders abortive any attempt to suppress its illicit use. The revenue from bhang increased during the year from Rs. 53,058 to Rs. 55,752, with a decline in consumption from 1,034 to 943 maunds. The decrease was marked in Calcutta, where the drug is chiefly consumed, owing to a rise in the retail price caused by enhanced license fees. In Gaya, which is also a large consumer, a greater influx of pilgrims is said to account for a considerable increase in consumption.

19. *Opium.*—Excise opium is supplied to the licensed vendors from the district treasuries at prices varying from Rs. 16 to Rs. 32 per seer. The minimum price is fixed for the districts of the Patna Division, where the poppy is cultivated, with the view of removing the temptation of obtaining the drug illicitly from the cultivators. An enquiry was made during the year into the question whether the low price of excise opium in those districts does not tempt vendors to export it to other districts where the price is higher, but the Government eventually accepted the Board's view that such exportation, if on a large scale, could be easily detected from any abnormal increase in the quantity of the drug taken from the treasuries, while an enhancement of the price would offer greater inducement to the cultivators to keep back a portion of their produce for illicit sale. It was found necessary during the year to regulate the supply of opium to the shops in the Tributary States of Orissa bordering on the districts of Cuttack, Balasore and Puri, so as to equalize taxation on both sides of the border, and prevent the vendors in the Tributary States from underselling those in British territory. The Lieutenant-Governor desires that the retail price of opium per tola in each district may be reported in future and shown in Appendix D of the Report. The total revenue from excise opium rose last year from Rs. 20,85,635 in 1892-93 to Rs. 21,34,867, both license fees and duty contributing to the increase. The quantity of the drug sold also increased from 1,934⅓ to 1,970 maunds, or by 35½ maunds, but it was lower by nearly 36 maunds than the quantity sold in 1891-92. Increases took place in Calcutta and 19 districts, but were generally slight, except in Calcutta, Cuttack, Balasore, and Manbhum. In Calcutta the increase was due to large consumption by the chandu shops, but was small compared with a heavy decrease in the previous year. The increase in Cuttack was due to the inclusion in the return of the year of a quantity of the drug sold in

1892-93 to the Dhenkanal State. The increase in Manbhum is due to the opium vendors of the Gangpur State having taken their supplies from that district. An increase of 3¼ maunds in Hooghly is attributed to the detection of some important smuggling cases in the previous year, and to a stricter watch being kept on the shops bordering on French Chandernagore, into which opium has long been smuggled from the producing districts. A considerable decrease in the quantity of opium taken from the treasury occurred in Chittagong, and is possibly due to the regulation of the supply to the vendors according to local requirements, and the consequent check on smuggling into Burma. The district of Murshidabad, in which consumption has steadily fallen in the past three years, and smuggling is suspected, appears to require the special attention of the excise authorities.

20. *Madak.*—This is a preparation of opium for smoking. A considerable reduction in the revenue occurred in Calcutta, owing to the prohibition of smoking on the premises of the licensed shops. The reduction of the limit of retail sale and of private possession to one tola, and the fixing of a fee of Rs. 50 for a special license for manufacture for domestic consumption, have also had an effect on the revenue. The Lieutenant-Governor does not regard the decrease in revenue with regret, but it would appear from the very great increase in the number of prosecutions for unlicensed manufacture, and the fact that only one license was taken during the year, that the fee of Rs. 50 for a special license is prohibitive and merely encourages illicit practices. The Board should at once submit a proposal for the reduction of the fee to a reasonable rate.

21. *Methylated spirit.*—This spirit is professedly imported for use in the arts, manufactures and chemistry, but evidence exists that much of the foreign imports, received mostly from Germany, is manipulated into Eau-de-Cologne and sold for use as spirit, and it is also suspected that methylated spirit is drunk after dilution with water or used for the adulteration of ordinary spirit. Methylation with caoutchoucine, which is the only substance used at the Custom House, Calcutta, effectually renders spirit unfit for use as liquor, but spirit methylated with wood-naptha, as in the case of most of the foreign imports, can with the admixture of essences, be manipulated into a potable liquor, and it is this kind which passes into consumption in the form of Eau-de-Cologne. The Collector of Backergunge has drawn attention in his last administration report to the large consumption of the so-called Eau-de-Cologne in his district, and the Lieutenant-Governor learns that the Commissioner of Excise will submit a separate report, with suggestions for suppressing the abuse which has grown up in connection with imports of methylated spirit. Much loss is at present caused to the excise revenue by the competition of this spirit, which pays an *ad-valorem* duty of 5 per cent., and is seldom less than 50° over-proof, with the more heavily taxed ordinary liquor, whether imported or country-made.

22. *Offences against the Opium and Excise Laws.*—While the number of prosecutions of licensees for petty and isolated infractions of the conditions of their licenses shows a satisfactory decline, prosecutions for other offences have increased; the Police, and to a less extent the Excise officers, having exhibited greater vigilance than in the preceding year. The net increase in cases is, however, due to the numerous prosecutions for unlicensed manufacture of madak. The total number of persons prosecuted was 5,138, against 4,634 in 1892-93, and the percentage of convictions also rose from 84·8 to 85·2. A marked increase in the number of prosecutions and convictions for illicit distillation of country spirit occurred in the Sonthal Parganas, and it may be hoped that a check has been given to the offence in that district. Illicit distillation seems to prevail largely also in Bankura, Midnapore, Angul, Singhbhum, and the Jehanabad sub-division of the district of Hooghly. The total amount of fines imposed for breaches of the excise laws and rules was Rs. 89,366, of which Rs. 57,791, or 64·6 per cent., were realised Under both heads there was an increase as compared with the preceding year. Simultaneously with an increase in the number of cases, an advance in the amount paid as rewards is to be expected, and the total sum expended in the past year in payment to Police and Excise officers and informers accordingly rose from Rs. 68,252 in the previous year to Rs. 74,697. The Lieutenant-Governor is glad to learn that the necessity

for prompt payment of rewards, especially to informers, was fully recognized during the year.

23. The thanks of the Government are due to Mr. Krishna Govinda Gupta for his successful administration of the department during the year, and to the Board for their supervision and for the advice which they have given on various matters. The Commissioner expresses his obligation to the Divisional Commissioners and the Collectors generally, and to some officers in particular, and speaks favourably of the work of the Special Deputy Collectors as a body. The names of the officers specially mentioned by him will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Offg. Secretary to the Government of Bengal.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF THE PURI LODGING-HOUSE ACT IN BENGAL DURING 1893-94.

MUNICIPAL DEPARTMENT—MUNICIPAL—No. 480T.—M.

Calcutta, the 15th October 1894.

RESOLUTION.

READ—

The reports from Commissioners of Divisions on the working of the Puri Lodging-house Act [IV (B.C.) of 1871 amended by Act II (B.C.) of 1879] during the year 1893-94 in the various places in their Divisions to which it has been extended.

SINCE 1888 it has been customary not to review these reports separately, but to include in the annual resolution relating to the municipalities in Bengal a short paragraph on the working of the Lodging-house Act in the Province. As, however, the Act has now been extended to several towns and areas, and its operation has assumed greater importance, a separate resolution has been considered desirable.

2. *Extension of the Act.*—The Puri Lodging-house Act IV of 1871, as amended by Acts II of 1879 and I of 1884, is in force in the towns and areas named in the margin. Reports have been received on the working of the Act in the twelve places first named; but although the Act was extended to Jajpur in September 1891, no report has yet been submitted. The Commissioner states that, owing to the bye-laws not having been sanctioned, the machinery of the Act could not be put into motion. This explanation cannot, however, be regarded as adequate, for the regulation, inspection and licensing of lodging-houses, the most important functions of the Act, are provided for in the Act itself and not by bye-laws. The Commissioner should, therefore, issue orders to the Magistrate to take immediate steps to enforce the Act in the town. The bye-laws for all the places in the Orissa Division to which the Act has been extended are now with the Legal Remembrancer for an expression of his opinion, and will be confirmed shortly. The Act was also extended in February 1894 to Bhubaneswar, a sacred place where pilgrims halt on their way to Puri, but it did not come into operation during the year under report.

3. *Income.*—The total income of the year was Rs. 47,361, against Rs. 27,380 in 1892-93; the opening balance was Rs. 16,650, and the closing balance Rs. 31,811. The fees realized for licenses for the reception of pilgrims showed a large increase, from Rs. 18,233 in 1892-93 to Rs. 34,868, and those for the certificates of the Health Officers as to the suitableness of the houses, from Rs. 1,162 to Rs. 1,576. This was mainly due to the year having been an auspicious one for pilgrimage to Jagannath, and accordingly in Puri the realizations under the former head, Rs. 18,070, were nearly four times as great as in the previous year. At Gaya, too, there was a substantial increase of more than Rs. 2,000. In Deoghur the fees produced Rs. 502 more than in the previous year 1892-93, owing to the rate having been raised from 2 to 4 annas per lodger. The rate for lodging-houses on the Jagannath Road in the Puri district was enhanced in the year 1891-92 from one pice to 2 annas, and the revenue increased in the year under report by nearly Rs. 500 without causing any reduction in the amount of licensed accommodation.

The income of the "chattis," or lodging-houses, on the Jagannath Road in the districts of Cuttack, Balasore, and Puri, includes the rents received from

the roadside lands, which were acquired in excess of actual requirements when the road was made. The collection of the rents appears in each case to have been satisfactory.

4. *Expenditure.*—The largest item of expenditure (Rs. 9,295) was under the head of contributions. Of this amount Rs. 4,710 were contributed by the Lodging-house Fund of Puri to the local Municipality. Where a municipality exists it seems generally advisable to entrust to it the expenditure of the allotments from the Lodging-house Fund for conservancy and sanitation, but it is desirable that the reports should show how the contribution has been expended in each case, and this information should be furnished in future. The expenditure under the head Medical is shown to be Rs. 7,719, but besides this Rs. 2,879, which appears in the accounts as a contribution, was really spent on medical requirements. Mr. Coxe, the District Magistrate of Puri, complains of the heavy expenditure on dispensaries incurred by the lodging-house funds belonging to the Jagannath Road in his district. He argues that the permanent residents get much more benefit from the dispensaries than the pilgrims, and thinks that one-sixth of their cost is all that the Lodging-house Fund should be called upon to contribute. Mr. Coxe has since sent up proposals for the re-arrangement of the expenditure of this fund, and these are now under the consideration of Government. The expenditure on construction (Rs. 662) was inadequate, and, as the closing balances were in many cases large (notably in those of Puri and Sitakund, and the "chattis" on the Jagannath Road in Cuttack), there was no reason for any parsimony. Since the close of the year proposals have been submitted to use portions of the balances of the two last-named funds on sanitary works.

5. *Prosecutions.*—The number of persons prosecuted for lodging pilgrims without a license, for lodging more than the licensed number, and for other offences against the Act and the bye-laws, was 265 against 198 in 1892-93, and the number convicted was 215 against 144. The amount of fines realized rose from Rs. 1,378 in 1892-93 to Rs. 2,051. In the town of Puri 138 persons were prosecuted, of whom 112 were convicted, 13 acquitted, and 13 cases remained pending at the close of the year. The Magistrate of Cuttack complains of the difficulty of enforcing the provision for the taking out of licenses for lodging-houses along the roads in his district, owing partly to the abolition of many police outposts. He must do his best with the existing means at his disposal to meet the difficulty. The law was, no doubt, more frequently disregarded in the past year owing to the unusually large influx of pilgrims. The Commissioner should consider the Magistrate's suggestion that where the "chattis" stand on Government land, the taking out of licenses should be made a condition of leasing.

6. *Public health.*—No diseases in an epidemic form broke out in Garhbeta during the year. At Dantun 8 cases of cholera were treated in the hospital, in which 3 died and 5 recovered. Cholera broke out in an epidemic form at Ulubaria when pilgrims were returning from Puri after the car festival: 66 persons were attacked, of whom one-half died and one-half recovered. There was only one case of cholera at Sitakund. No epidemic outbreak of disease occurred in the lodging-houses at Gaya, but the mortality among pilgrims was greater than in the previous year owing to the visit of a larger number of pilgrims to the town. The total number of deaths was 282. Of these, 168 were from fever, 82 from cholera, and 31 from other causes. The number of cholera cases treated in the hospital maintained by the Lodging-house Fund was 107, and of these 88 were pilgrims, the rest being the people of the town. Cholera deaths among pilgrims were 74, most of the patients having been received in a moribund state, due to exhaustion from long journeys, fasting and other hardships. In the dispensaries maintained on the Jagannath Road in the district of Puri, 56 persons treated were for cholera, of whom 21 were cured and 35 died. The reports from the places named in the margin are silent on the subject of the health of the pilgrims during the year. A statement in the following form should, wherever statistics are available, be incorporated in future reports. Where figures are not available, the health of the pilgrims should be commented on generally, and it should

7. A perusal of the reports shows that much good work is being done under the Act in most of the places to which it has been extended. The powers which the Act gives to inspect and regulate the lodging-houses, and to compel the provision of adequate and suitable accommodation for pilgrims, are of the utmost value. Its successful working depends mainly on the interest taken by the individual Magistrate or Health Officer, and the Lieutenant-Governor sees no reason to believe that there has been any shortcoming on the part of these officers during the year. In the Puri district especially much has been, and is being, done for the comfort and convenience of the pilgrims, under the energetic management of Dr. Banks, the Health Officer, supported by the District Magistrate. Lodging-houses to the number of 638 were licensed, with space for 17,050 lodgers, 4,039 inspections were made by the Health Officer and Assistant Health Officer, 11 new pucka and 34 cutcha lodging-houses were erected, and numerous smaller improvements were carried out during the year. In the "chattis" on the Jagannath Road in the Puri district, lodging-houses were frequently inspected to prevent overcrowding, and prosecutions were in some cases instituted. The food in the bazars was examined, and, if found unfit for consumption, was destroyed. The condition of water-supply at Puri, however, is still unsatisfactory, and some of the wells were closed during the year. The Lieutenant-Governor relies on the Magistrate and the Health Officer to continue their efforts, with the help of the Municipal Commissioners, to effect such improvements in the water-supply as may be practicable. The Swetganga tank, which is situated in the heart of the town, is in a very insanitary state, and the owner has not yet given sufficient assistance for its improvement. This question will be dealt with in the Resolution on the administration of Municipalities in the past year. In Gaya the inspection of lodging-houses and the issue of orders to cleanse lodging-houses, drains, &c., appear to have been well attended to, and the lodging-houses are reported to have been in good order. In the other places to which the Act has been extended, the operations are on a smaller scale, and the work of the year needs no particular comment.

Order.—Ordered that a copy of this Resolution be submitted to the Government of India, in the Home Department, and that copies of it be forwarded to the Commissioners of the Burdwan, Presidency, Chittagong, Patna, Bhagalpur, and Orissa Divisions, for information.

Ordered also, that a copy of the Resolution be communicated to the Sanitary Commissioner and to the Sanitary Board, and that it be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CALCUTTA FOR 1893-94.

No. 2298Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 18th October 1894.

RESOLUTION.

READ—

The Administration Report of the Port Commissioners of Calcutta for 1893-94.

THE consolidated debt due to Government by the Commissioners which at the beginning of the year stood at Rs. 38,46,346, was reduced by Rs. 1,54,771, and a further sum of Rs. 1,36,000 was invested in their own debentures. The gross debt of the Commissioners on 31st March 1894 amounted, enclusive of advances made by Government for the construction of the Kidderpore Docks, to Rs. 1,14,56,575, and the total investments at credit of the sinking fund have increased from Rs. 10,38,500 to Rs. 11,74,500 at the close of the year.

2. Against this debt the Commissioners hold block to the value of Rs. 2,06,64,074, and reserve funds amounting to Rs. 21,54,194 in addition to the valuable Strand Bank lands extending from Chandpal Ghât to Aheerectollah, for which however on annual rent of Rs. 37,292 is payable to Government.

3. An addition to the block of Rs. 3,51,724 was made during the year, the chief items being a new lightship and a new dredger. On the other hand Rs. 2,90,345 were written off, Rs. 2,35,235 of which was the value of the dredger *Octopus* sunk on the 22nd April 1893.

4. On a representation from the residents of Howrah, objecting to the gradual erection of huts and sheds among the avenue of trees along the wharf, a Committee was appointed to consider and report on the matter, and it was decided, in view of the necessity for providing increased accommodation, to widen the foreshore road by adding a berm of 80 feet along the river side of the wharf. Thirty feet of this width is to be maintained clear of huts and sheds, and the remaining width of 50 feet is to be utilized for business purposes, but no structure is to be allowed within 45 feet of the line of trees. This work was commenced in January 1894, and at the end of the year, two-thirds of the earthwork had been completed.

5. The total amount received from Government on account of the Dock loan up to the close of 1893-94 is Rs. 2,87,70,566, of which the sum of Rs. 7,587 was advanced during the year. Against this advance the expenditure has amounted to Rs. 2,87,39,974, of which Rs. 6,53,611 were spent during the year.

Both the caissons for the lock entrances were finished, and the one adapted for the 60 feet lock entrance has been utilized for locking vessels, which are too long to be admitted between the lock gates in the usual manner. By this means the lock chamber is increased in length by 36 feet, and rendered long enough to take in all vessels visiting the port, except two of the Brocklebank line.

During the year 26 additional hydraulic cranes were imported from England and were erected on the Dock walls. With this additional supply the Dock is now fully equipped with cranes, of which 51 are placed on the Dock walls and 5 at the tidal basin.

6. In regard to the revenue account, the year opened with a balance of Rs. 5,70,255, and the income for 1893-94 amounted to Rs. 43,47,834. The expenditure, including sinking fund renewals and improvements and repayment of loan, amounted to Rs. 43,15,676, leaving a balance of Rs. 6,02,413. The income of the year exceeded the budget estimate by Rs. 2,44,172, the increase being chiefly in the Jetties, including the Petroleum Wharf and Tea Warehouse, and the Harbour Master's Department. In the latter department the large earnings from mooring hire were due to the unusual number of vessels laid up in the port for long periods, and consequently cannot be looked on as altogether satisfactory.

7. The income under the head Jetties amounted to Rs. 13,38,391, showing an increase of Rs. 1,96,920, the chief improvement being under imports. The total

receipts from exports were Rs. 1,33,884, and are the largest since the formation of the Trust. The expenditure amounted to Rs. 7,96,258.

8. The income from the Petroleum Wharf at Budge-Budge continues to improve, the total receipts of the year having amounted to Rs. 2,34,083, or an increase of Rs. 36,972. The quantity of kerosine imported was 49,203,905 gallons, against an import of 32,543,864 gallons during 1892-93.

9. Although there was an increase in the importation of Russian oil in bulk during the year, the total importation from that country, which had risen to nearly 50 per cent. of the total importations for 1892-93, dropped during the year under review to only 16¾ per cent. of the total imported.

10. At the end of the year the total stock of oil at Budge-Budge was 16,365,120 gallons, out of which 12,766,360 gallons had been landed, and 3,598,760 gallons remained afloat. These conditions were unprecedented, and in consequence it has been found necessary to extend the shed so as to raise the storage accommodation to 16 lakhs of cases. A further proposal has been made to increase the accommodation to 20 lakhs of cases by the expedient of raising the roofs of the sheds, and this proposal is under consideration.

11. The total quantity of tea which passed through the Tea Warehouse was 51 million lbs against 45 million lbs during the previous year. The receipts amounted to Rs. 1,16,236, against Rs. 1,07,295 during the previous year.

12. During the year 217 vessels with an aggregate tonnage of 515,477 were berthed at the Jetties, against 214 vessels with a tonnage 485,299 during 1892-93. The average number of days each vessel occupied the Jetties was 10·5.

13. The income of the Harbour Master's Department amounted to Rs. 6,47,281, against Rs. 5,82,707 in 1892-93. The increase, as already explained, was due to higher receipts from mooring hire, in consequence of vessels lying back for freight occupying the moorings for longer periods, and also from the sale-proceeds of the dredger *Octopus*, which was sunk in the early part of the year. The expenditure amounted to Rs. 5,07,417.

14. During the year there were 16 casualties to vessels, against 23 in the preceding year. This gives a percentage of 1·61, calculated on the number of vessels which arrived in the port.

15. Under orders of Government, dated the 2nd of October 1893, the Deputy Conservator of the Port was vested with powers under Act V of 1883, to hold preliminary enquiries into the cause of casualties occuring to vessels in charge of Harbour Masters. Sixteen such enquiries were held, and in no case was a further investigation under the Act, mentioned above, considered to be necessary; two Assistant Harbour Marsters were, however, severely punished by the Commissioners.

16. The work of examining boats while plying was regularly attended to throughout the year by the surveyors. During the year 276 cargo and 87 passenger boats were called in for resurvey, having become unfit for service either through wear and tear or by meeting with accidents.

17. The total receipts under the head Port approaches amounted to Rs. 3,78,072, towards which the port-dues, reimposed from 1st December 1892, contributed Rs. 3,71,104. The expenditure amounted to Rs. 5,23,462. This large expenditure was due to the heavy cyclone of May 1893, repairs having been executed to several light and survey vessels.

18. The several channels in the river, with the exception of the Lower Saugor Roads and the Jellingham channel, have remained fairly steady. At the Lower Saugor Roads the bar has gradually extended to the south-west, necessitating the removal into deeper water of the Long Sand Light-house. The Jellingham channel has been a source of continual anxiety and trouble, the changes being so rapid and variable, entailing the services of one vessel to watch it daily. It was in this channel that the S.S. *Anglia* was lost. The Lieutenant-Governor is glad to see that the dangerous nature of this channel is realized by the Commissioners, and that special measures are being taken to give timely notice of the changes that are daily occurring.

19. This is the first complete year in which the special toll of 4 annas per ton on all imports and exports was in force. This toll was levied under section 108 of Act III of 1890, in order to enable the Trust to meet its liabilities. The toll yielded Rs. 7,95,100, or almost exactly the sum of Rs. 8,00,000, which it was originally estimated to produce.

20. The receipts of the Kidderpore Docks during the year amounted to Rs. 2,26,574 as shown below:—

	Rs.
Receipts from graving Dock	93,926
from imports	33,860
„ from exports	80,462
Rent and miscellaneous	12,349
Railway earnings	1,339
Receipts from towing vessels by hopper barges	4,638
Total	2,26,574

21. Against this the expenditure has amounted to Rs. 15,04,288, details of which are given below:—

	Rs.
Traffic establishment	52,299
Working expenses	1,86,429
Municipal taxes	1,32,434
Interest on capital	11,33,126
Total	15,04,288

22. The total deficit is therefore shown to be Rs. 12,77,714, and this result though anticipated is extremely unfortunate. Apart from the interest charges and municipal taxes, it is observed that the expenditure on Traffic Establishment and Working Expenses exceeded the income by Rs. 12,154. Since the completion of the year, however, the Commissioners have been endeavouring to meet the wishes of the mercantile community by giving additional facilities to the trade, and it is hoped that these measures will induce a larger number of vessels to resort to the Docks.

23. The thanks of the Government are due to the Commissioners for their efficient management of the affairs of the Trust during the year.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

REPORT ON THE WINTER RICE CROP IN BENGAL, 1894.

THE following is published for general information.

C. E. BUCKLAND,
Secy. to the Govt of Bengal.

REVENUE DEPT.,
The 18th October 1894.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the winter rice crop in Bengal, 1894 (*to the 15th September*).

1. *Character of the season.*—The rainfall of the monsoon of 1894, month by month, has been as follows:—

In May the rainfall was generally less than the normal. In June the rainfall was deficient in North Bengal, particularly in Rajshahi, Pabna, Bogra, Rangpur, and Jalpaiguri, and somewhat below the normal in parts of Eastern Bengal; it was also deficient in Jessore and Murshidabad, and in Muzaffarpur and Darbhanga, elsewhere abundant rain was received in June. In July the rainfall throughout these provinces was generally above the normal, except in North Bengal and North Bihar. The effect of the short rainfall in July in North Bengal was to retard the transplanting operations, and thus to prevent the full area from being brought under cultivation, as well as to improve the prospects of the crop. In August abundant rain was received everywhere except in Orissa, and in Hooghly, 24-Parganas and Midnapore, where the rainfall was considerably short of the normal. In North Bengal and North Bihar the rainfall of August was in excess of the normal, and thus partly made up the deficiency of rain in the preceding month. The rainfall during the first half of September was generally of a light character, but it appears to have been sufficient for the needs of the crop.

On the whole, the distribution of rainfall has proved to be favourable to the cultivation and growth of the winter rice crop in most districts of Bengal. The failure of the July rainfall in North Bengal and North Bihar was the only unfavourable element in the character of the present season, but it was to a great extent compensated for by the plentiful rainfall in the following month.

Damage by floods has been reported from the Kalna subdivision of Burdwan, from Nadia, Murshidabad, Pabna, Muzaffarpur, Cuttack, and Balasore; it was particularly serious in the Jajpur and Kendrapara sub-divisions of Cuttack. In the Contai sub-division of Midnapore the crop was seriously injured by the heavy rainfall of the 24th July, which also prevented a large area from being brought under cultivation.

2. *Area cultivated.*—The total area estimated to have been cultivated with winter rice in Bengal is 31,229,900 acres, against 31,021,900 acres in 1893, thus showing a small

increase over the area cropped last year. Timely rainfall is reported to have caused an increase in cultivation in many districts of Bengal, notably in the Burdwan, Presidency, and Dacca Divisions; on the other hand, the deficiency of rainfall in July prevented considerable areas from being brought under cultivation in Rangpur, Dinajpur, and Jalpaiguri. The areas sown with winter rice in these districts are estimated by the district officers to have fallen short of the areas cropped last year by 30, 6·5, and 15 per cent. respectively. In the Contai sub-division of Midnapur a large area, amounting to 25,800 acres or nearly 8 per cent. on the area sown in 1893, could not be sown with rice, owing to excessive rainfall at the end of July last.

3. *Character of the crop.*—It will be seen on reference to the district returns that out of the 44 districts from which returns have been received, 21 report a full average (16 annas) or more than a full average crop; 21 others report the crop as varying from 12 to 16 annas; and two districts, namely Jalpaiguri and Cuttack, return the crop to be 11 annas. There are only two sub-divisions where the crop is reported to be less than 8 annas, namely Contai in Midnapore, and Kendrapara in Cuttack, both of which return the crop as 7 annas.

On comparing the district estimates of outturn this year with those for 1893, it will appear that out of the 44 districts, twenty-two report the crop to be better than the crop of 1893, six report the crop to be equal to that of the last year, while 16 report it to be worse than the latter. The prospects of the standing crop appear, therefore, to be slightly better than those of the last year's crop. The outturn of the winter rice crop of 1893 was estimated by this Department at the full average or 16 annas. If the weather prove favourable to the standing crop in October, it may be expected that its outturn will amount to $16\frac{1}{2}$ annas, and thus slightly exceed the average.

B. C. BASU,
Assistant Director.

CALCUTTA,
The 4th October 1894.

Countersigned.
W. C. MACPHERSON,
Director of the Department of Land Records and Agriculture, Bengal.

DARJEELING,
The 6th October 1894.

Preliminary Forecast of the Winter Rice Crop for 1894 (up to the middle of September).

1	2	3	4	5	6	7	8	9	10	11
District.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas will represent the outturn of last year's winter crop?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Burdwan...	Sadar	794,880	635,500	434,300	424,300	434,200	16	15	Owing to sufficient rainfall this year, more lands have been cultivated in the Sadar sub-division, and unless there be a failure of autumn rains a good outturn may be expected there. In Kalna sufficient rainfall in the beginning was very favourable to the outturn; but a fourth of the *aman* crop having been submerged by flood water, the outturn is expected to be the same as last year. In Katwa sufficient rainfall during sowing time helped the cultivation of all lands, and is also the reason for the fair outturn.	The Collector remarks that the outturn of the crop in Kalna is expected to be the same as last year, although he returns this year's outturn as 12 annas only against 16 annas last year.
	Kalna	276,480	221,000	128,000	128,000	128,000	16	12		
	Katwa	226,240	169,600	140,800	140,800	140,800	16	16		
	Ranigunj	429,440	254,700	225,200	225,200	215,300	16	16		
	District Total ...	1,726,080	1,280,300	928,300	918,300	918,300	16	15¼		
Birbhum...	Sadar	1,124,023	900,000	654,000	654,000	654,000	16	16	I cannot give the sub-divisional figures, but will endeavour to make some estimate hereafter for future returns.	In previous returns the total cultivated area in the district used to be shown as 459,000 acres, but the Collector, Mr. Growse, thinks that estimate to be too low, and has raised it to 900,000 acres. Owing to this change the estimated area under *aman* rice has been increased from 279,000 acres to 654,000 acres (*vide* Bhadoi Crops Report for 1894).
	Rampurhat ...									
	District Total ...	1,124,023	900,000	654,000	654,000	654,000	16	16		
Bankura ...	Sadar	1,229,440	429,800	364,800	364,800	364,800	16	16	The want of rain in April and May is said to have decreased the area of cultivation in the Vishnupur sub-division to a slight extent.	
	Vishnupur ...	448,000	214,000	185,600	185,600	185,000	16	16		
	District Total ...	1,677,440	642,800	550,400	549,800	549,800	16	16		

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Midnapur	Sadar	2,120,960	1,°29,100	809,900	612,100	756,900	16	16	An increased area has been brought under cultivation this year everywhere, except in Contai sub-division, and the outturn is likely to be better. This is due to the timely and sufficient rainfall at the sowing time. In Contai the heavy rainfall of July 23th proved injurious to paddy cultivation. The raiyats are transplanting their fields again, but it is feared that the crop will in many cases prove a poor one. The figures in column 3 have been corrected according to the latest census figures, excluding the area occupied by river beds. Sufficient rain has done good to *Sadar* and part of Serampore, but want of it has caused damage in Ulubaria and Jahanabad. Increase in area is owing to timely rainfall. A better outturn is expected in Howrah if nothing unforeseen happens. This year's outturn is expected to be better than that of the last year owing to seasonable rainfall. (*a*) From the further enquiry now made, it appears that the approximate normal area under winter rice crop in the Basirhat sub-division is 213,800 acres, and not 213,100 areas as shown in the previous forecasts.	The area of river beds ought not to be excluded.
	Tamluk	390,400	279,600	264,300	203,100	239,500	4	15		
	Contai	543,360	456,300	416,000	325,300	299,500	14	7		
	Ghatal	238,080	146,500	131,800	120,000	122,000	14	16		
	District Total ...	3,292,800	2,111,500	1,622,000	1,260,500	1,417,900	15	13½		
Hooghly ...	Sadar	282,880	176,800	141,400	141,400	141,400	20	16		
	Serampur	219,520	166,600	109,500	80,400	95,000	12	14		
	Jahanabad ...	280,320	167,700	83,800	79,500	80,000	14	12		
	Howrah	109,440	69,800	60,800	35,400	39,100	12	15		
	Uluberia	193,920	128,000	108,800	61,200	90,000	8	12		
	District Total ...	1,086,080	702,300	495,300	397,900	445,500	14	14½		
24-Parganas	Sadar ...	690,506	462,700	382,000	231,100	293,900	14	16		
	Barasat ...	313,600	189,400	147,200	103,400	103,000	14	14		
	Basirhat ...	339,200	281,600	(*a*) 213,800	203,800	213,800	16	16		
	Diamond Harbour	328,320	289,900	285,400	246,100	247,000	12	14		
	District Total ...	1,671,626	1,223,600	1,028,400	784,400	857,700	14	15½		

Nadia ...	Sadar	497,920	362,800	65,200	34,000	65,200	10	12	The increase in the area sown this year is due to the timely and normal rainfall during the ploughing and sowing season. The increase in the expected outturn is also due to the normal rainfall and to the late rise of the rivers. I should have estimated a still larger outturn had not a certain amount of damage been done by floods.
	Kushtia	382,080	278,400	28,000	21,000	28,000	5	12	
	Meherpur	634,880	462,600	24,400	18,000	24,400	8	12	
	Ranaghat	273,280	199,200	12,800	10,000	12,800	16	16	
	District Total ...	1,788,160	1,303,000	130,400	83,000	130,400	9	12½	
Murshidabad.	Sadar	586,240	395,100	82,000	82,200	82,200	16	14	The decrease in the outturn, as compared with that of the last year, is due to the deficiency of rainfall during the time of transplantation and incessant rains in August last, and subsequent high rise of the Bhagirathi. The decrease in area in the Kandi sub-division, as compared with the normal and the last year's area is, simply owing to the deficiency of rainfall during the time of transplantation.
	Kandi	405,760	279,800	189,900	187,900	188,800	16	16	
	Jangipur	380,160	310,600	40,300	42,300	42,300	16	12	
	District Total ...	1,372,160	985,500	312,200	314,400	313,300	17	15	
Jessore ...	Sadar	568,960	304,000	166,400	160,000	160,000	8	16	The increase in the area over last year's is attributed to more seasonable rainfall. The area falling below normal is due to some of the *bheels* not drying up.
	Jhenida	304,000	204,800	64,000	64,000	64,000	6	14	
	Magura	272,000	171,500	89,600	65,000	78,000	10	16	
	Narail	311,680	187,500	128,000	128,000	128,000	12	18	
	Bangaon	415,360	249,000	130,000	58,000	100,000	10	14	
	District Total ...	1,872,000	1,116,800	578,000	475,000	530,000	9	16	
Khulna ...	Sadar	1,006,336	293,400	228,600	210,000	215,000	18	17	The increase in outturn and the estimated area as compared with the last year's report is chiefly due to seasonable rainfall this year and to cultivation of certain extra portions of the Sundarbans to some extent. I consider the crop above the average this year, and have put down 17 annas as the outturn per acre.
	Satkhira	814,643	299,500	232,400	200,000	220,000	14	17	
	Bagerhat	965,523	277,100	214,100	190,000	200,000	15	17	
	Area of boundary, khals, rivers of the Sundarbans in this district.	317,440	.....	.....	.....	.....	.....	.....	
	District Total ...	3,103,942	870,000	675,100	600,000	635,000	16	17	
Rajshahi ...	Sadar	631,152	386,700	199,300	199,300	199,500	18	18½	Last year the progress of cultivation was stopped by heavy rainfall at the time of ploughing, but in this year the rainfall was according to requirements and hence the increase in the area sown. The *aman* paddy suffered a little in Nator; transplantation could not be timely made for want of rain in July last, but if the rain continues to fall as it is doing now, the outturn will be an average one.
	Nator	522,880	402,100	249,300	189,700	189,700	12	14	
	Naugaon	385,920	297,100	224,300	223,500	223,500	18	16	
	District Total ...	1,539,952	1,085,900	672,900	612,500	612,700	16	16½	

1	2	3	4	5	6	7	8	9	10	11
District.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Agricultural Department, Bengal.
							Annas.	Annas.		
Dinajpur...	Sadar	2,060,000	1,377,600	1,090,400	1,090,400	1,005,400	20	12	The area sown this year is less than that of the last year owing to the insufficient rain during the time of cultivation.	
	Thakurgaon ...	554,880	367,400	218,100	218,100	218,100	20	12	The want of timely rain has affected this crop to a great extent, and hence the decrease in the outturn. Recent rainfall has given transplantation an impetus, but I doubt whether the crop will come to anything in more than three-fourths of the normal area.	
	District Total ...	2,634,880	1,745,000	1,308,500	1,308,500	1,223,500	20	12		
Jalpaiguri	Sadar	1,072,150	557,500	329,500	324,400	281,900	15	12	The increase in area in column 4 against Alipur is due to increase of cultivation in the Duars. The decreases in area and outturn shown in columns 7 and 9 are due to want of rain in July and August 1894.	It does not appear from the meteorological return that the rainfall of August was deficient.
	Alipore	823,731	427,700	250,200	193,700	157,900	16	9		
	District Total ...	1,895,881	985,200	579,700	518,100	439,700	15½	11		
Darjeeling	Sadar including Kalimpong.	464,640	61,400	10,200	11,500	11,500	14	14	The difference in area in the Sadar sub-division is due to the ordinary fluctuation in cultivation. No winter crop is cultivated in the Kurseong sub-division. Owing to late rain at sowing time, land could not be fully cultivated in the Siliguri sub-division. The untimely rainfall of the year will cause a decrease in the outturn.	
	Kurseong	118,400	12,800	.....	...	.....	.....	.....		
	Siliguri	161,920	115,200	57,600	57,600	57,600	16	14		
	District Total ...	744,960	189,400	67,800	69,100	69,100	15½	14		

Rangpur ...	Sadar	730,240	486,800	365,100	365,100	260,000	18	12	The decrease in area under this year's winter rice is due to unusually dry weather during the season of sowing and transplantation. To the same cause the decrease in outturn is also to be attributed.	
	Kurigram	599,680	468,900	234,500	236,000	177,000	18	13		
	Gaibanda ...	486,400	371,200	281,600	281,600	234,700	18	12		
	Nilphamari ...	414,720	275,800	92,800	105,000	80,000	18	13		
	District Total ...	2,231,040	1,602,700	974,000	987,700	691,700	18	12½		
Bogra ...	Whole district ...	929,600	421,000	280,000	290,000	300,000	18	15	The increase in the figure entered in column 7 is due to the fact that owing to late monsoon a larger amount of *aus* land has in addition to the *aman* lands been transplanted this year. Owing to insufficient rainfall transplantation was mostly commenced this year late in the season. A better crop cannot therefore be expected.	
Pabna ...	Sadar	564,480	423,600	225,200	408,000	409,000	16	14	Last year rainfall having commenced earlier than usual, most of the low lying lands which were fit for the cultivation of the winter rice crop were under water when the time for sowing arrived. But the season for sowing the crop this year was a more favourable one in that respect. This explains the cause of increase in the area sown this year over that of the last year. The sudden rise of the rivers before the plants could grow enough to be able to resist the action of flood is the reason why the outturn is estimated at less than the average. The crop in the low lands of Dulai thana has specially suffered from the effects of flood.	The estimate of normal area (column 5) seems to require revision. It is scarcely possible that the areas cropped last and this year should so greatly exceed the normal.
	Sirajganj	612,480	459,500	183,700	216,200	216,200	18	16		
	District Total ...	1,176,960	882,500	408,900	624,200	625,200	17	15		
Dacca ...	Sadar	810,240	405,100	270,100	243,100	243,100	12	14	The high price of paddy last year, and the favourable weather at the time of ploughing and sowing induced the cultivators to extend the cultivation; consequently there has been increase in the area sown this year as compared with 1893. This year's outturn is expected to be better than last year's owing partly to the gradual rise of the rivers, and partly to the timely rainfall.	With such favourable conditions, a full crop should be obtained.
	Manickganj ...	312,960	234,200	202,200	176,900	180,000	12	14		
	Munshiganj ...	256,640	128,000	51,200	62,000	61,000	12	14

							Annas.	Annas.		
Mymensingh.	Sadar	1,183,360	697,000	282,200	207,400	282,200	12	14	Owing to the insufficient rainfall in July and in the beginning of August last, the normal area could not be transplanted during the year, but the area transplanted is greater than that of last year. Outpost Badla, which was within the sub-division of Netrakona, having been transferred to Kishoreganj, the area of Netrakona decreased, and that of Kishoreganj increased. Hence revised figures for those sub-divisions have been shown in this return. The outturn in all the sub-divisions will be better than last year owing to the better distribution of rain.	
	Netrakona ...	772,840	285,500	180,000	135,000	165,000	12	16		
	Kishoreganj ...	612,480	264,000	135,200	123,000	123,000	12	14		
	Jamalpur	817,752	627,200	304,000	191,500	191,500	16	15		
	Tangail	666,248	533,000	205,000	205,000	205,000	14	16		
	District Total ...	4,052,480	2,405,700	1,106,400	861,900	966,700	13½	15		
Faridpur...	Sadar	550,400	385,300	289,000	216,700	290,000	11	14	The increase in area sown this year and the better outturn are due to timely rainfall, both during the sowing time and the period of growth.	
	Madaripur... ...	626,560	416,800	320,000	320,000	320,000	6½	20		
	Goalundo	273,920	205,400	137,000	137,000	137,000	10	16		
	District Total ...	1,450,880	1,007,500	746,000	673,700	737,000	9	17		
Backergunge.	Sadar	711,040	446,700	256,000	256,000	256,000	14	16	The outturn cannot yet exactly be estimated, as transplantion is not finished. The rainfall is favourable and prospects are decidedly good.	
	Patuakhali ...	757,840	320,200	224,000	224,000	224,000	16	16		
	Pirojpur	442,880	320,000	236,800	236,800	236,800	12	16		
	Bhola	393,600	256,100	160,000	160,000	160,000	12	16		
	District Total ...	2,335,360	1,343,200	876,800	876,800	876,800	13½	16		

Tippera ...	Sadar	730,880	547,800	383,300	353,300	(a)378,600	12	18	(a) There is a slight difference between this and last year's forecast about the area sown and therefore no remarks are necessary.
	Brahmanbaria ...	492,160	353,900	239,700	240,000	(b)250,000	8	(c)18	(b) The increase in the area sown in these two sub-divisions is due to high price of rice and distress which prevailed during the last year.
	Chandpur ...	371,200	265,600	192,000	185,600	(b)192,000	11	(c)18	(c) The increase in the outturn is chiefly due to the timely rainfall. In the Brahmanbaria sub-division, where the flood did much damage last year, the deposit of silt left by the flood has increased the fertility of the soil.
	District Total ...	1,594,240	1,167,300	805,000	808,900	820,600	10¼	18	
Noakhali...	Sadar	830,720	640,000	426,200	400,000	400,000	12	16	Owing to proper distribution of rainfall, this year's outturn is expected to be better than last year.

Patna ...	Sadar	394,880	393,500	267,500	109,600	108,100	14½	15	Owing to timely and sufficient rain the area sown this year was larger than that of the last year or the normal area; for the same reason this year's outturn will be better than last year's.	The Collector was requested to return separate figures for each sub-division in columns 4 and 5. The estimate of normal area seems to be very low as compared with the estimates of areas sown this and last year.
	Barh	336,640			75,500	76,300	16	16		
	Bihar	507,520			225,300	227,500	16	16		
	Dinapore	91,520			32,000	33,300	16	16		
	District Total ...	1,330,560	993,500	267,500	442,400	443,200	15½	15¾		
Gaya ...	Sadar	1,219,200	917,900	496,000	500,000	496,000	18	16	The area in column 3 has been revised according to the census of 1891. An increase in area sown is due to more seasonable rain this year; for the same reason the outturn is expected to be a little above average. In Nowadah sub-division the rainfall was scanty at the time of transplantation.	
	Nawada	611,200	489,600	366,700	370,000	370,000	18	14		
	Jahanabad ...	387,840	321,900	208,000	210,000	210,000	18	18		
	Aurangabad ...	797,440	478,100	215,000	218,000	225,000	18	18		
Shahabad...	District Total ...	3,015,680	2,207,500	1,285,700	1,298,000	1,301,000	18	16		
	Arrah	585,600	487,400	373,200	200,600	200,900	13	14	The figure in column 6 has been corrected from 100,600 to 200,600. The decrease in this year's area in Sadar is due to the fact that a very large area could not be sown owing to the difficulty in obtaining water; prospects very favourable. In Buxar and Bhabua the rainfall has been timely and favourable. In Sasaram owing to sufficient rainfall the whole area under winter rice has been brought under cultivation except in Karghar thana, where more land has been reserved for *rabi* cultivation. The figure in column 6 has been corrected fron 393,000 acres to 293,000 acres.	In the final report, it should be explaind why more land has been reserved for *rabi* cultivation in Karghor thana.
	Buxar	419,840	217,900	126,600	128,600	128,600	12	16		
	Sasaram	965,520	382,500	242,500	293,800	241,500	15	15		
	Bhabua	832,640	624,600	312,300	227,700	227,700	15	15		
	District Total ...	2,793,600	1,712,400	1,054,600	850,700	798,700	14	15		

Saran ...	Sadar	638,720	561,500	144,600	138,000	144,000	18	16	The increase in the area in the first two sub-divisions is due to early favourable rains.	
	Siwan	545,925	450,000	170,000	180,000	195,200	18	14

	District Total ...	1,678,085	1,382,500	431,600	433,000	456,800	17½	16		
Champaran	Sadar	971,520	654,000	229,000	229,000	229,000	15	15		No explanation is given why the outturn should be below the average.
	Bettiah	1,288,320	768,000	448,000	448,000	448,000	16	14		
	District Total ...	2,259,840	1,422,000	677,000	677,000	677,000	15½	14½		
Muzaffarpur.	Sadar	779,520	614,000	272,000	272,000	272,000	8	12	In the *Sadar* and Sitamarhi sub-divisions, owing to absence of rain in the early part of the season, the sowing and transplanting of the crops were retarded for some time, and hence the reduced outturn as compared with the average, but the weather was more favourable this year, and hence the estimated outturn better than in the last year, Owing to excessive rain and flood in Hajipur a greater portion of the crop has been damaged or washed away, and consequently the outturn is expected to be less than the normal and that of the last year.	
	Hajipur	493,440	338,000	130,000	130,000	130,000	14	11		
	Sitamarhi	648,960	493,000	320,000	320,000	320,000	10	14		
	District Total ...	1,921,920	1,445,000	722,000	722,000	722,000	10	13		
Darbhanga	Sadar	782,080	594,600	375,000	250,000	281,300	8	16	The decrease in the area sown this year as compared with the normal area under winter rice is due to insufficient rainfall early in the season. The prospects so far seem to be generally promising, and if the rain continue favourable till the *kathya*, a crop considerably above the average may be expected. The normal area under rice crop at Samastipur has been corrected from 125,800 to 165,800 from fresh enquiry.	Forecasts are prepared on the assumption that the season will prove favourable after the date of the forecasts. The Collector need not, therefore, have been so cautious in preparing the present estimate.
	Samastipur ...	498,960	391,000	165,800	124,000	125,000	8	12

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF SEPTEMBER 1894.

At the close of August the conditions in Bengal were fairly normal for the season, and the changes had been for the last few days of the month small and unimportant. In the Bay, on the other hand, the changes were more important. The monsoon current, which had been blowing rather feebly in the extreme south of the Bay, began during the last week in August to increase in strength very decidedly, as judged by the wind velocities at the Ceylon stations This strong advance gradually passed up the Bay and probably reached the centre of the Bay on about the 30th of August.

Barometric depression of August 30th to September 7th.—In front of this advance of monsoon winds a barometric depression of feeble and diffused nature appeared to form in the centre of the Bay on the 30th of August. This very feeble depression moved slowly towards the North Madras Coast, and on the 1st of September it was lying almost over that coast, and it was giving strong winds and squally weather in the east and south of the Bay. By the indraught towards it the monsoon current was partially prevented from flowing over Bengal, and hence rainfall was rather lighter than usual over the province at the end of August and beginning of September. On the 2nd the feeble low pressure area had moved in a north-westerly direction, and was lying over the eastern districts of the Central Provinces. On the 3rd it had again advanced in a north-westerly direction, and had become rather more definite and somewhat deeper, while its centre was near Pachmarhi. On the 4th it had moved into South-East Rajputana, and then it advanced in a more northerly direction into South-East Panjab, where it moved towards the hills and filled up on the 7th instant.

The depression was too far from Bengal to influence the province to any extent except that while it was off the Madras Coast it partially drew away the monsoon current from Bengal, but after its inland advance a fairly heavy wave of monsoon winds swept over Upper India in connection with the depression, though as Bengal was rather outside the actual indraught towards the storm, the rainfall in Bengal for the first week in September was lighter than usual, and only equalled about 75 per cent. of the normal.

Very feeble barometric depression from September 7th to September 9th.—On September 7th, while the first depression was breaking up in the Panjab, a second barometric depression was forming in the Bay. This, however, never developed to any extent, but merely advanced in a west-north-westerly direction, and filled up over Berar and the southern districts of the Central Provinces on the 9th.

Again this small depression partially drew away the monsoon current from Bengal, and rainfall became much lighter than usual, while at this time also the monsoon blowing in the centre and north of the Bay was feeble, and hence for the second week of September (ending the 15th) the general rainfall over the province only equalled about 55 per cent. of the normal amount.

In the south of the Bay, however, after a period during which the monsoon current was decidedly feeble, another rather strong advance appeared to take place, and this gradually passed up the Bay until by the 13th or 14th this was probably reaching the northern part of the Bay. In front of this advance the third very feeble barometric depression of the month was formed.

Very feeble barometric depression of September 14th to September 17th.—On the 14th pressure had fallen briskly round the head of the Bay and over the western half of the province, and a feeble low pressure area appeared in the north-west angle of the Bay, which was accompanied by a decided circulation of winds. On the 15th it had advanced inland, and was in the south of Chota Nagpur, probably to the south-east of Chaibassa, and was still accompanied by a distinct cyclonic circulation of winds. It had not, however, increased in depth, for pressure had increased over the whole of Bengal except in the immediate neighbourhood of the depression. With the inland advance of the feeble low pressure area, the monsoon current began to advance more freely over Bengal, and from the 15th fairly general rain was reported over the province. On the 16th the very feeble low pressure area appeared to have advanced into the west of Bihar, where it gave heavy rain to the northern stations and general moderate rain over the remainder of the province. On the 17th the very shallow depression with its feeble cyclonic circulation still seemed to exist over Bihar and part of Chota Nagpur, but there was no clear evidence of its existence on the 18th instant.

Ordinary monsoon conditions accompanied by general, and in many cases heavy, rain then continued over Bengal up to the 22nd, and for the weeking ending on this day the general rainfall received over the whole province equalled no less than 177 per cent. of the normal. On the 23rd, however, the area of lowest pressure had passed to the north-west angle of the Bay, where also a feeble form of wind circulation was beginning to set up. Rainfall then began to fall off in the interior of the province, and at this period the fourth barometric depression (or feeble cyclonic storm) of the month was formed. This was a more influential storm than either of the preceding three, and it gave squally weather over a large part of the Bay.

Barometric depression or feeble cyclonic storm of September 23rd to October 2nd.—On the 23rd pressure had fallen slowly over the whole province, and was in defect by amounts ranging up to about 0·15″ in the south and south-east of the province, and the lowest pressures were in South-West Bengal. At the head of the Bay and in South Bengal winds were distinctly

cyclonic in direction, but rather light in force, and the depression was giving disturbed weather in South Bengal, though the only general rainfall which was being received was in the north of the province. On the 24th pressure had fallen in Orissa and at some of the south-western and western stations, and the barometric depression on this day was in the north-west angle of the Bay at some little distance from the Orissa coast, where it was attended by a very complete cyclonic circulation of winds. The depression on the 24th was, therefore, rather more clearly pronounced, though it was still very feeble, and it had caused rainfall to recommence over a large part of the province, and the only districts which received no rain were parts of Bihar and Chota Nagpur. On the 25th pressure had risen slowly over the whole province except at Gopalpur, and the feeble barometric depression in the north-west of the Bay remained practically unchanged in character and position, and though the cyclonic circulation of winds attending it was very complete, yet the winds were not strong. On the 26th pressure had fallen briskly in the north-west angle of the Bay, the fall at False Point equalling 0·05″, and it had also fallen slowly elsewhere, except over parts of Bihar and Chota Nagpur. The depression in the north-west angle of the Bay had, therefore, distinctly intensified, but it had remained almost stationary. The perfect cyclonic circulation of winds on this day had extended over the whole province, but still the winds reported at the land stations were only light to moderate in force. On the 27th pressure had again fallen in Orissa and risen elsewhere, the increase being rapid at the eastern stations, and in addition to the depression having again intensified slowly, it had commenced to move in a westerly direction and was close to the coast of Orissa. On this day it was probably a small cyclonic storm, for the cyclonic circulation continued very perfect, and strong monsoon winds were feeding into the small storm from the east and south. During the afternoon of the 27th, the centre of the small storm passed inland, crossing the coast not very far from Puri, and moving with considerably increased rapidity in a west-north-westerly direction, and on the 28th the centre was well inland in the Central Provinces, and was midway between Sambalpur and Raipur. In its advance over Orissa it gave only moderate to rather strong winds, and the rainfall also accompanying it was much lighter than usual, and much lighter than was to be expected by the very considerable depression at its centre. It, however, brought up another advance of monsoon winds over the whole of Bengal, and good general rain was again received. From the 28th to the 29th the storm commenced to recurve, and it began to move in a north-westerly or even north-north-westerly direction at the rate of about ten miles an hour, and on the 29th the centre was between Jubbulpur and Seoni. The storm was fed mainly by the monsoon current blowing from the Bay of Bengal, and this hence was flowing rather freely over Bengal, and on the 29th again fairly general rain was received in practically all districts of the province. On the 30th the storm had advanced about 100 miles in a northerly direction, and its centre was between Saugor and Sutna. It then began to move in a north-easterly direction, and from the 30th of September to the 1st of October it had advanced over 150 miles, and was midway between Sutna and Benares, while on the 2nd it had again advanced in a north-easterly direction and had broken up against the Himalayas.

Hence the storm in the later portion of its path again approached towards Bihar and the north-western and western districts of the province generally, and hence it again brought rather disturbed weather and rainfall to the western and northern parts of the province.

Practically, therefore, the whole of the province was receiving more or less general monsoon rainfall almost up to the end of the month.

Pressure.—For the greater part of the first week of the month pressure was above the normal, and the mean excess averaged from 0·07″ to 0·09″, the excess being largest at the northern stations and smallest in the south-west of the province. This excess to a great extent disappeared in the second week, when pressure was almost normal, while in the third week a decided defect had been established, and pressure was below the normal by from about 0·04″ to 0·05″ at the northern stations to very small amounts in the extreme south of the province.

In the last week of the month, owing to the gradual formation of the small cyclonic storm in the north-west angle of the Bay and its advance through Orissa, and then in a direction varying from north-westerly at first to north-easterly in the end, the mean pressure was considerably below the normal, and the defect was naturally largest in the south-western districts. The mean pressure for that week was in defect by from 0·05 inch at such stations as Dinajpur and Jalpaiguri to 0·126 inch at False Point, and about 0·12 inch at Cuttack and Balasore. The pressure over the whole province was also in defect by about 0·08 inch. In Assam the mean pressure for the work was 0·086 inch below the normal.

The mean pressure for the whole month has varied from about 29·67″ in the extreme west of the province to 29·76″ at Sibsagar, thus giving a very slight gradient only over the province. The variations from the normal at the beginning and end of the month, it will have been seen, were of opposite nature, and hence the mean pressure for the month has been almost normal, and at most stations a defect of about a hundredth of an inch only has been registered.

Temperature.—At the beginning of the month the mean temperature was about half a degree above the normal. In the second week owing to the partial break in the rains, which then occurred, the mean temperature of the province became 0·7° above the normal. In the third week, as the rainfall was still light in the western and south-

western divisions, temperature continued in slight excess, but in the north and east of the Province decidedly low temperatures were recorded, the defects averaging more than a degree and-a-half. Again, in the last week of the month these conditions were almost reversed, and for the whole province there was an excess in the general mean temperature of more than half a degree.

For the whole month the mean temperature has hence not varied much from the normal. Very slight excess temperatures, usually of about half a degree, have been registered in the extreme west, south-west and south of the province, while elsewhere defects of about similar amounts have been recorded. Hence the average mean temperature of the whole of Bengal for September has been almost absolutely normal, the actual variation being only about a twentieth of a degree. In Assam, on the other hand, the average mean temperature has been 1·6° in defect.

In dealing with the day and night temperatures, however, it is found that the day temperatures of Bengal averaged about a degree in defect of the normal, while the night or minimum temperatures were in excess by about similar amounts.

Rainfall.—The actual rainfall in the month has varied from about 40 inches in and near the hills in North Bengal, as represented by such stations as Bhagatpur (Jalpaiguri district), Buxa (Darjeeling district), Dinhatta (Kuch Bihar district), and Matabhanga (Kuch Bihar district),—all of which have received from 40 to 41 inches, to the small fall of about 2 to 4 inches in the south, &c., of Chota Nagpur, as represented by the stations Ghatsila in the Singhbhum district (2·50 inches), Monoharpur, also in the Singhbhum district (3·92 inches), Raghunathpur in the Manbhum district (3·73 inches), Hosanabad in the Palamau district (3·07 inches), Garhwa, also in the Palamau district (3·54 inches), and Gangpur in the Lohardaga district (2·65 inches). Hence the falls, it will be seen, have been heaviest in the north-eastern districts, and lightest in the south-western districts of the province. If a line is drawn from the south-east to the north-west of the province, dividing the province into about two equal sections, on the north of the line roughly the falls vary from 10 up to 40 inches, and to the south of it from about 10 down to 3 inches. In some parts of East Bengal, however, there are some areas of unusually low rainfall, and thus at Manikganj (Dacca district), Atia (Mymensingh district), and Daudkandi (Tippera district), falls of rather less than 4 inches have been received. Another area of exceptionally light rainfall is shown in South-West Bengal, and falls of four inches or less have been registered at Mohesreka (Howrah district), Saugor Island, Jessore and Magura and Bangaon in the Jessore district. Comparing the actual falls with the normal, the southern half of the province has received a largely defective fall, and the northern half generally very considerable excess falls. The areas of largest defect are in the extreme southern and south-eastern parts of Bengal, where the rainfall has been in defect by from seven to eight inches at Chittagong and Cox's Bazar, by nearly six inches at Noakhali, by nearly nine inches at Saugor Island, by nearly seven inches at Contai, by eight inches at Soro (Balasore district), and by about five inches at Tajpur (Cuttack district) and Bhadrak (Balasore district). Other largely defective falls of about four to six inches have been reported from Chuadanga and Kushtia in the Nadia district, at Jessore, Magura and Bangaon in the Jessore district, at Satkhira in the Khulna district, at Nator in the Rajshahi district, at Pabna and Sirajganj in the Pabna district, at Munshiganj and Manikganj in the Dacca district, at Mymensingh and Jamalpur in the Mymensingh district, at Chandpur in the Tippera district, at Motihari in the Champaran district, and at Naya Dumka in the Sonthal Parganas.

On the other hand, a very large area in North Bengal has received from 10 to 20 inches in excess of the normal, and some parts more than 20 inches, and again there is a centre of very heavy rainfall in Bihar, where excess falls of more than 10 inches have been received at such stations as Patna and Dinapore. A similar excess fall is reported at Chanchal in the Malda district.

Indeed, the rainfall in September has been distributed very irregularly, and in the midst of districts receiving excess falls some stations report defects, and thus, while Chanchal, as before stated, has received an excess fall of 10·48 inches, Malda, the sadar station of the district, has reported a defect of 2·65 inches. Or to take another instance of this irregularity, the general fall in Champaran has been 3·2 inches in defect, while the district of Darbhanga has received 4·43 inches in excess, and the district of Patna 7·62 inches in excess.

When, however, the average divisional rainfalls are compared with the normal, it is seen that considerable or large excess falls have been received in North Bengal and Bihar, moderately defective falls in South-West Bengal and Chota Nagpur, and largely defective falls in East Bengal and Orissa.

While, however, only two divisions show excess falls in the month, the number of rainy days, on the other hand, has been decidedly larger than usual in all divisions except East Bengal and Chota Nagpur, and hence the defective rainfall appears to be due rather to the lightness of the falls than to want of actual rainy days.

The comparison of the actual rainfall of the various large divisions of the province during the month is most accurately shown in the form of a percentage. The figures representing the rainfall for the month calculated in this way are included in the following table under the heading of September. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first nine columns giving the actual average falls in each division for each month expressed as a percentage of the normal, while the tenth column gives the actual rainfall of the first nine months as a percentage of the normal rainfall for that period:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Actual rainfall of first nine months of 1894 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	0	55	42	97	58	104	121	89	82	92
North Bengal ...	0	64	16	177	83	77	80	111	136	97
East Bengal ...	0	87	164	79	70	95	118	112	76	97
Bihar ...	3	163	24	98	29	121	108	126	128	112
Orissa ...	80	19	27	128	20	137	154	82	69	100
Chota Nagpur ...	3	110	4	144	31	149	138	126	86	117

For the whole year up to the end of September, it will be noticed, the falls have been almost equal to the normal in South-West, North and East Bengal and in Orissa, while over the remainder of the province the falls have been in excess.

The following table contains full data for the comparison of the actual and normal rainfall of the month of September in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or actual average district rainfall as determined from the rainfall observations of the past fifteen years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district fall of the past month to the normal rainfall as a percentage, and the fourth column states as a percentage how much the district rainfall for the month varied from the normal:—

Percentage Table for September 1894.

Division.	District.	Normal district rainfall for September.	Actual district rainfall for September 1894.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

	Inches.
The total fall of rain from 14th to 20th October 1894	0·41
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·85
The total fall from 1st January to 20th October 1894	45·05
The average fall of the corresponding period for 24 years, Surveyor-General's Office	62·80

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; ≤, lightning; d, drizzling rain; p, passing temporary showers ☁, dew; ≡, fog.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns a wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at lea ·10 inch of rain has fallen.

CALCUTTA, *the 23rd October* 1894.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 20TH OF OCTOBER 1894.

At the close of the previous week a diffused low pressure area covered the central and southern districts of Bengal. This probably represented the area of minimum pressure which was making its retreat southwards. The low pressure area was giving disturbed rainy weather over a large part of the province, and it was accompanied by light irregular winds, rather heavily clouded skies, and high humidity. On the 14th instant the general pressure distribution was changing, the area of lowest pressure was retreating southwards and comparatively high pressure was establishing itself in the north of the province. Hence more or less northerly winds were setting in at the north-western and western stations in the province, and these were driving back the more or less easterly and moist winds which had been previously blowing. Weather therefore became fine and almost rainless in Bihar and Chota Nagpur, though local showers were rather numerous in the remaining districts. On the 15th the pressure changes were small, and the lowest pressures were reported in the extreme south of the province, and fine settled weather prevailed over the north-western and western districts, though it remained showery elsewhere. On the 16th pressure had risen slowly over the whole province, the rise being largest in Assam and North-East Bengal, and the highest pressures were reported in the north-east and north of the province, and the lowest in the south of Orissa. Weather was usually fine except at the south-western and western stations, where showers were reported, and in Assam where rainfall was general. A slight increase in the easterly element in the wind directions, however, had taken place on this day, so that conditions had become slightly more favourable for rainfall. On the 17th pressure had risen briskly over practically the whole province, and it had become for the first time for a considerable period in excess of the normal, though the excess amounts were usually small. The area of lowest pressure had again retreated southwards over the Bay. The easterly winds partially retreated from Bengal, and weather became decidedly more settled over the province, though still rather numerous showers were reported in South-West and North Bengal and Orissa. In the centre and south of the Bay, however, conditions had become suspicious, and were favourable for the development of a storm. On the 18th pressure had again risen slowly over the whole province, and hence became moderately above the normal, and weather became fine with passing clouds over all divisions except Orissa, where light general rain had fallen. Light northerly winds also prevailed at most stations. In the south of the Bay, however, the disturbed conditions appeared to have concentrated into a diffused cyclonic storm at a long distance from the Madras coast, and the centre of which was probably a little to the south of the latitude of Madras. On the 19th pressure was usually falling slowly over Bengal, though it still continued above the normal. Light irregular winds generally prevailed, but weather was fine at practically all stations. In the south of the Bay the diffused cyclonic storm appeared to have moved slowly in a west-north-westerly direction, but the centre was still at a considerable distance from the coast. On the 20th pressure had again fallen slowly to moderately over the whole province, and pressure had become almost normal. Winds were rather variable in direction and light in force, and small local storms with rain had become more numerous, so that showers were reported over a large part of the province. In the south of the Bay the diffused cyclonic storm had again advanced slowly towards the Coromandel coast in a west-north-westerly direction. The disturbance was a large one, and it was giving strong winds and squally weather as far north as Coconada, and in connection with these disturbed conditions in the Bay weather in Bengal was becoming a little less settled on the 20th.

Pressure.—The variation of the mean pressure from the normal for the week has been exceedingly small. At the great majority of stations pressure has been above the normal, but the excess has not averaged more than about a hundreth of an inch. The largest excess pressures have been registered in South-East Bengal and Cachar, while on the other hand very slightly defective pressures have been recorded in the extreme west of the province.

In Assam the mean pressure has shown an excess of 0·016 inch.

Temperature has been above the normal almost throughout the week, and the excess in the average mean temperature has equalled 1·4°. In North Bengal and Bihar, indeed, the excess has averaged from two to two and-a-half degrees. In Assam, on the other hand, the average excess in the mean temperature has only equalled 0·9°.

Rainfall.—An average fall of about one inch and-a-half has been recorded in North Bengal and Orissa and of about an inch in South-West and East Bengal, while in Bihar and Chota Nagpur the falls have only averaged about half an inch. The falls have hence been in moderate excess in North Bengal, Bihar and Orissa, and a little below the normal in Chota Nagpur and South-West Bengal, but in East Bengal the defect has been large. In the present week again, however, the number of rainy days has far exceeded the normal number even in the districts which have received defective falls except in Chota Nagpur, and in such divisions as North Bengal, Bihar, and Orissa, the number of rainy days has been about twice as large as usual.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following :—South-West Bengal 89 per cent., North Bengal 138 per cent., East Bengal 71 per cent., Bihar 145 per cent., Orissa 115 per cent., and Chota Nagpur 82 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 107 per cent. of the normal.

In Assam during the week Silchar has received 0·81 inch of rain, Dhubri 0·22 inch, and Sibsagar 0·85 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 20th of October 1894:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

RESOLUTION ON THE REPORT OF THE COMMITTEE FOR THE MANAGEMENT OF THE ZOOLOGICAL GARDEN, CALCUTTA, FOR THE YEAR 1893-94.

REVENUE DEPARTMENT—MISCELLANEOUS No. 903T.—R.

Darjeeling, the 22nd October 1894.

RESOLUTION.

READ—

The Report of the Honorary Committee for the Management of the Zoological Garden, Calcutta, for the year 1893-94.

The total receipts of the Garden, excluding the opening balance of Rs. 5,240, amounted to Rs. 43,193, against Rs. 42,144 in the previous year, and the total expenditure increased from Rs. 41,202 in 1892-93 to Rs. 43,521 during the year under report. The increased receipts were chiefly due to the unusual influx of pilgrims into Calcutta during the year, many of whom also visited the garden. The increase in expenditure was caused by larger sums being spent on repairs of roads and buildings than in the previous year. The closing balance in favour of the Garden decreased from Rs. 5,240 to Rs. 4,912.

2. The number of visitors who were admitted to the Garden on payment of entrance fees was the highest on record since its foundation, being 162,449, against 139,173 in 1892-93, thus showing an increase of 23,276 entrances. In addition, a large number of students and children were admitted free of charge.

3. Altogether 317 additions were made to the collection (including 102 mammals, 89 birds, and 126 reptiles), of which 12 were born in the Garden, 24 were captured, and the rest were obtained either by presentation, or by purchase or exchange. Among the more important acquisitions were a large consignment of valuable animals, consisting of a pair of zebras, one jaguar, a pair of chacma baboons, five crested cranes from Africa, four common rheas, one imperial eagle, one crested screamer, and some other animals, received in exchange from Mr. Carl Hagenbeck of Hamburg; a fine pair of pumas obtained from the Zoological and Acclimatization Society of Melbourne; a Mississipi alligator and a rattle-snake, also acquired by exchange, being the first of their kinds ever seen in India; a rare carnivorous animal *Cynogale bennetti* from Borneo acquired by purchase; and a fine specimen of a hunting leopard from Rajputana, presented by His Highness the Maharaja of Jeypur.

4. A series of experiments on the efficacy or otherwise of various alleged remedies for snake-bite was conducted during the year in the Joy Gobind Law Laboratory, and a report of the results was submitted to Government by the President of the Committee, Dr. D. D. Cunningham. A copy of this report has been forwarded to the Government of India for information.

Another series of experiments was undertaken in the same Laboratory at the instance of the "Hemp Drugs Commission." As the enquiry is being continued in the current year, the Committee will deal with the subject in their next report.

5. The Lieutenant-Governor notices with pleasure the liberal donation of Rs. 8,000 made by Maharaja Bahadur Sir Jotendra Mohan Tagore, K.C.S.I., for the construction of a Zoological Library and Lecture-room. This building will shortly be ready for use. The Committee observe that a hall without furniture and books will be useless for the purpose for which it has been intended, and express the hope that public-spirited and enlightened gentlemen and noblemen will come forward to provide funds for the purpose.

6. The Lieutenant-Governor tenders his thanks to the members of the Committee for their efficient management of the Garden during the year.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Honorary Secretary to the Committee for information, and that it be published in the Gazette.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

PROCEDURE FOR THE RENEWAL OF EXPIRED LICENSES UNDER THE INDIAN ARMS ACT, 1878.

POLICE.

Dated Darjeeling, the 27th October 1894.

RESOLUTION No. 2086J.D.

READ again—

The Circular of this Government, No. 890J., dated the 13th February 1894, to all Commissioners of Divisions, regarding the provision of facilities for the renewal of expired licenses under the Indian Arms Act.

Read also the following replies:—

Letter from the Commissioner of the Bhagalpur Division, No. 770J., dated the 14th April 1894.

Letter from the Commissioner of the Chittagong Division, No. 264M., dated the 14th April 1894.

Letter from the Commissioner of the Rajshahi Division, No. 1Jct., dated the 19th April 1894.

Letter from the Commissioner of the Presidency Division, No. 39J.G, dated the 21st April 1894.

Letter from the Commissioner of the Burdwan Division, No. 137J.G., dated the 8th May 1894.

Letter from the Commissioner of the Orissa Division, No. 344J., dated the 19th June 1894.

Letter from the Commissioner of the Patna Division, No. 359G., dated the 21st June 1894.

Letter from the Commissioner of the Chota Nagpur Division, No. 337J., dated the 19th July 1894.

Letter from the Commissioner of the Dacca Division, No. 1412J., dated the 28th July 1894.

UNDER rule 13 of the rules under the Arms Act, licenses to possess arms, &c., are granted by the Magistrate of the district, and under rule 19 the currency of a license may be renewed on payment of a second fee by the same authority. It was brought to the Lieutenant-Governor's notice that inconvenience was occasioned to the public by the delay involved under this procedure for the renewal of a license, and it was accordingly suggested to the Government of India that rule 19 of the rules under the Arms Act might be modified so as to empower Subdivisional Officers as well as the authority granting the licenses to grant renewals on the prescribed fee being paid. This proposal was, however, not accepted by the Supreme Government. Commissioners of Divisions were then invited, in the circular of this Government, No. 890J., dated the 13th February 1894, to suggest any other procedure which might appear appropriate for the removal of the difficulties complained of. They were also asked their opinion as to the best existing procedure, and the average delay in having a license renewed. From the replies received it appears that there is a general consensus of opinion in favour of allowing applications for renewals to be made by post, and that the best existing procedure is that in force in the Noakhali district, where applications for renewal are either sent by post or presented personally, together with registration envelopes stamped and ready addressed. The average delay in obtaining a renewal is said to vary from two to three days in the Birbhum district, to three months in the Tippera district.

2. The existing practice in the matter of the renewal of expired licenses appears to be as follows:—Having regard to clause 9 of the conditions under which a license in Form VIII is granted, the license-holder files before the end of the year for which it is issued an application for its renewal on a piece of four-anna stamped paper. The old license is annexed to the application. This application may be made either at the head-quarters of the district, or at a subdivision. In the latter case the Subdivisional Officer transmits it to head-quarters for orders. As a rule the renewal is accorded without objection, and the new form lately prescribed by the Government of India provides for recording a memorandum of renewal on the license. The applicant is then left to call for his license himself and take it away. If he does not call before the lapse of the old license on the 31st December, he renders himself liable to the penalties for holding an unlicensed gun.

3. It seems to the Lieutenant-Governor that the existing procedure, if intelligently and considerately worked, is not open to much objection, but as a fact there is reason to believe that there is often great delay in Magistrates' offices owing to want of method and proper supervision. Sir Charles Elliott therefore desires to prescribe general instructions for the guidance of Magistrates and police officers, which it is hoped may obviate the inconvenience now felt by the public. The following procedure is accordingly laid down in order to ensure this object:—A list of all persons holding licenses under the Arms Act within the area of the thana should be maintained at every police-station. This is prescribed under Rule 72, Chapter XVI, Volume I of the Bengal Police Code, but it is doubtful whether in all cases the rule is complied with. The Inspector-General of Police will take measures to ensure that this list is kept, and will issue orders that shall make it incumbent on every officer in charge of a police-station to report to the Magistrate of the district, on or before the 1st December, whether there is any objection to the renewal of any of the licenses within his jurisdiction. As licenses are granted for one year only, and the duration of the license expires on the 31st December, the holder of a license, if he desires to renew it, must apply before the close of the year for renewal. This application he must make on stamped paper of the value of four annas either in person or by agent or through the post, and he may make it either at the police-station or to the Subdivisional Officer in whose jurisdiction he resides, or to the District Magistrate. The permission to apply at the police-station will, it is expected, prove a boon to the public. The application must be accompanied by the current license. If the papers are received by the officer in charge of the police-station or the Subdivisional Officer, he will transmit them without delay to the District Magistrate. The District Magistrate having already received the police reports, will be in a position to decide at once upon the question of renewal, and the simple forms lately prescribed by the Government of India will in all cases of renewal enable him to give effect to the orders passed in each case without any waste of time. Within a week's time the license, with the order of renewal recorded on it, should be ready for return to the holder. In cases where enquiry is found to be necessary, some delay must be unavoidable, but such cases are the exception. The holder of the renewed license will then gain possession of it either by applying for it personally or by agent at the thana, or subdivisional or sadar office wherever the application was filed, or, if he prefers, he can attach a registered and stamped envelope bearing his own address to his application, and the renewed license will then be sent to him by post from the Magistrate's office.

4. His Honour apprehends that there is no other way of insisting upon the renewal of licenses than by the institution of prosecutions. It should, therefore, be made the duty of some clerk in the Magistrate's office to report, immediately after the 1st January of each year, what licenses have not been presented for renewal. It is desirable to prosecute for neglect to apply for a renewal, not with rigor, but firmly, in order that it may be clearly understood that the provisions of the law will be enforced.

5. In conclusion the Lieutenant-Governor takes this opportunity of drawing the attention of District Magistrates to the necessity of numbering and marking guns for which a license is given. It is feared that this precaution, which is obviously necessary for purposes of identification, has been generally neglected in Bengal districts. His Honour will not go so far as to insist that the gun itself should be produced and identified on every occasion when the license for it is renewed, although this may be found necessary in some localities where the misuse of gun licenses is shown to exist: but it must be laid down as an invariable rule of practice that guns should always be marked and numbered before an original license is granted for their possession, and that the number should be entered on the license when it is originally granted.

ORDER.—Ordered that copies of the above Resolution be forwarded to all Commissioners of Divisions and to the Inspector-General of Police, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Govt. of Bengal.

DISTRICT ROAD FUND.

No. 4963R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

Dated Calcutta, the 22nd October 1894.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 600L.F., dated 28th September 1894, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th June 1894.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the 1st quarter of the year 1894-95 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to the Commissioners of the Rajshahi, Chittagong, Bhagalpur and Chota Nagpur Divisions, to the Superintending Engineers of the Northern and Western Circles, to the Inspector of Works, Eastern Circle, and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Secretary.

G. E. MANISTY,

Offg. Accountant-General, Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 27th October, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
BURDWAN DIVN. 1	Burdwan Oct. 27, '94	0·11	Weather—seasonable. Prospects of *aman* rice and sugarcane good. Fodder and water sufficient. Prices of common rice :—
	Kalna ...	0·07	
	Katwa ...	0·72	
	Raniganj ...	1·21	Srs. Burdwan ... ... 11 to 17 ; Kalna ... ... 10 to 14 ; Katwa ... ... 15½ ; Raniganj ... ... 15 } per rupee.
2	Birbhum „ 27, '94	2·77	Weather—unsettled and ending in heavy rain on the 24th and 25th. Clear sky now and weather much cooler. *Aus* being reaped and a 20-anna crop reported in some parts. The recent heavy rain will have done some harm, however, both to *aus* and *aman*. Lands being prepared for *rabi* crops in places. Cattle doing well. Supply of water ample and of fodder normal.
	Rampur Hát ...	1·90	
3	Bankura „ 27, '94	0·13	Weather—hot and cloudy. State and prospects of crops very good. Coarse rice selling at—
	Vishnupur ...	Nil	Srs. Sadar ... ... 20 ; Vishnupur ... ... 17½ } per rupee.
4	Midnapore „ 27, '94	0·84	Weather—feel of the cold weather. Prospects of crops very bright. Fodder and water abundant. Prices of common rice :—
	Contai ...	0·94	
	Tamluk ...	1·72	
	Ghatal ...	Nil	Srs. Sadar ... ... 14 ; Contai ... ... 16½ ; Tamluk ... ... 14 ; Ghatal ... ... 14 } per rupee.
5	Hooghly „ 27, '94	0·06	Weather—seasonable. Harvesting of *aus* and jute completed. Prospects of *aman* good. Ploughing for *rabi* crops going on. Prices of common rice :—
	Serampore ...	0·33	
	Jahanabad ...	0·27	Srs. Sadar ... ... 12 ; Serampore ... ... 12 to 12½ ; Jahanabad ... ... 14 to 15 } per rupee.
6	Howrah „ 27, '94	0·11	Weather—clear and cool. Prospects of paddy and sugarcane good. Prices falling. Rice selling at—
	Ulubaria ...	0·32	Srs. Howrah ... ... 10 ; Ulubaria ... ... 11 to 13½ } per rupee. Fodder and water-supply sufficient.
PRESIDENCY DIVN. 7	24-Parganas „ 27, '94	0·25	Weather—seasonable. Prospects of *aman* good. Lands being prepared for *rabi* crops. A few cases of cow-pox reported from Basirhat. Fodder and water sufficient. Rice sells at—
			Srs. c. Sadar ... ... 12 to 13 0 ; Barasat ... ... 10 10 ; Basirhat ... ... 11 to 12 0 ; Diamond Harbour ... ... 10 12 } per rupee.
8	Nadia „ 27, '94	0·02	The weather is at last beginning to get cool. Prospects of all crops excellent. Common rice has fallen, and now sells at from 12 to 15 seers per rupee.
	Kushtia ...	1·75	
	Meherpur ...	1·94	
	Chuadanga ...	0·19	
	Ranaghat ...	0·08	
9	Murshidabad „ 27, '94	1·78	Weather—seasonable. Indigo and *rabi* crops being sown. Prospects of standing crops on the whole good. Supply of fodder reported to be insufficient at Jangipur. Common rice sells at 13 seers per rupee.
10	Jessore „ 27, '94	0·27	Weather—hot and cloudy. Sowing of indigo and winter crops in progress. Prospect of *aman* good. Rivers falling. Fodder and water sufficient. Prices of common rice :—
	Jhenida ...	0·03	
	Magura ...	0·10	
	Narail ...	0·13	
	Bangaon ...	0·24	Srs. c. Jessore ... ... 11 to 13 0 ; Jhenida ... ... 15 0 ; Magura ... ... 14 8 ; Narail ... ... 14 14 ; Bangaon ... ... 12 to 16 0 } per rupee.
11	Khulna „ 27, '94	0·19	Weather—seasonable. Prospects of *aman* crop continue to be good. Cultivation of land for *rabi* crops going on. Common rice sells at from 11 to 13 seers per rupee. Fodder and water-supply plentiful.
	Bagerhat ...	0·42	
	Satkhira ...	1·20	

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*			
RAJSHAHI DIVN.			
12	Rajshahi ... Oct. 27, '94	2·09	Weather—first part of the week rainy; latter portion dry and seasonable Condition of *aman* rice is excellent, the rain of the week having done immense good. No more rain is wanted. Lands are being prepared for *rabi* cultivation, and rain would do harm in this direction. There is no cattle-disease. Fodder and water-supply ample. Price of rice varies from 11 to 14 seers per rupee.
	Nator ...	2·61	
	Naugaon ...	2·92	
13	Dinajpur ,, 27, '94	3·10	Weather—mornings and evenings cool and hot during day with occasional rain. *Aman* progressing. Cultivation of *rabi* crops going on. Fodder and drinking water sufficient. Common rice selling from 11 to 12 seers per rupee.
	Thakurgaon ...	5·45	
14	Jalpaiguri ,, 27, '94	5·31	Weather—very wet and quite unseasonable for this season of the year, very cloudy still and getting cold. The rain has benefited the winter rice crop which is expected to yield a full crop, but it has thrown back to some extent the sowing of the *rabi* crops. Price of common rice varies from 10 to 13 seers per rupee. Cattle-disease is pretty prevalent everywhere.
15	Darjeeling ,, 27, '94	2·22	Weather—rainy; cold weather setting in. *In the Hills*:—*Aghani dhan*, *bara marua* and *kalai* coming to perfection. Potatoes and *phaphur* progressing favourably. *In the Terai*:—Prospects of *aghani dhan* favourable. Paddy in ear. Land being ploughed for mustard and *kalai*. Prices of coarse rice:—
	Siliguri ...	3·31	
			Srs.
			Hills ... ... 9 to 10 } per rupee.
			Terai ... ... 10 to 12 }
16	Rangpur ,, 27, '94	5·30	Heavy rain during the week. Jute steeping continues. *Aman* rice doing well. Lands under preparation for tobacco, &c. The late rain will not be beneficial. Common rice 8 to 13 seers per rupee.
	Gaibanda ...	3·33	
	Kurigram ...	3·60	
	Nilphamari ...	6·97	
17	Bogra ,, 27, '94	2·05	Weather—seasonable. Prospects of *aman* favourable; an outturn of 16 annas expected. Price of common rice stationary (12 seers for the rupee). Fodder and water sufficient.
	Sherpur ...	5·40	
	Naukhila ...	1·54	
1	Pabna ,, 27, '94	1·70	Weather—variable. Prospects of *aman* good. Sowing of *rabi* crops in progress. Common rice selling at 12 seers per rupee and jute at Rs. 4 to 5 a maund. Fodder and water-supply sufficient.
DACCA DIVN.			
19	Dacca ...	...	Report not received.
20	Mymensingh ,, 27, '94	3·69	Weather—cloudy with occasional heavy showers. State and prospects of standing crops good. Common rice sells at 11½ seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.
21	Faridpur ,, 27, '94	0·59	Weather—hot. Prospects of crops good. *Aman* harvest commenced in Goalundo. Rice 11½ to 12½ seers per rupee.
	Goalundo ...	Nil	
	Madaripur ...	Not reported.	
22	Backergunge ,, 27, '94	0·86	Weather—seasonable. Prospects of crops good. Common rice sells from 9 to 13 seers per rupee. Fodder and water sufficient.
	Pirojpur ...	1·27	
	Patuakhali ...	2·13	
	Bhola ...	0·54	
CHITTAGONG DIVN.			
23	Tippera ...	...	Report not received.
24	Noakhali ...	...	Ditto.
25	Chittagong ...	...	Ditto.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
	BIHAR.		
	PATNA DIVISION.		
26	Patna Oct. 27, '94	5·42	Weather—very cloudy and rainy. Prospects of rice up to now very good, but the continued rain will injure it hereafter. The present wet weather is retarding *rabi* sowings which have been already delayed. Prices continue normal. Common rice selling at—
	Barh ..	3·28	
	Bihar ...	2·94	
	Dinapur ...	3·14	
			Srs.
			Sadar ... ... 16 }
			Barh ... ... 12½ } per rupee.
			Bihar ... ... 15½ }
			Dinapur ... ... 11 to 14½ }
27	Gaya „ 27, '94	2·36	Weather—rainy and unsettled. The rain has done considerable damage to the winter rice crop, and unduly retarded *rabi* sowings, which means a poor harvest in the spring. Sugarcane pressing has begun in parts. Prices unaltered and about normal. Supply of fodder and water ample.
	Aurangabad ...	2·88	
	Nawada ...	2·49	
	Jahanabad ...	2·12	
28	Shahabad „ 27, '94	3·57	Weather—rainy and cloudy. Prospect of paddy good; but if the rain continues, the crop will suffer. *Rabi* sowings being retarded owing to rain.
	Buxar ..	2·70	
	Bhabua ...	0·85	
29	Saran „ 27, '94	3·88	Weather—colder and seasonable. The rainfall has injured the paddy crop to some extent. The sowing of the *rabi* crop is being retarded. Fodder and water abundant. Prices of common rice:—
	Siwan ...	3·77	
	Gopalganj ...	2·51	
			Srs. c.
			Chapra ... ... 15 0 }
			Siwan ... ... 14 6 } per rupee.
			Gopalganj ... ... 15 6 }
30	Champaran „ 27, '94	3·01	Weather—cloudy. *Aghani* rice in fair condition. *Rabi* sowings progressing. Common rice selling at 16 seers per rupee. Fodder and water sufficient.
31	Muzaffarpur „ 27, '94	2·05	Weather—cloudy during latter part of the week. The sowing of the *rabi* crops, which was already backward, has been still further retarded by the recent rainfall, which will also slightly damage the paddy crop in blossom. No cattle-disease. Fodder and water plentiful. Common rice selling at 13 seers and the new *gadar* (*aus*) rice at 16 seers in the rupee.
	Hajipur ...	1·48	
	Sitamarhi ...	3·44	
32	Darbhanga 27, '94	2·32	Weather—cloudy with heavy showers on 25th. *Aghani* rice is doing well, but the rain of this week has been somewhat injurious to paddy in blossom as also to *rabi* sowings. A break in the rains is very necessary for *rabi* cultivation. Fodder for cattle sufficient. Prices normal and stationary.
	BHAGALPUR DIVISION.		
33	Monghyr „ 27, '94	2·86	Weather—rainy and cloudy. The rain which has recently fallen has retarded the *rabi* sowings and has also done some injury to the paddy crop. It has also washed out the *urid*, *kalai* and *kurthi* sown on the flooded areas. Otherwise prospects good. Fodder sufficient. Prices of common rice:—
	Begusarai ...	5·31	
	Jamui ...	Not reported.	
			Srs. c.
			Sadar ... ... 11 to 14 0 }
			Begusarai ... ... 12 4 } per rupee.
			Jamui ... ... 15 12 }
34	Bhagalpur „ 27, '94	1·34	Sky continues overcast and there has been a good deal of rain on some days. It is cooler. The rain has done some harm to *aghani* paddy and to *kalai* and *kurthi*, and has delayed sowing of some *rabi* crops. Prospects, however, continue to be good. Prices normal and practically stationary. Price of common rice 12½ to 15½ seers per rupee for old rice and 20 seers for new *bhadoi* rice. Fodder and water sufficient.
	Banka ...	2·82	
	Madhipura ..	2·65	
	Supaul ...	3·10	
35	Purnea „ 27, '94	4·20	Weather—cloudy but cool. The recent rain has probably done some damage to paddy in the ear and in the Kishanganj subdivision to potatoes, and will retard *rabi* sowings. Average price of rice 15 seers per rupee.
	Kishanganj ...	3·76	
	Araria ...	3·66	

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*			
Bhagalpur Divn.—*concld.* 36	Malda Oct. 27, '94	9·42	Weather—hot and cloudy with some heavy rain. Winter paddy coming into ear and promising well. *Kulai* pulse thriving. Lands are being prepared for wheat and other winter crops. Coarse rice selling at from 12 to 18½ seers per rupee. Fodder and water sufficient.
	Chanchal* ...	1·35	
	Shibganj ..	4·28	
	Gazole ...	1·91	
37	Sonthal Parganas „ 27, '94	3·64	Weather—too wet for the time of year. Rice crop excellent; the heavy rain has done a very little harm and is delaying sowings of winter crops to some extent.
	Deoghur ...	2·30	
	Godda ...	2·89	
	Jamtara ...	4·18	
	Pakour ..	2·42	
	Rajmahal ..	2·07	
ORISSA.			
Orissa Divn. 38	Cuttack „ 27, '94	0·07	Weather—warm. Harvesting of *beali* nearly over. *Laghu sarad* attaining maturity. *Guru sarad* in ear. Prospects good. *Rabi* crops being sown. Condition of cattle good. Fodder-supply sufficient. Prices of common rice :— Sadar ... ... Srs. 10 c. 8 to Srs. 14 c. 7; Jajpur ... ... 10 8 to 15 12; Kendrapara ... ... 12 13 to 17 1; Banki ... ... 14 7 — per rupee.
39	Balasore „ 27, '94	0·47	Weather—seasonable. *Beali* rice is being harvested. *Sarad* rice doing well. The rain which has fallen during the week has done much good. Some cattle-disease reported from the Sadar subdivision. Prices of rice :— Balasore ... ... Srs. 18; Bhadrak ... ... 18; Dhamnagar ... ... 14; Chandbali ... ... 16 — per rupee.
40	Puri „ 25, '94	4·20	Weather—cloudy with occasional showers of rain. Harvesting of *beali* still continues. *Sarad* is in ear. *Laghu sarad* is ripening. State of miscellaneous crops good. Rice sells from 11 to 17 seers 11 chitaks per rupee.
	Khurda ...	0·62	
CHOTA NAGPUR.			
	South-West Frontier Agency.		
Chota Nagpur Divn. 41	Hazaribagh Oct. 27, '94	5·50	Weather—unsettled. Rice and other crops continue to do well. *Rabi* sowings are being retarded by rain. Fodder-supply plentiful. Common rice selling at from 12 to 16 seers per rupee.
42	Lohardaga „ 27, '94	0·99	Weather—cloudy. Prospect of winter paddy continues good; sixteen annas outturn expected. Sowing of mustard finished. Potatoes being sown. Common rice is selling at 16 seers per rupee. Fodder and water sufficient.
43	Palamau „ 25, '94	3·10	Weather—very unsettled. Heavy local storms which are most unusual at this time of year. Prospects of crops good, but cessation of the rains would be very beneficial. *Rabi* crops being sown. Rice selling at 13 to 22½ seers per rupee.
44	Manbhum „ 27, '94	0·53	Weather—stormy early in the week. Now seasonable. Prospects of *aman* rice continue excellent. Price of common rice 12 to 20 seers per rupee.
45	Singhbhum „ 27, '94	1·08	It rained day before yesterday (25th); sky still not free from clouds. Prospects of standing crops not affected by the rain; but more rain may cause harm. Cutting of paddy going on. Rice selling from 18 to 22 seers per rupee.

Published for general information.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when a 0·10 inch of rain has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 27TH OF OCTOBER 1894.

DURING the previous week a diffused but rather large cyclonic storm had formed in the south of the Bay, which had advanced slowly in a west-north-westerly direction, and on the 20th, or the last day of that week, was lying off the Coromandel coast with a centre probably in about the latitude of Madras. The diffused storm continued its advance, and the centre passed inland a little to the north of Madras, and probably between that station and Nellore, in the early morning of the 21st, or the first day of the week under review. The disturbance was of feeble strength near its centre, but at considerable distances from it, it was accompanied by very strong winds, specially to the north of the centre, and at such stations as Coconada, Masulipatam, and even in Ceylon at Galle, very strong winds, and at certain times a severe gale of wind, were reported. Decidedly heavy rain was also brought up to the Madras coast during the approach and passage of the depression over the land. The diffused storm apparently either broke up on striking the coast, or it may perhaps have passed across the peninsula in a feeble form, and have afterwards developed into a storm which advanced up the Bombay coast, and filled up in Guzerat on the 27th. At all events, in so far as the weather in the Bay of Bengal is concerned, on the 22nd it had practically ceased to exist. It had, however, brought up with it a moderately heavy wave of monsoon winds, and when the depression had passed away this wave began to spread northwards along the west coast of the Bay. On the 22nd moderate general rain was received in Orissa. On the 23rd, south-westerly or more or less monsoon winds set in over Bengal, and winds became moderate in force at the head of the Bay. Pressure also began to fall on the 23rd. The fall of pressure continued on the 24th, and the fairly steady south-westerly wind current affected practically the whole province, while rainfall, which had been more or less local up to this date, except in Assam and Orissa, began to increase in amount, and became more general, and in Bihar in particular on the 24th the falls were heavy. On the 25th, a rapid fall of pressure took place over the northern half of the province, the fall equalling 0·07″ over parts of Bihar, and a very distinct barometric depression had formed over this area, the defect ranging up to 0·14″ at Bhagalpur, round which as a centre there was a distinct, though rather irregular, cyclonic circulation of winds. With the formation of the depression very heavy general rain fell over the whole of the northern half of the province, and lighter and also rather general rain over the southern half. On the 26th pressure had fallen rather rapidly at the extreme northern, eastern, and southern stations, and pressure had become in defect by amounts ranging up to 0·234″ at Sibsagar, 0·212″ at Jalpaiguri, and 0·207″ at Darjeeling. A strong westerly element in the wind direction, however, began to set in over the greater part of the province on this day, and hence, though the depression in the north of the province was still very prominent, it had become more diffused, and the cyclonic circulation of winds in connection with it had disappeared. Fairly general rain had again fallen in connection with the depression, but the amounts were only heavy at the eastern stations on the 26th. On the 27th a moderate to rapid increase of pressure occurred, the increase ranging from 0·17″ at Sibsagar to 0·04″ in South Bengal. Hence the barometric depression was rapidly filling up, though pressure was still in defect and winds had become westerly at the great majority of stations, and in some cases north-westerly and northerly. Hence weather was becoming much more settled, and on the 27th only a few unimportant showers were reported in the south of the province.

Pressure.—Owing apparently to the effects of the storm in the Bay, and the subsequent advance of monsoon winds over Bengal, and to the development of another depression in the north of the province, the mean pressure has been very considerably below the normal, and the defects have usually ranged from about 0·04″ at the southern stations up to about 0·08″ at the extreme north of the province. In Assam the defect has averaged 0·064″.

Temperature has been decidedly high almost throughout the week, and the general excess has averaged 1·1°. The largest excess has been recorded in Orissa, where it has equalled 2°.

In Assam, on the other hand, temperature has been in defect and the average defect has equalled 1·7°.

Rainfall has been unusually heavy and frequent during the week. The falls in North Bengal and Bihar have averaged no less than between three and four inches, and Chota Nagpur and East Bengal have received about two and-a-half inches. The smallest falls have been received in South-West Bengal and Orissa, but even these districts have received falls which have averaged about an inch. In all cases, except in Orissa and South-West Bengal, the falls have been largely above the normal. The number of rainy days has also been exceptionally large, and in all divisions they have largely exceeded the normal.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 105 per cent., North Bengal 641 per cent., East Bengal 225 per cent., Bihar 583 per cent., Orissa 75 per cent., and Chota Nagpur 486 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 353 per cent. of the normal.

In Assam during the week Silchar has received 12·12 inches of rain, Dhubri 4·35 inches, and Sibsagar 3·67 inches.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 27th of October 1894:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	78
	Inches.
The total fall of rain from 21st to 27th October 1894	0·25
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·65
The total fall from 1st January to 27th October 1894	45·30
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·45

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; d, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 29th October 1894.

RESOLUTION ON THE REPORT ON PUBLIC INSTRUCTION IN BENGAL FOR THE YEAR 1893-94.

GENERAL DEPARTMENT—EDUCATION.

Darjeeling, the 29th October 1894.

RESOLUTION—No. 468T.—G.

READ—

The Report on Public Instruction in Bengal for the year 1893-94.

Preliminary.

The Annual Report for 1893-94 has been submitted by Sir Alfred Croft, K.C.I.E., who resumed charge of the Department on 7th December 1893, after long furlough from 5th April 1892. During the earlier part of the year Dr. C. A. Martin officiated as Director of Public Instruction. The Report is longer by 35 pages than its predecessor for 1892-93, and by 23 pages than that for 1891-92, but it is full of most valuable and interesting matter, and the Lieutenant-Governor cannot point to any portion of it which could with advantage be much shortened. The punctuality practically achieved in the submission of the Report is commendable.

Number under instruction.

2. The number of pupils under instruction continues to increase, though there is no great advance to record this year. In public institutions the number has risen by 13,670, from 1,400,067 to 1,413,737, and in private institutions by 541 pupils,

from 134,989 to 135,530: taken together there has been a total gain of 14,211 pupils. The institutions have also increased in number: public, from 53,131 to 53,615; private or indigenous, from 13,473 to 13,602; total increase 613. The gain has been obtained in nearly all classes of institutions. Among the schools classified as "public institutions" which adopt departmental standards, the number supported or aided by public funds has risen from 41,697 to 41,981, and the number of unaided schools has also increased from 11,434 to 11,634. Taking University and secondary education together, the pupils under instruction have slightly risen from 207,192 to 208,453. The increase in the attendance in primary schools is larger, viz., from 1,123,225 to 1,130,551, the development being apparent in both upper and lower primaries, but more especially in the latter. The figures for the lower primary schools are given below for the last five years:—

	Schools.	Pupils.
1889-90	44,146	960,914
1890-91	43,998	942,244
1891-92	44,920	987,948
1892-93	43,829	983,271
1893-94	44,020	988,745

Female schools have advanced remarkably in the last four years, as shown by the following figures:—

	Schools.	Pupils.
1890-91	2,270	49,638
1891-92	2,743	57,801
1892-93	2,856	60,249
1893-94	3,042	65,011

Arabic and Persian schools are almost stationary, but Sanskrit education shows 120 more schools and 700 more pupils.

Ratio to population.

3. In the population to which the educational returns apply, there are, at the usual rate of 15 per cent., 5,461,912 male children and 5,494,642 female children of school-going age. The returns show 1,444,421 boys and 104,846 girls at school. Thus of all boys of a school-going age 26·4 per cent., and of all girls of a school-going age 1·9 per cent., are at school. In the previous year the percentages were 26·2 and 1·9 respectively; they do not change materially from year to year. The proportion of boys actually at school in the different districts, compared with the number of boys of school-going age, taken at the usual rate of 15 per cent. of the male population, varies from nearly 60 per cent. in Hooghly and Noakhali, and nearly 54 per cent. in Howrah and Chittagong, to less than 10 per cent. in Palamau and to 6·3 in the Chittagong Hill Tracts. The order of the districts *inter se* remains remarkably constant, with but few fluctuations.

Financial results.

4. The income of the Department, which was Rs. 5,65,567 in 1892-93, fell to about Rs. 5,53,000 in 1893-94, the reduction being mainly in contributions from private persons. The expenditure charged in the accounts to the Department was about Rs. 25,72,000, against Rs. 25,37,481 in the preceding year. The net expenditure from Provincial revenues on education was therefore Rs. 20,24,000 against Rs. 19,71,914, an increase of Rs. 52,000. On the other hand, the expenditure on school buildings, which is charged in the accounts to the head of the Public Works Department, fell from Rs. 2,85,854 to Rs. 1,93,404, the chief difference being that the Calcutta School of Art was completed in 1892-93. Taking the departmental accounts, as distinguished from those of the Financial Department, the total net expenditure on education in Bengal, including all disbursements from public and private sources, after deducting the fees and contributions paid to the University and in all public schools and colleges, amounted to Rs. 95,75,457 as compared with Rs. 96,45,408 in the preceding year—a decrease of Rs. 69,951. The net expenditure from all public sources, including District and Municipal funds, increased from Rs. 34,66,457 to Rs. 34,69,664, or by Rs. 3,207, while expenditure from private sources fell off from Rs. 61,78,951 to Rs. 61,05,793, or by Rs. 73,158. No less than Rs. 69,403 of this sum are due to the diminished income of the University, the figures in the preceding year having represented the accounts for

15 months owing to an alteration in the financial year. Collegiate education cost more by Rs. 23,575, and secondary education by Rs. 60,321, chiefly from private sources: primary education expenditure increased by Rs. 50,380. Female education cost less by Rs. 58,248, in spite of higher contributions from public funds. It was noticed last year that municipalities spent 50 per cent. more on secondary than on primary education: this year a comparison shows very different results, viz., Rs. 29,970 spent on secondary and Rs. 41,419 on primary education.

Inspection tours.

5. Dr. Martin made tours extending over 53 days, and visited 71 institutions in 11 districts, besides the Chota Nagpur Division. Sir Alfred Croft, after his return from furlough and performing his duties as Vice-Chancellor of the University in connection with the Convocation and otherwise, spent 32 days in inspecting 43 institutions in six districts. The time spent on inspections by the inspecting staff of the Province, throughout the year, is exhibited in the following statement and compared with last year:—

	1892-93.		1893-94.	
	Number of officers.	Average number of days.	Number of officers.	Average number of days.
1	2	3	4	5
Inspectors	5	168	5	172
Assistant and Joint-Inspectors ...	9	131	9	152
Inspectors of European Schools ..	2	67	2	95
Deputy Inspectors	44	161	44	182
Sub-Inspectors	198	219	200	212

In every class but the last there is an improvement. Mr. M. Prothero and Mr. Reuther did specially good work in their circles; they were 228 and 208 days respectively on tour away from their head-quarters. Mr. Prothero's 228 out of 271 days on duty is, as the Director remarks, an unexampled record of activity. Rai Radhika Prosanna Mukerjee Bahadur spent 155 days on tour, and visited 279 schools: Babu Dinanath Sen, Officiating Inspector in the Eastern Circle, was out for 145 days and visited 174 schools. Mr. G. A. Stack in Bihar inspected 130 schools in 166 days. Mr. LeFeuvre was inspecting for 180 days out of 249 on duty as Assistant Inspector. Babu Chandra Mohun Mazumdar, Assistant Inspector of the Presidency Division, was on tour for only 16 days in six months, and pleads ill-health. He should be required to take long leave or do his duty properly. Babu Beni Madhub De, Assistant Inspector of the Burdwan Division, only toured for 61 days in nine months, and has been previously warned. He has now taken two years' furlough, and will, it is hoped, show more activity on his return. Babu Brajendra Kumar Guha was censured last year for his inadequate touring, and has done only slightly better this year. Maulvi Abdul Karim, Assistant Inspector of Muhammadan Education, should have done more than 141 days, as he has very little office work: the same remarks apply to Maulvi Muhammad Ibrahim, employed on similar duty in Bihar. The Director's orders, that all Inspectors and Assistant Inspectors should distribute their work so as to go through half of the districts in their circles each year, and to pay shorter visits to the other half, are approved. Among the Deputy Inspectors only five officers failed to attain the prescribed minimum of the rate of 150 days' touring in the year. The Lieutenant-Governor trusts that this year will see better inspection work of secondary schools done in Midnapore and Jessore. The Sub-Inspectors have on an average exceeded the prescribed minimum of 200 days' touring in all the divisions, but the minimum of 400 visits to schools was not attained in the Rajshahi, Dacca, Chittagong, and Bhagalpur Divisions. Sir Alfred Croft expresses the opinion

that 400 visits to schools is too high a minimum to fix, and on the other hand a record of 500 visits to schools implies that the work must have been perfunctorily done. The Lieutenant-Governor accepts the Director's views in these respects, and is fully satisfied that both by personal example and by precept he is doing all he can to inculcate the importance of activity in inspection, and also the necessity of the tours being wisely planned and the visits of inspection searching and instructive. Last year 750 chief gurus and inspecting pandits paid 248,008 visits to schools; average 331. This year 484 of them paid 239,835 visits; average 495. The diminution in number from 750 to 484 is accounted for by the general substitution of inspecting pandits for chief gurus; the latter, it is considered, are too fully occupied with their own pathsalas to be able to give proper attention to others. The new system which is approved by the Director should be extended to the 24-Parganas.

District Boards.

6. The Lieutenant-Governor has heard with much pleasure that the District and Local Boards have worked in harmony, except in one district, with the officers of the Department, and that the advice of the Deputy Inspector of Schools is generally both asked for and followed, or at any rate fully considered. In the more advanced districts the Boards are beginning to work on their own lines. This is specially marked in the Presidency and Burdwan Divisions, which show a growing tendency to independent action, not leading to friction, but said to be not always conducive to the interests of education. In some instances, chiefly in the Burdwan, Rajshahi, and Orissa Divisions, complaints are still made of delay in the payment of school grants. The arrears fall over into the next year, and become chargeable to the allotment of the year, without any separate provision being made for them in the budget. The savings thus effected are by no means invariably re-allotted to education in the following year; and thus not only the school teachers suffer from the delay, but the progress of education itself is impeded. In one district an arrear educational grant paid by Government was wholly allotted to public works. This should not have been allowed. The Director writes:—"While the general work of administration was carried on under orders of the Chairman or Vice-Chairman in consultation with the Deputy Inspector, all important matters, such as the appointment of inspecting pandits, sanctioning grants to primary or secondary schools, passing rules for the grant of rewards and prizes, framing budget estimates, the consideration of proposals coming from the Department or from local inspecting officers, the promotion of technical education, the creation of special, technical or female scholarships, and similar subjects, were dealt with at the meetings of the District Boards. The Education Sub-Committee in most cases prepared papers for the consideration of the Board, and occasionally disposed of ordinary business transferred to them by the Chairman." In some districts Local Boards have been given power over secondary as well as primary education; in others they have no educational functions at all; in others their powers over primary education are subject to revision by the District Boards. The Director considers that the utmost that can yet be safely entrusted to Local Boards is the control of primary education, including the payment of teachers on the authority of the Sub-Inspector; the appointment or confirmation of the appointment of teachers; and the selection of backward schools for stipends. In these views the Lieutenant-Governor is disposed to concur, and he will deal more fully with the subject in the annual Resolution on Local Self-Government.

University education.

7. The number of Colleges has increased from 33 to 36, divided into Government 11, municipal 1, aided 8, and unaided 16. The Martinière College for girls has been transferred from the unaided to the aided list; while Bishops' College, Doveton College and Loretto House have now furnished returns of their College Departments. The students on the roll at the end of the year were 6,240 instead of 5,443 last year, an increase of 797 students, nineteen of these being females. This large increase is explained by the high percentage of successful candidates at the Entrance Examination of 1893. The increase in the pupils of Government colleges was 196, in aided colleges 195, and in unaided colleges 406. The Presidency College has 573 on its rolls, the largest number in its history: at Dacca the numbers have declined in two years from 313 to 190. Out of

the total number of 6,240 College students, 3,892 are reading in 18 Colleges in Calcutta and 2,348 in 18 mufassal Colleges. The variations in the numbers of the successful candidates at the University examinations during the last six calendar years are shown in the following statement:—

	1889.	1890.	1891.	1892	1893.	1894.
1	2	3	4	5	6	7
Entrance	1,153	2,156	1,710	1,643	2,915	1,863
Percentage of success ...	25	50	43	40	67	44
First Arts	629	996	693	1,011	830	826
Percentage of success ...	27	36	36	44	37	38
Bachelors of Arts ...	366	399	231	280	301	484
Percentage of success ...	34	40	29	24	25	36
Bachelors of Law ...	187	254	128	48	148	99
Percentage of success ..	52	70	63	27	47	32
Masters of Arts ...	62	57	46	54	57	.....*
Percentage of success ...	50	45	36	46	44	.....

* The examination is held in November.

These figures illustrate what the Lieutenant-Governor has before remarked as to the inequality of the test to which candidates are subjected in different years, and he regrets that the University have not been able as yet to secure greater uniformity in the severity of the questions put and the system of marking. It is a serious detriment to the solid progress of education when so large an element of uncertainty enters into the prospect of University success.

Success in University examinations.

8. A comparison of the tables shows that, out of 4,775 youths reading in the first and second-year classes on the 31st December 1893 for the F.A. examination, 2,179 attended the examination. The percentage of successful candidates slightly rose from 37 to 38. In Government Colleges the percentage was 39, in aided Colleges 47, and in unaided Colleges 36. The Government Colleges were less successful than usual, especially those at Patna, Cuttack, and Chittagong, and it behoves the Professors of these Colleges to exert themselves to recover for them the high position they formerly held, and have lost. Among aided Colleges, the Uttarpara College was most successful, passing 64 per cent. of its candidates: among the unaided, the Bangabasi College at Calcutta passed 23 out of 41 candidates, while the two Barisal Colleges passed 60 out of 107.

Among the candidates for the B.A. degree, the percentage of success recovered considerably from 25 to 36, though it did not attain the high figure of 40 per cent. achieved in 1890. Comparing the groups of Colleges, the ratio of success appears to be as follows:—

	A Course.	B Course.	Total percentage.
Government ...	39	46	41
Aided ...	45	23	39
Unaided ...	32	28	31
Total	37	34	36

The close approximation of the ratio of success in the A and B courses is welcomed as showing that at last the two examinations are of nearly equal severity. Hitherto it has been held that the examination in the B course was unduly easy, and that to this cause the higher ratio of success and the comparative popularity of the course were due, rather than to the natural inclination

of the Bengali mind towards physical science. The figures of preceding years have been:—

	A Course.	B Course.	Total percentage.
1889	33	39	34
1890	39	49	40
1891	26	33	29
1892	20	47	24
1893	21	45	25
1894	37		36

The Director quotes also the percentages of success attained by the Presidency College, viz., 70 per cent. in the A course and 66 per cent. in the B course, which support the conclusion, not only that the instruction is equally efficient in both departments, but also that the University standards are, or at the last examination were, of equal difficulty in both courses. The City College in Calcutta continues to be remarkably successful in the B course: and the steady progress of instruction in physical science among the aided and unaided Colleges of Bengal affords much ground for satisfaction, while the success attained is gradually appoaching that of the Government Colleges. The number of candidates who took up the A or Literature course has risen this year from 987 to 992; while the number of students of the B or Science course has risen from 182 in 1892 to 355 in 1894, having nearly doubled in two years.

Of the 129 candidates for Mastership of Arts, 57 passed, as compared with 54 out of 118 in the preceding year, but no degrees were taken in Arabic, Persian or History, all of which were represented in 1893. The literary subjects, English, Sanskrit and Philosophy, had 34 successful students, while 23 passed in Mathematics, Chemistry and Physical Sciences.

Cost of the Colleges.

9. The total expenditure upon collegiate education has increased from Rs. 6,95,839 to Rs. 7,19,354, or by Rs. 23,515: the expenditure from Provincial revenues has increased by Rs. 8,099, and the fee-receipts are larger by Rs. 33,416, while the receipts from subscriptions and endowments show a decline of Rs. 17,698. The charge on Provincial revenues is nearly 40 per cent. of the total expenditure, and amounts to nearly twice the Government outlay on primary education. The annual cost of each student in a Government College during the year decreased from Rs. 238-11-8 to Rs. 236-14-5, and the cost of his education to Government from Rs. 145-11-1 to Rs. 142-15. The cost of collegiate education generally has fallen from Rs. 124-0-11 per head to Rs. 114-7-7. The cost of the whole number of collegiate students for the past five years may be exhibited as follows, in a constantly descending scale of expense:—

	1890.	1891.	1892.	1893.	1894.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Average cost of each student in a College in Bengal ...	138	129	127	124	114
The Government share thereof ...	55	52	52	50	46

This decrease of cost has been effected in spite of new charges for exchange compensation allowances and increased municipal taxation.

Athletic pursuits.

10. The Lieutenant-Governor cannot leave the subject of collegiate education without recording his approval of the efforts which are being made to encourage manly games among the students of the Colleges. He has perused with great interest the accounts given in the College reports in paragraph 68 of the various measures which have been taken to provide for the physical exercise which is as necessary for Bengali as for English youths, and he desires to express his thanks to Sir A. Croft, and to those officers of the Department who have personally

encouraged athletic pursuits and joined with the students in their games. He notices also with high commendation the manner in which in many districts the Collectors and other high officials have associated themselves with this movement.

Secondary education.

11. The main statistics relating to secondary schools for the last five years are contained in the following statement which is taken from paragraph 72 of the Report:—

	Number of schools.	Number of pupils.	Public funds.	Private funds.	Total.
1	2	3	4	5	6
			Rs.	Rs.	Rs.
1889-90 ...	2,366	201,452	6,08,294	20,11,672	26,19,966
1890-91 ...	2,393	199,105	6,11,046	20,62,859	26,73,905
1891-92 ...	2,285	194,178	5,94,846	20,87,904	26,82,750
1892-93 ...	2,326	198,270	5,90,493	20,92,642	26,83,135
1893-94 ...	2,373	198,736	5,94,328	21,33,751	27,28,079

Secondary schools of all classes taken together have increased from 2,326 to 2,373, or by 2 per cent.; and their pupils from 198,270 to 198,736, or by ·23 per cent. The total expenditure has risen this year by Rs. 44,944, of which Rs. 41,109 have been contributed by private funds and Rs. 3,835 from public sources (Provincial revenues and Municipal and District Funds). The expenditure from Provincial revenues has increased by Rs. 14,390, while that from District Funds has diminished by Rs. 3,721 and from Municipal funds by Rs. 6,834. This result may be attributed to the larger recognition by Municipalities of the claims of primary education within their limits.

High schools.

12. The number of Government and aided high schools remained unaltered; the number of unaided high schools increased by 6, the total being 361 against 355 in 1892-93. The number of pupils fell from 76,458 to 75,682, a decrease of 776, or 1 per cent. At the University Entrance Examination, 1,863 boys passed out of 4,268 candidates, against 2,915 successful out of 4,365 candidates in 1892-93. The percentage of successful candidates in the preceding five years has been 25, 50, 43, 40, 67. The figure for this year (44 per cent.) is more like the normal proportion of success; last year it was unusually high, the examination being an exceptionally easy one. Government schools passed nearly 60 per cent. of their candidates; while schools under private management, both aided and unaided, were successful to the extent of between 38 and 39 per cent. In the competition for scholarships, the schools of the different divisions show a remarkable equality in success, the general percentage being 43·6; Rajshahi heads the list with 71 per cent. of its candidates successful. The merit marks allotted to the different schools in paragraphs 78 to 81 are based solely on the number of candidates who passed at the Entrance Examination in the different Divisions. To be a satisfactory test of merit, some deduction should be made for unsuccessful candidates, and some value should be given to the proportion between the number in the Entrance class and the total number of pupils in the school. The Dacca, Hare, and Hooghly collegiate schools, the Barisal, Faridpur, and Noakhali high schools, distinguished themselves by the number of candidates they passed.

Middle class schools.

13. The middle English schools increased from 841 with 58,414 pupils to 869 with 60,250 pupils. In the middle scholarship examination, where the standard required is the full middle vernacular test, together with English language and composition as taught in the middle classes of high English schools, 1,738 were successful out of 2,993 candidates, the percentage of success among the candidates being 58·1 against 65·9 last year. An important reform was introduced by the adoption of a common standard for all Bengal proper, a common set of questions having been issued to all examination centres in the

past year, instead of separate question papers for each circle, as in previous years. The middle Vernacular schools, on the other hand, though more numerous by 1,143 to 1,130, have fewer pupils, 62,804 instead of 63,398. In the examination, which is the same as the preceding with the omission of the papers in the English language, the percentage of success was 58·5 against 60 in the previous year, 1,800 out of 3,073 candidates being successful.

Drawing.

14. Some progress has been made in the teaching of drawing. Last year 13 candidates from 9 Governmant high schools took up drawing as a subject for the Entrance Examination, and two passed. This year out of 40 candidates from 12 Government high schools 19 passed the test. But the Director states that the subject is still unpopular, as it takes up time, and carries no value either in the University examinations or (as yet) in the award of junior scholarships. The evidence afforded by the training schools where drawing is compulsory shows that there is no inherent incapacity for the subject in the Bengali student: but the motive is wanting. At the examination of students at training schools for certificates this year, 250 of the students passed in drawing, and 25 of them were awarded special certificates as qualified to teach drawing. The Lieutenant-Governor agrees with Sir Alfred Croft in thinking that the time has now arrived when the supply of qualified teachers is sufficient to justify the rule that the marks obtained in drawing shall count in the award of junior scholarships. It may be expected that the attractions of the Government scholarships will induce a majority of the high schools in Bengal to take up the subject as a necessary part of the course for the Entrance Examination. In the course of time it may be hoped that drawing will become a subject for the middle scholarships also.

Discipline and moral training.

15. The Lieutenant-Governor has frequently inculcated the importance of improvement in the discipline of schools and the *morale* of the students: and he is glad to read in the Report (paragraph 94) that there were not many breaches of discipline and offences against morality, and that few of these were serious. Last year some unpleasant occurrences in connection with the Noakhali Zilla School were reported, and apparently the warning given was neglected, as this year again a grave case of repeated unruliness in the same school has been brought to light. The students implicated have been properly punished, and if such misconduct recurs, it will possibly be necessary to enforce the threat contained in the Resolution No. 507 of 26th October 1891, when the Lieutenant-Governor stated his readiness, if any bad case of lawlessness were proved and warnings neglected, to close any school or college where such a punishment is required. Sir Alfred Croft rightly draws attention to the difficulty of clearing the moral atmosphere if parents and guardians not only do not co-operate with Government in checking lawlessness, but even try to protect the delinquents against punishment by having recourse to the law courts. A curious instance of this tendency occurred in Orissa:—

"A boy of the third class was fined for playing truant in the pandit's hour. A day or two after, the pandit had an interview with the boy's father, an educated man holding a respectable post in the Collector's office, who did not scruple to threaten the pandit with newspaper agitation against him, for having got his boy punished for something that was no offence in his opinion. Of course no heed is paid to such threats by the head-master or his assistants in the discharge of their legitimate duties."

Three years ago the Lieutenant-Governor recorded his expectation of assistance from parents and guardians, and he trusts that the instances of their opposition brought to his notice are only isolated cases. The misconduct of teachers themselves is much more reprehensible than the wrongdoings of youths, but Sir Alfred Croft says "it is chiefly confined to the primary schools, the teachers of which are for the most part poor and ill-educated." The Lieutenant-Governor trusts to the Director of Public Instruction to have every case reported to him, and to ensure the infliction of adequate punishment. It is satisfactory to hear that the transfer rules have greatly safeguarded the interests of discipline: any dilatoriness on the part of the school authorities in granting transfers to boys who are really in need of a transfer should be defeated by such measures as (see paragraph 97) have been adopted in the Presidency Circle.

Boarding-houses.

16. The provision of boarding-houses for non-resident students has always been regarded by Government as being intimately connected with the question of discipline. Almost all the Government schools in the mufassal have attached boarding-houses, and, where there are none, efforts are being made to remove the want. The number and nature of boarding-houses in connection with institutions under private management have been specially reported upon during the year, and the Lieutenant-Governor is glad to see that so much is being done in the Province to provide respectable accommodation for students under supervision. Two years ago, the Lieutenant-Governor commented on the want of boarding-houses or of decent lodging-houses for the 4,000 (or so) students in Calcutta, and expressed a trust that something would be done by the action of the gentlemen who form the Society for the Higher Training of Young Men. This Society has no doubt been useful in visiting the boys in their messes and private quarters, but the special report indicates that very little has been done towards providing better accommodation, joined to some degree of discipline, in Calcutta. A student's boarding-house has been located by a few private gentlemen in some fine buildings on the Harrison Road, and another has been opened under the auspices of the Oxford Mission. It is to be hoped that these examples may be followed by others. The private institutions which have hostels attached are, with only two exceptions, all under missionary management.

Physical training.

17. The development of out-door games among the schoolboys in Bengal during the last few years has been remarkable. It is not surprising that cricket and foot-ball are more favourite pastimes, and evoke greater enthusiasm in high and middle schools, than gymnastic exercises, even where there is a regular gymnasium with a special instructor and all necessary apparatus. The Lieutenant-Governor desires to acknowledge the interest exhibited by the officers mentioned in paragraph 99 of Sir Alfred Croft's report, as having offered encouragement to physical exercise among native boys, either by way of example or by advice and the gift of prizes. It is an excellent thing that friendly intercourse should be stimulated between the residents of a station and the schoolboys in their games, so that he has heard with much pleasure of such events as the cricket matches at Mymensingh, and of the annual athletic sports at some district head-quarters under the patronage of Eurapean officers and the leaders of native society. The District Boards have also begun to take steps to create and spread a taste for physical training. The want of a suitable playground in the heart of Calcutta will be remedied by the enlargement and levelling of Marcus Square, to which Government have offered to contribute half a lakh of rupees.

Primary education.

18. The following figures taken from paragraph 102 of the report represent the numerical fluctuations of primary education for native boys during the last five years :—

	Upper Primary.		Lower Primary.	
	Number of schools.	Pupils.	Number of schools.	Pupils.
1	2	3	4	5
1889-90 ...	3,337	124,568	44,145	960,865
1890-91 ...	3,537	128,537	43,997	942,211
1891-92 ...	3,661	135,371	44,918	987,876
1892-93 ...	3,697	139,726	43,828	983,204
1893-94 ...	3,763	141,483	44,020	988,745

The number of schools in both divisions has increased by 258, and their pupils by 7,298. Upper primaries and their pupils show a continuous increase; the lower primaries, on the other hand, fluctuate curiously in numbers; but,

comparing a series of years, the numbers of their pupils show a sustained increase. The variations in the number of these schools are attributed, as usual, to local causes, such as a rise in the price of food, the general unhealthiness of the year, floods, scarcity, a cyclone, and outbreaks of cholera.

Cost of primary schools to Government.

19. The expenditure incurred from the primary allotment by the Department and by District Boards on account of schools for native boys and girls, and of the subsidiary agency, is compared for the last two years in the following table taken from paragraph 103 of the Report:—

Description of schools and expenditure.	From Provincial Revenues.		From District Funds.		Total.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Stipendiary schools	1,06,741	1,03,701	1,64,003	1,56,003	2,70,744	2,59,704
Non-stipendiary schools	30,474	24,129	2,02,557	3,11,375	2,33,031	3,35,504
Schools abolished before the close of the year...	2,857	4,335	8,900	9,216	11,757	13,551
Chief gurus and inspecting pandits	14,187	13,281	78,265	80,483	92,452	93,764
Examination charges	1,147	1,150	11,080	12,455	12,827	13,605
Scholarships and prizes	9,652	7,039	27,762	31,584	37,414	38,623
Grants for buildings and furniture	7,544	5,598	1,787	1,956	9,331	7,554
Other payments	8,715	9,394	21,609	23,932	30,324	33,326
Total ...	1,81,317	1,68,627	5,76,563	6,27,004	7,57,880	7,95,631
Allotment	1,87,372	1,77,561	6,22,351	6,51,380	8,09,723	8,26,640
Savings	6,055	6,033	45,788	24,376	51,843	31,009

Though the departmental budget grant for primary schools was Rs. 2,10,038, against Rs. 2,01,360 in the preceding year, these figures show rather a smaller expenditure on primary schools by Government, and a considerably larger expenditure from District Funds, the total being an increase of nearly Rs. 38,000. The allotments also were more fully spent. The increased contributions made by Municipalities to primary schools for boys effected not only a decrease in the provincial expenditure, but large savings in the allotments originally made. These savings were still further increased by the fact that a considerable sum remained in hand unallotted to meet future demands, which owing to the same causes were not made. Eventually a sum of Rs. 31,000 was regranted during 1894-95 from the savings of 1893-94, for the purpose of increasing the allotments of those districts which needed it most. This is the feature of the year, that the policy of Government in requiring Municipalities and District Boards to defray to a greater extent the cost of primary education has been more largely carried out. The Municipal expenditure on primary schools was Rs. 51,630, against Rs. 32,916 in the previous year, a very satisfactory increase. This policy has been further developed during the year now current. The small allotment made by the Calcutta Corporation for education, apparently Rs. 3,000 only, has been previously commented upon. The Inspector of Schools, Presidency Circle, writes:—"The question of making better provision for the advancement of primary education was more than once pressed upon the Corporation by the Local Government, but, from a communication recently received from the Secretary to the Corporation, it appears that for the current year at least the Commissioners have resolved neither to increase the allotment nor to alter the mode of its administration. The Bombay Corporation spent on education during 1892-93 Rs. 55,220, against Rs. 51,300 in the preceding year." Moreover, a portion of the allotment in Calcutta was spent on secondary schools, a proceeding which appears to be contrary to the intention of the Calcutta Municipal Act.

System of payments of grants to primary schools.

20. Of the three systems under which payments to primary schools are regulated, viz., by stipends, by rewards for passed pupils, and by a mixed system of small stipends supplemented by rewards, the Government and the Director recommend the last in preference to the other two, and discourage the spread of the first. This year the sum spent in rewards has risen from Rs. 3,07,072 to Rs. 3,49,634, while the expenditure on stipends has declined from Rs. 2,56,869 to Rs. 2,46,473. Stipends are now being more and more rigorously confined (*a*) to lower primary schools in backward localities, where they are most needed, and (*b*) to

upper primary schools: to the former as an aid to stability, to the latter in recognition of their success. The system of giving small stipends, the amount of which is eventually deducted from the reward which the school is expected to earn, is in partial operation in several districts, but has not been introduced to any large extent, and it is almost or quite unknown in the Bhagalpur, Orissa, and Chota Nagpur Divisions. The system has met with very varying success, as was anticipated. Its trial on a large scale is attended with some risk except in the case of schools of ascertained stability and efficiency; and that for the following reasons. The average earnings of a lower primary school are a little over a rupee a month, and the weaker schools fall short of this amount. The advance system is designed for the latter schools, which lack the element of stability. The plan is to offer such schools advance payments at the rate of Re. 1 or Re. 1-8 a month, in the hope that this will ensure better results, even though they have not succeeded in earning these amounts in the past. Sometimes they fail to do so even with this encouragement, but in general the result is successful. The principle of the system, if worked with care, appears to be quite sound; and the Lieutenant-Governor would be glad to see it more extensively followed subject to the considerations laid down in paragraph 110 of the Report.

Comparison of cost of upper and lower primaries.

21. The apportionment of the primary grant between upper and lower primary schools, and the relative cost in these classes, are shown in the following table, Division by Division:—

Primary Schools.

Division.	Allotment.	Expenditure.		Number of schools.		Number of pupils.		Cost per school.		Cost per pupil.	
		Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.
1	2	3	4	5	6	7	8	9	10	11	12
	Rs.	Rs.	Rs.					Rs.	Rs.	As.	As.
Presidency ...	85,220	17,886	54,406	401	3,402	15,407	97,226	44·6	15·9	18·5	8·7
Calcutta ...	9,172	586	7,418	10	186	567	8,842	58·6	39·8	16·5	13·4
Burdwan ...	1,14,839	29,110	71,066	698	7,902	26,047	196,780	41·7	8·9	17·8	5·7
Rajshahi ...	77,304	21,387	45,028	433	2,288	15,200	56,027	49·4	20·1	22·5	12·8
Dacca ...	87,658	24,180	47,209	667	4,997	22,931	113,587	36·2	9·8	16·	6·9
Chittagong ...	68,006	20,581	43,539	448	4,845	17,517	94,520	45·9	10·	18·7	7·2
Patna ...	1,07,403	16,632	55,676	175	4,305	8,502	102,699	95.	12·9	31·3	8·6
Bhagalpur ...	68,111	12,550	34,830	202	2,104	8,425	48,173	62·1	16·5	23·8	11·5
Chota Nagpur ...	61 103	6,604	45,668	105	1,698	4,855	48,186	62·8	26·8	21·7	14·2
Orissa ...	52,970	11,533	27,612	231	3,544	6,341	54,615	49·9	7·7	29·1	8·
Total ...	7,36,729	1,61,049	4,34,482	3,370	34,721	125,792	820,575	47·7	12·5	20·4	8·4
Total for 1892 ...	7,21,047	1,64,308	3,98,804	3,285	34,852	123,927	823,907	50·	11·4	21·2	7·7

While the number of upper primaries increased, the total payments made to them decreased, so that the average receipts of each school fell from Rs. 50 to Rs. 47-7. On the other hand, while the number of lower primaries fell slightly, payments on a larger scale were made to them, and the average earnings of a lower primary rose accordingly from Rs. 11-4 to Rs. 12-5. The average cost of the two classes of primary schools throughout Bengal is roughly Rs. 4 a month for a upper and Re. 1 a month for a lower primary. It varies District by District and Division by Division: the higher rate of expenditure does not necessarily indicate superior efficiency, but rather a higher market value for efficient teachers, a higher cost of living, or the necessity of supplementing local fees by higher payments in backward parts.

Relative position of Divisions.

22. The Director has furnished an interesting table to show the number of pupils in each district in the different stages of primary education, and to compare the relative positions of the districts. He assigns a merit mark of 5, 3, 1 respectively to pupils in the three stages, (1) upper primary, (2) lower primary reading printed books, (3) lower primary not reading printed books. The Divisional figures are shown in the margin. As might be expected, the Burdwan Division (in which there has been an indigenous system of education from time immemorial) shows the best percentage of merit marks on population of school-going age, with Hooghly as the best district, and Howrah, Bankura, and Midnapore close up. Palamau, Shahabad, and Muzaffarpur are the least successful districts. The percentage of merit is necessarily

Division.	Boys only.	Boys and girls together.
Burdwan ...	122	63·6
Chittagong ...	103·6	55·6
Presidency ...	72	38·9
Orissa ...	72·5	37·3
Dacca ...	65·6	35·8
Rajshahi ...	44·6	23·7
Chota Nagpur ...	39·2	20·9
Patna ...	28	14·4
Bhagalpur ...	28	14

much affected not only by the amount of the primary grant, but also by the degree of efficiency with which it is administered. It is evident from the Director's remarks that the District Boards have profited by their experiences, and are generally willing to learn; though they in some cases fall into mistakes in their experiments, they have the departmental officers at hand to guide them in the right direction.

Primary scholarships.

23. The results of the upper primary scholarship examination for boys, including candidates from upper primary schools and private students, for the last five years, are shown in the following statement:—

Year.	Number of competing schools.	Number of successful schools.	Number of candidates.	Number of successful candidates.	Percentage of successful schools.	Percentage of successful candidates.
1	2	3	4	5	6	7
1889-90 ...	2,258	1,660	5,484	3,053	73·7	55·7
1890-91 ...	2,449	1,654	5,910	2,847	67·5	48·2
1891-92 ...	2,381	1,493	5,681	2,491	62·7	43·8
1892-93 ...	2,460	1,694	5,615	2,895	68·8	51·5
1893-94 ...	2,532	1,858	6,068	3,297	73·3	54·3

More schools and candidates competed and were successful than in any year of this quinquenniel period, but the percentage of success was not quite so high as in 1889-90. The results of the corresponding lower primary scholarship examination show that the number of competing schools decreased from 10,597 to 10,498, but that of successful schools increased from 6,923 to 6,931. Their percentage of success has therefore risen from 65 to 66. The number of examinees has decreased from 34,754 to 33,444, and of successful candidates from 17,069 to 16,864; so that the percentage of success has increased from 49·1 to 50·4. The falling off in the number of candidates is ascribed to floods in Eastern Bengal and high prices. The Lieutenant-Governor concurs in the views expressed in the following quotation from the Director's report as being in the direction of the policy laid down in 1891-92, that measures should be adopted to secure uniformity in the standard of examination in all the districts of the same Division, even if it is unattainable throughout the Province. Sir Alfred Croft writes (paragraph 126):—"During the year under report an important step was taken towards equalising the value of the pass certificate in the different districts of the same Division, by means of a common set of question papers prepared by a Board of Examiners under the supervision of the Circle Inspector. The answer papers, however, continue to be valued by the local Examiners in each district. It would be preferable, on the whole, to have the same set of examiners for all the districts comprised in a common examination; but there are advantages in associating the District Boards with the conduct of the examination, since they have to pay the cost."

The Lieutenant-Governor has perused with much interest Sir Alfred Croft's account of the co-operation of village schoolmasters with the Postal Department in working post-offices with money-order and Savings Bank powers, in village deliveries, and in the diffusion of the rudiments of postal information by instructing the scholars how to address letters.

Training schools.

24. The number of training schools for masters, mistresses, and gurus decreased from 267 to 247, and the pupils from 2,382 to 2,032. The expenditure from Provincial Revenues increased from Rs. 84,597 to Rs. 86,444, while the total expenditure rose from Rs. 1,13,380 to Rs. 1,17,803. The number of pupils in the 15 Government schools for masters sank from 638 to 599, while it rose in the five aided schools from 231 to 303: in the six aided schools for mistresses the number fell from 300 to 190. The average cost to Government of the education of each pupil in a training school varied from Rs. 79 at Hooghly and Rs. 101 at Rangpur to Rs. 153 at Calcutta, Rs. 164 at Cuttack, and Rs. 193 at Patna. The results

of the Vernacular Mastership Examination for pupils of first grade training schools, excluding private candidates (of whom 22 were successful), show 276 as having passed out of 483 candidates; in the previous year 444 (including private candidates) passed out of 621. Only 66 men have been granted first grade certificates (as compared with 110 and 142 in the last two years) after the three years' course. The number who passed in drawing was 250, of whom 25 gained special certificates of efficiency.

Degree of success attained by training schools.

25. Two years ago Sir Charles Elliott desired that the whole system of training schools should be carefully reviewed by the Inspectors. Some attention was paid to the subject last year, but Sir Alfred Croft's return from furlough and his views on the question were awaited. He points out that training schools have been regarded, on the one hand, as costly, on the other as superfluous. It may be admitted that they are exceptionally costly because they require at their head men of exceptional ability and experience, and also because it is essential to make provision for housing the students and giving them stipends to meet the cost of living. On the other point, Sir A. Croft's report may be quoted *in extenso* :—

"The other objection, as to the schools being no longer necessary, was based on the belief that trained and certificated teachers often failed to get employment. This, as we have seen, was true of Dacca, but not generally true elsewhere; and even the Dacca school is now finding its level and equating its admissions to the normal demand. Other general causes too, as I have explained, are tending to reduce the number of candidates for employment; and thus, I believe, the last vestiges of the complaint will disappear. But even had the complaint been generally true, the argument would have been inconclusive. While middle schools exist, there is necessarily a demand for trained pandits; and if the schools do their work so well that the supply exceeds the demand, this furnishes no very good ground for their abolition. I say there is a demand for trained pandits; and not only so, but the supply is of such a quality as very effectually to meet that demand. This is conclusively shown by the popularity and success of the middle school system, which depends for its very existence on the training schools, since there is no other source from which the teachers can be supplied. There are more than 2,000 middle schools (English and vernacular taken together, for in both the full vernacular course is taught), and only 207 of these are under public management. Is it possible to suppose that the public throughout Bengal would have set up, and would continue to maintain, 1,800 schools of this class, unless they were satisfied with the instruction given in these schools, and with the pandits who teach them? To abolish or weaken the training schools would be to pull down or undermine the whole middle school system, upon which the middle classes of Bengal rely for that vernacular education which so largely meets their requirements, especially in rural districts. Nor is it only within the walls of the middle school that the influence of the training schools is felt. The head pandits are a well-educated, shrewd body of men, who come to the front in their villages, and often take an active part in municipal or other public affairs."

The Lieutenant-Governor never had any doubt that these schools ought to be maintained, but he felt that the existing schools are unduly costly, and he doubted their efficiency. He is glad to receive this assurance that the supply of trained pandits turned out is at all events equal to the demand.

Guru-training classes.

26. Similarly the question of the utility of the guru-training classes, which has been attacked in many quarters, is discussed in connection with primary education. The system is thus described (paragraph 144):—

"To selected middle schools in each district a class is attached for the training of primary school teachers in the neighbourhood, who attend morning or evening and on Sundays and holidays for this purpose, without relinquishing charge of their own schools. After a certain period of training the gurus are encouraged to go up for one or other of the different departmental examinations, and rewards on a fixed scale are given to those who pass. When all the teachers in one locality have been trained, the class is moved to another middle school. The head pandit receives one rupee a month for each man under training so long as the class is attached to his school. If teachers are brought in from such a distance that they have to give up their own schools which are placed for the time under other teachers, they receive small allowances from the District Board, under Rule 50 of the Rules under the Local Self-Government Act."

In 1892-93, out of 1,171 gurus under this training, 91 gained certificates of different kinds at a cost of Rs. 6,473, or about Rs. 70 each. In 1893-94, out of 907, only 86 gained certificates (none higher than the Middle Vernacular

Examination) at a cost of Rs. 7,086, or over Rs 80 each. Thus only about one guru in ten affords any evidence that the money has been usefully spent. The system has been worked vigorously in the Presidency Circle only, and there has met with some success: elsewhere it is generally condemned. Sir Alfred Croft, after quoting at length the opinion of Inspectors and Assistant Inspectors, sums up the discussion as follows (paragraph 155):—

"While these classes in the beginning were undoubtedly useful—and were specially so when the superior inspecting officers had faith in their utility—the time has now come when the system should be abandoned or largely reduced; and that for two reasons. In the first place, the system has been at work for so many years that all or most of the primary school teachers in the neighbourhood of middle schools who required it have come under training. The rest are either too far off to be brought in, or too firmly wedded to their ancient ways to be capable of improvement. In the second place, owing to the lapse of years, the indigenous gurus of the original stamp have largely disappeared, and have been replaced by passed pupils from middle and upper primary schools, who are found after a time of probation to make very efficient teachers, and to bring up their pupils with success to the departmental examinations. Nor must we lose sight of the entirely new conditions that have been introduced by the appointment of inspecting pandits, who have everywhere displaced the old 'chief gurus.' Many of these pandits are passed pupils of first grade training schools, and as such have received systematic instruction in the art of teaching. As they go round to the pathsalas, their business is to teach the gurus how to do their work; and consequently they serve in a manner as peripatetic training schools. In the more remote and backward parts of the country they are the only possible agency, since the gurus will not come in to be trained. We cannot, unless they are stipendiaries, force the gurus to come in; because they are either self-appointed or the nominees of the village, and are not therefore under the orders of the inspecting officers. Indeed, it is chiefly in these very backward places that we are brought face to face with the difficulties arising from the limited amount of the funds available for primary education. In these villages pupils are few, fees and other customary gifts to the gurus are small, and not much can be gained at the examination for rewards. Small emoluments will not attract competent teachers, and we are glad to get almost any one who offers. He comes, but it is hardly worth his while to stay, and he goes off to try his fortune elsewhere. So the schools in these less favoured parts suffer continually from the change of teachers. These are not the conditions under which we can insist on the teachers being trained; we must take whom we can get, and try to keep them as long as we can by not imposing on them terms that they dislike. The District Boards are generally fully alive to this difficulty, and are seeking to overcome it by attaching stipends, not merely to the most advanced schools, but also to the most backward, so as to offer a decent livelihood to the teachers and secure the appointment of competent men. More advanced villages, with plenty of pupils and a considerable and assured income from fees and rewards, can take care of themselves pretty well in this respect. The villagers are awake to their own interests, and if they are not satisfied that the teacher is up to the mark, they can generally find a way to get rid of him. After the lapse of a few more years the old gurus will have mostly disappeared, giving place to a more promising class of teachers."

The Lieutenant-Governor accepts the Director's proposals that the guru-training classes may be generally closed at the end of the present year, except in the Presidency Division and Sonthal Parganas, where the Inspectors wish with some modifications to retain them. He agrees also to the devotion of the money thus saved to the benefit of primary education, by increasing the number of primary scholarships, and in backward districts by increasing the number of middle vernacular schools, so as to facilitate the supply of primary school teachers; the number of inspecting pandits may also be increased. The seven third grade training schools maintained by Government in backward districts should also be dealt with, closed or modified, as suggested.

Qualifications of teachers in middle and upper primary schools.

27. The statistics contained in paragraph 161 of the Report show the nature of the previous training received by head-masters and teachers in the schools of this class. In 649 middle English schools, out of 2,761 teachers, 701 had passed the Entrance or some higher standard of the University, 635 the Vernacular Mastership examination, 256 the Middle English, and 392 the Middle Vernacular test. Out of 2,800 teachers in Middle Vernacular schools, 116 had passed the University Entrance or higher examanation, 971 the Vernacular Mastership test, 911 the Middle Vernacular. In 3,728 upper primary schools, there are 5,017 teachers, of whom nearly half had passed the Middle Vernacular test, and only 1,183 had passed no test at all. Of these the Director writes that "the great majority are indigenous teachers of the old class, the best of whom have long been famous for their natural capacity, their familiarity with

the whole range of pathsala learning, and their aptitude as teachers." These results are interesting and on the whole satisfactory, and it will be useful to trace in after years the upward tendency which ought to exist in the qualifications of this class of teachers. The Lieutenant-Governor will also be glad if in future reports the same information is given regarding the teachers of Government Colleges and High Schools.

Other schools of special instruction.

28. The statistics of the numbers and cost of all institutions and departments of institutions teaching Law, Medicine, or Engineering, the Calcutta School of Art, Industrial Schools, and other schools of a special character, are exhibited in the following form:—

	Number of institutions.	Number of pupils on the rolls on the 31st March 1894.	Average monthly roll, &c.	Expenditure. From public funds. From Provincial Revenues.	From District Funds.	From Municipal Funds.	Expenditure. From private funds. From fees and fines.	From other sources.	Total.	Average annual cost of educating each pupil. Cost to public funds.	Total cost.

Total ...	17	586	541	1,383	72	196	891	5,888	8,430	2 8 10	15 9 0

The variations in the numbers of the students of the several professions are of interest, as follows:—

Year.	Law.	Medicine.	Engineering.	Arts and Industry.	Other Special Schools.	Total.
1	2	3	4	5	6	7.
1889-90 ...	912	1,016	652	795	611	3,986
1890-91 ...	1,025	1,184	703	753	550	4,215
1891-92 ...	563	1,290	661	853	559	3,926
1892-93 ...	488	1,545	764	915	447	4,159
1893-94 ...	509	1,747	933	1,034	586	4,809

These statistics are very gratifying, as showing a great development in every other profession except that of Law, a profession which is generally thought to be overstocked. During the last three years, 1,560 students have taken to the Bar: during the previous three years, 2,872 chose the legal profession. In the previous year, 148 candidates out of 315 passed the University Examination for the degree of Bachelor in Law: this year only 64 passed out of 304. The difficulty of the test was slightly enhanced, but it is apprehended that the standard of attainments among the candidates was lower than usual. At a supplementary examination allowed by the Senate, 35 candidates out of 61 passed.

Medical schools.

29. There has been a rise in the number of students of all classes of Medical schools in the province. The Medical College, Calcutta, is fuller than it has ever been, and the want of accommodation in the lecture rooms, which is an old complaint, has been more keenly felt than ever. The four Government Medical schools have also increased in strength, and all but one of them receive female students: the Lieutenant-Governor hopes that arrangements will be made at once to open a female class at Dacca also. The information given as to the subsequent employment of the female students who have passed out from the Medical College or Schools is valuable and should be kept up in future: the Lieutenant-Governor notices with satisfaction that a large number of them have received employment under the Dufferin Fund throughout India. His Honour is surprised to learn that only four of the passed students of the Campbell Medical School have received appointments as Civil Hospital Assistants during the last four years; it is not clear whether the small number appointed is due to disinclination on their part, or to the absence of vacancies, or to the filling up of vacancies in other ways. The attention of the Inspector-General of Civil Hospitals should be drawn to this subject. The numbers who entered Government service from the Patna and Cuttack schools have been much larger.

Sibpur College.

30. Engineering and surveying continue to make progress at the Sibpur Civil Engineering College, and at the Dacca, Patna and Cuttack Survey Schools. The Sibpur College consists of two departments, the Engineer Department affiliated to the University with 116 students, and the Apprentice or Foreman Mechanic Department, with 215 students; total strength 331, against 278 in the previous year. The attention of the Eurasian community was drawn to the opening offered by this College in the Resolution on the Pauperism Committee, and it is strange that more youths of this class have not entered. In the Engineer Class there are only 2 Europeans or Eurasians and 36 in the Apprentice Class. Muhammadans are even more backward; their numbers are 2 and 2 respectively in the above-named classes; but it is hoped that more will be attracted by making separate arrangements for their residence and messing within the College precincts. Under the orders of Government, the workshops attached to the College have recently been transferred from the charge of the Public Works Department, and are to be under the exclusive control of the Principal: they are to be employed solely for the mechanical training of the students and for the manufacture of machines for the workshops and for subordinate institutions. This change is in course of execution, and will cost Rs. 50,000 for the erection of new buildings, the refitting of old ones, and the removal and re-erection of plant and machinery. The number of candidates having grown to be unmanageable, the admissions to the Engineer Department are to be limited to 40 annually, and to 60 in the Apprentice Department, and the standard of admission has been raised in each case. Only 5 out of 16 candidates passed the University Examination for the B.E. at the end of the 4th year, which is a poor result. The demand for passed apprentices still continues, and not one of those who have passed out is now unemployed. Rules for the affiliation of technical schools in other parts of Bengal to the Sibpur College are under consideration, and ten visits have been paid by the Principal to mufassal schools of this class. An artisan class is about to be established. It is intended for youths, whether European or Native, whose education is not up to the required standard for foreman mechanics, but who are capable of learning a trade. The conduct of the students and their discipline have been good: much attention is paid to athletic sports, and the College Volunteers have done well.

In all respects the College is making good progress as the centre of technical education in Bengal. The cost, apart from the workshops, rose from Rs. 62,742 to Rs. 70,384, of which Rs. 12,965 were raised from fees and fines.

Survey schools.

31. The utility of the three Government Survey schools has been considered during the year, and special reports have been submitted regarding them. It has been alleged that they have failed to supply surveyors for the work of the Survey Department. The explanation offered is that they teach to a much higher standard than is required by that Department, which only offers a rate of pay corresponding to its requirements, and that in other departments and in private service the passed students of the schools find abundant employment at remunerative rates. The students of the Dacca school are reported to have completed a cadastral map of a tract of about 50 square miles containing about 100 villages. It would be well if the students of the other schools could be employed in a similar manner on a permanently useful surveys, and the area could be continuously extended. The scholarships attached to the Patna and Cuttack schools have been limited for the future to natives of Bihar and Orissa respectively. A useful rule has been passed by the Director, requiring greater knowledge of English from the students admitted to these schools to fit them for employment in Government service.

School of Art.

32. The Government School of Art in Chowringhi is the recognised centre of artistic and decorative industry in Bengal, as Sibpur is of instruction in mechanical and manufacturing industries. The number of students has risen from 181 in 1892, and 198 in 1893, to 269 in March 1894. The Superintendent states that the general character of the work done in the school will compare favourably with that of any Art School in the United Kingdom; and outside evidence has testified to the high class character of the students' performances, in illustrations of zoology, in modelling, wood-engraving, lithography, and illustrations of the Annals of the Royal Botanic Garden. The total expenditure on the institution was Rs. 31,058, of which Rs. 6,461 were paid from fees and fines.

Industrial schools.

33. The number of industrial schools has advanced from 21 to 26 by the addition of three schools under the management of District Boards, one aided and one unaided school: and the pupils have increased from 717 to 765. These 26 schools are divided into (*a*) three Government schools with 33 pupils, (*b*) nine Board schools with 283 pupils, (*c*) eight aided schools with 236 pupils, (*d*) six unaided schools with 213 pupils. Speaking generally, the object of them all is to teach such subjects as carpentry, blacksmith's work, mensuration, engineering, estimating, drawing, surveying by chain and compass, trigonometry and the plane-table; together with engraving, electro-plating, tinsmithy, clock-making, embroidery, or *bidri* work; not all in one school, but some in one and some in another. The Director's remarks and criticisms on the conditions and prospects of these schools (paragraphs 193 to 215 of the Report) are full of instruction and should be read with the utmost care by those who are concerned in their management, and by all who are convinced that the encouragement of diversity of occupations is the greatest educational want of the present time. The subject is one of extreme importance, and Government is most anxious to encourage the development of occupations other than literary careers for the youth of Bengal, and to supply the great and increasing demand for all kinds of scientific labour throughout the country. It is inevitable that, through want of experience and of definiteness of aim, mistakes will be made before success can be achieved. The difficulty of the situation is fully perceived by the Director, who writes as follows (paragraph 215):—

"They seem to want finality and a definite outlook for the future. They are at work, and pupils attend them; but they are evidently in a crude and inchoate state, and the prospects of the pupils, after completing their training, are as yet by no means clear. They will have acquired a certain amount of manual training under instructors of a much higher degree of skill than is to be found in the ordinary workman of the bazar; and they will have received some useful instruction in 'practical' subjects, including drawing. But, then, what is to become of them? To what market are they to carry their acquirements? The answer seems to me to lie, as Mr. Slater has so often pointed out, in the affiliation of all these schools that are worth retaining to the 'Central Technical College' at Sibpur. They will receive teachers from Sibpur; they will send up the best of their pupils to Sibpur for further training: Sibpur will gradually supply them with a stock of tools suitable to their

varying needs and ambitions; and the tie will be strengthened by the occasional visits of inspection which they will receive from the Sibpur Principal. The pupils sent for training will, like other Sibpur apprentices, readily find employment; and every instance of this will act upon the local pupils as an encouragement and an incentive. Men possessing these qualifications are, in a state of advancing civilisation, required in every district; and District Boards will be quick to recognise how greatly their local industries will be promoted by having a supply of such men at their doors, and will be ready to provide stipends to Sibpur for all promising pupils. As time goes on, as the teachers gain greater experience, as pupils become more numerous and more confident,—above all as the school, always secure of the interest and support of the District Board and the local Municipality, becomes gradually equipped with a full stock of tools and the necessary appliances of a workshop,—it will finally cease to be dependent upon Sibpur, and will complete the training of its pupils from its own local resources. In this, as in other similar cases, it will be found that supply will promote demand, and that with trained mechanics always to be had, new industries will arise, and new opportunities will be found for employing them. I use the language of prophecy; for I hold that in a country like India, now entering with rapid strides upon the path of material progress, it is impossible to doubt that technical skill, of the generally useful kind that these schools impart, will sooner or later find an abundant market. I am convinced that we should go on, with absolute assurance and confidence, in the way we have begun, undeterred by difficulty or failure. The hope of their early success lies in the rapidity with which the Sibpur College can be developed to such a point as will enable it to meet all their requirements. They are clamouring for tools and machines; but it is only in a few instances as yet that Sibpur has been able to supply them. With the workshops under the direct control of the Principal, it will be in a much better position to do this; for the manufacture of machine-tools will not only supply the requirements of the schools, but will afford the best possible training to the pupils who make them."

Among the technical schools which are at present in this experimental stage, is the Bihar Industrial School, which was opened last year. It cost Rs. 10,026 during the year, and has a capital fund of Rs. 2,50,532. There were 47 pupils, half and half Hindus and Muhammadans (against 32 in the preceding year), 46 being in the enjoyment of stipends. Some local difficulties have been encountered, which have militated against the award of all the stipends provided by the districts in Bihar, and in some quarters the existence of the Government Survey School in the same compound is regarded as an obstacle to the success of the Bihar Industrial School. The prospects of obtaining employment through the former are more secure than in the latter case, as the Survey School is of older standing; but Sir Alfred Croft anticipates, and the Lieutenant-Governor sees no reason to doubt his views, that students of the Industrial School will find remunerative employment in Bihar as the Sibpur apprentices have found it in Bengal, especially when the school is fully equipped with machinery and appliances from Sibpur, when the instruction is settled on a systematic basis and when provision is made for the further training of the students at Sibpur. With the development of railways and in other ways, a hundred different lines will be found along which the trained Bihari mechanic may find employment. The real requirement of these schools, including the Bihar Industrial School, seems to be the introduction of machinery and appliances, with supervision from, and communication with, a central institution at Sibpur.

34. The main statistics of female education are shown in the following table taken from paragraph 221 of the Report:—

Female education.

Class of Schools.	Number of schools.	Number of pupils on the rolls on the 31st March 1894.	Average number on the rolls monthly.	Average daily attendance.	Expenditure. From public funds. Provincial Revenues.	District Funds.	Municipal Funds.	From private funds. Fees.	Other sources.	Total.
1	2	3	4	5	6	7	8	9	10	11
					Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Managed by Government	2	252	229	188	22,178	...	120	6,193	563	29,054
Ditto by District Board or Municipal Board	3	171	166	98	215	...	1,088	27	...	1,330
Aided by Government or by District or Municipal Boards	2,613	53,986	49,585	36,808	74,313	31,628	10,244	23,667	1,92,900	3,32,752
Unaided	381	6,625	6,067	4,654	...	...	...	6,476	16,877	23,353
Total for 1893-94 ...	2,999	61,034	56,047	41,748	96,706	31,628	11,452	30,363	2,10,340	3,86,489
					1,39,786			2,46,703		
1892-93	2,821	56,579	...	...	95,960	29,226	10,522	30,731	1,85,396	3,51,735
					1,35,708			2,16,027		
1891-92	2,706	54,199	...	...	1,31,093			2,23,976		3,55,069
1890-91	2,238	46,443	...	...	1,26,520			2,24,567		3,51,087
1889-90	2,153	45,690	...	...	1,20,171			2,06,788		3,26,959

In four years the number of girls' schools has increased from 2,153 to 2,999, and of pupils from 45,690 to 61,034, besides 33,686 girls in boys' schools. The net result of the year is a gain of 178 schools and 3,941 pupils. The total expenditure increased during the year from Rs. 3,51,735 to Rs. 3,86,489; of this increase Rs. 30,700 were from private funds and the remaining Rs. 4,000 from public funds. The only two purely Government institutions are the Bethune Collegiate School in Calcutta and the Eden Female School at Dacca. The Bethune School sent up seven candidates to the last Entrance Examination, of whom six were successful and one took the degree of B.A., with honours in literature. From the Eden Female School two girls appeared at the Entrance examination, but were unsuccessful. There are three other high schools for girls, all in Calcutta, with 219 pupils; one middle English school at Chinsura with only 8 pupils, which is not well reported of; and 26 middle vernacular schools distributed over eight of the nine Divisions in Bengal. The upper primary schools for girls are 201 and the lower primary 2,766, against 177 and 2,678 respectively in the preceding year. Much attention has been paid to the girls' schools in Calcutta, which affords, as Sir Alfred Croft remarks (paragraph 231), the best field for the promotion of female education, and changes have been made in the system of grants-in-aid and in the standards of examination: but it is too early yet to anticipate results. About Rs. 3,000 a month are granted for 6,468 pupils. Mrs. Wheeler, the Inspectress of Schools, examined *in situ* in Calcutta, 52 schools with 4,172 pupils, besides 82 zananas, and out of Calcutta 68 schools with 2,683 pupils, besides two zananas: total 120 schools with 6,859 pupils. Out of 2,946 pupils examined by her, 2,509 passed, or 85 per cent. In Calcutta there were 151 primary girls' schools with 5,932 pupils, against 150 schools and 5,872 pupils last year. In the examinations in the special standards for girls' schools, originally prescribed for Calcutta and the neighbourhood and subsequently extended to Murshidabad, 265 students out of 546 were successful, as compared with 236 out of 276 last year, the examination being stricter and the test somewhat higher. Sir Alfred Croft calls attention to the inconvenience arising from the multiplicity of the standards for examinations and scholarships now in force for girls' schools in different parts of the country. It is to be hoped that the Calcutta standards will be adopted without change, or with such small changes as will be acceptable to school managers in the mufassal. With the provision of girls' scholarships in all other parts of Bengal to be awarded on the new standards, it is anticipated that female education would make a fresh start.

Education of Europeans.

35. The statistics of European education show a steady increase over a long series of years. The following table for ten years is of interest:

Year.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.
1	2	3	4	5	6	7	8	9	10	11
Number of pupils	6,389	6,098	6,391	6,541	6,682	6,710	6,829	7,098	7,444	7,777

The number of schools has increased from 67 to 72. There are 146 more boys and 187 more girls under instruction than in 1893. Of the 7,777 children under education, 4,083 were under Roman Catholic management at 27 schools, while 17 Church of England schools afforded education for 1,908 children, the remaining 1,786 belonging to different denominations. The total cost of European education in Bengal rose from Rs. 10,84,680 to Rs. 11,14,962, of which Government paid Rs. 1,82,906. There are 14 aided and 7 unaided high schools, 4 of which are at Darjeeling and the rest in the plains; the number of pupils were 2,191 boys and 1,267 girls, against 2,127 boys and 1,237 girls in 1893. They sent up 38 candidates (10 boys and 28 girls) to the High School examination, of whom 17 passed (3 boys and 14 girls). In the previous year 7 passed out of 18 candidates. For the University Entrance Examination (which is more popular and is considered easier) the number of candidates decreased from 141 (excluding St. Mary's Convent at Chandernagore) to 113,

and the number of successful candidates from 114 to 73. The percentage of successful candidates fell from 81·8 to 64·6. The number of middle schools is 36, containing 1,720 boys and 1,897 girls, against 1,688 boys and 1,798 girls in 1892-93: only two of these schools are in the hills. There is one Government school at Kurseong with 103 boys. Twenty-six are aided and 9 unaided schools. Twenty schools competed for the Middle Scholarship Examination, sending up 178 candidates, of whom 126, or 72 per cent., were successful: the numbers in 1893 were less, but the percentage of success, 86·4, was better. There are 16 primary schools, 15 aided and 1 unaided, with 353 boys and 349 girls, against 303 boys and 291 girls in the preceding year. The candidates for primary scholarships were 330 against 249 last year, and the successful ones 265 against 183.

Grants-in-aid rules.

36. The new rules for grants-in-aid proposed by Mr. Bamford were introduced during the year, viz., that all the aided schools in Bengal should receive grants dependent upon the average attendance of scholars instead of upon examination results, and that frequent supervision by the Inspector should supersede the annual examination. An interesting account is furnished in paragraphs 252 and 256 of the working of these rules. They involved no change for the five schools (the Catholic Male Orphanage, St. John's Parochial School, the boys' and girls' schools composing the Free School, and St. Paul's School at Darjeeling) on the special list, which had previously drawn fixed grants and had been examined in 1892-93 on the collective system, the classes as a whole being tested instead of each individual pupil. For the remaining schools more time is required for results to be attained. It is not easy all at once to eradicate the idea that every effort must be concentrated on passing a single examination test, everything that may possibly interfere with the preparation for it being regarded as positively injurious. Under the new system, teachers are expected to work with broader views, and can now afford to work slowly and thoroughly, securing each step before attempting the next. They have, as Mr. Bamford says, "to aim not so much at bringing their pupils to acquire a knowledge of certain particular facts and processes, as at training them to observe carefully whatever comes before them, and to reason about what they see and learn. With this wider purpose added to their work, teachers cannot be expected to cover the same extent of ground as before in all cases, even though in some the more sound teaching quickly recovers that which was apparently lost at the outset in making a sure foundation." A better classification of pupils has to be adopted, old ideas of promotion have to be abandoned, and the influence of parents to be properly directed, before entirely satisfactory progress can be effected with the new rules.

Muhammadan education.

37. The total number of Muhammadan pupils has varied during recent years as follows: 433,653, 415,428, 448,847, 447,485, and this year stands at 446,130: so that there has been a further loss of 1,355 pupils shared by both public and private institutions: and their ratio to the total number of youths under instruction has fallen from 29·1 to 28·8 per cent. The number of Muhammadans in Bengal being to the entire population as 33 to 100, the total percentage of Muhammadan pupils does not fall much below this ratio; but there is a marked disparity with the rest of the population in the higher branches of the educational system. There was an increase in the number of Muhammadan pupils in the arts and professional colleges, in middle vernacular and upper primary schools, in private institutions of an advanced character, and in Koran schools: in all other institutions there was a decline. The Director attributes the net decrease in the number of pupils to the prevailing high prices and distress; and the fall in Tippera alone (7,727), where the floods were severe, more than accounts for the decrease in the numbers in the whole Province. On the other hand, there was an increase of 6,254 pupils in Chittagong, which is credited to the special encouragement given to Muhammadan education by the District Magistrate and Board and the Deputy Inspector. The actual expenditure from the Mohsin Fund exceeded the estimates by Rs. 2,285. The number of Muhammadan candidates successful at the University Examinations for the last five years is shown as follows:—

	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
Entrance ...	125	110	85	172	134
Firts Arts ...	57	16	47	35	31
Bachelors of Arts ...	21	19	14	23	26
Masters of Arts ...	3	2	2	2	0

The total number of Muhammadans who passed any examination down to the lower primary rose from 3,847 to 4,854. Though there was no Muhammadan M.A. during the year, the proportion at the other University Examinations compared not unfavourably with the number under instruction, and there has been a marked improvement in the numbers passing at the middle and primary examinations. In the general results of the common examination of madrasas for the last two years (for which the papers were set by a Central Board), 162 out of 217 candidates passed this year, as compared with 169 out of 313 last year: the Calcutta, Chittagong, and Tippera Madrasas all did much better. The 1,609 pupils at the seven madrasas under Government management (of which three are maintained from Provincial revenues and the rest from the Mohsin Fund) cost Government Rs. 30,035 out of a total expenditure of Rs. 62,060. At the Calcutta Madrasa, the number of pupils in the Arabic Department declined from 500 to 360 on account of the institution of a test examination for all candidates at the Central Examination of Madrasas, a test which many students wished to avoid, as they are content to learn a certain amount of Arabic, but object to repeated examinations. The athletic club, aided by Government, is compulsory on the boys in the upper classes, and had 214 members. Physical training is also cultivated at the Murshidabad Nawab's Madrasa. Besides the seven principal madrasas, there are a good many institutions bearing the name in different parts of Bengal, intended primarily for the benefit of Muhammadans: but most of them do not attempt to teach Arabic or Persian up to a high standard. Special graduate, senior and junior scholarships have been created of late years for the benefit of Muhammadans desirous of pursuing a collegiate course of instruction, and provision has been made for the award to Muhammadan pupils of a number of free studentships in middle and high schools under public management. Several District Boards also have taken further steps to promote Muhammadan education. Since the close of the year, also, a report from Dr. Martin, pointing out how far Muhammadans are employed as Deputy and Sub-Inspectors, has been dealt with, and orders issued that their claims should receive full consideration.

Education of aborigines and indigenous education.

38. As has been before explained, in the term aboriginal population are included the Sonthals and Kols, Dhangars, Uraons, Paharias, Indo-Tibetans, Indo-Chinese, Indo-Burmese, besides the tribes on the Assam, Chittagong, and Tippera frontiers. The number of pupils of these aboriginal races under tuition increased from 31,712 to 35,572, an increase of 3,860 pupils, the Christians having advanced by 271, and the non-Christians by 3,589. Of these aborigines 21,026 are returned as under tuition in Chota Nagpur, 3,564 being Christians, and 17,462 non-Christians. In the Bhagalpur Division there are 6,197, in Burdwan 3,585, and in the Orissa Tributary Mahals 1,518 pupils of aboriginal races. There was a large increase of 2,737 pupils in Singhbhum, attributed to the abundant harvest in Dalbhum, where numerous Sonthal schools sprang up. The five missions in Chota Nagpur maintained 163 schools against 136 in 1892-93, with 4,729 pupils as against 3,920. The total expenditure on these schools decreased from Rs. 42,063 to Rs. 40,578, while the Government share of it rose from Rs. 9,282 to Rs. 9,338. The elementary schools for the children of labourers employed in the coal mines at and about Giridhi under the wise supervision of Dr. Saise advanced from 21 to 32, and their pupils from 1,072 to 1,500. The aboriginal schools passed two candidates at the Entrance Examination and 460 at the other departmental examinations in the year, as compared with 534 in the previous year.

Indigenous education.

39. The indigenous schools are private institutions which do not conform to any particular departmental standard, but adhere to the indigenous modes of teaching handed down by tradition. The figures for the last five years are as follows:—

	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
Schools ...	13,867	13,387	13,868	13,473	13,602
Pupils ...	139,603	132,057	139,564	134,989	135,530

Many of these schools will eventually give way to the extending operations of the department, so that the fact that the number of schools and pupils are lower than they were in 1889-90 is rather a matter for congratulation than otherwise. As compared with last year, the schools increased by 129 and the pupils by 541.

Sanskrit.

40. The encouragement recently given to Sanskrit education shows its results in the further increase (after a rise of 102 last year) of 120 Sanskrit tols and 700 pupils over 1892-93. These institutions are now being sought out with great care. In February 1893, new rules were sanctioned by Government for the award of stipends to pupils and teachers, to the amount of Rs. 12,240 a year, on the results of examination in two standards. The total outlay was Rs. 10,629. These examinations are conducted by certain recognised private Associations, and the stipends are awarded on the recommendation of the Principal of the Sanskrit College, to whom the results are submitted.

Endowment of Sanskrit learning.

41. A munificent trust of Rs. 1,60,000, producing an income of Rs. 8,000 a year, was created during the year by the late Babu Bhudeb Mukherjea, C.I.E., for the encouragement of Sanskrit learning. Before the donor died in May last, he was able to award a number of stipends of the value of Rs. 50 each per annum to some of the deserving pundits of the country. It was also proposed in the trust deed that, in the event of failure of the trustees, the Local Government should take possession of the trust fund and carry out the conditions of the trust.

Arabic and Persian.

42. The advanced schools for teaching Arabic or Persian were more numerous by eight, but their pupils were fewer by 134. These schools, generally known as *maktabs*, differ from ordinary Koran schools only in this respect that, in addition to learning the Koran by rote, the pupils read a little Arabic or Persian prose and poetry, and sometimes grammar.

Koran schools.

43. Out of the 5,251 Koran schools, as many as 4,662 exist in the Dacca and Chittagong Divisions. They are comparatively unimportant from an educational point of view, as no secular education is given in most of them. The Assistant Inspector, Chittagong Division, writes: "The Muhammadans think it a respectable thing to keep a *mianji* in their houses, who teaches the children of the family and of their neighbours to learn to say their prayers. These institutions have been kept on in the returns in the hope of their introducing Bengali and arithmetic."

The Cental Text-Book Committee.

44. The late Babu Bhudeb Mukherjea, C.I.E., mentioned in paragraph 41, was also President of the Central Text-Book Committee, and connected with it for nearly 20 years, during which time his great experience, judgment and scholarship afforded valuable aid to its deliberations. He has been succeeded as President of the Committee by the Hon'ble Mr. Justice Guru Das Banerjee, M.A., D.L. Other vacancies on the Committee caused by the death of Nawab Abdul Latif Bahadur, C.I.E., and Rai Bankim Chandra Chatterjee Bhadur, C.I.E., have been suitably filled up. The Committee dealt with 225 books during the

year, approving 94 and rejecting 131. The chief work in hand is the revision of the authorised list of books for middle schools. When that is finished, authorized lists of text-books for high and primary schools will be drawn up.

Sir A. Croft's Report.

45. It is impossible to rise from a perusal of this Report without feeling impressed by its remarkable merits, not only on the score of literary skill and grasp of the subject, but also for the marks it bears of wise reflection, large experience, and administrative ability. There is literally no branch of the subject, however small, which Sir Alfred Croft has not illuminated by his penetrating and instructive remarks, and the Lieutenant-Governor commends its perusal to all those who are interested in the growth and direction of public instruction.

Conclusion.

46. The Lieutenant-Governor desires to acknowledge the good work done by Dr. Martin while in charge of the Department of Public Instruction between the dates of Mr. Tawney's retirement and the return from leave of the permanent Director. The thanks of Government are also due to the officers who are favourably mentioned in Chapter II, or elsewhere in the Report.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE CALCUTTA MUNICIPAL CORPORATION FOR THE YEAR 1893-94.

MUNICIPAL DEPARTMENT.—MUNICIPAL.

Darjeeling, the 1st November 1894.

RESOLUTION No. 5230M.

READ—

The Administration Report of the Calcutta Municipal Corporation for the year 1893-94.

Read again—

The report for 1892-93, and the Resolution recorded by the Government thereon.

The present report is in the same form as the last, but much delay has occurred in its submission, notwithstanding the comments of the Government in the Resolutions on the previous Reports. It should have reached the Government by the 1st August, but was not received until the 21st September, or seven weeks later. It appears that the draft came defore the Committee appointed to consider it so late as the 29th August, but was not detained by them beyond the 5th September. The preparation of the draft should be greatly expedited in future, and the Lieutenant-Governor trusts that the delays which have occurred in the submission of the report to Government in past years will be avoided.

2. Mr. Ritchie officiated as Chairman throughout the year, in the absence of Mr. Lee on furlough. There were only two changes among the Commissioners. Nawab Abdul Latif, C.I.E., who had long been a member of the Corporation, died in July, and the Commissioners recorded a resolution expressing the regret with which the intelligence of his death had been received by them, and their appreciation of his services as a Commissioner. Mr. John Cowie, who had for many years held the post of Secretary to the Commissioners, also died during the year, and the appointment was conferred on Mr. W. R. Macdonald.

3. *Meetings and attendance of Commissioners.*—The Commissioners of Calcutta are 75 in number, of whom 50 are elected by the rate-payers and 25 nominated by the Government, the Port Commissioners, the Trades' Association, and the Chambers of Commerce. The attendance at the various general, special and committee meetings during the year maintained the high standard reached in previous years. The Commissioners met in general meeting 26 times, while of the nine standing Committees, which deal in the first instance with details of business, the General Committee met 51 and the others 61 times. There were also 26 meetings of Special Committees and 35 of Sub-Committees, the total number of meetings of all kinds being thus 199. Nineteen Commissioners attended 50 times or more at the meetings, four of them, Babu Priya Nath Mullik (116), Babu Nobin Bihari Sircar (116), Rai Durgagati Banerjee, Bahadur (106), and Babu Lal Bihari Baisakh (104) having been present at over 100 meetings. The general percentage of attendance was 58·5 against 57·2 in 1892-93. The percentage was not so good among the nominated as among the elected Commissioners.

4. *Proceedings of meetings.*—Among the important matters discussed in general meeting were a scheme for the surface drainage of the portion of the suburban area east of the Russa Road, the provision of a site for a new hospital at Bhowanipur, the revision of the building bye-laws, the statutory obligation of the Commissioners to spend three lakhs annually on suburban improvement, and the grant to the Calcutta Public Library. The scheme for the surface drainage of a portion of the Suburbs has been many years under preparation, but as the whole question of the drainage of the Suburbs has now been reported on by Mr. A. J. Hughes on the special invitation of the Commissioners, there is a prospect of the matter at length assuming a final shape at an early date. It will be further referred to below. The Commissioners expressed their willingness during the year to provide a site for the new hospital at Bhowanipur, and this site has since been selected. Their offer of an annual contribution towards the maintenance of the institution is now under the consideration of Government. A Special Committee has been appointed for the revision of the building bye-laws. The matter is of great importance from a sanitary point of view, and it may be hoped that the Committee will

be able to submit recommendations which will meet, as far as possible, the views of the Health Officer. The subject was referred to at some length in the Resolution on the Report for 1892-93, and the Lieutenant-Governor desired to see a draft of the revised bye-laws at an early date. There has already been some delay, and it is of importance that the Committee should proceed expeditiously with its work. In the Resolution on the Report for 1892-93, the Lieutenant-Governor referred to the discussion which had for years been going on in regard to the expenditure which should annually be incurred on improvements in the amalgamated suburban area, and was hopeful that the matter would be soon decided, and that the Commissioners would adjust their accounts, and in future comply year by year with the requirements of the law. It is disappointing, therefore, to find that the opinion of the counsel consulted by the Commissioners was not accepted and acted upon, and that a Sub-Committee was appointed to draw up a fresh case for counsel. This vexed question, which has impeded the carrying out of improvements in the Suburbs, should obviously be speedily disposed of, and past accounts finally adjusted, in order that the liability of the Commissioners may be placed beyond further discussion, and that proper provision may be made for the future expenditure on Suburban improvements, with reference to both the unexpended balance of passed years and the regular annual allotment prescribed by the law. The grant to the Calcutta Public Library is another question regarding which there has been prolonged discussion. The Lieutenant-Governor has learnt with satisfaction that since the close of the year the Commissioners and the proprietors have agreed on conditions which will ensure the restoration of the full annual grant of Rs. 8,000 in perpetuity.

5. *Loans.*—The liability of the Corporation on account of loans raised for works was as follows at the commencement of the year:—

	Rs.	A.	P.
Unpaid balance of 6 per cent. debenture loan of 1866	5,000	0	0
5 per cent. debenture loans	1,44,01,900	0	0
4½ per cent. ditto	30,48,300	0	0
	1,74,55,200	0	0
Balance of consolidated loans from Government ...	53,50,910	9	5
Loan from Port Commissioners	2,00,000	0	0
Total ...	2,30,06,110	9	5

The balance of the consolidated loans taken from the Government having been reduced to Rs. 51,11,493-7-7 during the year by a repayment of Rs. 2,39,417-1-10, the loan liability of the Corporation at the close of the year stood at Rs. 2,27,66,693-7-7. Against this liability the Commissioners had in their Reserve Funds and in the Special Funds for the repayment of the loan of 1866 a total sum of Rs. 10,82,193-14-3. The Corporation were fortunately under no necessity to raise fresh loans during the year.

6. *Income and Expenditure.*—The receipts and expenditure of the Municipality in the past two years compare thus:—

Receipts.	1892-93.	1893-94.
	Rs.	Rs.
General-rate at 9½ per cent.	16,14,107	16,55,787
Sewage-rate at 2 per cent.	3,39,651	3,48,395
Water-rate at 6 per cent.	10,18,672	10,45,207
Lighting-rate at 2 per cent.	3,39,560	3,48,403
Total of consolidated taxation at 19½ per cent. ...	33,11,990	33,97,792
Taxes on trades and professions, carriages and animals, &c.	5,36,614	5,42,242
Municipal market receipts	1,27,221	1,32,311
Receipts from the sale of water	98,347	1,00,770
Conservancy receipts	65,565	64,430
Road Department receipts	28,010	78,585
Slaughter-house receipts	39,281	37,639
All other receipts	93,403	1,09,726
Total ...	43,00,431	44,63,795

EXPENDITURE.

	1892-93.	1893-94.
	Rs.	Rs.
Interest on loans	4,54,351	5,40,262
Contributions for repayment of loans	2,02,807	2,06,233
General establishment	4,03,580	3,86,046
General office expenditure	97,543	97,001
Road Department	4,35,580	3,66,133
Street watering	91,944	90,801
Gowkhana	2,06,869	1,78,670
Conservancy	1,59,805	1,50,621
Bustee cleaning	1,07,817	1,02,431
Sewer cleaning and relaying charges	70,855	60,968
Hospital and vaccination charges	56,299	56,147
Suburban improvements	52,762	1,34,950
All other expenditure from the General Fund ...	2,65,694	2,31,662
Sewage-rate charges	2,67,404	2,62,723
Water-rate charges	11,11,942	10,68,586
Lighting-rate charges	3,78,386	3,90,496
Total ...	43,63,638	43,24,030

The total receipts thus amounted to Rs. 44,63,795 in the past year against Rs. 43,00,431 in 1892-93. The income under the four rates shows an improvement, and all the other heads detailed above, except the conservancy and slaughter-house receipts, also contributed to the increase of Rs. 1,63,364 in the revenue of the year. The expenditure, on the other hand, declined from Rs. 43,63,638 in 1892-93 to Rs. 43,24,030, making a reduction of Rs. 39,608, and a net financial improvement of Rs. 2,02,972.

7. *Financial position.*—The main ordinary income of the Corporation is derived from the four (general, sewage, water and lighting) rates, which form the consolidated rate, levied for some years past at 19½ per cent. on the annual value of houses and lands situated within the Town and the Suburbs. Any enhancement of the annual valuation of the Municipality necessarily increases the receipts on account of the consolidated rate, and to this the favourable financial results of the past year are partly attributable. As the revaluation of the Town under the present law has now been almost completed, only moderate increases in the annual valuation, and, therefore, in the receipts from the consolidated rate, can be expected after the current year. With these increases, however, and progressive growth in other sources of income, there is no reason to apprehend that the financial position of the Corporation in the future will not be such as to admit of the execution of large works of improvement, such as the drainage of the Suburban area, which are so essential for the proper sanitation of the town. At the same time, the duty of economy in expenditure, so far as it can be curtailed without loss of efficiency, should not be lost sight of. The Commissioners started the year with a cash balance of Rs. 1,79,530 in the Revenue Funds, and of Rs. 2,33,057 in the Capital Funds for works, and had at its close cash balances of 3¼ lakhs and Rs. 3,45,162 in the revenue and the Capital Funds respectively.

8. *Assessment and collection of the consolidated rate.*—The assessment of the houses, lands and bustees, on the basis of their annual value, is made in the Assessor's Department, and objections are heard by the Vice-Chairman. The total increase in valuation in the past year was Rs. 7,14,287. The number of objections against assessments for disposal was 4,953, and of these 2,860 were disposed of against 1,166 in the previous year. This shows a marked improvement in work, but the number of pending objections was still large at the close of the year. The Government had to comment, in the Resolutions on the two last reports, on the practice of the Commissioners in deferring the service of notices of demand for the rates until after the close of the quarter to which they refer. The law clearly contemplates the issue of these notices without undue delay after the failure of the assessees to pay within seven days of the presentation of the bills at the commencement of each quarter. The course followed by the Commissioners results in the postponement

for an entire quarter of the realization of much of the demand, and tends to encourage default on the part of numerous assessees who could pay with punctuality. The Commissioners have at length agreed to a departure from their practice by sanctioning the issue of notices of demand for the last quarter of the year in the manner contemplated by the law. The change effected an improvement in collections towards the close of the past year, and it would be still more to the advantage of the Corporation to allow the same system to be followed throughout each quarter of the year. The total demand of the consolidated rate for the past year was Rs. 36,87,491 against Rs. 35,44,144 in 1892-93, showing an increase of Rs. 1,43,347, due to the revision of the assessments. The incidence of this rate per head of the population in the past year was Rs. 5-3-8 against Rs. 5-1-7 in 1892-93, and that of the total municipal taxation Rs. 6-2-6 against Rs. 5-14-9.

9. The collection of the rates is made in the first instance by the Collector for the Town and by the Joint-Collector for the Suburban area. The bills which cannot be collected by these officers are made over to the Warrant Department for the adoption of coercive process, unless payment is voluntarily made. The following statement shows the demand and collections in the past year:—

Rates.	Arrear demand at the beginning of the year.	Current demand of the year.	Total demand.	Collections.	Remissions.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
General rate at 9½ per cent. ... ... Sewage rate at 2 per cent. ... ... Water-rate at 6 per cent. ... ... Lighting rate at 2 per cent.	3,60,293	30,87,491	40,47,784	33,97,891	87,339	5,62,554

The reports should furnish a statement in this form in future, and it should be explained what portions of the balance at the close of the year are in the hands of the Assessor for enquiry, and of the Collector, the Joint-Collector and the Warrant Department respectively for recovery. The collections of the arrears of past years made by each of the collecting offices and the balance of such arrears remaining at the close of the year, should also be stated. The large balance of Rs. 5,62,554 at the end of the past year is a very unsatisfactory symptom.

10. The total amount which the Collector had to realize in the past year was Rs. 30,61,598, and of this sum he collected Rs. 25,85,340 or 84·45 per cent. If allowance is made for bills which could not be served, for bills withdrawn by the assessor, for bills received from him too late for any action to be taken on them, and for bills cancelled by the Vice-Chairman on remission of the assessment, the percentage of collection attained by the Collector is 88·79 against 89·17 in the previous year. In neither year could the result be deemed satisfactory. The Joint-Collector's work was still less satisfactory than the Collector's. He had to collect Rs. 7,07,308, and actually realised only Rs. 5,87,449. After allowance for bills which could not be acted on, as in the case of the Collector, his collections amounted to a percentage of 87·09 on the demand, against 87·01 in the previous year. The Lieutenant-Governor had occasion in the Resolution on the Report for 1892-93 to notice an improvement in the working of the Warrant Department, which had previously been far from satisfactory; but the present report shows that further improvement is needed, and that the Department ought to be rendered more efficient. The percentage of rate bills disposed of fell off during the year from 63·7 in 1892-93 to 58·4, and that of miscellaneous bills from 75·6 to 43·2. The recoveries on account of rate bills amounted to 40·1 per cent. of the demand only, against 41·7 in 1892-93, and the balance for realization at close of the year was Rs. 1,66,110 out of a total demand of Rs. 5,60,013 during the year. The recovery of the large sum outstanding under decrees of the Courts of Small Causes, only a small portion of which was credited to the Municipality during the year, demands special attention.

11. *License and Registration Department.*—The following taxes, fees and fines were realised in this Department during the past two years :—

	1892-93.			1893-94.		
	Rs.	A.	P.	Rs.	A.	P.
I.—Tax on trades and professions ...	3,42,318	12	4	3,46,839	7	3
II.—Tax on carriages and animals ...	1,42,510	5	6	1,43,338	12	6
III.—Cart registration fees ...	71,750	0	0	72,027	8	0
IV.—Fees for the removal of trade refuse	62,044	14	0	60,741	0	0
V.—License fees for cowsheds, &c. ...	43	0	0	37	0	0
VI.—Registration fees for hackney carriages, &c.	17,337	0	0	17,864	4	6
VII.—Miscellaneous receipts ...	474	14	0	719	14	0
VIII.—Fines under section 90 of the Municipal Act	8,269	0	6	8,405	8	6
IX.—Fines under section 80 of the Municipal Act	1,085	8	0	966	0	0
Total ...	96,45,833	6	4	6,50,939	6	9

The improvements in the receipts under the principal heads, except that of fees for the removal of trade refuse, and in the total income, is satisfactory The taxes on trades and professions and carriages and animals have shown a progressive increase since 1890-91, and the fees for cart registration exhibit similar progress except in one year. The fines recovered under sections 80 and 90 of the Act for omission to take out licenses for carriages or animals and for exercising a trade or profession, have at the same time fallen off considerably. The figures indicate, the Commissioners observe, that there is less necessity for resorting to the Magistrate for enforcement of the law. Constant vigilance on the part of the Inspectors is, however, essential to ensure that the taxes and fees are paid in all cases in which they are leviable by law. The total number of carriages taxed last year increased from 5,042 in 1892-93 to 5,212, and that of horses and ponies from 6,672 to 6,778. The number of hackney carriages registered rose from 3,337 to 3,452, there being an increase in first and second class, as was anticipated from the revision of the law in 1891, against a decrease in third class carriages.

12. The income from the Municipal Market increased from Rs. 1,26,416 to Rs. 1,28,311, or by Rs. 1,895, the profit to the Commissioners after payment of all charges being Rs. 1,07,815 against Rs. 1,00,954 in the previous year. The Lieutenant-Governor is glad to notice the favourable remarks of the Commissioners regarding the working of their Printing Department, which invited such strong criticism in the previous year.

13. *Sale of surplus lands.*—Among the matters on which the Surveyor's Department was engaged during the year was the disposal of the surplus lands of the Lansdowne and Harrison Roads, both very important thoroughfares recently opened. The plots were sold at rates which indicate the keenest demand for land in the Town and Suburbs, and a readiness on the part of some to pay fancy prices for its acquisition. In the Barabazar section of the Harrison Road, from Rs. 7,500 to Rs. 22,000 per cottah were paid for small building plots, while narrow strips lying in front of houses, a few feet from the side of the road, were purchased at from Rs. 25,000 to Rs. 80,000 per cottah by the owners of the adjacent properties, for the purpose of obtaining a better frontage. The amount realized during the year from the sales of the surplus lands of this road was Rs. 7,00,441, the total receipts up to the close of the year being Rs. 23,95,381. The money thus received is credited to the Capital Account and not to the current year's revenue.

14. *Expenditure.*—The increase or decrease in expenditure under the various heads, as compared with 1892-93, is explained in detail in the Report. The savings in many cases appear to have been due to economical working, but the reduction of the grant for road works was ill-advised, involving larger expendture at a later date. The Lieutenant-Governor observes also that the provision for the removal of road scrapings in the budget for the current year was rejected by the Commissioners. This also was an unwise economy, and the consequent inefficiency of the establishment for the cleansing of the streets has, it is understood, given rise to much complaint on the part of the public.

15. *Litigation.*—The Commissioners have found themselves constrained to have increasing recourse to the Civil Court for the recovery of rates and miscellaneous dues, in consequence of the difficulty experienced by their officers in effecting summary distraint, through the removal of goods by defaulters into their inner apartments. The number of suits in which the Corporation was plaintiff in the past year was 122, one being in the High Court and the rest in the Courts of Small Causes. The Commissioners were very successful in this litigation, none of their suits having been dismissed out of 92 disposed of. The civil suits in which the Corporation was defendant were only five in number, and three were finally decided. The arbitrators in the suit of Rajender Dutt appear to have been very dilatory. The suit was referred to them three or four years ago, and they had not submitted their award when this report was forwarded to Government. The other pending suit is the important land acquisition claim in respect of 54 Clive Street, which was taken up for the Harrison Road. The owners demanded Rs. 21,24,640, against a tender of Rs. 2,27,925 by the Collector, and the Judge awarded Rs. 6,57,089, exclusive of the 15 per cent. statutory allowance. Both the claimants and the Corporation have appealed to the High Court against this decision, and the appeals have been pending for two years. In the meanwhile interest on the sum which may ultimately be awarded accumulates. The amount at stake is very large, and the Commissioners should make every effort to get the appeals speedily heard. Steps might apparently have been taken earlier to have the "paper-book" printed, the delay in the hearing of the appeals being attributed to the fact that this had not been done. Regarding prosecutions by the Corporation in the Magistrates' Courts, the Report notices a large reduction in cases for street obstructions, and questions the explanation of the Road Department that it is due to the deterrent effect already produced by constant prosecutions. It rests with the executive of the Corporation to remedy any laxity which has arisen in this matter.

16. *Education.*—The Government has repeatedly drawn the attention of the Commissioners to the insufficiency of their contribution towards primary education within their jurisdiction, and has suggested that an annual allotment of Rs. 10,000 should be made in lieu of their present expenditure of less than Rs. 3,000. This suggestion the Commissioners have not adopted, and they observe that, looking to the large projects of town improvement on which they have embarked, and to the huge demands on them for expenditure on sanitation which are imminent, they feel that their financial position is not such as to enable them to meet the wishes of Government at the present moment. The Lieutenant-Governor is, however, unable to admit that the Commissioners are not in a position to provide for the small annual grant of Rs. 10,000. The Bombay Corporation spent in 1892-93 no less than Rs. 55,220 on education, whereas even out of the almost nominal sum of Rs. 3,000 which the Commissioners agree to allot in Calcutta, only Rs. 2,047 were paid to the schools during the past year.

17. *Bustee improvement.*—In the Resolution on the Report for 1892-93 the Government quoted the remarks of the Commissioners explaining their procedure in regard to bustee improvement, and drew their attention to the provisions of the law, which empower them to levy the cost of such improvements from the bustee owners instead of meeting it out of their general income, as they now do. The question is not again discussed in the present Report, and it appears that the Commissioners desire to adhere to the course which they have hitherto observed. They anticipate opposition which would seriously impede progress if the bustee owners were required to pay the full cost of improvements, and are satisfied with the contribution which the owners make in giving up land free for the roads opened out through the bustees. It may be advisable to forego recovery of the cost where the owners are people of small means who are unable to meet the expenditure, but the same concession should not be extended to owners who are well able to pay and whose income from the bustees is greatly enhanced by the improvements effected. It is unfortunate that several projects begun under Act IV (B.C.) of 1876 had to be abandoned during the year in consequence of a ruling of the High Court that proceedings should have been taken *de novo* under the present Act. The Commissioners

should consider whether fresh proceedings should not be taken in respect of these projects. The total amount spent by the Corporation on bustee improvement up to the close of the past year was very nearly 9 lakhs. The Lieutenant-Governor hopes that the improvements at Hastings will be completed in the current year.

18. *Engineer's Department.*—The duties of this Department embrace the charge of the water-works, the drainage, the roads, the sewers, the Municipal railway, and the Municipal workshops, and, no doubt, furnish full employment for the Engineer and his subordinate staff. Through the completion of two new tanks, the settling tanks at the Palta head works have now a united working capacity of 105 millions of gallons, or five times the requisite daily supply of filtered water in the Municipality. This supply has risen from 16¾ millions of gallons in 1889-90 to nearly 20¼ millions of gallons in the past year, giving a present daily consumption per head of the population of 36·66 gallons for the Town proper, and of 19·55 gallons for the Suburban area. The distribution pipes were extended 16 36 miles in the past year, and their total length is now 302·09 miles, the number of premises connected being 24,315. The expenditure of the year amounted to Rs. 10,00,781, the cost for supplying every 1,000 gallons having been thus 2·18 annas. The fittings of 36,780 premises were inspected during the year, and nearly 5,000 notices to repair were served. Nevertheless, it is remarked that the use of water is still distinguished by the utmost lavishness. The reduction of pressure resulting from this waste affects the efficient working of the water-supply throughout the Town, and it is desirable that further efforts should be made by the Commissioners, by inviting the co-operation of the house-holders, by more frequent inspections, or, if these measures fail, by the introduction of some mechanical contrivance, to secure proper economy in the use of the water. The Commissioners have acted wisely in arranging for the supply of a new pair of pumping engines for the Talia pumping station, as a stand-bye to the existing machinery. In addition to the filtered water, over 4¼ millions of gallons of unfiltered water are supplied daily in the Town and Suburbs, through an aggregate of 72·46 miles of pipes, for watering the roads, through ground hydrants, for use at the public bathing platforms, for flushing the sewers, and for conservancy purposes generally. The Lieutenant-Governor notices with pleasure that 12 cast-iron cattle drinking troughs were presented to the town last year by private individuals, to whom the Commissioners express their thanks.

19. *Drainage.*—For the drainage of the town proper a regular system of underground sewerage has long been in operation, and the ordinary duties of the Engineer's Department in this branch are to maintain the system in proper working order, and to effect such improvements, and extend the house-connections to such an extent, as may be possible from year to year. In the past year 25 flushing chambers were constructed, their total number being raised to 383, and various repairs were carried out. The present total length of the sewers is nearly 204 miles, and the number of premises connected with them is 27,997, 437 new premises having had connections made last year. The extension of the sewerage system to ths Entally block of the Suburban area, which is approaching completion, is an important work, and the Lieutenant-Governor is glad to learn that it is proposed to take in hand sewerage works for the fringe area between the Circular Road and the Canal. The most important project which lies before the Commissioners, however, is the drainage of the whole Suburban area, south and south-east of the Town proper. One of the chief objects of the amalgamation of the Town and Suburbs, and of the relief of the Corporation from police charges, was to secure the execution of this great improvement. The extension of the filtered water-supply has done much for the Suburbs, but until an efficient system of drainage is established the sanitation of that portion of the Municipality cannot be considered satisfactory. The drainage project has been reported on by Mr. A. J. Hughes, C.I.E., and will now be forwarded for the final opinion of Mr. Baldwin Latham, who investigated the whole question on the spot on his visit to Calcutta some years since. The Lieutenant-Governor has not seen Mr. Hughes' report, but he has perused with interest the lecture delivered by that gentlemen at a meeting of the Commissioners at the Town

Hall, in which the scheme recommended by him, which agrees generally with that suggested by Mr. Baldwin Latham himself, and meets with the concurrence of the Engineer and the Health Officer to the Corporation, is explained. It appears that Mr. Hughes proposes to divide the Suburbs into two sections for drainage purposes. In the outer section, which is mainly rural in character, he would have a system of efficient surface drains only, for carrying off rain-water to a safe outfall, the sewage being disposed of through pail depôts so arranged that house drainage can be carried direct to them by sweepers. For the inner, or urban area, within which fall Kidderpore, Bhowanipur and Ballygunge, he would provide a main sewer running through the entire length of the tract from west to east, and discharging itself into the Salt Lakes, with which branch sewers and houses would be connected, as in the Town proper. The rain water would be carried away in surface drains. In the matter of cost, Mr. Hughes' proposals have special importance, as, after careful estimates, he has been able to show that the expenditure involved will fall far below that which was previously assumed. The cost of the main sewer he estimates at 14 lakhs of rupees, and that of the branches at 16 lakhs, the total outlay on the urban section being thus 30 lakhs of rupees. For the surface drainage of this section as well as the rural area he would spend for the present 7 lakhs of rupees only. The capital of 37 lakhs required for the works could be raised by loan, while the annual charge for interest and working expenses, amounting to Rs. 2,24,000, might be met partly by reductions in establishment, which would be practicable on the completion of the drainage system, and partly from the sum of three lakhs which should be spent annually on the improvement of the Suburbs. The scheme is doubtless one of great magnitude, but its financial aspects do not, in the opinion of the Lieutenant-Governor, present difficulties which should deter the Commissioners from taking it up in earnest, after the receipt of Mr. Baldwin Latham's advice, and making arrangements for its early inception. Mr. Hughes has suggested that, pending the completion of the scheme, certain works should be undertaken for the purpose especially of getting rid of the difficulty connected with the Goragacha trenching-ground. His proposals deserve the early consideration of the Commissioners.

20. *Health Department.*—In addition to the registration of vital statistics, vaccination, enquiries into disease, and the inspection of the municipal dispensaries, the Health Department has charge of the gowkhanas, or depôts at which the municipal ponies and cattle are kept, the conservancy arrangements, and the municipal slaughter-house. The calendar year 1893 was one of heavy rainfall and high prices of food. The number of births recorded was higher than in any of the previous four years, the ratio per mille being 19·7 against 18·6 in 1892-93. The increase was mainly due to improvement in registration in the Suburban area, although in the Town also registration was more efficient. The mortality shows a small decrease as compared with that of the proceding year, and was also lower than in 1891 and 1890. The ratio for the entire Municipality was 29·5 against 29·6 in 1892, 31·5 in 1891, and 29·8 in 1890. The improvement occurred entirely in the Town, the Suburbs showing a considerable increase of mortality. The decline in the death-rate in the Town is explained by an exceptionally low mortality from cholera and small-pox, the deaths from the former (596) having been the lowest on record. In the Suburban area the increase was due to greater mortality from fever and other causes.

Vital statistics.

21. *Fever.*—The deaths from fever in 1893 were more numerous than in any year since the amalgamation of the Suburbs with the Town, the ratio reached being 10·1 for the Town, 15·5 for the Suburbs, and 11·8 for the entire Municipality, against 9·9, 13·8 and 11·1 respectively in 1892. The Heath Officer draws attention to the increasing mortality from fever in the Town proper, which he attributes to defects in the drainage system, and urges alterations in the direction indicated by Mr. Baldwin Latham. In view, however, of the more pressing necessity of a drainage system in the Suburban area, it is hardly possible at present to undertake any great and costly changes in the Town itself. The large fever mortality in the Suburbs is attributed by the Health Officer to the exceptional rains of the year, the effects of which

were intensified by the absence of proper surface drainage. The past year thus affords strong evidence of the urgent need of a drainage system in the Suburbs.

22. *Cholera.*—For the comparative freedom from cholera during the year, which was shared by both the Town and the Suburban area, no local cause can be assigned. In the Suburbs the improvement in health with respect to cholera, as compared with previous years, is doubtless partly due to the introduction of the filtered water-supply.

23. The appointment of a new Superintendent with veterinary experience for the pony and cattle depôts of the Corporation has led to much improvement in the management of the depôts and the condition of the animals, and much reduction in both sickness and mortality is already observed. It would appear from the observations of the Commissioners in regard to the marked reduction in the number of sheep and goats brought to the municipal slaughter-house that the unlicensed slaughtering at so-called Kalisthans, to which reference was made in the Resolution on the Report for 1892-93, continues unabated. The attention of the Commissioners is again invited to the necessity for prompt and thorough measures to check the irregularities which have grown up. They recognize the importance of the matter, and it rests with them to deal with it in an effective manner. As regards the light penalties which are said to be inflicted when prosecutions for unlicensed slaughtering are instituted, it does not appear that the wide prevalence of the offence and the consequent necessity for more severe punishments, have been brought to the notice of the Magistrates.

24. The thanks of the Government are due to the Commissioners for the interest which they have displayed throughout the year in the administration of the Corporation, and the time and trouble which they have bestowed on the large questions as well as matters of detail brought under their consideration. Mr. Ritchie has filled with efficiency the office of Chairman, and the Heads of Departments and the Secretary have rendered useful service, which is cordially acknowledged by the Commissioners.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON.

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE FINAL REPORT OF THE SURVEY-SETTLEMENT OF THE SRINAGAR-BANAILI ESTATES.

REVENUE DEPARTMENT, LAND REVENUE.

Darjeeling the 2nd November 1894.

RESOLUTION—No. 4863.

READ—

(1) A letter No. 233A., dated 9th March 1893, from the Board of Revenue, with enclosures, submitting the Settlement Officer's final report of the survey-settlement of the Srinagar-Banaili estates; together with a supplementary report by Assistant Settlement Officer, Babu Barhamdeo Narain.

(2) The Board's letter No. 1052A., dated the 25th August 1894, submitting the final report of Deputy Collector, Babu Barhamdeo Narain, on the correction of errors in the settlement records.

Read also—

(3) A letter, dated the 15th February 1894, from M. Finucane, Esq., on special duty submitting a note on the maintenance of the settlement records in the Srinagar-Banaili estates.

These estates are situated in the districts of Malda, Purnea, Bhagalpur, Monghyr, and Darbhanga, and are owned jointly by Kumar Nityanand Singh, Kumar Kamalanand Singh, and Kumar Kalkanand Singh, of Srinagar, and Raja Padmanand Singh, of Banaili. The Court of Wards took charge of the Srinagar portion of the estates in October 1882, the three proprietors of that portion being then minors. No trustworthy rent-roll had been left by the late proprietor, the father of the minors; and the rent demand was never collected in full. The arrear demand when the Court of Wards entered upon the management of the property was Rs. 14,68,440. In 1884 it was found necessary to remit arrears to the amount of Rs. 10,15,036, and in 1886-87 the collections of rent and cesses were only 63 and 55 per cent., respectively, the arrears amounting to seven lakhs. It was therefore resolved that the property should be surveyed and a record of rights prepared under the Bengal Tenancy Act, in order to effect an adjustment of the rent demand and to secure system and punctuality in the collections. With this object an application was made by the Court of Wards under section 101 of the Bengal Tenancy Act, in which Raja Padmanand Singh, the co-sharer in the greater part of the property, joined. Under the orders of 1887, the proceedings were to embrace lands in estates which were the exclusive property of the Srinagar minors, and in those which were the joint property of the minors and the Banaili Raj. The proceedings were subsequently extended to three villages in the Khubkhund pargana of Bhagalpur, in which a 4-anna share was held by other proprietors, and to the villages in Purnea held by the Srinagar estate in patni and darpatni. It may be mentioned here that the Srinagar estate was released from the management of the Court of Wards in July 1891.

Reasons for undertaking the survey and settlement.

2. The following extract from Mr. Collin's report (paragraph 74) gives an account of the principal causes of confusion in the rent-roll which made it incumbent on the Court of Wards to prepare a new and accurate record through the machinery of a survey and settlement under Chapter X of the Tenancy Act:—

"74. It has been explained that the chief reason for the survey was to clear up confusion in the landlords' rent-rolls. The following were the principal causes of the confusion:—

(1) Abatements and remissions on account of absconded raiyats, or raiyats who had died without heirs, had not been noted in the rent-rolls. In the Daphar pargana the rent-roll of the Srinagar estate had not been corrected for over 30 years, with the result that large unrealizable balances were shown. Another result was that abandoned holdings were resettled with new raiyats, while also retained in the former tenant's name, and thus appeared twice in the rent-roll.

(2) Changes of tenants by transfer or succession had not been noted in the rent-rolls, and thus the landlords' papers were obsolete. In the village of Bishunpur-Gonesham, the patwari papers showed 86 raiyats, of whom 44 were not traceable. The landlords at first claimed to have the names of raiyats entered in the records, though they had ceased to have any connection with

the village, as they feared that otherwise they would have no power of collecting the arrears of rent from them. This led to many disputes as to the name of the tenant to be entered.

(3) The patwari papers often did not show the true name of the cultivator. Raiyats were entered by fictitious names. In the villages of Dharampur and Hempur the patwaris' paper contained 54 names of fictitious or 'furzi' raiyats. In one village of 196 acres, the names of 47 fictitious raiyats were found to be entered. It was found that this practice prevailed in 38 out of 108 villages in the Khubkhand and Uttarkhand parganas. It was stated that the object was to distinguish between holdings held at money rental and those held on halhasili or jaidadi tenures. It was, however, a matter of great difficulty to find out the name of the real tenant. The same practice prevailed to a modified extent in Purnea, where raiyats held a number of holdings under many names and discarded or retained the tenancies, as they thought fit.

(4) The rent-rolls were not checked by the landlords' agents. Thus in Belwa-Sukhasan village, 54 new tenants were discovered. In Nirmalli 300 bighas of land unassessed to rent were found, which were entered as taufir in the patwaris' papers, but were found to be held by raiyats.

(5) Numerous disputes as to rates existed. Many of the villages were formerly leased out, and the lessees tried to raise the rates by the simple expedient of entering higher rates in their rent-rolls. The rates were also in many villages raised by the lessees on the condition that no measurement was made. The enhancements were looked upon by the raiyats as special cesses, but the landlords treated them as real, and tried to retain them after measuring the villages. Thus in Mysurho the rates were raised, in 1274F., from Re. 1-10-6 to Re. 1-14 on the understanding that there should be no measurement. In 1278 the village was measured, and all lands held by raiyats were assessed at the higher rate, though the raiyats did not accept the enhancement. Disputes of this character were frequent in the Khubkhand and Uttarkhand parganas of Bhagalpur; and in several villages of Monghyr there were instances of disputed rates on account of illegal enhancements. The difficulty was accentuated when the new form of rent-receipt introduced by the Tenancy Act came into force. The landlords then would only give receipts with the new rentals, and the raiyats would not accept them until the rents were entered at the old recognized rates. In some villages in Bhagalpur, such as the Shahpur taluka, Darhar, Agwanpur and others, there was confusion as to areas of holdings. The rates had been increased by a lump sum on the understanding that raiyats should be allowed to extend their holdings without measurement. In some cases the landlords had broken through this understanding, and had measured the villages and assessed the newly cultivated lands. The majority of the raiyats would refuse to accept the assessment, but a few would submit, and hence the dispute was kept alive. In cases where no measurement was made, the enhanced rental was calculated on the area of the old holding. When the new form of rent-receipt introduced by the Tenancy Act came into force, a difficulty arose as to what area should be entered. The landlords wished to enter the recorded area and the enhanced rental. The raiyats objected, as this would be evidence of their acceptance of the higher rate. In some villages they were prepared to measure the holdings on the condition that the old rate was preserved, but they would not pay rent, or take the new forms of receipt if they were to show the former areas at the enhanced rentals. Nothing was done to clear up the disputes, and thus arrears of rent accumulated.

(6) In nearly every village disputes arose as to the rates payable by head raiyats or privileged tenants. There were a large number of such privileged raiyats who had rendered services to the proprietors or lessees. The landlords' papers used to show the full village rate against such tenants, but a deduction was made at time of payment of rent. When the new form of rent receipt came into force, the landlords wished to show the rental at full rates on the receipts, while the raiyats would not accept them unless they showed the special rates. In Bhagalpur, out of 14,291 raiyats, rents were disputed in 5,075 cases. In Monghyr 8 per cent. of the rentals were disputed.

(7) In Purnea the system of accumulative holdings was a fruitful source of confusion. If any raiyat died without heirs, or abandoned his holding, the patwari would assume that his next-of-kin took possession of it without procuring any formal agreement. The holding would be continued in the name of the former raiyat, and certificates for arrears of rent would be issued in his name. It frequently happened that the new tenant did not take up the holding, or if he did, he added it to his original holding, and then repudiated the addition of rent. As there were no measurement papers or other trustworthy records of areas, it was very difficult to decide such disputes.

(8) There was much confusion in the demarcation of village boundaries in Monghyr and Malda. The situation of some villages, as Mahamedpur Bhelwa in

Monghyr, and of a number of scattered villages in Malda, could with great difficulty be discovered. In several cases of boundary disputes in Monghyr there was evidence that the patwaris had entered the names of raiyats as cultivating disputed lands who could not be identified; and an instance recently came to light in the decision of a boundary dispute between Koela and Birbhas villages, where the papers produced by the representatives of the estates are declared by the Assistant Settlement Officer to be forged.

Progress of the operations.

3. The survey was carried out chiefly by a professional party under Mr. G. B. Scott, Deputy Superintendent of the Survey of India Department. It was begun in November 1887, and all the records were made over to the Settlement Department by the end of October 1889. Mr. E. W. Collin, C.S., was appointed Settlement Officer. The bulk of the work was accomplished by him, and he submitted the final report of the settlement on the 7th July 1891. What remained to be done was entrusted to Babu Barhamdeo Narain, Assistant Settlement Officer, who took over charge on the 11th May 1891, and submitted a supplementary report on the 26th March 1892. Extracts from Mr. Collin's report were published in a Resolution, dated the 10th December 1891, recorded on the results of surveys and records of rights in certain wards' estates; but the present review of the settlement was postponed pending the result of a further enquiry which was rendered necessary by the discovery of errors in the settlement records after the operations had been closed and the records had been deposited in the Collectorates of the five districts concerned. Babu Barhamdeo Narain was deputed, in January 1893, to correct any errors which might be brought to light—a duty which occupied him for about one year. The report now forwarded by the Board shows that there were altogether 1,597 errors in the original records and 625 mistakes of copying in the khatian, khasra and tirij. The former, which alone need be taken into account, were due to the following causes:—

Correction of errors in the settlement records.

(1) Mistakes made by patwaris in stating the former areas and rents of holdings.
(2) Mistakes made in transcribing figures from one paper to another.
(3) Arithmetical mistakes of calculation.
(4) Mistakes arising from misunderstanding of judgments and orders by the muharrirs.
(5) Mistakes arising from omission to carry out orders in all papers.
(6) Unaccountable mistakes, which were rare.

It may be stated that the number of tenancies entered in the khatian amounted to 67,141, that two-thirds of the mistakes relating to the amount of rent payable affected that amount to the extent of less than one rupee, and that the result of the revision was that it increased the rent-roll by Rs. 1,511-2-3, and diminished it by Rs. 1,298. Corrections have been made in red ink, both in words and figures, in the Collector's copies of the khatians, as well as in the copies supplied to the landlords, and in every case previous notice was given to the party adversely affected. The raiyats' copies have been corrected where produced, but where they were not produced, a remark has been recorded on the Collector's copy to the effect that, as far as the raiyat's copy differs from the Collector's, to that extent the former is wrong. The total cost of this revision amounts to Rs. 8,354-9-10.

4. It is gratifying to find that the amount of error which has been discovered in the settlement records is far less than was anticipated, and the Lieutenant-Governor thinks that it may safely be said that it is not greater than is likely to creep into a work involving such multiplicity of details, and carried out by an inexperienced staff, however careful the supervision of the superior officers may be. Sir Charles Elliott has little doubt that an equal number of mistakes in copying, in calculating rents, and in entering the results of contested cases, might have been found in any of the settlements with which he himself was connected in the North-Western and Central Provinces, had they been subjected to a similar test, and His Honour wishes emphatically to state that, in his opinion, the discovery of these errors involves no discredit to Mr. Collin or his Assistant, Babu Barhamdeo Narain. It is, however, highly satisfactory and advantageous to all parties that the errors have been discovered and corrected even at the cost of so much expenditure and delay.

Areas surveyed and settled.

5. The total area surveyed was 447,662 acres, or about 699½ square miles; but the total area settled was only 426,265 acres, or about 666 square miles, the remainder having been excluded from settlement on account of lands belonging to other proprietors having been found interlaced with the surveyed area and for other reasons. The total area surveyed by the professional party was 617 square miles, while 81 square miles in pargana Daphar in Bhagalpur were surveyed by the Settlement Department. The whole property comprises 64 revenue-paying estates, 3 revenue-free estates, and 77 villages held under patni leases. The revenue-free estates and fifteen of the revenue-paying estates belong solely to the Srinagar share. The remainder are the joint property of Banaili and Srinagar, while in two estates in Bhagalpur other proprietors also hold shares, the area of which amounts to 1,733 acres. Of the patni estates, two in Purnea are held jointly by Srinagar and Banaili, while the rest of the patni villages belong solely to Srinagar. Of the total area settled, 83 per cent. is held jointly, and 17 per cent. is held solely, by the Srinagar estate. The total Government revenue payable by the estates is Rs. 1,13,138-12-7½. The estates are distributed in five districts and 24 parganas, as follows: the villages in Bhagalpur and Monghyr lying in comparatively compact blocks, while those in the three other districts are much scattered:—

Districts.		Pargana.			Number of villages.
Bhagalpur	1.	Daphar	...	...	94
	2.	Harawat	...	...	1
	3.	Khubkhand	...	...	81
	4.	Uttarkhand	...	...	25

	23.	Mahinagar	...	...	67
	24.	Sujanagar	...	...	4
			Total	...	696

Method of settlement.

6. Two methods of settlement were employed. In the Daphar pargana of Bhagalpur, an entire revision of the rent-roll was made, the land held by each tenant being classified in accordance with a system which had become customary in that pargana. Under the second method, which was adopted for the rest of the tract under settlement, rents were altered under section 52 of the Tenancy Act, according to the increase or decrease of the areas of holdings, an allowance of two cottahs in the bigha being generally made on account of the roughness of the old measurement; enhancement of rent being demanded only when the excess over the old area exceeded this proportion. The settlement in the case of excess areas was largely the result of compromise, but in 22 out of the 29 villages of pargana Akbarabad disputes regarding the length of the *laggi* (or measuring rod) arose. The Settlement Officer held that the *laggi* was one of five cubits, each cubit being of 18 inches, and on appeal this decision was confirmed by the Special Judge. Even then the settlement of these twenty-two villages had generally to be made *ex parte* in the absence of the raiyats, the majority of whom resisted every effort made to induce them to attend.

Increase of rental.

7. The result of the settlement and the subsequent revision is that the total demand as shown in the fictitious rent-roll kept up before the settlement, has been lowered from

Rs. 4,88,715 to Rs. 4,88,532, or by Rs. 183. But this decrease is apparent only, being due not to any actual reduction of rent, but to the settlement of disputes as to existing rates, the effect of which has been to replace a fictitious by a real demand. The net result of the settlement has been a real increase of Rs. 23,850 in the total rental, which is equal to nearly 8 per cent. on the total outlay, including the cost of revision.

The Lieutenant-Governor, however, agrees with the Board in doubting whether the proprietors have received all the increase which they might reasonably have expected, in view of the excess cultivation brought to light, and the fact that the rents now settled will not be liable to enhancement for 15 years.

Cost of operations.

8. Government has borne the cost of the traverse survey, which amounts to Rs. 7,220. The net expenditure on cadastral survey and settlement chargeable to the parties according to the final adjustment of accounts accepted by the Accountant-General is Rs. 2,98,897-3-1, which gives an average of annas 10·7 per acre on the area surveyed, and of annas 11·2 per acre on the area settled. It was decided that the raiyats should pay two annas an acre on the area of their holdings, and that the landlords should pay the balance of the costs according to their several interests.

As stated in paragraph 3 of this Resolution, the total cost of the correction of errors by Babu Barhamdeo Narain amounts to Rs. 8,354-9-10. The Lieutenant-Governor is satisfied that in the course of the settlement proceedings every facility was afforded to the Managers of the Srinagar and Banaili estates to bring mistakes to notice and to have them corrected. They did not sufficiently avail themselves of such opportunities, and although there was an interval of upwards of a year between the delivery of the bulk of the records to the landlords' agents and the closing of the settlement office, and a similar interval between the latter and the deputation of Babu Barhamdeo Narain to bring mistakes to light, still the agents were not ready with complete lists of mistakes when the Deputy Collector began the work of revision, and repeated extensions of time had to be granted to them for their preparation, with the result that Babu Barhamdeo Narain's proceedings were unduly prolonged. The Lieutenant-Governor has therefore accepted the Board's recommendation that half the cost of correcting errors should be borne by the two estates, the amount being equally divided between them, as hardly any mistakes have been found in the records of villages belonging exclusively to the Srinagar estate. The other half will be borne by Government.

Realisation of the outstanding balance of cost.

9. When Babu Barhamdeo Narain submitted his supplementary report of 26th March 1892, a sum of Rs. 50,986-5-6 was still outstanding, of which Rs. 15,719-14-1 was due from the Srinagar estate, Rs. 34,978-7 from the tenants, and Rs. 288-0-5 from the outside shareholders. In February last Mr. Finucane visited Bhagalpur for the purpose of ascertaining what arrangements had been made by the two estates to maintain the settlement records, and he found then that the amount outstanding against the tenants was still unpaid, and that there was some confusion of accounts between the two estates, one of which had paid too much and the other too little. In accordance with Mr. Finucane's recommendation, Babu Barhamdeo Narain was at once posted to Bhagalpur in the regular line, and ordered to realise the outstanding balances with the aid of the certificate procedure, an establishment of six muharrirs for four months being sanctioned for his assistance. His Honour hopes that the accounts have now been adjusted, and awaits a report from the Board on the subject.

Causes of high cost.

10. The causes which have rendered the settlement expensive and protracted are reported to be—

(1) the scattered nature of the estates;
(2) disputes as to the standards of measurement and as to existing rents;
(3) the large number of objection petitions filed;
(4) the necessity of making a fresh copy of the records for the proprietors;
(5) the remand during 1890 of 14 boundary disputes for retrial; and
(6) the recusancy of the raiyats of pargana Akbarabad, which caused much waste of time in attempts to conciliate them and necessitated the issue of a large number of processes.

Case-work.

11. The principal classes of work under this head were:—

(1) Applications for settlement of fair rents under section 104 of the Tenancy Act 632
(2) Civil suits for decision of claims, under section 106 2,852

Of the fair rent suits five were brought by raiyats for reduction of rent, of which four were successful; the rest were brought by the landlords, and 473 were decided in their favour after contest. The amount of enhanced rent decreed in these cases is not reported. Of the civil suits under section 106, about half were brought by the landlords and half by raiyats, but the information on the subject is scanty. A set of tables was promised by the Settlement Officer shewing the result of these trials, but it has not been sent in. In about 12 per cent. of the contested cases appeals were laid before the Special Judge, and in rather more than half these cases the decisions of the lower Court were upheld.

Classification of settled area and tenants.

12. The total rent-paying area of the estates is 312,981 acres, of which 250,694 acres are cultivated and 62,287 are uncultivated. The area on which no rent is paid amounts to 113,283 acres. The total number of rent-free tenures is 2,445 with an area of 14,421 acres, or nearly 6 acres for each tenure. The tenants of the estates were classified as follows:—

Cultivating tenure-holders	113
Raiyats	60,895
Under-raiyats	11,128
Raiyats holding under cultivating tenure-holders—	
Settled raiyats	1,045
Non-occupancy raiyats	459
Service tenure	1
Total ...	73,641

The 60,895 raiyats are classified as follows:—

Class of Raiyats.	No.	Area.	Average size of holding.	Area for which rent is given in the tabular statement annexed to the Report.*	Rent.	Rate of rent per acre.
1	2	3	4	5	6	7
(1) *Raiyats at fixed rates.*		Acres.	Acres.	Acres.	Rs.	Rs. A. P.
Resident	189	1,271	6·72	.....	...	...
Non-resident ...	149	962	6·44	.....	...	...
Total ...	338	2,233	6·60	2,155	2,176	1 0 1
(2) *Settled raiyats.*						
Resident	31,669	183,020	5·76	.....	...	...
Non-resident ...	21,693	93,824	4·32	.....	...	...
Total ...	53,362	276,844	5·18	275,898	424,654	1 8 7
(3) *Occupancy, but not settled raiyats.*						
Resident	419	2,454	5·85	.....	...	...
Non-resident ...	573	3,618	6·31	.....	...	...
Total ...	992	6,072	6·12	6,060	9,090	1 8 0
(4) *Non-occupancy raiyats.*						
Resident	2,813	5,832	2·10	.....	...	...
Non-resident ...	3,390	8,541	2·51	.....	...	...
Total ...	6,203	14,373	2·31	14,366	20,289	1 6 7

* Rent figures have not been given for pargana Bhoor and Fakrabad in Darbhanga.

About 90 per cent. of the raiyats holding 95·2 per cent. of the raiyati area have occupancy rights. Those holding at fixed rates pay much lower rates of rent than the rest, but there is little difference between the rates paid by the settled and the occupancy raiyats, and the non-occupancy raiyats pay at a lower rate than either of these classes. Transfers of portions of holdings are very common, and are accepted by the landlords. The under-raiyats pay their rents in kind, and are generally liable to ejectment at any time, being little more than the field labourers of wealthy raiyats. The total area held on produce rents is 5,090 acres, or 1·6 of the total rent-paying area.

Size of holdings and rates of rent.

13. Sir Charles Elliott tested the survey and settlement work in two villages near Purnea and inspected some of Mr. Collin's settlement records in April 1891, and was generally pleased with the way in which the latter had been prepared. His Honour expressed some regret that more had not been done in the way of collecting and recording facts and observations illustrating the economic and agricultural conditions under which the tenants lived with whom Mr. Collin had been occupied. He found that Mr. Collin had prepared a brief English report on each village, showing its past history, prevailing tenures, etc., but in addition to this His Honour desired that the final report should deal intelligently and comprehensively with such data as could be extracted from the settlement records. Mr. Collin accordingly gives an interesting analysis of the average size of the holdings and the average rates of rent among the different classes of raiyats in each district in which operations were carried on. The following summary may be quoted from the Report:—

"Taking the general results of this comparison of holdings and rates of rent, it will be seen that the holdings are as a rule large, and that, where the average size of the holding is less than 5 acres, as in the Khubkhand pargana of Bhagalpur, and the Mahinagar pargana of Malda, the condition of the raiyats is not entirely prosperous: but where there are large holdings and low rates, as in Daphar and Tirakhurdah parganas, the raiyats are well to do. The facility with which the raiyats of the Daphar pargana tided over the bad year of 1888, compared with the distress felt in the northern tracts of Darbhanga and Muzaffarpur, confirms this fact. Compared with the results obtained in the Muzaffarpur settlement, the position of raiyats in the estates under settlement is more prosperous than in that district, where the average rate of rent is Rs. 3-12 per acre and the average size of the holding only 3 acres. It is seen also that where soil-rates exist, the average rate of rent is higher than where there are consolidated rents—a fact which follows from the theory that the latter form of rental only exists in tracts where the soil is unfertile, cultivation backward, and the competition for land slight."

The average rate of rents varies in the different districts as follows:—

	Rs.	A.	P.	
Bhagalpur	1	10	2	per acre.
Monghyr	2	3	7	,,
Purnea	1	1	2	,,
Darbhanga	2	8	1	,,
Malda	1	4	8	,,

Mr. Collin writes—

"The average rate of rent ascertained in the Muzaffarpur settlement was Rs. 3-12 per acre, while in the Sunkerpur estate of the Dinajpur district the rate is Re. 1-9-3 per acre. It will be seen that the rent rates in the estates are very moderate, and there is no sign of rack-renting. In fact the conditions of the estates are such that it would have been impossible to force up rents in the same way as has been done in Muzaffarpur. The raiyats are, as a rule, aware of their rights, and singularly tenacious of them. They are not subject, as in Bihar, to the attacks of numerous landlords under the system of subdivision of estates. The effect of the lessee system in raising rents has been felt, but not to so great an exent as in Muzaffarpur, chiefly on account of the absence of competition for land. The village system is also in greater force in the estates than in Muzaffarpur, and the raiyats stand by each other in resisting changes of rents. On the other hand, the proprietors appear in past years to have acted reasonably, and to have fostered good relations with their tenants, and the name of Raja Lilanund Singh, father of the present Raja of Banaili, is held in great esteem by the raiyats of the estate."

Comparison of past and settled rentals.

14. In paragraph 85 of his Report Mr. Collin compares past and settled rentals in a statistical table which may be quoted with the remarks which he adds in explanation:—

Name of district.	Name of pargana.	Percentage of—		Percentage of—	
		Increase of area.	Decrease of area.	Increase of rent.	Decrease of rent.
1	2	3	4	5	6
Bhagalpur ...	Daphar ...	21	.....	16	.....
	Harawat ...	4·5	.....	.....	.....
	Khubkhand ...	23·9	.....	2·04	.....
	Utterkhand ...	29	.....	7·3	.....
	Nirsingpur ...	10	.....	.....	·3
	Chai ...	17	.....	2·8	.....
Monghyr ...	Farkya ...	2·4	.....	.....	4·5
Purnea ...	Haveli ...	.....	11	.....	2·3
	Shahpur ...	6·5	.....	.....	11
	Dharampur ...	.....	10	.....	16
	Kadwa ...	6·1	.....	1·2	.....
	Tirakhurdah ...	20	.....	.....	2·7
	Sujanagar ...	.....	4·7	·3	.....
	Tajpur ...	25	.....	.....	4
	Dehat ...	30	.....	.....	3·8
Darbhanga ...	Bhaor ...	14	.....	.....	5
	Fakrabad ...	.....	.....	.....	.....
Malda ...	Akbarabad ...	.....	.....	10·7	.....
	Bhatiya ...	42	.....	17	.....
	Kotwali ...	.....	.....	.....	2·8
	Mahinagar ...	2	.....	8·09	.....
	Sujanagar ...	.....	7	.....	19·3
Total ...	.....	8	.....	·11	.....

"From this statement it will be seen that though the areas of holdings have increased by 8, the net increase of rental has only been ·11 per cent. I have in a previous paragraph (paragraph 66) explained that, where there has been a decrease, it is chiefly due to the exclusion of disputed rents. There is a further reason for the decrease in the fact that, in the landlords' rent-rolls, remissions of rents have not been noted when a raiyat has abandoned his holding, while at the same time, if the lands have been resettled with raiyats, the holding has been shown twice, *i.e.*, the abandoned holding is retained and the new holding is entered in the rent-roll."

Halhasili and Jaidadi tenures.

15. These raiyati holdings are peculiar to the Bhagalpur district, and are prevalent for lands subject to inundation, and where cultivation is precarious along the banks of rivers or on sandy high lands of poor quality. Under the *halhasili* system a raiyat takes up certain lands for which he pays 4 annas per bigha for the first year, and 12 annas per bigha for the second year, and the full rate (which varies from Re. 1-12 to Re. 1-4 in different villages) for the third year. Rent, however, is not paid for the whole holding, but only for such lands as are cultivated and sown with a crop. After three years the lands, if they require a rest, are abandoned and new lands taken up. The *jaidadi* tenure differs from the *halhasili* only in the fact that in the former case the raiyat only pays rent for the land on which a crop is found at harvest time. If the crop of any field is totally lost, the raiyat pays rent for only 2 cottahs or one-tenth per bigha. If the crop has not been injured, the raiyat pays rent on nine-tenths of the area.

Mulberry crops.

16. Mr. Collin gives an interesting account of the cultivation of the mulberry crop, which is grown in parganas Akbarabad, Bhatiya, and Kotwali in the Malda district.

The following table showing the percentage of lands cultivated with this crop is extracted:—

	Total cultivated area in acres.	Percentage of land cultivated with mulberry.
Akbarabad ...	... 7,697	25 per cent.
Bhatiya ...	... 424	39·3 ,,
Kotwali ...	... 892	22·4 ,,

It is stated that, if the season is favourable, half a maund of cocoons will be reared from a bigha of mulberry land at each breeding season, or "bund." The cocoons sell at Rs. 30 to Rs. 35 per maund, so that in a good season the total outturn amounts to Rs. 64 per bigha of 2,500 square yards, the cost of cultivation being Rs. 18 per bigha. The rent is a small item in the cost, being only 10 annas per bigha. The rearing of cocoons is, however, a risky operation, and the "bunds" often fail, especially those of July and September. The best bunds are in December and March. In good seasons the mulberry plant sells at from Re. 1 to Rs. 2 per maund, each bigha producing 10 maunds. Mr. Collin estimates that, taking the average of years, the profits of mulberry cultivation cannot be less than Rs. 25 per bigha of 2,500 square yards, which is equivalent to Rs. 48 per acre.

Maintenance of the records.

17. The enquiry made by Mr. Finucane in February last disclosed that no real attempt was being made to maintain the records and correct the maps. The Manager of the Srinagar estate was absent at Allahabad, but the Manager of the Banaili estate informed him that he was endeavouring to keep up a mutation register, in which it was found that only a small number of mutations relating to transfers by sale had been registered, transfers by succession not being registered at all. Mr. Finucane suggested that copies of the khasra and khatian relating to each village should be given to the patwari, who should be called upon to report the mutations annually in a form devised by him; that an amin should verify the patwari's statements by local enquiry; and that alterations found necessary should be made in the khatians in the tahsil office, or that supplementary khatians should be prepared, under the sub-manager's orders. This and the recording of mutations by sale reported by the purchasers may help to maintain something like a correct record of existing facts, and the Board of Revenue have been requested to submit a report in April 1895, showing what use has been made by the Manager of Mr. Finucane's suggestions.

18. His Honour desires to acknowledge the care and ability with which Mr. Collin conducted the operations entrusted to him. Credit is also due to Babu Barhamdeo Narain for the work done by him under Mr. Collin, and subsequently in connection with the correction of errors in the records.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that a copy be forwarded to the Board of Revenue for information and guidance.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 3rd November, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
Burdwan Divs. 1	Burdwan Nov. 3, '94	0·47	Weather—cloudy and rainy. Prospects of *aman* and sugarcane good. *Rabi* crop is likely to be injured by unseasonable rain. Prices of common rice:—
	Kalna	1·30	
	Katwa	0·03	
	Raniganj	0·02	
			Srs. Burdwan ... ... 11½ to 18; Kalna ... ... 10 to 14; Katwa ... ... 15 1/16; Raniganj ... ... 15 — per rupee.
2	Birbhum „ 3, '94	0·15	Weather—cloudy and unsettled. Paddy still thriving, and *aus* is being reaped. It is raining today (3rd), and the rain is doing harm to the *aus*. Sugarcane good in Rampur Hát, but not in Sadar. Cattle doing well.
	Rampur Hát ...	0·65	
3	Bankura „ 3, '94	0·82	Weather—fine at first, but stormy latterly. Prospects of winter rice very good. Coarse rice sells at—
			Srs. Bankura ... ... 20; Vishnupur ... ... 17½ — per rupee.
4	Midnapore „ 3, '94	1·94	The cold weather seemed to have set in, but there has been heavy rain for the last two days, but no wind. Prospects of *aman dhan* good so far as is at present known. The recent rain has not done material damage. Prices of common rice:—
			Srs. Sadar ... ... 14; Contai ... ... 20; Tamluk ... ... 13½; Ghatal ... ... 14½ — per rupee.
5	Hooghly „ 3, '94	4·30	Cold-weather conditions appeared to be established, but since thursday (1st November) wind has been southerly and south-easterly with very heavy rain. All crops have been doing well, but most of them will suffer to some extent, the *rabi* crop particularly, from this heavy rain. Prices of common rice:—
			Srs. Sadar ... ... 11; Serampore ... ... 11 to 12½; Jahanabad ... ... 14 — per rupee.
6	Howrah „ 3, '94	2·56	Weather—cloudy with rain. Prospects of paddy and sugarcane favourable. Prices continue normal. Common rice sells at—
	Ulubaria ...	0·10	
			Srs. Howrah ... ... 10; Ulubaria ... ... 11 to 13½ — per rupee. Fodder and water-supply sufficient.
Presidency Divs. 7	24-Parganas „ 3, '94	2·99	Weather—rainy and cloudy in the latter part of the week. Prospects of *aman* crop continue generally favourable. Lands are being prepared for *rabi* crops. Cattle-disease reported from Basirhat. Fodder and water sufficient.
8	Nadia „ 3, '94	2·99	Weather—excessively damp and cloudy. The heavy rain of the last two days is not good for the crops, and if it continues damage will be done. Common rice averages 13 seers per rupee.
	Kushtia ...	0·55	
	Meherpur ...	Nil	
	Chuadanga ...	0·06	
	Ranaghat ...	Nil	
9	Murshidabad „ 3, '94	0·52	Weather—cloudy and rainy. Sowing of indigo and *kalai* nearly finished. The rain has partially damaged the *kalai* plants. Supply of fodder not yet sufficient at Jangipur. Common rice sells at 13 seers per rupee.
10	Jessore „ 3, '94	2·17	Weather—cool and rainy in the latter part of the week. Sowing of winter crops retarded by the rain. Prospect of *aman* good. Fodder and water sufficient. Prices of common rice:—
	Jhenida ...	Nil	
	Magura ...	0·05	
11	Narail ...	0·16	Srs. c. Jessore ... ... 11 to 13 0; Jhenida ... ... 15 0; Magura ... ... 15 8; Narail ... ... 14 14; Bangaon ... ... 12 to 16 0 — per rupee.

BENGAL—*concld.*				
Rajshahi Divn.	12	Rajshahi Nov. 3, '94 Nator ... Naugaon ...	0·88 0·85 Nil	Weather—rainy and unseasonable. The jute and *aus* have given full crops on the whole. The winter rice is flourishing, there having been ample rain. No more rain is wanted, though it is raining heavily now. The *rabi* cultivation will be seriously injured; and lands will have to be resown again. There is no cattle-disease reported. Fodder and drinking water ample. Rice is selling from 11 to 14 seers per rupee.
	13	Dinajpur „ 3, '94 Thakurgaon ...	Nil Nil	Weather—cool and cloudy. *Aman* progressing; cultivation of *rabi* crops going on. Fodder and drinking water sufficient. Rice selling at 12 seers per rupee.
	14	Jalpaiguri „ 3, '94	Nil	Weather—cold; clouds, however, still come up daily. Winter rice crop doing well, and sowing of *rabi* crops is being proceeded with satisfactorily. Price of common rice ranges from 10 to 12 seers per rupee.
	15	Darjeeling „ 3, '94 Siliguri ...	0·06 0·27	Weather—cloudy in the early part of the week, bright and cool towards the close. *In the Hills:—Aghani dhan, bara marua* and *kalai* progressing favourably. Potatoes and *phaphur* in blossom. *In the Terai:*—Paddy ripening. Mustard and potatoes are being sown. Prices of coarse rice:— Srs. Hills ... ... 8 to 10 Terai ... ... 10 to 12 } per rupee.
	16	Rangpur „ 3, '94 Gaibanda ... Kurigram ... Nilphamari ...	Nil 1·95 2·45 0·18	Weather—cloudy with slight showers here and there; tolerably cool at night. *Aman* crop doing well. Land is being prepared for tobacco and other cold-weather crops. Some harm has been done by the late heavy showers. Common rice 9 to 10 seers per rupee.
	17	Bogra „ 3, '94 Sherpur ... Naukhila ...	0·20 Nil 0·11	Weather—rainy and cloudy. Prospects of *aman* favourable, but the continuance of rain that is now falling may affect the outturn. Price of common rice stationary (12 seers to the rupee). Fodder and water sufficient.
	18	Pabna „ 3, '94	1·67	Weather—cool and rainy. Prospects of standing crops good. Sowing of *rabi* continues. Common rice selling at 12 seers per rupee. Fodder and water-supply sufficient.
Dacca Divn.	19	Dacca 3, '94	2·83	Cold weather set in, but last three days heavy rain again. Harvesting of *aman* paddy commenced. Prospects good. Ploughing for sowing *rabi* crops going on in some places. Fodder plentiful. Common rice selling from 10 to 16 seers per rupee. No cattle-disease.
	20	Mymensingh „ 3, '94	1·81	Weather—cloudy and cool. The river is again rising. Prospects of standing crops good. Common rice sells at 12½ seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.
	21	Faridpur „ 3, '94 Goalundo ... Madaripur ...	3·28 3·15 0·97	Weather—very unsettled with wind and rain; cold. Prospects of crops fair. Reaping of *aman* crop has begun. Winter crops are being sown. Rice 11½ to 16 seers per rupee.
	22	Backergunge „ 3, '94	0·91	Weather rainy and cloudy with occasional winds. Prospects of crops good, but the rain and winds may affect the *aman* in places. Price of common rice varies from 9 to 13 seers per rupee. Fodder and water sufficient.
Chittagong Divn.	23	Tippera 3, '94	0·25	Weather—seasonable. Prospects of crops excellent. Price of rice falling:— Highest— Srs. c. Kotwali ... ... 13 5 Lowest— Chowdagram 23 0
	24	Noakhali 3, '94	1·63	Weather—cloudy and rainy. State and prospects of *aman* good. Lands are being prepared for *rabi* crops. No cattle-disease. Fodder and water plentiful. Price of rice per rupee:— *Aus.* *Aman.* Srs. Srs. Sadar ... ... 18 12 Fenny ... ... 20 13 } per rupee.
	25	Chittagong 3, '94	0·07	Weather—hot and cloudy at times. Early *aman* ripening and is being harvested in places. Prospects fair. Water and fodder sufficient. Prices steady.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
	BIHAR.		
	PATNA DIVISION.		
26	Patna Nov. 3, '94	0·04	Cold weather setting in; occasionally cloudy. Prospects of rice continue good. Owing to the late rain *rabi* sowings are very backward. Prices continue normal. Common rice selling at—
	Barh ...	Nil	
	Bihar ...	Nil	
	Dinapur ...	0·5	
			Srs.

* Mean of 6 days.

Explanation.—Summary—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for t
The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. T
means of the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in quest
stated on in the district sending in returns divided by the number of stations. A rainy day is one of which at least a tenth of an inch fell.

for the week ending Saturday, the 3rd of November 1894.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1894. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are ...ting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ...inch of rain has fallen.

CALCUTTA, *the 6th November* 1894.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 3RD OF NOVEMBER 1894.

AT the close of the previous week ordinary north-east monsoon conditions appeared to be setting in over Bengal. Light westerly, north-westerly and northerly winds were blowing over the whole province, skies were only lightly to moderately clouded, and rainfall had practically ceased, except for a few local showers in the extreme south of the province. Temperature was low and generally below the normal, and the humidity had decreased and had become fairly low, while pressure was increasing, though it was still in slight defect.

On the 28th of October, or the first day of the present week, a brisk fall of temperature had occurred, and large defects were reported at the northern stations, though excess amounts were registered in the south of the province. Pressure was increasing rapidly, and a steady northerly wind current was reported over the province, and it was again rainless except over Orissa and South-West Bengal. On the 29th conditions were unchanged in Bengal, temperature again fell and was below the normal, skies were almost cloudless, and rainfall was entirely absent, except for one or two local showers in Orissa. In the Bay, however, the first indications of an important change occurred, as pressure fell to the south of Burma and the north-easterly winds blowing at Diamond Island began to strengthen rather rapidly. Indeed it is probable that a barometric depression or storm was forming on this day close to the Andamans or over the Andaman Sea, or it may be even that a depression was crossing into the Andaman Sea from the Gulf of Siam, as was the case three years ago at precisely this season. On the 30th weather continued practically unchanged in Bengal, where temperature was falling, and the whole province was practically rainless. On the other hand the depression in the Bay had developed into a storm, and pressure had fallen moderately at Diamond Island, where wind velocity had increased up to 38 miles an hour at 8 A.M. of that day. On this day the storm centre was probably to the west of the Andamans, and it had probably already commenced a westerly or west-north-westerly movement. On the 31st of October again fine and almost cloudless weather with falling temperature and a practical absence of rain obtained in Bengal. In the Bay the storm had moved in a west-north-westerly direction with moderate rapidity, and its centre was probably almost in the middle of the Bay and in about Latitude 14° N. Judging by the indications at the coast stations, it was now a severe storm, for though the centre was a long distance from the Burma coast, and at perhaps about 450 miles from Diamond Island, the wind velocity at that station for the 24 hours from 8 A.M. of the 30th to the 31st had averaged the large amount of 32 miles an hour. On 1st November the influence of the storm was beginning to extend to Bengal; cloud proportion and humidity were increasing rapidly; showers were also beginning to fall in the south-eastern districts; winds had become part of a large cyclonic circulation and were easterly and north-easterly, and strong winds were commencing at the head of the Bay, while pressure was beginning to fall rapidly in Orissa. Temperature had also begun to increase rapidly as it always does when disturbed weather commences. In the Bay the storm had again advanced, and its centre was apparently in about Latitude 15° or 16° N. and Longitude 84° or 85° E. It had therefore advanced in a north-westerly direction instead of in a west-north-westerly direction as on the previous day. It also, as judged by the coast observation, was still a powerful storm, as at Diamond Island, which must have been about 650 miles from the centre of the storm, the high average wind velocity of 32 miles an hour was still registered. The storm had thus moved in a more northerly direction than on the previous day, and it appeared as if it might recurve without crossing the west coast of the Bay, and this supposition was strengthened by the fact that from 8 A.M. of the 1st to 8 P.M. on the same day the storm made very little forward progress. It usually happens that, when storms are recurving, their rate of advance becomes very slow, and hence it appeared probable that the storm would subsequently move in a northerly and north-north-easterly direction towards the head of the Bay. From 8 P.M. of the 1st, however, the storm again advanced in a north-westerly direction, and it crossed the coast to the south of Coconada and between that station and Masulipatam about 6 A.M. of the 2nd, and at 8 A.M. its centre was near Rajahmundry. In its passage inland it gave much less violent winds than were to be expected from the most definite indications of strength which had been given in the outside area of the storm, and even on the 2nd, when the storm had crossed the Madras Coast, the wind velocity in Burma at Diamond Island averaged the large amount of 26 miles an hour. Hence it was certainly a very large storm, though it does not appear to have concentrated mainly towards its centre as most October and November storms do, and so far there is no evidence of the zone of hurricane winds which usually exists in such storms. On the 2nd the whole of the southern half of Bengal had become largely influenced by the storm, and strong winds forming part of the large cyclonic circulation were blowing at the head of the Bay, and also at some of the inland stations, and indeed the winds over the whole province, were affected by the storm. Skies had become almost overcast, and rain had also recommenced and was general in all divisions except Bihar and parts of Assam. On the 3rd the storm had again moved away in a north-westerly direction and was rapidly filling up. In Bengal, however, winds continued to form part of

the cyclonic circulation, and fairly general rain was still being received over a large part of the province, except in Bihar and Assam.

Pressure.—Owing to the formation and advance of the storm in the Bay, pressure has been below the normal in all districts, and the defects have been largest in the south-western districts. Thus the mean pressure for the week has been in defect by about 0·06″ at such stations as False Point, Cuttack, and Balasore, while in the north and north-east of the province of Bengal the defect has equalled only about 0·01″ to 0·02″.

In Assam the defect has been even smaller, and for the week the average pressure has been below the normal by 0·007″ only.

Temperature.—For the first half of the week temperature was below the normal, while in the second half decided excess temperatures were registered. Hence for the week the mean average temperature has not varied much from the normal, and for the whole of Bengal a defect of only 0·3° has been registered. Orissa, which was the division nearest the storm and disturbed weather in the Bay, has indeed shown an excess of 1·3° for the week, while on the other hand a corresponding defect has been registered in Bihar.

In Assam a defect of 0·4° has been registered in the mean temperature.

Rainfall.—Over the greater part of the province rainfall was practically absent until the last two days, when fairly general and in many cases heavy rain was received. In Orissa, on the other hand, rain was received more frequently, and most stations received showers on the first two or three days and the last two or three days of the week. The large average falls of between two and three inches have been received in Orissa and South-West Bengal, while a fall of about an inch and a quarter has been recorded in East Bengal. Over the remainder of the province the falls have averaged from about a quarter to half an inch. The falls have hence been largely in excess in South-West Bengal and Orissa, in moderate excess in North and East Bengal, and about normal in Chota Nagpur and Bihar. The number of rainy days has been in large excess in all divisions, and they have usually been twice or three times as numerous as in ordinary years.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 700 per cent., North Bengal 320 per cent., East Bengal 174 per cent., Bihar 95 per cent., Orissa 287 per cent., and Chota Nagpur 122 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 283 per cent. of the normal.

In Assam during the week Silchar has received 0·39 inch of rain, Dhubri no rain at all, and Sibsagar 0·05 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 3rd of November 1894:—

Meteorological Divisions.	Temperature.						Rainfall.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

	Inches.
The mean pressure of the seven days	29·881
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·899
	Hours.
The total number of hours of bright sunshine	40·3
The maximum possible number of hours of sunshine	79·0
	°
The mean temperature of the seven days	76·1
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	78·8
The extreme variation of temperature	19·7
The maximum temperature	85·6
	Miles.
The highest velocity of the wind in one hour	12
	%
The mean relative humidity	85
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	74
	Inches.
The total fall of rain from 28th October to 3rd November 1894	3·12
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·48
The total fall from 1st January to 3rd November 1894	48·42
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·93

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ≤, lightning lr. lightning reflection; ≏, dew.

WORKING OF THE BENGAL JUTE WAREHOUSE AND FIRE BRIGADE ACT I OF 1893, IN THE COSSIPORE-CHITPUR AND MANIKTOLA MUNICIPALITIES DURING THE YEAR 1893-94.

THE following reports are published for general information, in accordance with the provisions of section 41 of the Licensed Warehouse and Fire Brigade Act of 1893.

J. A. BOURDILLON,
Offg. Secy. to the Govt. of Bengal.

No. 96M., dated Calcutta, the 24th September 1894.

From—H. C. WILLIAMS, Esq., Offg. Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Municipal Department.

WITH reference to Government letter No. 3312M. of the 15th August last, I have the honour to submit herewith copies of the reports on the working of the Bengal Jute Warehouse and Fire Brigade Act I of 1893, in the Cossipore-Chitpur and Maniktola Municipalities in the district of the 24-Parganas during the year 1893-94, as received from the Magistrate of the 24-Parganas.

No. 794, dated Talla, the 4th September 1894.

From—Rai Gopal Chandra Mookerjee, Bahadur, c.e., Chairman of the Cossipore-Chitpur Municipality,

To—The Magistrate of the 24-Parganas, Alipore.

With reference to your memorandum No. 781M. of the 22nd ultimo, forwarding a copy of Bengal Government letter No. 3312M. of the 15th idem, calling for early submission of the report on the working of the Bengal Jute Warehouse and Fire Brigade Act in the Cossipore-Chitpur Municipality for the year 1893-94, I have the honour to submit the following report.

The management of the Fire Brigade in Calcutta and the suburbs is in the hands of the Commissioner of Police, Calcutta, and that officer has already submitted his report to the Government of Bengal.

2. As regards the working of licensed warehouses, I beg to state that under Act I of 1893, which passed through the Bengal Council on the 1st April 1893, and received the assent of the Governor-General on the 17th June 1893, and was published in the *Calcutta Gazette* on the 28th June, and under orders of the Government of Bengal No. 300T.M. of the 26th June 1893, license fees for the 1st quarter for all warehouses described in clause (8), section 1 of the Act, were required to be collected according to Act IV of 1883, and of the other three quarters according to Act I of 1893. But it was found, however, that there were several technical objections to the levying of fees under the new Act, and on representations being made to the Bengal Government through the Commissioner of Police, Calcutta (*vide* my letter No. 709 of the 25th August 1893), a short amending Act was passed in the Bengal Legislative Council towards the close of the year under report, by which the Commissioners were authorized to levy fees on warehouses for the last three quarters according to the provisions of the old Act IV of 1883. The operation of Bengal Act I of 1893 was therefore postponed to the 1st April 1894.

3. On the 14th July 1893, the Commissioners received intimation from the Commissioner of Police, Calcutta, of the appointment of Mr. G. E. Marklew as Inspector of Warehouses, under section 8, clause 1 of Act I of 1893, and the pay of the Jute Inspector attached to the Cossipore-Chitpur was therefore stopped from July 1893.

4. Under the old Act the Commissioners received 20 per cent. of the collection towards the cost of inspection and assessment of warehouses. This arrangement having been altered by Act I of 1893, the Commissioner of Police was written to on the subject in reply to his letter No. 9689 of the 14th December 1893, and the Government of Bengal, in their letter No. 3987M. of the 16th December 1893, requested the Commissioner of Police to make provision for the cost of assessing and collecting the rates of warehouses in his budget, and the latter made provision for Rs. 250 under the head for the Cossipore-Chitpur Commissioners for the last three quarters, which amount has been sanctioned by the Government.

5. Act I of 1893 became law on the 17th June 1893, and as under the old Act IV, 1883, the annual fee imposed in respect of a warehouse had to be collected in advance and in one instalment, the persons who took out licenses between the 1st April 1893 and 30th June following, paid the fees under the old scale of 10 per cent. on the assessed value of the warehouses, and thus the Commissioners were able to collect sum more than sufficient to meet the first demand of the Commissioner of Police in reference to his first budget estimate.

6. In accordance with Government order No. 29T.M. of the 30th August 1893, the Commissioner of Police estimated Rs. 14,589 as the share due by the Commissioners of Cossipore-Chitpur for the maintenance of the Fire Brigade, and this amount was paid to the Commissioner of Police in the way shewn in the statement under head "Disbursement," in paragraph 9.

7. During the year under review licenses were granted to 72 jute presses and warehouses, and the amount of license fees realized therefrom was Rs. 28,442-4-3, thus:—

		Rs.	A.	P.
12	Jute presshouses	20,218	5	0
50	„ warehouses	7,800	4	0
2	Cotton warehouses	126	0	0
1	Warehouse for storing rags	15	3	3
7	Roperies	282	8	0
	Total ...	28,442	4	3

The license fees of three warehouses still remained to be paid when the year came to a close.

8. The accompanying statement gives a complete list of the jute-presses, warehouses, roperies, &c., to which licenses were granted during the year 1893-94.

9. The following statement shows the receipts and disbursements of the jute license fees during the year under review:—

Receipts.	Amount.	Disbursements.	Amount.
1	2	3	4
	Rs. A. P.		Rs. A. P.
License fee for the 1st quarter of 1893-94 according to Act VI of 1883.	8,415 12 3	Paid to the Commissioner of Police for the maintenance of fire-brigade for the year 1893-94, as per Commissioner of Police's budget estimate and Government of Bengal's order No. 29T.—M. of the 30th August 1893.	14,589 0 0
Ditto for the remaining three quarters of 1893-94 according to Act I of 1893.	11,856 10 3		
Ditto realized in excess from the persons who paid the full amount of license fees under the old scale according to Act IV of 1883, and took out licenses between 1st April and 30th June 1893.	8,169 13 9	Paid to the municipal fund 20 per cent. of the amount of license fees realized for the 1st quarter of 1893-94, according to Act IV of 1883.	1,683 2 6
		Balance at the hands of the Commissioners on the 31st March 1894.	12,170 1 9
Total ...	28,442 4 3	Total ...	28,442 4 3

10. The Manager of the Union Pressing Company, Limited, was prosecuted for not having paid the full amount of license fee according to Government orders, and for having carried on his work without obtaining a license. He was prosecuted in the Sealdah Deputy Magistrate's Court, and subsequently paid the full amount of the fee, and a license was granted to him. Twelve owners or occupiers of jute warehouses and roperies were also prosecuted for not taking out licenses, and for infringing some of the rules laid down in Act I of 1893, and they were fined by the Deputy Magistrate of Sealdah.

RAM DAS ROY CHOWDHURI,

Secretary, Cossipore-Chitpur Municipality.

Report on the working of the Bengal Jute Warehouse and Fire Brigade Act I of 1893 *in the Maniktola Municipality.*

DURING the year under review there were nine jute warehouse against eight of the preceding year, and 13 warehouses dealing with more than 50 maunds of firewood, hay and packing cases assessable under the new Act, and by subsequent Government Notification No. 2853M., dated the 14th August 1893. Agreeably to the provisions of the Act, license fees for three quarters of the year were levied upon the assessed value of holdings under the Fire Brigade Act, the fees for the 1st quarter having been recovered under Act IV of 1883 in the case of jute warehouses and under section 261 of the Municipal Act in the case of other warehouses, the Commissioners in meeting resolved that the owners of jute warehouses should pay at 6 per cent. and other warehouses at 10 per cent. on the annual value of holdings in which they carry on their business, and that three quarters' fees were realized at those rates; but some of the owners of jute warehouses paid at 10 per cent. before the new Act came into force, and proportionate refund had to be made in such cases. The loss to the Commissioners on account of partial repeal of section 261 of the Municipal Act is estimated at

Rs. 240, being the difference of the fees which would have been leviable according to the scale of fees prescribed under section 261, which is based upon the principles of measurement under that section, and is found to be somewhat higher than the rate on the assessed value now levied under the new Act.

There was a further loss to the Municipality to the extent of 20 per cent. on the realization on jute warehouses on account of repeal of Act IV of 1883, which entitled the Commissioners (section 16 of the Act) to appropriate 20 per cent. of the fees and penalties received and levied under that Act to its general fund. Under the Jute Warehouse Act it is no longer necessary or incumbent on the Municipality to provide for the inspection of those warehouses, as a separate Inspector has been appointed directly under the Commissioner of Police. But the Commissioners have to provide for the assessment and collection of fees.

2. A sum of Rs. 966-8-3 was received during the year as license fees from jute and other warehouses against Rs. 585-14 received only from jute warehouses of the preceding year, and the Municipal Commissioners contributed Rs. 1,088-9-7 for the maintenance of Fire Brigade Fund, which included Rs. 520-9-7 for the contribution of the previous year, and an excess payment of Rs. 478, as shewn in the budget estimate of the Commissioner of Police for the year 1894-95.

3. The Municipal Commissioners accepted the revised budget estimate of the cost of the Fire Brigade for the year 1893-94 of their own share, *i.e.*, Rs. 468, which was forwarded by the Commissioner of Police on the 3rd February 1894.

4. The jute godowns within the limits of this municipality are all pucka brick-built houses, but the firewood depôts were on open grounds on the sides of the Circular Canal. It is said that the jute business was not very prosperous, and only two to three lakhs of maunds of jute were imported into the warehouses. The jute and firewood are brought generally by country boats from the eastern districts through the Circular Canal, and are landed in its sides. Large quantities of jute are also brought into the godown by the Eastern Bengal State Railway.

5. No fire took place anywhere within the municipality requiring the help of the Fire Brigade during the year.

ABINASH CHUNDER BOSE, *Vice-Chairman.*

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 10th November, 1894.

14	Jalpaiguri „ 10, '94	0·04	Cold weather has set in. Winter rice crop doing well everywhere. Cold-weather crops are being sown. Price of rice ranges from 10 to 13 seers per rupee. No cattle-disease reported this week.
15	Darjeeling „ 10, '94 Siliguri ...	0·02 0·28	Weather—bright and cold. *In the Hills :—Haimanti* paddy, *bara marua* and *kalai* are being harvested. Potatoes and *phaphur* in blossom. *In the Terai :—Haimanti* paddy ripening. Rain is interfering with the ploughing of lands. Prices of coarse rice :— Srs. Hills ... ... 8 to 10 Terai ... ... 10 } per rupee.
16	Rangpur „ 10, '94 Nilphamari ... Gaibanda ... Ulipur ...	0·46 0·02 1·09 Nil	Weather—seasonable. *Aman* crop doing well. Mustard is being sown, but the late rain will retard sowings a good deal and will affect the outturn. Common rice sells from 9 to 14 seers per rupee.
17	Bogra „ 10, '94 Sherpur ...	5·62 2·45	Weather—seasonable. Prospects of *aman* continue favourable. Lands are being ploughed for *rabi* crops. Common rice selling at 13½ seers per rupee Fodder and water sufficient.
18	Pabna „ 10, '94	1·84	Weather—cool. Prospects continue good throughout the district. Sowing of *rabi* crops in progress. Common rice selling at 12 seers per rupee and jute at Rs. 4 to Rs. 5 per maund. Fodder and water-supply sufficient.
DACCA DIVN.			
19	Dacca „ 10, '94	1·70	Weather—first part of the week was rainy and the latter part cool. Harvesting of *aman* paddy going on; prospects good. Fodder available. Common rice selling from 10 to 13 seers per rupee. No cattle-disease.
20	Mymensingh „ 10, '94	3·05	Weather—cold and rainy. The river is falling. Prospect of *aman* crop good. Common rice sells at 12½ seers per rupee. No cattle-disease. Fodder and water available.
21	Faridpur „ 10, '94 Goalundo ... Madaripur ...	5·19 7·87 3·56	Weather—seasonable. Prospect of *amam* crop fair. *Digha* and *Asvini* paddy being harvested. Sowing of winter crops has begun. Price of common rice ranges from 14 to 16 seers per rupee. Condition of cattle good. Fodder available.
22	Backergunge „ 10, '94	2·63	Weather—seasonable. State and prospects of crops good though slightly damaged by rain in places. Price of common rice varies from 9 to 13 seers per rupee. Fodder and water sufficient.
CHITTAGONG DIVN.			
23	Tippera „ 10, '94	1·11	Weather—cool. The late rain has done much good to the standing crops. Prospects excellent. The price of rice is falling— Srs. c. Highest— Kotwali ... ... 13 5 Lowest— Chowdagram ... ... 22 12 } per rupee.
24	Noakhali „ 10, '94	1·56	Weather—seasonable. State and prospects of *aman* good. *Rabi* crops are being sown. No cattle-disease. Fodder and water available. Price of rice :— *Aus* *Aman.* Srs. Srs. Sadar ... ... 18 12 Fenny ... ... 18 13 } per rupee.
25	Chittagong „ 10, '94	1·56	Weather—seasonable. Early *aman* ripening and is being harvested in places. Lands are being ploughed for old-weather crops. Prospects fair. Prices steady. Water and fodder sufficient.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
	BIHAR.		
	PATNA DIVISION.		
26	Patna — Nov. 10, '94	1·06	Weather—generally clear and cool. Prospects of rice continue excellent. Sowing of *rabi* and poppy has commenced on high lands, but the country is still very wet, and the spring crops will be very late. Prices of common rice:—
	Bihar ...	0·23	
	Dinapur ...	2·88	
	Barh ...	0·45	
			Srs.
			Sadar ... ... 16 }
			Bihar ... ... 15½ } per rupee.
			Dinapur ... ... 11 to 14½ } per rupee.
			Barh ... ... 12½ } per rupee.
27	Gaya — „ 10, '94	2·88	Weather—stormy and rainy up to 5th November; clear and cool since. Paddy prospects tolerably good, though injured by the rain. *Rabi* sowings recommenced. Prices about normal. Prices of common rice:—
	Nawada ...	0·71	
	Jahanabad ...	1·45	
	Aurangabad ...	1·49	
			Srs.
			Sadar ... ... 13½ }
			Jahanabad ... ... 14½ } per rupee.
			Aurangabad ... ... 15 } per rupee.
			Nawada ... ... 17 } per rupee.
			Fodder and water-supply ample.
28	Shahabad — „ 10, '94	1·61	Weather—fine and seasonable. The recent rain has injured the rice crop to some extent, and has damaged the prospect of the *rabi* crop by retarding sowings. The wheat especially will suffer.
	Buxar ...	5·26	
	Sasaram ...	1·19	
	Bhabua ...	2·88	
29	Saran — „ 10, '94	2·75	Weather—cloudy with showers of rain in the beginning of the week; fine since last three days. *Aghani* paddy doing well. The recent rain has much retarded the *rabi* sowings and damaged the crops already sown. Fodder and water plentiful. Prices of common rice:—
	Siwan ...	1·14	
	Gopalganj ...	1·52	
			Srs. c.
			Chapra ... ... 15 8 }
			Siwan ... ... 15 0 } per rupee.
			Gopalganj ... ... 15 6 } per rupee.
30	Champaran — „ 10, '94	2·01	Weather—rainy in the beginning of the week, but clear towards the end. Nights are getting cool. *Aghani* paddy in flower. Prospects continue generally good. *Rabi* sowing has again commenced. Poppy cultivation retarded in places owing to excessive moisture. Early sowings germinating and the plants are doing well. Common rice selling at 18 seers per rupee. Fodder and water sufficient for cattle.
31	Muzaffarpur — „ 10, '94	1·87	Weather—cloudy for the first two or three days, but now clear with west wind. *Rabi* sowings have been again taken up on high lands. Low lands are still too moist owing to excessive rain. Paddy crop is doing well. Poppy-seeds are again being sown as the lands become drier. Fodder and water ample. Common rice selling at 13½ seers per rupee.
	Hajipur ...	1·35	
	Sitamarhi ...	1·04	
32	Darbhanga — .. 10, '94	0·77	Weather—rainy and cloudy in the early part of the week. The rainfall of the week has somewhat injured the *aghani* rice in blossom and also retarded the progress of *rabi* sowing. Poppy sowing commenced in places. Fodder for cattle sufficient. Prices stationary.
	BHAGALPUR DIVISION.		
33	Monghyr — „ 10, '94	0·15	Weather—cold and cloudy. *Rabi* being sown. Prospects of paddy and chilly continue good. Sugarcane is being harvested. Fodder and water sufficient. Prices of common rice:—
	Begusarai ...	0·69	
	Jamui ...	0·46	
			Srs.
			Sadar ... ... 11 to 16 }
			Begusarai ... ... 12 } per rupee.
			Jamui ... ... 15½ } per rupee.
34	Bhagalpur — „ 10, '94	0·53	The cold weather has set in with the usual characteristics. The prospects of the rice crop are excellent. *Rabi* sowing is in active progress. Some damage has been done to the mustard by the rainfall; but on the whole the outlook leaves little to be desired. Common rice 13 seers 14 chitaks per rupee.
	Banka ...	Nil	
	Madhipura ...	0·22	
	Supaul ...	Nil	
35	Purnea — „ 10, '94	0·08	Weather—cool. Prospects of winter rice excellent. Mustard and tobacco sowings begun. No cattle-disease. Fodder and water plentiful. Average price of rice 16 seers per rupee.
	Kishanganj ...	Nil	
	Araria ...	Nil	

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*			
Bhagalpur Divs.—*concld.* 36	Malda Nov. 10, '94 Chanchal ... Shibganj ..	0·16 0·04 3·48	Mornings and nights cool. High wind prevails in a mild form. Sky has cleared up. The break in the rains was of unusual good to all agricultual operations. Prospect of winter rice continues favourable: it is coming into maturity. *Kalai* pulse thriving. *Rabi* crops are being sown. Ordinary rice selling from 12 to 18½ seers a rupee. Fodder and water ample.
37	Sonthal Parganas „ 10, '94 Deoghur ... Godda ... Jamtara ... Pakour .. Rajmahal ...	1·78 1·04 4·84 1·98 5·20 0·43	Cold weather has commenced. Rain has done slight damage to paddy and retarded sowing of *rabi* crops, but prospects are on the whole good. Rice cheaper than at this time last year.
ORISSA.			
Orissa Divs. 38	Cuttack „ 10, '94	2·17	Weather—rainy; sky clear since 8th. *Laghu sarad* is ripening and being harvested. *Garu sarad* in ear. *Rabi* crops in progress. The rainfall in Kendrapara during the week was 6·26 inches, which appears to have damaged both *rabi* and *sarad* crops to a certain extent. Condition of cattle good. Fodder sufficient. Common rice sells at— Srs. c. Srs. c. Sadar ... ... 10 8 to 16 7 Jajpur ... ... 13 2 to 15 12 Kendrapara ... ... 12 8 to 18 0 } per rupee. Banki 17 1
39	Balasore „ 10, '94	3·11	Weather—bright; cold in the morning and evening. Harvesting of early *sarad* going on. Late *sarad* doing well. The sowing of winter crops has been delayed owing to the rain of the preceding week. Rice is selling at— Srs. Balasore ... ... 18 Bhadrak ... ... 18 Dhamnagar ... ... 14 } per rupee. Chandbali ... ... 18 Fodder and water for cattle sufficient.
40	Puri „ 8, '94 Khurda ...	2·22 2·91	Weather—cloudy with occasional showers of rain. *Sarad* rice is in ear. *Laghu* rice is being reaped. State of miscellaneous crops good. Ploughing for *dalua* rice has begun. Rice sells from 11 to 17½ seers per rupee.
CHOTA NAGPUR.			
South-West Frontier Agency.			
Chota Nagpur Divs. 41	Hazaribagh Nov. 10, '94 Giridi ..	Nil Not reported.	Weather—bright and cool. Prospects of crops generally good. *Rabi* sowings backward. Common rice selling from 12 to 18 seers per rupee.
42	Lohardaga „ 10, '94	0·56	Weather—seasonable. Sowing of potatoes continues. Reaping of winter paddy commenced. Common rice selling at 16 seers per rupee. Fodder and water sufficient.
43	Palamau „ 8, '94	0·48	Weather—first part of the week cloudy, now seasonable. The winter has set in. Rain was general all over the district except at Bisrampur. Paddy is being harvested. The recent rain has done mischief to a slight extent. No cattle-disease. Price of rice varies from 14 seers at Garhowa to 20 seers per rupee at Mahuadad.
44	Manbhum „ 10, '94 Gobindpur ...	Nil Nil	Weather—seasonable. Reaping of winter rice has begun. Prospects good. Price of common rice 12 to 20 seers per rupee.
45	Singhbhum „ 10, '94	0·09	Weather—bright and cold. Crops are doing well. Paddy being harvested with full outturn. Rice selling at 18 to 20 seers per rupee.

Published for general information.

STATISTICAL DEPARTMENT,
The 10th November, 1894.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of October 1894.

	Inches.	Date.	Hour.
The mean pressure of the month	29·811		
The average pressure of October from 24 years' registers ...	29·832		
The highest pressure in the month	29·972	19th	10
The lowest pressure in the month	29·520	2nd	16
The range of pressure	0·452		
	Hours.		
The total number of hours of bright sunshine during the month	194·3		
The maximum possible number of hours of sunshine ...	359·1		
	⊖		
The mean temperature of the month	80·2		
The average temperature of October from 24 years' registers	81·5		
The highest temperature in the month	88·4	7th	
The lowest temperature in the month	65·9	31st	
The range of temperature during the month	22·5		
The mean daily range of temperature	10·4		
The greatest range of temperature in one day	15·1	31st	
	Per cent.		
The mean humidity of the month	87		
The average humidity of October from 24 years' registers ...	79		
	Inches.		
The mean vapour tension of the month	0·900		
The average vapour tension of October from 9 years' registers	0·854		
The mean cloud proportion of the month	4·48		
The average cloud proportion of October from 17 years' registers	4·03		
	Inches.		
The total rainfall of the month	4·41		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	3·53?		
The average fall of October from 48 years' registers ...	5·61		
The greatest fall in 24 hours	1·14	9th	
	Days.		
The number of rainy days in the month	18		
The average number of rainy days in October from 24 years' registers	10		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	145·0		
The mean difference of sun and air temperatures	59·3		
The greatest sun temperature	155·3	12th	
The greatest excess of sun over air temperature	68·7	12th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	72·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	3·0		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	5·4	31st	
	Miles.		
The mean movement of the wind per day	50·6		
The greatest movement of the wind in one day	153·0	25th	
The greatest movement of the wind in one hour	18·0	25th	11 to noon.

The number of hours with winds from each of the 8 points—
N. 52, N.E. 21, E. 34, S.E. 100, S. 152, S.W. 123, W. 62, N.W. 22, Calm 178.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·8 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

* Mean of 6 days.

Explanation.—Summary—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for th
The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. Th
means of the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in questio
state on in the district sending in returns divided by the number of stations. A rainy day is one of which at least a tenth of an inch fell.

for the week ending Saturday, the 10th of November 1894.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1894. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are missing the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0 inch of rain has fallen.

CALCUTTA, *the 13th November* 1894.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 10TH OF NOVEMBER 1894.

DURING the previous week a cyclonic storm had formed in the Bay and had advanced across the Madras coast on the morning of Friday, the 2nd instant, between Coconada and Masulipatam. It was a large storm, and the cyclonic circulation of winds in connection with it had swept over the whole of Bengal, and hence had given moist south-easterly and easterly winds and very disturbed weather. Hence on the 3rd, or the last day of the previous week, rainfall had been practically general over the province. This disturbed weather continued on the 4th. Moderately strong and very moist easterly winds were blowing over the whole province, temperature was rising and was unusually high, the sky was almost overcast, and humidity was also excessive, while the changes of pressure were unimportant. On the 5th, however, conditions began to change, and westerly winds appeared in the south-western districts, and hence began to slowly drive back the moist easterly winds which had been previously blowing. Pressure also began to rise slowly to moderately, and temperature had again risen and had become in excess by from 3° to 4°. With the commencement of westerly winds the sky began to clear in Orissa and Chota Nagpur, where rainfall was also light, though it was still fairly general over the remainder of the province, except in North Bengal. On the 6th again the westerly winds had extended and prevailed over the western half of the province, while irregular winds were blowing elsewhere. Pressure had also risen moderately over the west of the province, though it was falling over the eastern half, while temperature, humidity, and cloud proportion commenced to decrease in Bihar and at the western stations generally. The rainfall on this day also was confined practically to Assam, East Bengal, and Bihar. On the 7th, the dry north-westerly and westerly winds had swept over the whole province, and hence fine settled weather was setting in. Pressure was, however, still below the normal, while temperature, humidity, and cloud proportion were rapidly decreasing, the decrease being largest at the western stations. Rainfall had again been received in East Bengal and Assam, but the remainder of the province was practically rainless. On the 8th a brisk increase of pressure occurred, and pressure became in excess in all districts. A further brisk fall of temperature occurred, humidity and cloud proportion also decreased, and no rainfall was reported, except for a few showers in Assam and Orissa. On the 9th the same changes again occurred, and the fall of temperature was very pronounced, and at such stations as Chaibassa the fall in the mean temperature equalled 10° from the 8th to the 9th instant, and exceeded 5° at many other stations, and hence the mean temperature of the province on the 9th was in considerable defect, the variation ranging up to from 4° to 6° in the south-west of the province. The sky also became practically cloudless, and humidity again decreased, and the air became unusually dry over the western half of the province. Pressure had also became in excess by amounts ranging up to a tenth of an inch at False Point, and the whole province was rainless. Similar conditions again obtained on the 10th. Thus during the second half of the week fine settled weather rapidly set in over the province, and the cold weather conditions became established.

Pressure.—The variations of the pressure from the normal for the week have not been large, for during the first half defective pressures were registered, while pressure was in excess at the end of the week. These variations have hence neutralized one another to a great extent, and the mean pressure for the province has been generally in excess by about 0·01″. In Bihar and at some of the stations in North Bengal, pressure has been in slight defect, but elsewhere it has been in excess, the largest variations having been registered in the south-east of the province.

In Assam the mean average pressure has been in excess by 0·011″.

Temperature.—The variations of temperature during the week have been large, and temperature was considerably in excess in the early part of the week, and equally largely in defect in the latter part. Again, therefore, the variation from the normal has been small, and for the whole province, the mean temperature for the week has been in excess by 0·6°.

In Assam the mean temperature has been in excess by 0·7°.

Rainfall was unusually heavy for the season in the early part of the week, but in the second half the province has been rainless. East Bengal has received an average fall of 2·40 inches and South-West Bengal, Bihar and Orissa falls between one and two inches, while in North Bengal and Chota Nagpur the falls have been from about half to one inch. These falls vary from about four times the normal amount in Orissa and Chota Nagpur to from ten to eighteen times the normal in East and South-West Bengal and Bihar. The number of rainy days during the week has also been very much larger than usual.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following :—South-West Bengal 1,223 per cent., North Bengal 720 per cent., East Bengal 1,000 per cent., Bihar 1,800 per cent., Orissa 351 per cent., and Chota Nagpur 460 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 926 per cent. of the normal.

In Assam, during the week Silchar has received 7·07 inches of rain, Dhubri 0·02 inch and Sibsagar 0·74 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 10th of November 1894:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The maximum possible number of hours of sunshine		78·1
		°
The mean temperature of the seven days		75·3
The average temperature of the corresponding period for 24 years, Surveyor-General's Office		77·4
The extreme variation of temperature		24·4
The maximum temperature		85·3
		Miles.
The highest velocity of the wind in one hour		9
		%
The mean relative humidity		82
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		74
		Inches.
The total fall of rain from 4th to 10th November 1894		0·16
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·37
The total fall from 1st January to 10th November 1894		48·58
The average fall of the corresponding period for 24 years, Surveyor-General's Office		65·30

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; ≤, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 12th November 1894.

J. H. GILLILAND,

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF 1894-95.

No. 924B., dated Calcutta, the 12th November 1894.

From—N. K. BOSE, Esq., Offg. Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

Hon'ble D. R. LYALL, C.S.I.

I AM directed to submit the following report on the state of the salt market for the second quarter of 1894-95, comprising the months of July, August and September 1894.

2. The quantity of salt of every description cleared during the quarter under report amounted to 27,54,188 maunds against 27,18,594 maunds in the previous quarter, and 24,44,590 maunds in the corresponding quarter of the previous year; and the net duty levied thereon was Rs. 63,79,206 against Rs. 64,42,704 in the previous quarter, and Rs. 57,21,769 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of excise salt removed from the golas in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter are shown in table I:—

TABLE I.

	Puri.	
	Mds.	s.
Balance at close of the last quarter ...	1,61,396	0
Manufactured or added during the quarter	54,628	0
Total	2,16,024	0
Sales during the quarter	12,023	0
Wastage	3,300	0
Total	15,323	0
Balance at close of the quarter	2,00,701	0

There was no salt in golas in the other two districts.

4. The total sale of excise salt during the quarter under review amounted to 12,023 maunds against 4,586 maunds in the previous quarter, and 15,456 maunds in the corresponding quarter of the previous year. The total amount of excise salt on which duty was paid during the quarter was 12,023 maunds.

5. The subjoined table shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review compared with the figures of the corresponding quarters of the previous two years:—

Sulkea Government golas	6,42,906	7,94,073	9,86,216	14,74,417	29,92,134
Chittagong ditto	36,993	91,185	1,53,832	74,381	1,18,723
Total ...	6,79,889	8,85,263	11,40,048	15,48,798	31,10,857

The principal feature of the quarter is the large increase of salt in bond in Calcutta, the total having more than doubled during the period under review.

7. The despatches of salt from Calcutta by water and the three railways passing the several salt-pass stations into the interior of the country both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter under review and the corresponding quarters of the previous two years, are shown in the table below:—

TABLE IV.

PERIOD.	BY WATER.					BY RAIL.			BY STEAMERS AND FLATS.

8. The quantity of salt despatched by the East Indian Railway to stations beyond Buxar during the quarter under review amounted to 2,248 maunds 20 seers as noted in the margin, against 1,873 maunds 30 seers in the previous quarter and 1,438 maunds in the corresponding quarter of the previous year.

	Mds.	s.
July ...	749	20
August ...	374	30
September	1,124	10
Total	2,248	20

9. The quantity of saltpetre-salt removed from the refineries on payment of duty amounted to 6,238 maunds against 8,258 maunds in the previous quarter, and 4,311 maunds in the corresponding quarter of the previous year.

10. The shipments of Liverpool salt for the port of Calcutta according to published market reports were as follows:—

	Tons.
July	18,110
August	21,070
September	6,750
	45,930

It is reported that 7,050 tons of Hamburg salt were shipped for Calcutta during the quarter under review.

11. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter:—

TABLE V.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF OCTOBER 1894.

DURING the last week of September a barometric depression which had formed in the north of the Bay had passed inland near Puri, and had advanced at first in a west-north-westerly direction, and then in a northerly and north-easterly path, and had broken up against the Himalayas, probably to the north of Bihar, on the 2nd of October. This brought up another though rather feeble wave of monsoon winds to Bengal, and hence at the beginning of October rainfall was still being received over a large part of the province. At this time the first barometric depression of the month was formed which, however, was rather feeble in character.

Feeble barometric depression of October 2nd to 6th.—While, however, the first storm was advancing in a north-easterly direction towards the Himalayas, where it broke up on the 2nd, another feeble depression was forming in the Bay. On the 1st pressure had fallen over the whole province, the fall being rather rapid in Orissa, where it exceeded a twentieth of an inch, and where pressure was in defect by amounts ranging up to 0·189 inch at Cuttack. On this day ordinary but rather strong monsoon winds only prevailed over the whole Bay. On the 2nd a further slow to moderate fall of pressure occurred over the whole province, the fall exceeding a twentieth of an inch at the stations in the north-west angle of the Bay, and pressure became below the normal by amounts ranging up to 0·229 inch at Balasore and Saugor Island, and 0·220 inch at False Point and Cuttack. A very decided cyclonic circulation of winds also set up round the north-west angle of the Bay, the centre of the circulation being to the south of Saugor Island and to the east of False Point, but the wind force in connection with this circulation was light. The depression commenced to move in a north-westerly direction almost as soon as it had formed, and the centre of the feeble storm passed between Saugor Island and Balasore on the evening of the 2nd, and at 8 A.M. of the 3rd the centre was between Chaibassa and Balasore, and nearer the former station than the latter. On the 4th the feeble depression had again moved in a north-westerly direction, and was to the west of Hazaribagh, but it was apparently beginning to fill up. On the 5th the small cyclonic storm had advanced about 250 miles in a north-westerly direction, and its centre was near Lucknow, and the depression at the centre of the storm was greater and the gradients were steeper, and the storm was giving heavy rain in the North-West Provinces, though the falls were lighter in Bengal. On the 6th the storm had advanced in a northerly direction, and it had broken up against the Himalayas probably not very far from Naini Tal.

With the formation of the depression on the 2nd and the commencement of its inland advance on the evening of this day, another feeble burst of monsoon winds began to flow over Bengal, and hence from the 3rd instant rainfall again was general over the whole province; this general rainfall continued on the 4th and 5th, while on the 6th it was again becoming decidedly local.

The effects of this depression had to a great extent passed away at the end of the first week in October, and on the 7th pressure was rising; while the moist easterly and south-easterly winds which had flowed over Bengal after the depression were being gradually driven back by an advancing north-westerly wind current, which was making itself felt in Bihar and Chota Nagpur. On the 8th the north-westerly winds had again extended, and the general rainfall had almost ceased, though owing to the interaction which was taking place between the two opposing wind systems some heavy local falls of rain occurred. A partial re-establishment of the moist easterly and south-easterly wind current, however, occurred on the 9th and 10th, but on the 11th and 12th again more or less westerly winds were setting in at some of the western stations, and a feeble tendency to cyclonic circulation of winds was set up in Bihar. Rather general rain therefore again occurred, and on the 12th heavy rainfall was reported in the north of the province. On the 13th the lowest pressure had retreated southwards to Central and South-West Bengal, where an irregular cyclonic circulation of winds existed, and with the southerly movement of the area of disturbance, the area of general rainfall also retreated, and on the 13th moderate general rain was received in all districts. On the 14th the area of lowest pressure had again retreated southwards, and comparatively high pressure was establishing itself in the north of the province, while more or less northerly winds were again setting in over a considerable area. On the 15th, 16th, and 17th, these changes continued, and on the 17th pressure had risen briskly over practically the whole province, and it had become for the first time for a considerable period in excess of the normal, though the excess amounts were small. The area of lowest pressure had again retreated southwards down the Bay. The easterly winds had to a considerable extent retreated from Bengal, and weather became much more settled over the province, though showers were still being received in South-West and North Bengal and Orissa.

In the centre and south of the Bay on this date, the 17th instant, however, conditions had become suspicious, and were favourable for the development of a storm, and about this period the second storm of the month was formed. This was a decidedly more influential storm than the former one, but it was still only of diffused and rather feeble nature.

Feeble diffused cyclonic storm of October 18th to 22nd instant.—The disturbed conditions which existed on the 17th probably concentrated and formed a definite though diffused storm on the 18th, which commenced to move slowly in a west-north-westerly direction, and on the 19th was still a considerable distance from the Madras coast. On the 20th the diffused storm had again advanced in a west-north-westerly direction towards the Coromandel coast, and its centre was still some little distance from the coast and probably opposite Madras. The disturbance was a large one, and it was giving strong winds and squally weather as far north as Coconada. The diffused storm continued its advance, and the centre passed inland a little to the north of Madras, and probably between that station and Nellore, in the early morning of the 21st. The disturbance was of feeble strength near its centre, but at considerable distances from the centre, it was accompanied by very strong winds, specially to the north, and at such stations as Coconada, and Masulipatam, and even in Ceylon at Galle, very strong winds, and at certain times a severe gale of wind, were reported. Decidedly heavy rain was also brought up to the Madras coast during the approach and passage of the depression over the land. The diffused storm apparently either broke up on striking the coast, or it may perhaps have passed across the peninsula in a feeble form, and have afterwards developed into a more severe storm which advanced up the Bombay coast, and filled up in Guzerat on the 27th. At all events so far as the weather in the Bay of Bengal is concerned, on the 22nd it had practically ceased to exist.

The storm as usual brought with it a moderately heavy wave of monsoon winds, and when the depression had passed away this wave began to spread northwards along the west coast of the Bay. On the 22nd this wave had reached Orissa, and moderate general rain was received over that district. On the 23rd the moist south-westerly winds set in over the whole of Bengal, and winds became strong at the head of the Bay, and from about the 23rd rainfall again became general in Bengal, and on the 24th the falls were particularly heavy in Bihar. This heavy precipitation was followed on the 25th by a rapid fall of pressure over the northern half of the province, and a very distinct barometric depression was formed over this area, the defect ranging up to 0·14 inch at Bhagalpur, and the depression was accompanied by a distinct cyclonic circulation of winds. With the formation of the depression further heavy rain was determined to the north of the province, and the depression increased in depth on the 26th and moved more towards North Bengal and Assam, where defects of nearly a quarter of an inch were recorded. A strong westerly element, however, began to set in over the province on this day, and the cyclonic circulation of winds had broken up, and with a rapid increase of pressure recorded on the 27th and 28th the depression disappeared, and a steady northerly wind current set in over Bengal, producing a rapid fall of temperature on the 28th and 29th, when also the sky rapidly cleared and became almost cloudless, and rainfall became almost absent except for one or two local showers in Orissa. Indeed, from about the 28th up till practically the end of the month the conditions in Bengal were those which characterise the commencement of the cold-weather months.

Again, however, conditions in the Bay became disturbed, and a very large though not intense cyclonic storm was formed, the history of which is given below as detailed in the Bengal Weather Report for the week ending the 3rd of November :—

Large but rather diffused cyclonic storm of October 29th to November 4th.—In the Bay the first indications of an important change occurred on the 29th instant, as pressure fell to the south of Burma and the north-easterly winds blowing at Diamond Island began to strengthen rather rapidly. Indeed, it is probable that a barometric depression or storm was forming on this day close to the Andamans or over the Andaman Sea, or it may be even that a depression was crossing into the Andaman Sea from the Gulf of Siam, as was the case three years ago at precisely this season. On the 30th weather continued practically unchanged in Bengal, where temperature was falling, and the whole province was practically rainless. On the other hand the depression in the Bay had developed into a storm, and pressure had fallen moderately at Diamond Island, where wind velocity had increased up to 38 miles an hour at 8 A.M. of that day. On this day the storm centre was probably to the west of the Andamans, and it had probably already commenced a westerly or west-north-westerly movement. On the 31st of October again fine and almost cloudless weather with falling temperature and a practical absence of rain obtained in Bengal. In the Bay the storm had moved in a west-north-westerly direction with moderate rapidity, and its centre was probably almost in the middle of the Bay and in about Latitude 14° N. Judging by the indications at the coast stations, it was now a severe storm, for though the centre was a long distance from the Burma coast, and at perhaps about 450 miles from Diamond Island, the wind velocity at that station for the 24 hours from 8 A.M. of the 30th to the 31st had averaged the large amount of 32 miles an hour. On 1st November the influence of the storm was beginning to extend to Bengal; cloud proportion and humidity were increasing rapidly; showers were also beginning to fall in the south-eastern districts; winds had become part of a large cyclonic circulation and were easterly and north-easterly, and strong winds were commencing at the head of the Bay, while pressure was beginning to fall rapidly in Orissa. Temperature had also begun to increase rapidly as it always does when disturbed weather commences. In the Bay the storm had again advanced, and its centre was apparently in about Latitude 15° or 16° N. and Longitude 84° or 85° E. It had therefore advanced in a

north-westerly direction instead of in a west-north-westerly direction as on the previous day. It also, as judged by the coast observation, was still a powerful storm, as at Diamond Island which must have been about 650 miles from the centre of the storm, the high average wind velocity of 32 miles an hour was still registered. The storm had thus moved in a more northerly direction than on the previous day, and it appeared as if it might recurve without crossing the west coast of the Bay, and this supposition was strengthened by the fact that from 8 A.M. of the 1st to 8 P.M. on the same day the storm made very little forward progress. It usually happens that, when storms are recurving, their rate of advance becomes very slow, and hence it appeared probable that the storm would subsequently move in a northerly and north-north-easterly direction towards the head of the Bay. From 8 P.M. of the 1st, however, the storm again advanced in a north-westerly direction, and it crossed the coast to the south of Coconada and between that station and Masulipatam about 6 A.M. of the 2nd, and at 8 A.M. its centre was near Rajahmundry. In its passage inland it gave much less violent winds than were to be expected from the most definite indications of strength which had been given in the outside area of the storm, and even on the 2nd, when the storm had crossed the Madras Coast, the wind velocity in Burma at Diamond Island averaged the large amount of 26 miles an hour. Hence it was certainly a very large storm, though it does not appear to have concentrated mainly towards its centre as most October and November storms do. On the 2nd of November the whole of the southern half of Bengal had become largely influenced by the storm, and strong winds forming part of the large cyclonic circulation were blowing at the head of the Bay, and also at some of the inland stations, and indeed the winds over the whole province were affected by the storm. Skies had become almost overcast and rain had also recommenced and was general in all divisions except Bihar and parts of Assam. On the 3rd the storm had again moved away in a north-westerly direction and was rapidly filling up, and on the 4th it had practically disappeared. In Bengal, however, winds continued to form part of the cyclonic circulation, and fairly general rain was still being received over a a large part of the province up till about the 6th instant, when these abnormal conditions were gradually driven back, and from about the 8th ordinary cold season or north-east monsoon conditions set in over Bengal.

Pressure.—Owing to the influence of the two storms and two depressions of the month, of which the two storms and the first depression were formed in the Bay and influenced the weather in Bengal largely, while the second depression formed over the land in the northern districts of the province, the general pressure for the month has been rather largely in defect. The variations have usually been between 0·04″ and 0·05″, but they are largest in the west of the province, and they range up to about 0·06″ at the extreme western stations of Arrah, Buxar, and Dehree, while on the other hand they are smallest in South-East Bengal, where they have equalled about 0·03″, and at Chittogong pressure was in defect by only 0·004.″

In Assam the mean defect for the whole month has been equal to 0·033.″

Temperature.—Owing to the disturbed weather with moist winds and heavily clouded skies which have prevailed to such an unusual extent in October of the present year, the day temperatures have been distinctly below the normal, and defects have been recorded ranging from about 1° in the south and east of the province up to 3° at the western and north-western stations. On the other hand these conditions have given unusually high night or minimum temperatures, and at the great majority of stations the average minimum temperatures for the month have been in excess by from 2° to 3°. Hence the mean temperature for the month has also been in excess, the usual excess equalling about a degree. On the other hand at the extreme western stations owing to the large defect in the day temperatures the mean temperature has been in very slight defect, and the same has been the case in Assam, where the variation of the mean temperature from the normal has shown a defect of 0·1° only.

Rainfall.—The rainfall during October has been unusually heavy, and the general fall over the whole of the province has been 59 per cent. in excess of the normal. This heavy fall has been of course brought about by the effect of the two storms and the two barometric depressions previously described, and by the fact that the monsoon current was influencing the province almost up to the close of the month. The falls in North Bengal, Bihar, Orissa, and Chota Nagpur have equalled from about seven to seven and-a-half inches, while in South-West Bengal and East Bengal the falls have been from four and-a-half to five and-a-half inches. The falls indeed in Chota Nagpur, Bihar, and North Bengal have been from three and-a-half to four inches in excess of the normal. The average numbers of rainy days also in each division have been much larger than the normal, and in such districts as Chota Nagpur, Bihar, and North Bengal, the actual number of rainy days has been about twice as large as usual.

The following table gives a comparison between the actual monthly and total rainfall and the normal rainfall of the province up to the end of October in the same form as has been employed in the previous monthly abstracts of the present year. The figures represent the ratio of the rainfall of each month of the present year to the normal rainfall expressed as a percentage. The table thus gives a condensed summary of the rainfall data of the year for each meteorological division. The first ten columns give the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the end of October:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	Actual rainfall of first ten months of 1894 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	0	55	42	97	58	104	121	89	82	105	93
North Bengal ...	0	64	16	177	83	77	80	111	136	177	102
East Bengal ...	0	87	164	79	70	95	118	112	76	104	98
Bihar ...	3	163	24	98	29	121	108	126	128	213	119
Orissa ...	30	19	27	128	20	137	154	82	69	112	102
Chota Nagpur ...	3	110	4	144	31	149	138	126	86	241	124

It will be seen that excess rainfall has been recorded in all districts, the excess ranging from 141 per cent. in Chota Nagpur and 113 per cent. in Bihar to 4 and 5 per cent. in East and South-West Bengal. The last column of the table also shows that the rainfall for the year has been in excess in all districts, except South-West and East Bengal, where defects of only 7 and 2 per cent. have been recorded.

The following table gives full data for the comparison of the actual and normal rainfall of the month of October in all districts of the province. The figures are obtained in the manner explained in previous monthly summaries. The first column gives the average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the actual weighted rainfall of the month at the reporting stations in the district. The third column expresses the ratio of the actual district rainfall to the normal as a percentage, and the fourth the same information in a slightly different form :—

Percentage Table for October 1894.

Division.	District.	Normal district rainfall for October.	Actual district rainfall for October 1894.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·14
The total fall from 1st January to 17th November 1894	48·58
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·44

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

Explanation.—Summary—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the ...e *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The ... of the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisions, stations for the period in question ...s in the district sending in returns divided by the number of stations. A rainy day is one of which at least a tenth of an inch fell.

for the week ending Saturday, the 17th of November 1894.
